defining the future of crossbows

...the mark of perfection™

Welcome to the Cutting Edge ...

THE MAN BEHIND THE TECHNOLOGY

Craftsman, inventor, self-taught machinist and world-champion archer, Bill Bednar, more than anyone at Hunter's, is responsible for the reputation the company is earning as the innovator and technological leader among crossbow manufacturers.

Bill's son, Rick, runs the company. His oldest daughter, Cindy, is the office manager, and his youngest daughter, Joanna, keeps the books. Bill's wife, Edith, works part-time helping pay the bills and, like any good mother and wife, makes certain her family maintains its balance in an oftentimes stressful business.

Bill, on the other hand, is officially retired — although you would never know it. There have been few days since Hunter's Manufacturing, Inc. opened its doors in January, 1994, that you would not have been able to find Bill working on a new idea — or refining an old one — in his small machine shop located in a far corner of the factory.

Hunter's crossbow patents, and its pending patents are Bill Bednar inventions. As technical problems have surfaced, Bill has led the way to their solutions. And, as ideas for product improvements have come up, Bill has been the one to develop, build, test, and refine the prototypes. His insatiable curiosity and steadfast determination to find the perfect bow and to make the perfect shot has made him one of the archery world's foremost technical experts.

He came by his expertise honestly. After Edith bought him a recurve bow for Christmas in 1958, he did not waste any time learning how to shoot it. By 1960, he had won *The Ohio State Amateur Championship* and went on to win 13 Ohio State Outdoor and Indoor titles and three *Ohio State Field Championships*.

He was a member of the 1961 U.S. World Championship Team and he was the *Professional National Champ* in 1963, 1965 and 1966. And, he won the *Ben Pearson Open Championship* in 1964.

Since 1987, Bill has been shooting compound bows and crossbows. In both 1989 and 1991, he was a member of the National Crossbow Senior Team, and since 1987, he has won six *Gold Medals* shooting his compound bow in the Senior Olympics.

As you look through this catalog and come to appreciate the commitment to technical superiority that has become the hallmark of Hunter's crossbows, there is a good chance Bill Bednar is in his shop — leaning over his Bridgeport — working on an idea or two to make them better.

CORE PERFORMANCE FEATURES

When it comes to crossbow technology, Hunter's Manufacturing is on the cutting edge — leading the way & defining the future.*

All Hunter's Manufacturing crossbows carry a **Limited Lifetime Operational Warranty**. That means the only reason you will ever have to buy another Hunter's crossbow, is if you just can't stop yourself.

And... you can be certain that no matter which model you select, you are assured of its accuracy, dependability, and overall performance; because every Hunter's crossbow is made with the following **core performance features**: [see centerfold for descriptions]

- | | |
|----------------------------------|---------------------------------------|
| ♦ Patented VIBRA-CUSH™ | ♦ ACRA-ANGLE™ Barrel |
| ♦ Patented PowerTouch™ Trigger | ♦ CLAWOVER™ String Catch |
| ♦ Patented DFI™ | ♦ FST™ Stock |
| ♦ CNC Machined Components | ♦ Ambidextrous Safety |
| ♦ Tunable Synthetic Yoked Cables | ♦ Rubber-Coated Aluminum Foot Stirrup |
| ♦ Pre-Sighted at factory | ♦ Power Limb-Tip Caps |

No Matter Which Hunter's Crossbow You Select, You'll Have A Lifetime Investment in Performance and Quality.

*A number of our innovative designs and features are licensed to other crossbow manufacturers.

The Unparalleled Leaders ...

THE TURBO EXTREME™ & THE MAGNUM EXTREME™

Introduced in '97, these two Hunter's models have set the standard by which all other crossbows are measured.

- ♦ Film-dipped in **Realtree® X-tra Brown™** camo.
- ♦ Powered by Hunter's **ST™ limbs** — recognized as the best crossbow limbs made today — they are quieter and faster, produce less recoil, and are more reliable than traditional solid limb models. Mounted in pivoting limb pockets, you can easily reduce the draw weight by as much as 40 lbs. lower than the factory-strung weights.
- ♦ All machined components are hard-coated to an incredibly durable **60+ Rockwell bronze finish** and then **impregnated with Teflon®** to create nearly friction-free surfaces.
- ♦ Available with the quality-crafted **Millett 30mm Illuminated Red Dot Scope (HCA-083)** or with our **Rear Peep (HCA-060)** and **new MicroSlide™ Front Sight (HCA-043)** combination.

