2019 PRODUCT CATALOG

**ANY COMPANY CAN BUILD A CROSSBOW,
ONLY TENPOINT BUILDS
COMPLETE HUNTING SYSTEMS.**

When you purchase a TenPoint, you purchase more than a crossbow. You arm yourself with a complete hunting system engineered to fill your freezer or put one in the record books. With the sole focus of manufacturing crossbows for over 25 years, our family owned business builds the industry's highest quality, most durable, and most accurate hunting crossbows – regardless of your price range.

PATENTED COCKING DEVICES

TenPoint offers several patented cocking devices that allow ALL hunters, regardless of physical ability, to effortlessly draw our crossbows.

TENPOINT COMPLETE HUNTING SYSTEMS

Built from the ground up – every TenPoint crossbow includes several custom accessories specifically engineered to transform your crossbow into a deadly hunting machine.

CUSTOM ENGINEERED SCOPES

All TenPoint crossbows include custom engineered scopes that are built specifically for your crossbow model, leading to pin-point accuracy right out of the box.

IMPECCABLE FIT AND FINISH

From CNC-machined aircraft-grade aluminum to double-dipped camouflage decoration, all TenPoint crossbows are built with impeccable fit and finish.

CUSTOM ALPHA-NOCK

The revolutionary Alpha-Nock™ increases string-to-nock engagement by 28%, resulting in straight nock travel and precision down-range accuracy.

PRECISION ENGINEERED ARROWS

From shaft and insert materials to fletching and nocks, all TenPoint crossbows include custom designed arrows that are built from the ground up. Our arrows are measured for straightness up to +/- .001 and weight-grain sorted up to within 1-grain per pack to deliver match-grade down-range accuracy.

MADE IN AMERICA
MOGADORE, OHIO

Since being founded in 1994, all TenPoint crossbows have been engineered, built and shipped from our Mogadore, Ohio location.

MOA

CUSTOM FIT

Create perfect eye-alignment with the 3-position cheek piece and match your length-of-pull with the 2-position butt plate.

T5 TRIGGER

Designed for hunting, the NEW auto-engaging trigger features a consistent, crisp break.

ACUTORQ

Features a torque control mechanism which eliminates the possibility of over-cranking your ACUdraw PRO™ unit.

25% FLATTER

Industry-leading speed generates flatter arrow trajectory than competing models.

3X QUIETER

Elongated power stroke generates more speed with less draw weight – resulting in a smoother shot with less vibration than competing models.

25% MORE ACCURATE

EVO-X CenterPunch™ Premium Arrows are inspected for straightness to within .001", and weight-grain matched to within 1-grain per arrow.

SUPERIOR BALANCE

Center-mounted riser eliminates the "nose-heavy" feel of traditional crossbows.

DOVETAIL BUBBLE LEVEL

Ensures the crossbow is perfectly level for added accuracy and precise shooting at longer distances.

SILENT COCKING DEVICE

Silently draw your crossbow with only 9-pounds of force using the ACUdraw PRO.

PREMIUM OPTIC

Be a sniper in the woods with our 1.5-6x variable speed EVO-X Marksman™ Scope designed with high quality glass etched reticles and 14x fully multi-coated lenses for precision down-range accuracy.

WHY SHOOT A REVERSE-DRAW CROSSBOW?

SUPERIOR BALANCE:

By shifting the riser from the front of the crossbow to its center, the design provides exceptional balance and eliminates that "nose heavy" feel of traditional crossbows.

PIN-POINT ACCURACY:

The center-balanced design allows a shooter to hold the crossbow steady on the target, with less fatigue, resulting in more accurate off-hand shooting and greater down-range accuracy.

WHISPER-QUIET:

Drawing the string through the riser elongates the power stroke and generates more speed with less draw weight – resulting in less vibration and a shot up to 3x quieter than competing models.

SMOOTHER SHOT:

With less draw weight held at the trigger, a reverse-draw crossbow delivers a smoother shot with less vibration, creating a more desirable shooting experience.

NEW FOR 2019

TURBO M1

The NEW Turbo M1 is the lightest, narrowest, and fastest version in our long line of successful Turbo models. Featuring a radically narrow, 9-inch wide bow assembly, the Turbo M1 sends arrows down-range with pin-point accuracy at lightning speeds up to 380 feet-per-second. The optional ACUdraw PRO silent cocking device makes cocking this crossbow effortless, while the NEW T5 trigger helps separate it from the competition.

PAGE 12

TITAN M1

A remarkable 9.5-inches narrower and 30 feet-per-second faster than the previous best-selling Titan model, the NEW Titan M1 offers an incredible performance-to-value ratio never seen before in the crossbow industry. Measuring an ultra-compact 9-inches wide and shooting up to devastating speeds of 370 feet-per-second, the ultra-light Titan M1 is primed to be one of the top selling crossbows for 2019.

PAGE 13

BLAZER SOFT CROSSBOW CASE

The new Blazer soft case is built with everything you need to protect and transport your crossbow. Lightweight and rugged, it features two external zippered pockets and one internal zippered pocket for accessory storage. In addition, it features two quick-release straps that can be used individually for "sling-style" carrying or together for "backpack-style" carrying. Fits TenPoint's 2019 crossbow line-up.