- ♦ Includes Hunter's improved **"targetized" RangeMaster™ Rear Scope Adjustment Mechanism (HCA-068)** with its tension adjusting setscrew and its new lock-down thumbscrew. This allows you to lock your scope at the yardage you select — or to immobilize it — and to regulate the "feel" or tension of the mechanism. Select your yardage by a simple click of the thumb lever without ever taking your eye off your scope.
- ♦ The extreme version of our **PowerTouch™** patented trigger includes an **adjustable trigger-travel feature**, so you can set the travel for different shooting circumstances. For example, you may want short travel for target shooting and long travel for hunting with gloves.

HCB-009

275+ fps.

The **TURBO Extreme™** has a 150 lb. draw weight and shoots a 2219, 20" arrow with a 125 gr. field point or broadhead in excess of **275+ fps.** Also available with scope (HCB-009-S).

HCB-005-S

285+ fps.

The **MAGNUM Extreme™** has a 165 lb. draw weight and shoots a 2219, 20" arrow with a 125 gr. field point or broadhead in excess of **285+ fps.** Also available without scope (HCB-005).

A New Look & More Power for '98

THE HUNTMASTER™ & THE 458 MAGNUM™

This year, Hunter's powerful new front end makes these models perform better. And the new camo makes them better looking.

- ◆ Film-dipped in Mossy Oak® BREAK-UP™ for '98.
- ◆ Powered by Hunter's new TL-4™ limbs. Producing less recoil, TL-4's are quieter, faster, and more reliable than traditional solid-limb designs. TL-4 limbs are mounted in pivoting limb pockets, allowing you to reduce the draw weight by as much as 40 lbs. lower than the preset factory weight.
- ◆ Black anodized finish on machined aluminum components.
- ◆ Available with our 4-power x 1" Mini Scope (HCA-085) or with our Rear Peep (HCA-060) and Standard Front Sight (HCA-041) combination.
- ◆ Includes Hunter's improved "targetized" RangeMaster™ Rear Scope Adjustment Mechanism (HCA-068) with its tension adjusting setscrew and its new lock-down thumbscrew. This allows you to lock your scope at the yardage you select — or to immobilize it — and to regulate the "feel" or tension of the mechanism. Select your yardage by a simple click of the thumb lever without ever taking your eye off your scope.

HCB-013

265+
fps.

The HuntMaster™ has a 150 lb. draw weight and shoots a 2219, 20" arrow with a 125 gr. field point or broadhead in excess of 265+ fps. Also available with scope (HCB-013-S).

HCB-003-S

280+
fps.

The 458 MAGNUM™ has a 165 lb. draw weight and shoots a 2219, 20" arrow with a 125 gr. field point or broadhead in excess of 280+ fps. Also available without scope (HCB-003).

Two Value-Priced Performance Giants ...

New for '98

THE WOODSMAN™

The WoodsMan™ combines the advantages of four-limb technology with Hunter's powerful core performance features to create a value-priced crossbow that outperforms other manufacturers' top-of-the-line models.

- ◆ A new riser configuration features non-pivoting and non-adjustable machined limb-pockets for dependable alignment, accuracy, and stability.*
- ◆ Equipped with steel cables fitted with tunable synthetic yokes.
- ◆ Powered by Hunter's new TL-4™ limbs, film-dipped in Mossy Oak® BREAK-UP™ camo. Producing less recoil, TL-4's are quieter, faster, and more reliable than traditional solid-limb designs.
- ◆ Features a non-adjustable 3/8" dovetail scope mount machined into our patented PowerTouch™ trigger assembly. As an option, you can slip our new heavy-duty 7/8" SlideMount™ (HCA-078) dovetail over the fixed mount for larger Weaver-style scopes.
- ◆ The FST™ stock features a new, sleek and stealthy matte-black finish.
- ◆ Equipped with a single-pin Standard Front Sight (HCA-041) and Hunter's adjustable Rear Peep (HCA-060).
- ◆ The WoodsMan™ has a 150 lb. draw weight and generates speeds in excess of 260+ fps using a 2219, 20" arrow with a 125 gr. field point.