PAGE 31

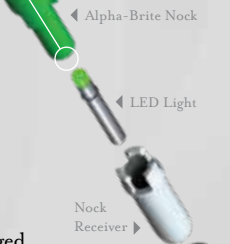

ALPHA-NOCK PAGE 28

The revolutionary Alpha-Nock increases string-to-nock engagement by 28%. The NEW nock features a deep bowstring groove, a large smooth radius base, and elongated ears. The string on TenPoint's extremely narrow crossbows wraps tightly around the center of the Alpha-Nock resulting in straight nock travel and precision down-range accuracy, while minimizing string serving wear. The Alpha-Nock's deep groove "holds" the bowstring in place to prevent "shoot-over" or "shoot-under".

All 2019 TenPoint crossbows are shipped with and require the use of our new Alpha-Nock arrows.

ALPHA-BRITE PAGE 28

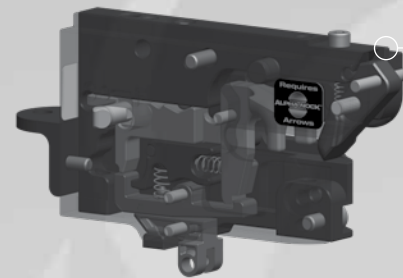

Our crossbows are so fast, you'll need a lighted arrow to track its impact. The new three-piece, Alpha-Brite™ Lighted Nock System consists of a Nock-Receiver insert with a six-sided interior cavity designed to accept a combined LED unit and translucent pegged Alpha-Brite nock.

T5 TRIGGER

A critical component in making our 2019 crossbows the smoothest shooting ever, the T5 Trigger features a new string latch design that reduces friction and delivers a crisp, consistent break shot-after-shot. One of the safest triggers on the market as well, the ambidextrous T5 Trigger features an auto-engaging safety and Dry-Fire-Inhibitor™ (DFI).

*Featured on all 2019 TenPoint crossbows

NEW FOR 2019

NITRO XRT™

Cemented at the top of the food chain, the Nitro XRT is fueled by RX7 cams™ and our Vector Quad™ 4 cable system that generate unprecedented power and nock-breaking accuracy.

Its center-mounted riser eliminates the “nose-heavy” feel of traditional crossbows and produces the smoothest shot on the market. Effortlessly draw the crossbow with the silent ACUdraw PRO and become a sniper in the woods with the EVO-X Marksman Scope.

PERFECTION LIVES HERE.™

STEALTH NXT™

Named the 2018 Crossbow of the Year, the Stealth NXT is our narrowest and most accurate crossbow ever built. The RX6™ Cams rotate 340-degrees to create lightning speed, while the Vector Quad 4 cable system keeps the cams perfectly level to produce match-grade down-range accuracy on a whisper-quiet shot 3x quieter than competing models.

STEALTH NXT –
THE 2018 CROSSBOW OF THE YEAR.
**TENPOINT'S NARROWEST
AND MOST ACCURATE
CROSSBOW EVER.**

In 2018, multiple industry experts ran the most popular crossbow models through rigorous testing procedures. The Stealth NXT's unrivaled combination of width, speed, and accuracy helped it earn top honors in categories such as performance, measurables, function, fit, and finish. With continuous improvements to the Stealth for 2019, it promises to be another banner year for the most decorated TenPoint crossbow to date.

**"TENPOINT PRODUCES SOME OF THE
BEST CROSSBOWS ON THE MARKET,
AND THE STEALTH NXT IS ITS MOST
IMPRESSIVE YET."**

HORTON

CROSSBOW INNOVATIONS

ADRENALINE FUELED.

With bloodlines rooted in the elite quality, durability, and performance TenPoint owners have come to expect, Horton crossbows feature precision-engineered reverse-draw technology designed for superior balance and efficiency to seize your season-defining moment.

1 Patented reverse-draw technology shifts the riser from the front of the crossbow to the center, eliminating the "nose-heavy" feel of traditional crossbows and creating an elongated power stroke for smoother shooting.

2 RDX laminated limbs powered by an efficient Reaper Cam System™ and DynaFLIGHT 97 string and cables generate a quiet, lethal shot.

3 Machined aluminum RDX cams featuring 440 stainless steel bearings improve stability and down-range accuracy.

4 Machined, lightweight aluminum riser and pockets provide added cushioning that reduces limb stress – adding years of performance on your crossbow.

MADE IN AMERICA
MOGADORE, OHIO

VORTEC RDX™

The reverse-draw Vortec RDX is perfectly balanced, leading to more accurate off-hand shooting and reduced fatigue while holding steady on a target. Thanks to a super light draw weight, the Vortec RDX is easy to draw and offers a super smooth, vibration-free shot. Outfitted with or without an integrated cocking device, the Vortec RDX is sold in a ready-to-hunt package that includes an Integrated String Stop System to reduce noise and vibration.

POUND FOR POUND, DOLLAR FOR DOLLAR
THE BEST CROSSBOW VALUE
 ON THE MARKET TODAY.

Designed, engineered, manufactured, and tested right here in America, Wicked Ridge truly embodies all the qualities you've come to expect from a company that pioneered many of the world's finest crossbow technologies. It's a passion for the hunt, a will to succeed, a desire to serve our customers, and a commitment to perfection that makes Wicked Ridge more than just another crossbow company, and ultimately worthy of the TenPoint name.

NEW FOR 2019

RDX₄₀₀
 PAGE 20

RANGER_{X2}
 PAGE 23

SDS™ (STRING DAMPENING SYSTEM)

The NEW Wicked Ridge SDS mounts directly to the riser and dramatically reduces string noise and oscillation. Compatible with the Invader X4, Warrior Ultra-Lite, and Ranger X2.

NEW RDX TECHNOLOGY

FEATURED ON THE RDX 400

- 1** Patented reverse-draw technology shifts the riser from the front of the crossbow to the center, eliminating the "nose-heavy" feel of traditional crossbows and creating an elongated power stroke for smoother shooting.
- 2** RDX laminated limbs powered by the Reaper Cam System and DynaFLIGHT 97 string and cables generate a quiet, lethal shot.
- 3** Machined aluminum RDX cams featuring 440 stainless steel bearings improve stability and down-range accuracy.
- 4** Machined lightweight aluminum riser and pockets provide added cushioning that reduces limb stress – adding years of performance on your crossbow.

FORWARD DRAW TECHNOLOGY

- 1** Open-back design dramatically reduces weight and allows for easy installation of either an ACUdraw or ACUdraw 50 with a quick-install adapter plate. (Except on the Ranger X2.)
- 2** Powered by speed-inspired 4S cams, the bow assembly is incredibly narrow when cocked. Built for pin-point accuracy, its riser and machined aluminum limb pockets are fitted with 11" WRX laminated limbs.
- 3** Fully-integrated pass-thru fore-grip provides protection and comfort and is backed-up with elongated safety wings to help keep the shooter's hand safely below the bowstring release path.
- 4** Ergonomic pistol grip with a fully enclosed trigger guard provides added safety. (Except on the Ranger X2.)
- 5** Built-in Picatinny rail below the front of the barrel for easy mounting of additional accessories. (Except on the Ranger X2.)

HUNT THE RIDGE.™
25

SIX INNOVATIVE COCKING DEVICES

TO MEET YOUR BOWHUNTING NEEDS.

GEAR ASSISTED COCKING DEVICES

USER-FRIENDLY AND PRACTICAL SOLUTIONS FOR COCKING A CROSSBOW EFFORTLESSLY AND ACCURATELY.

Fully integrated into the stock, with no dangling parts, they require only the strength of the average person's index finger to operate. The ACUdraw PRO and ACUdraw allow hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

ACUDRAW PRO

THE FASTEST, LIGHTEST, QUIETEST, AND SAFEST COCKING DEVICE

- ✓ Reduces draw weight to roughly 9-pounds
- ✓ Silent operation
- ✓ Draws most crossbows 43% faster than the ACUdraw model
- ✓ 4-ounces lighter than the ACUdraw model
- ✓ Auto-engage lever activates the gear system immediately as cranking begins
- ✓ Draws the bow accurately every time
- ✓ ACUtorq handle sold separately
- ✓ Available as an accessory or pre-installed on certain models (not for use on pre-2018 Wicked Ridge crossbows)

HCA-001-PRO ACUdraw PRO

ACUDRAW

A TIME-TESTED, PREMIERE COCKING DEVICE

- ✓ Reduces draw weight to about 5-pounds when operated manually
- ✓ Lightweight and has no bulky clamp-on assemblies or hang-on accessories
- ✓ Draws the bow accurately every time
- ✓ Available as an accessory or pre-installed

HCA-000-B-AD ACUdraw

INTEGRATED ROPE-COCKING DEVICES

Fully integrated into the stock, the ACUdraw 50 SLED and ACUdraw 50 have taken the leveraged, 50% reduction rope-cocking concept to an easy-to-use level. Their cord/ropes retract neatly inside the unit's housing after cocking. Lightweight, contoured covers provide improved security of the unit and its cord/ropes when not in use. No storing a cocking rope, untangling it, or putting it away after each use.

- ✓ Draw the bow accurately every time
- ✓ Reduces the draw weight by 50%
- ✓ No longer a need to hang a rope around your neck or to stash it in your fanny pack

- ✓ When not in use, powerful mini-magnets hold the detachable handles securely and silently in place (Each ACUdraw 50 SLED or ACUdraw 50 handle is marked: WARNING: Contains a powerful Neodymium magnet that may interfere with the safe operation of pacemakers or other medical implants.)
- ✓ Available as an accessory or pre-installed

ACUDRAW 50 SLED (PATENTED) MAKES COCKING NARROW CROSSBOWS A BREEZE

The ACUdraw 50 SLED contains a sled with detachable, magnetic handles that is compatible with all TenPoint and Horton crossbows with Functionally Superior Bullpup (FSB) stocks, including ultra-narrow and reverse-draw crossbows (except the Nitro X and Nitro XRT) and most Wicked Ridge crossbows.