260+
fps.

HCB-021

*Must use a bowpress to change strings and cables.

THE HUNTSMAN™

Already the proven performance leader in its class, the '98 HuntsMan™ features some exciting modifications, which will overpower the competition.

- ◆ The HuntsMan's traditional steel cables are now fitted with tunable synthetic yokes.
- ◆ The HuntsMan's traditional solid limb is now film dipped in Realtree® X-tra Brown™ camo. The limbs are mounted in pivoting limb pockets, which allow you to reduce the draw weight, by as much as 40 lbs. lower than the preset factory weight.
- ◆ In response to consumer demand, we have integrated a non-adjustable 3/8" dovetail scope mount into our patented Power-Touch™ trigger assembly for the HuntsMan. As an option you can slip our new heavy-duty 7/8" SlideMount™ (HCA-078) dovetail over the fixed mount for large Weaver-style scopes.
- ◆ The FST™ stock features our new, sleek and stealthy matte-black finish.
- ◆ Our Standard Front Sight (HCA-041) with one pin, accompanied by our adjustable Rear Peep (HCA-060), is standard on all HuntsMan crossbows.
- ◆ The HuntsMan™ has a 150 lb. draw weight and generates speeds in excess of 250+ fps using a 2219, 20" arrow with a 125 gr. field point.

250+
fps.

HCB-020

If Looks Could Kill ...

Hunter's crossbows combine the ultimate in design, performance, and technology with killer good looks — a lethal combination.

CORE PERFORMANCE
BUILT WITH
QUALITY
FEATURES

First introduced
by or exclusive
to Hunter's
Manufacturing
Company.

1. Lightweight aluminum foot stirrup with new sound-reducing rubber coating.
2. **New** lightweight, thin-line machined aluminum pivoting limb pockets allow you to lower the draw weight by as much as 40 lbs., using Hunter's Poundage Conversion Kit (HCA087). Perfect for those who prefer or need lower draw weight. *Note: WoodsMan™ limb pockets are non-adjustable and non-pivoting for '98.*
3. VIBRA-CUSH™ patented bow-to-barrel mounting system. Dramatically reduces vibration and noise level, making Hunter's crossbows the quietest on the market.
4. **New** lightweight machined aluminum riser cut to exacting tolerances. Includes locking setscrew system for the main assembly bolt and limb bolts. Hunter's bow assemblies do not loosen with vibration.
5. ST™ Limb System. Available only on our two Extreme™ crossbow models. Incredibly smooth and reliable, this unique four-limb design reduces recoil and noise while its powerful stroke delivers superior speed and kinetic energy.
6. Power Limb-Tip Caps™. Provide unmatched strength and improved performance to All Hunter's limbs.
7. Precision-machined aluminum wheels.
8. Synthetic cable yokes for the ultimate in tunability and stability.

9. ACRA-ANGLE™ Barrel. Extruded aluminum design features angled sides to prevent finger injury and insure accurate cocking. Hunter's two Extreme™ model barrels are hard-coated to a 60+ Rockwell finish and Teflon® impregnated to reduce string friction and increase speed.
10. ACRA-ARROW™ Retention Spring. Extra long to insure stable arrow flight. Tip is coated with Polyolefin™ to eliminate vibration noise.
11. DFI™ System. Patented Dry-fire Inhibitor prevents a dry-fire when the crossbow is not loaded.
12. CLAWOVER™ String Catch, releases from above the string rather than from below, like most crossbows. Allows the string to travel the flight deck vibration-free, insuring stable, accurate arrow flight.
13. Ambidextrous safety. Automatically moves from "fire" to "safe" when you cock the crossbow.
14. PowerTouch™ Patented Trigger. Precision machined to exacting standards. With its 3-1/2 lb. pull, it is recognized by many as the finest crossbow trigger made today. Hunter's two Extreme™ model crossbows also include an adjustable trigger-travel feature, allowing you to set the travel to fit the situation. Short travel for target shooting, long travel for hunting with gloves.
15. FST™ Stock. This functionally-superior thumbhole design is large enough to accommodate gloved hands and ergonomically contoured to allow your thumb and wrist to "find" their most comfortable and stable shooting position. The pistol grip's palm swell adds further stability and comfort.