HCA-000-A50-S ACUdraw 50 SLED (Not for use on Nitro X or Nitro XRT)

HCA-000-B-A50 ACUdraw 50 (Not for use on ultra-narrow or reverse-draw crossbows)

ACUDRAW 50 (PATENTED) TAKING THE TRADITIONAL ROPE-COCKER TO A HIGHER LEVEL

Compatible with most TenPoint, Horton, and Wicked Ridge crossbows (not compatible with ultra-narrow or reverse-draw crossbows).

RETRACTABLE ROPE-COCKING DEVICES

The ACUsled™ and ACURope™ are revolutionary portable, retractable crossbow rope-cockers that cock a crossbow like traditional rope-cockers on the market today – but that's where the comparison ends. They also reduce the risk of inaccurate cocking that can occur with traditional rope-cockers, and thus, improves a shooter's accuracy.

When the shooter is finished cocking the bow, the ACUsled or ACURope's draw cord completely retracts inside one of the two grips. Then, the grips dovetail neatly together to form a compact unit for easy storage.

The unit's slender draw cords, pound-for-pound, 15-times stronger than steel, are made of heat and abrasion resistant SPECTRA® 1000 fiber.

- ✓ Reduces the draw weight by 50%
- ✓ Clever, convenient, and user-friendly
- ✓ Draws the bow accurately every time
- ✓ Lightweight and affordable
- ✓ No more dangling ropes or handles

ACUSLED

INDUSTRY'S ONLY PORTABLE, FULLY RETRACTABLE, ROPESLED

Compatible with all TenPoint and Horton crossbows with Functionally Superior Bullpup (FSB) stocks, including ultra-narrow and reverse-draw crossbows (except the Nitro X or Nitro XRT) and most Wicked Ridge crossbows.

HCA-000-AS ACUsled (Not for use on Nitro X or Nitro XRT)

HCA-000-B-R ACURope (Not for use on ultra-narrow or reverse-draw crossbows)

ACUROPE (PATENTED)

INDUSTRY'S FIRST COMPACT, FULLY RETRACTABLE ROPE-COCKER

Compatible with most crossbows on the market (not compatible with ultra-narrow or reverse-draw crossbows).

NEW FOR 2019

REVOLUTIONARY ALPHA-NOCK AND ALPHA-BRITE LIGHTED NOCK SYSTEM

DESIGNED FOR INCREASED STRING-TO-NOCK ENGAGEMENT ON EXTREMELY NARROW CROSSBOWS.

TenPoint's Alpha-Nock features a deep bowstring groove, a large smooth radius base, and elongated ears. The string on TenPoint's extremely narrow crossbows wraps tightly around the center of the Alpha-Nock resulting in straight nock travel and precision down-range accuracy, while minimizing string serving wear.

The Alpha-Nock's deep groove and large radius base "holds" the bowstring in place on extremely narrow crossbows to prevent "shoot-over" or "shoot-under".

Large smooth radius
Deep bowstring groove
Elongated ears

LIGHTED NOCK SYSTEM

ALPHA-BRITE LIGHTED NOCK SYSTEM

The three-piece, Alpha-Brite Lighted Nock System begins with a Nock-Receiver insert with a six-sided interior cavity designed to accept a combined LED unit and translucent pegged Alpha-Brite Nock. The Nock Receiver is glued into the nock-end of the arrow and indexed with the vanes.

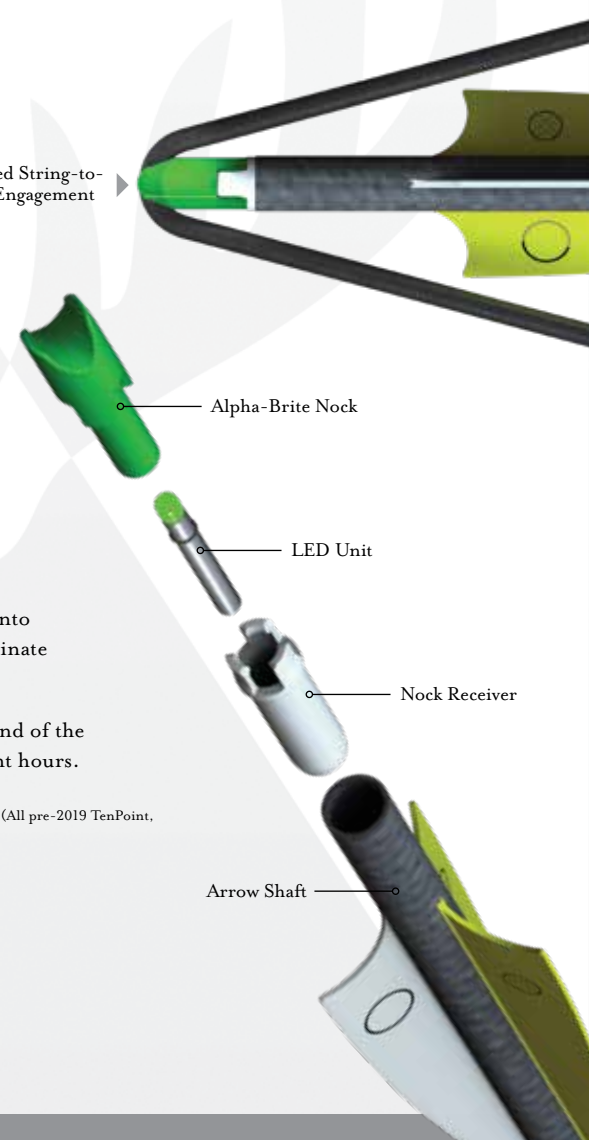

To complete the Alpha-Brite installation, insert the LED unit – lighted end first – into the peg end of the Alpha-Brite nock and insert the nock and LED unit into the Nock Receiver. Then, insert the nock tabs between the receiver's locking clips until you hear/feel it "click" into place. When you fire your crossbow, the bowstring's force will compress the two pieces, eliminate the gap, and activate the LED unit.

To deactivate the Alpha-Brite system, remove the nock and LED unit, and pull the lighted end of the LED unit until the light turns off. The LED unit's battery should last for approximately eight hours.

*All 2019 and newer TenPoint crossbows require the use of an Alpha-Nock Arrow. Failure to do so will void the manufacturer's warranty. (All pre-2019 TenPoint, Horton, and Wicked Ridge crossbows require the use of Omni-Nock or Alpha-Nock Arrows.)

- HEA-358.3 3-pack Alpha-Brite Lighted Nock System (not shown)
- HEA-312.3 3-pack (green LED lite sticks - not shown)

28% Increased String-to-Nock Engagement

Alpha-Brite Nock
LED Unit
Nock Receiver
Arrow Shaft

PATENTED OMNI-NOCK AND PATENT-PENDING OMNI-BRITE 2.0 LIGHTED NOCK SYSTEM

TenPoint's patented Omni-Nock and patent-pending lighted version, the Omni-Brite 2.0 Lighted Nock System features six micro-grooves that form three bowstring channels which eliminate the need to index the arrow.

Some TenPoint and all Horton and Wicked Ridge arrows come pre-installed with either its own colored Omni-Nock or colored receiver and Omni-Nock.

Because the channel "holds" the bowstring in place, the Omni-Nock also prevents flat-nock "shoot-over" or shoot-under".

*Engineered for pre-2019 TenPoint Crossbows and all Horton and Wicked Ridge Crossbows, the Omni-Nock works well on other manufacturers' models with precise and consistent bowstring alignment. Check your manufacturer's arrow specifications.

Micro-grooves form bowstring channels which eliminate the need to index the arrow.

OMNI-BRITE 2.0 LIGHTED NOCK SYSTEM

The three-piece, patent-pending Omni-Brite 2.0 Lighted Nock System begins with a nock receiver insert with a six-sided interior cavity designed to accept a combined LED Unit and translucent pegged Omni-Brite 2.0 Nock. The Nock Receiver glues into the nock-end of the arrow and must be indexed or aligned with the vanes. Like the Omni-Nocks, Nock Receivers employ the same color-scheme and are, therefore, arrow specific.

To complete the Omni-Brite 2.0 installation, insert the LED Unit – lighted end first – into the peg end of the Omni-Brite 2.0 Nock and insert the Nock and LED Unit into the Nock Receiver. Then, insert the nock tabs between the receiver's locking clips until you hear/feel it click into place. When you fire your crossbow, the bowstrings force will compress the two pieces, eliminate the gap, and activate the LED.

To deactivate the Omni-Brite 2.0 System, remove the Nock and LED Unit, and pull the lighted end of the LED Unit until the light is off. The LED Unit's battery should last for approximately eight hours.

*All 3- and 6-packs come with 100-grain field points

EVO-X CENTERPUNCH CARBON ARROW

STANDARD-WEIGHT / 445-GRAINS / BALANCED AT 17% FOC

The most accurate crossbow arrow ever, the CenterPunch 20-inch arrow is fletched slightly offset and is fitted with an 84-grain insert and TenPoint's NEW Alpha-Nock or white SuperBrite Omni-Nock and receiver for quick lighted nock installation. Constructed from modulus carbon fiber at 33 MSI (million-pounds-per-square-inch) and wrapped in an exclusive LAZER-TECH carbon weave, it is fletched with 3.5" Bohning X Vanes™. CenterPunch arrows are inspected for straightness to within .001 and each package is weight-grain matched to within 1-grain per arrow.