16. ACUdraw™ Integrated Automated Cocking Unit (patent pending). When operated by a hand crank, the ACUdraw converts the crossbow's draw weight to a mere 5 lbs., making crossbow hunting accessible to anyone who cannot draw 150 or 165 lbs. It also assures an accurate draw every time. Available as a stock option on all models except the HuntsMan and WoodsMan, the ACUdraw™ can be special-ordered and can be retrofitted to any Hunter's crossbow.
17. Thumb-Operated RangeMaster™ Scope Adjustment Mechanism. By simply moving the thumb-operated lever from one position to another, you can adjust your yardage without taking your eye off the scope. **New, improved design.** Now features a new dual-tension adjustment setscrew and lock down thumbscrew system. The RangeMaster system is not included in the HuntsMan™ and WoodsMan™ model crossbows' new non-adjustable scope mount design.
18. Millett® Illuminated Red Dot Scope. Available as an accessory or as a stock option on our two Extreme™ model crossbows. The world's finest scope and crossbow combination (pre-sighted at factory). Crossbows ordered without scopes come equipped with a rear peep and front sight combination.

19. Machined Aluminum 3/8" Dovetail Scope Mount. Integrated to work with the RangeMaster Rear Scope Adjustment Mechanism. Includes an adjustment screw to regulate the dovetail elevation angle. An optional 7/8" dovetail (Weaver style) mount is also available as an accessory (HCA077). The HuntsMan and WoodsMan crossbows have a non-adjustable 3/8" scope mount that accepts our new optional SlideMount™ (HCA078), or a slide-on 7/8" Weaver-style mount.
20. Hunter's Turbo EX™ arrow. Our XX78, 2219, 20" Easton Aluminum shaft, the strongest and straightest aluminum shaft made today. Hunter's also carries the proven XX75 alloy version of the same shaft and the 2315, XX75, 458 Series arrow. Hunter's is an Easton Complete Crossbow Arrow Resource.
21. NAP's Thunderhead™ 125 Broadhead. Our tests have shown New Archery Product's Thunderhead™ to be extremely reliable and accurate, so we do not hesitate to recommend it.

Note: All of the Extreme™ model crossbow wheels, barrels, limb pockets, risers and trigger boxes are both hard-coated to a 60+ Rockwell finish for durability and Teflon®-impregnated to minimize friction.

The products listed in this catalog may be covered under the following
Hunter's Manufacturing Company patents and any patents pending:
U.S. Patent Nos. 5,649,520 5,598,829 and 5,553,596

Making Bowhunting Accessible ...

THE ACUDRAW™

PAT. PEND.

The world's only integrated automated cocking unit makes crossbow hunting safer and more accessible. It also insures an accurate and precise draw every time. Can be installed in any Hunter's crossbow.

IMPROVED FOR 1998

Based on Customer Suggestions

- Reduces draw weight to about 5 lbs. when operated manually
- Draws the bow perfectly every time
- Whisper-quiet manual crank or power-up with almost any cordless screwdriver or drill (4.2 volts or more)
- Weights just over one pound with no bulky clamp-on or hang-on accessories
- Comes with instructional video

The ACUdraw™ is stocked in four Hunter's crossbow models

Take to the Woods Prepared ...

ACCESSORIES

SLINGS:

- HCA-002 Deluxe Black Crossbow Sling w/swivels (not pictured)
- HCA-007 Deluxe Realtree® X-tra Brown™ Sling w/swivels
- HCA-008 Deluxe Mossy Oak® BREAK-UP™ Sling w/swivels

New for '98, the Deluxe Slings, shown in Realtree® X-tra Brown™ and Mossy Oak® BREAK-UP™, are unparalleled in quality and construction. They feature a longer design with non-slip, double-thick reinforced shoulder pads and heavy-duty adjustable nylon straps (swivels included).

QUIVERS:

- HCA-016 Instant Detach 4-Arrow Front Mount Black Quiver (not pictured)
- HCA-017 Instant Detach 4-Arrow Front Mount Realtree® X-tra Brown™ Quiver

The successor to our very popular Flipper™ Quiver, this new Instant Detach design is quiet and easy to use. Snap it on and turn the lock-down screws to secure it. Only shown in X-tra Brown™ camo, it is also available in black.