- HEA-630.3 3-pack (w/Omni-Nocks)
- HEA-630.6 6-pack (w/Omni-Nocks)
- HEA-630.72 72-pack (w/Omni-Nocks)
- HEA-638.3 3-pack (w/Omni-Brite 2.0 lighted nocks)
- HEA-638.6 6-pack (w/Omni-Brite 2.0 lighted nocks)
- HEA-638.72 72-pack (w/Omni-Brite 2.0 lighted nocks)
- HEA-640.6 6-pack (w/Alpha-Nocks)
- HEA-640.72 72-pack (w/Alpha-Nocks)
- HEA-648.3 3-pack (w/Alpha-Brite lighted nocks)
- HEA-648.72 72-pack (w/Alpha-Brite lighted nocks)

*All 3- and 6-packs come with 100-grain field points

PRO ELITE CARBON ARROW

STANDARD-WEIGHT / 425-GRAINS / BALANCED AT 14% FOC

The Pro Elite 20-inch carbon arrow is fletched slightly offset and is fitted with a 68-grain brass insert, 3.5" Bohning X Vanes™ and TenPoint's NEW Alpha-Nock or neon yellow SuperBrite Omni-Nock and receiver for quick lighted nock installation. Pro Elite shafts are inspected for straightness to within .003 and hand-sorted for weight tolerance to within 2-grains per dozen.

- HEA-002.3 3-pack (w/Omni-Nocks)
- HEA-002.6 6-pack (w/Omni-Nocks)
- HEA-002.72 72-pack (w/Omni-Nocks)
- HEA-038.3 3-pack (w/Omni-Brite 2.0 lighted nocks)
- HEA-038.72 72-pack (w/Omni-Brite 2.0 lighted nocks)

*All 3- and 6-packs come with 100-grain field points

XX75 MAGNUM ALUMINUM ARROW

STANDARD-WEIGHT / 435-GRAINS / BALANCED AT 9% FOC

The XX75 Magnum 20-inch 2219 aluminum arrow is fletched slightly offset and is fitted with a 13-grain aluminum insert, 3.5" Bohning X Vanes™ and TenPoint's neon orange SuperBrite Omni-Nock.

- HEA-722.6 6-pack (w/Omni-Nocks)
- HEA-722.72 72-pack (w/Omni-Nocks)
- HEA-728.3 3-pack (w/Omni-Brite 2.0 lighted nocks)

*All 3- and 6-packs come with 100-grain field points

HORTON CARBON ARROW

STANDARD-WEIGHT / 400-GRAINS / BALANCED AT 14% FOC

The Horton 20-inch carbon arrow is fletched slightly offset and is fitted with a 43-grain aluminum insert, 3.5" Bohning X Vanes™ and TenPoint's neon green SuperBrite Omni-Nock. Horton shafts are inspected for straightness to within .003 and hand-sorted for weight tolerance to within 2-grains per dozen.

- HEA-460.6 6-pack (w/Omni-Nocks)
- HEA-460.72 72-pack (w/Omni-Nocks)
- HEA-428.3 3-pack (w/Omni-Brite 2.0 lighted nocks)

*All 3- and 6-packs come with 100-grain field points

PRO LITE™ CARBON ARROW

LIGHTWEIGHT / 370-GRAINS / BALANCED AT 10.5% FOC

The Pro Lite 20-inch carbon arrow is fletched slightly offset and is fitted with a 25-grain aluminum insert, 3.5" Bohning X Vanes™ and TenPoint's neon green SuperBrite Omni-Nock. Pro Lite shafts are inspected for straightness to within .003 and hand-sorted for weight tolerance to within 2-grains per dozen.

- HEA-201.6 6-pack (w/Omni-Nocks)
- HEA-201.72 72-pack (w/Omni-Nocks)
- HEA-204.3 3-pack (w/Omni-Brite 2.0 lighted nocks)

*All 3- and 6-packs come with 100-grain field points

WICKED RIDGE RANGER™ CARBON ARROW

LIGHTWEIGHT / 350-GRAINS / BALANCED AT 15% FOC

The Ranger 18-inch carbon arrow is fletched slightly offset and is fitted with a 15-grain aluminum insert, 3.5" Bohning X Vanes™ and neon yellow SuperBrite Omni-Nock.

NOTE: the Ranger arrow is for use with Wicked Ridge Ranger models only.

CROSSBOW ACCESSORIES

NEW CENTERPUNCH BROADHEAD

Designed for strength, the NEW 100-grain, rear-deploying EVO-X CenterPunch Broadhead features a collarless design that delivers field point accuracy and a devastating 1 7/8" cut. Its 7075 T6 aluminum ferrule, ultra-strong precision point, and scalpel-sharp blades stay closed during flight – creating massive wound channels and leaving huge blood trails.

HEA-800.3 CenterPunch Broadhead

NEOPRENE SLINGS

Featuring an extra strong 1.25-inch wide shoulder strap, thumb loop, and a non-slip design. Equipped with custom swivels and heavy-duty adjustable strap.

HCA-004 TenPoint
HCA-00415-H Horton
WRA004 Wicked Ridge

NEW ULTRA-NARROW BLAZER SOFT CASE

Designed for optimal protection and durability, the new Blazer soft case is built with everything you need to protect and transport your crossbow. Lightweight and rugged, the water-resistant case features a foam-padded interior with a hook and loop strap to secure the crossbow during travel, as well as two external zippered pockets and one internal zippered pocket for accessory storage. Its side-mounted rubber grip handle and top nylon handle provide easy transportation and storage. In addition, the case features two padded quick-release straps that can be used individually for "sling-style" carrying or together for "backpack style" carrying, as well as Molle straps on the exterior pockets and backpack straps allow hunters and shooters to attach additional accessories.

HCA-20119 Blazer Soft Case / Black / Fits all of TenPoint's 2019 crossbow line-up

DIMENSIONS: Case Length: 40.5" / Case Width: 18.5" / Case Depth: 10.75"

SOFT CASES

These ultra-durable soft cases ensure protection needed for travel and/or storage of your crossbow. They contain deep, sturdy side panels to accommodate mounted optics, zippered compartment for accessories, and a shoulder strap.

HCA-20016-T TenPoint Embroidered Soft Case / Black / Fits all TenPoint crossbows
HCA-20015-H Horton Embroidered Soft Case / Black / Fits all Horton crossbows
WRA200 Wicked Ridge Embroidered Soft Case / Camo / Fits most Wicked Ridge crossbows (except RDX 400)

CROSSBOW CASES

HARD CASES

Designed for maximum protection and durability, these rigid, water-resistant cases feature an extremely durable shell, as well as a velvet interior for added protection. The interior of the case includes two hook and loop straps to secure the crossbow during travel, and storage for a quiver that also includes straps. An integrated stirrup pass-thru with storm flap allows you to hang the crossbow, in the case, for easy storage. If used with TSA approved locks, the case is TSA compliant.

HCA-20318 TenPoint STAG Case: Black / Fits all of TenPoint's 2019 crossbow line-up

DIMENSIONS: Case Length: 36.75" (not including foot stirrup pass-thru) / Case Width: 18" / Case Depth: 10.75" / Interior Length: 36.25" / Interior Width: 17.5" / Interior Depth: 10.25"

HCA-20018 EVO-X Hammerhead™ Case: Black / Fits most forward & reverse-draw crossbows

DIMENSIONS: Case Length: 36.75" (not including foot stirrup pass-thru) / Case Width: 27.5" / Case Depth: 10.75" / Interior Length: 36.25" / Interior Width: 27" / Interior Depth: 10.25"

STEDDYEDDY® (PATENTED)

The SteadyEddy telescoping two-section monopod ensures motion-free shooting while seated or standing. It attaches directly to your crossbow using a 360-degree maneuverable rapid-pivot tube equipped with a snap-on connection and clamps under your stock when not in use. Comes with a cushioned hand grip, a carbide tip that grips rock and ice, and a removable rubber support ball.

HCA-030 SteadyEddy Crossbow Monopod System (compatible with TenPoint, Horton Crossbow Innovations, and Wicked Ridge crossbows)

HCA-031 SteadyEddy Rapid-Pivot Retrofit Kit (not shown)

MAINTENANCE

TENPOINT STRING WAX AND CONDITIONER

Made from all natural compounds. Comes in a convenient chap-stick style tube. Lubricates and rejuvenates bow strings and cables.

FLIGHT RAIL AND TRIGGER LUBE

Unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit.

HCA-11007 TenPoint String Wax and Conditioner
HCA-111 Flight Rail and Trigger Lube
(Contains Scorpion Venom™ Premium Lubricant)

SILENCERS

Private labeled exclusively for TenPoint by Bowjax, Inc. the Noise Dampening packages progressively reduce decibel level and shorten noise duration when used on compound crossbows and/or vertical bows. Two versions are available.

HCA-13617 Noise Dampening Package – for crossbows with limb gap of 11/16" – 1 3/8" (Includes limb vibration dampeners, a retention spring dampener, foot stirrup dampeners, and barrel dampeners)

HCA-13718 Universal Limb and Foot Stirrup Silencing Package – Limb & foot stirrup dampeners only, for most compound crossbows and/or vertical bows

SDS™ (STRING DAMPENING SYSTEM) (PATENTED)

Featuring micro-adjustable dampening rods with durable, high impact rubber dampeners the SDS mounts in the cable slot to dramatically reduce string noise and oscillation.

HCA-148

NEW HCA-148 SDS (String Dampening System) Compatible with most post-1999 TenPoint Crossbow Technologies thumbhole models except the GT Curve™. Also compatible with most pre-2015 Wicked Ridge crossbows, all Raider CLS™ and Warrior HL™ models, and Horton Legend Ultra Lite™ crossbows. Not compatible with RDX or NXT crossbows, RCX crossbows with built-in dampeners, Wicked Ridge Invader X4, Invader G3™, Warrior Ultra-Lite, Warrior G3™, Ranger™ or Lady Ranger™ models.

HCA-146

NEW HCA-146 Wicked Ridge SDS (String Dampening System) Compatible with the Invader X4, Warrior Ultra-Lite and Ranger X2.

SCOPES

EVO-X MARKSMAN™ SCOPE

The most accurate crossbow scope on the market, the Marksman Scope features a patented, variable speed locking ring for crossbows that shoot between 330 and 450 FPS, as well as fully multi-coated 1.5-6x optics.

Its configuration consists of five illuminated duplex crosshairs calibrated for 10-yard increments between 20- and 60-yards, and two non-illuminated duplex crosshairs at 70- and 80-yards for competition and recreational shooting. The scope is outfitted with quick-detach scope rings, a bubble level, and high-quality flip-up scope caps. An infinite-position rheostat controls the light intensity of the red and green illuminated crosshairs.

HCA-095 Marksman Scope with 7/8" mounting rings and flip-up scope caps

RANGEMASTER® PRO SCOPE

This 8.25-inch aluminum scope features a variable speed and arrow drop-compensation setting for crossbows that shoot between 275 and 425 fps, and requires no adjustment for distance.

Three duplex crosshairs and five dots calibrated for 20-, 30-, 40-, 50- and 60-yards (fourth and fifth dots are free-standing, just below the 40-yard crosshair) are available with a non-illuminated black dot or one of two rheostat controlled illuminated, colored dots (red or green). An etched glass reticle and fully multi-coated 1.5 to 5x optics reduce the loss of light transmission, while a 30mm tube heightens light-gathering and durability.

HCA-09811 RangeMaster Pro Scope with 7/8" mounting rings and flip-up scope caps

3X PRO-VIEW 3™ SCOPE

Calibrated for crossbows that shoot in the 350 fps range, this lightweight 8.5-inch aluminum tube scope features 3 crosshairs and four dots calibrated for 20-, 30-, 40-, and 50-yards (fourth dot is free-standing, just below the 40-yard crosshair) and fully-coated 3x optics. Available with non-illuminated black dots or one of two rheostat controlled illuminated, colored dots (red or green).

HCA-097-11 3x Pro-View 3 Scope with 7/8" mounting rings

MULTI-LINE SCOPE

Only 8.5-inches long, this compact scope features fully coated 3x optics and three duplex crosshairs calibrated for 20-, 30-, and 40-yards and a fourth partial line for 50-yard shots. Scope mounting rings included.

HCA-088 Multi-Line Scope with 7/8" mounting rings

MISCELLANEOUS

DOVETAIL BUBBLE LEVEL

The bubble level can be attached to any weaver-style dovetail to provide added accuracy, especially at longer distances.

NEW HCA-073 Dovetail Bubble Level

GRIPGUARD™ (PATENTED)

The GripGuard is a shield that custom fits over post-1999 through 2013 TenPoint synthetic stock model fore-grips with or without a GripSafety™. The wings at the top of the shield help prevent a shooter's fore-grip fingers and/or thumb from dangerously migrating above the flight deck while shooting the crossbow.

* Available at no charge, contact Customer Service at 330-628-9245 option 2.

HCA-10014 Molded GripGuard / black

BEDNAR PERFECT PULLER® (PATENTED)

Named for and originally developed by the late Hall of Fame Archer Bill Bednar, this tool is designed to pull arrows from high density targets. Includes three interchangeable grippers sized to fit different shaft diameters of both crossbow and compound arrows. In addition, the hunter orange handles are notched to create a built in nock tool.

HCA-104 Bednar Perfect Puller (with interchangeable grippers)

ROPE-SLED™

TenPoint's narrow sled fits/works on all TenPoint and Horton crossbows with Functionally Superior Bullpup (FSB) stocks, including ultra-narrow and reverse-draw crossbows (except the Nitro XRT or Nitro X) and most Wicked Ridge crossbows, reducing the cocking effort by 50%.

HCA-000-RS Rope-Sled

ROPE-COCKER

This ultra-durable crossbow rope-cocker features an abrasion-resistant, high tenacity polyester cord, custom dyed in high-visibility hunter orange.

WRA000.B Rope-Cocker

ACUTORQ HANDLE™

The ACUtorq handle employs a unique torque control mechanism that eliminates the possibility of over-cranking any ACUdraw unit once the crossbow is cocked, reducing the chance of damaging the unit. Its sleek design allows storage in stocks that currently have a storage cavity already cutout. Compatible with all previous ACUdraw cocking devices.

HCA-445-ACU ACUtorq Handle – For most crossbows with original ACUdraw units except TenPoint Nitro XRT, Nitro X, Stealth NXT, and Shadow NXT (red cap on handle)

HCA-445 PRO ACUtorq Handle – For crossbows with ACUdraw PRO units (black cap on handle)

ACUDRAW/ACUDRAW 50/ACU-52 REPLACEMENT ACCESSORIES

Visit www.tenpointcrossbows.com to find cocking device replacement parts.

WARRANTY

MADE IN AMERICA
MOGADORE, OHIO

We design, build, and test our crossbows here in the U.S.A. Doing so enables us to control the process and to use the best parts and materials available, thereby guaranteeing a final product of uncompromising quality.

Our rigorous testing standards have earned us a reputation for making some of the most durable and dependable products on the market. We validate all of our designs through a prototyping process that combines hands-on testing with automated cycle testing.

Our automated shooting simulator allows us to put thousands of shots on our bow assembly designs in a matter of days — so when the final product arrives on the shelves, it will meet your expectations.