- HCA-020 5-Arrow Side-Mount Black Quiver
- HCA-022 5-Arrow Side-Mount Realtree® X-tra Brown™ Quiver (not pictured)

Shown only in black above, our traditional, popular 5-Arrow Side-Mount Quiver is now also available in Realtree® X-tra Brown™ camo.

CROSSBOW CASES:

- HCA-200 Deluxe 2-Pocket Realtree® X-tra Brown™ Case
- HCA-201 Deluxe 2-Pocket Mossy Oak® BREAK-UP™ Case
- HCA-205 Standard Realtree® X-tra Brown™ Case (not pictured)
- HCA-206 Standard Mossy Oak® BREAK-UP™ Case (not pictured)

(Pictured in the Deluxe 2-Pocket model only, they are available in Realtree® X-tra Brown™ or Mossy Oak® BREAK-UP™ camo patterns. Check your state regulations. Some states require crossbows to be transported in cases.)

SCOPES:

- HCA-083 30mm MILLETT™ Red Dot Scope w/rings

Hunter's has partnered with Millett™ to bring you the best value in an illuminated red dot scope on the market today. With eleven brightness settings and its all-aluminum construction, this zero-power scope comes with a tube extension lens shade and 3/8" mounting rings. Delivers pinpoint accuracy in all light conditions.

- HCA-085 4-Power x 1" Mini Crossbow Scope w/rings

Perfectly proportioned at only 7" long, this light, compact scope features fully coated optics, duplex cross hairs, and all-aluminum construction. An exceptional value, it comes with 3/8" base scope-mount rings.

SIGHTS:

- HCA-041 Standard Front Sight w/Pin (Black Finish)

Standard on all TL-4™ crossbows and the HuntsMan™, this sturdy, rust-resistant machined aluminum sight bracket features two pin slots and can be mounted on either side of the riser. Comes standard with one pin.

- HCA-043 MicroSlide™ Front Sight w/Pins (Hard-coated Finish)

New for '98, the machined aluminum MicroSlide™ features a single slot with a slope design that allows multiple pins to align in close vertical proximity to each other.

Developed just for our powerful shooting Extreme™ model crossbows and their ultra-flat trajectories.

TARGETS

- HCA-095 Field Point Practice Target w/stand

Large 25" x 25" surface makes the durable practice target perfect for any arrows using practice points. Remove arrows effortlessly!

- HCA-100 Broadhead Practice Target

This large ethafoam target with 6# density provides optimum stopping power for field points or broadheads. The perfect target to evaluate your broadhead grouping before heading to the woods.

CROSSBOW PRESS

- HCA-106 Portable Crossbow Press

Easy to use, the Portable Crossbow Press is the perfect, cost-effective device for owners who choose to do their own crossbow maintenance, tuning and repair.

TRIGGER ASSEMBLY

- HCA-500 3/8" Fixed Mount PowerTouch™ Trigger Assembly (black finish)

New for '98 and a standard feature on our HuntsMan™ and WoodsMan™ crossbows, this non-adjustable 3/8" dovetail scope-mount version of our patented PowerTouch™ trigger can be purchased as an option by those who prefer a nonadjustable scope mount. It is designed to accept Hunter's new 7/8" SlideMount™ dovetail for those who want a Weaver-style mount.

STRINGS & CABLES

- HCA-115 HuntMaster™ & Extreme™ Bows' Replacement String
- HCA-117 HuntsMan™ Replacement String
- HCA-119 458 Magnum™ Replacement String
- HCA-120 HuntMaster™ Replacement Cables w/o yokes
- HCA-122 HuntMaster™ Replacement Cables w/yokes
- HCA-125 Huntsman™ Cables w/o yokes
- HCA-126 Huntsman™ Cables w/yokes
- HCA-124 458 Magnum™ & Extreme™ Bow Cables

ACUDRAW™

- HCA-088 Replacement Hand Crank
- HCA-089 Replacement Crank Holder
- HCA-400 Replacement Draw Cords (Pre-'98)
- HCA-401 Replacement Draw Cords (Post-'98)
- HCA-410 Replacement Power Spring (Pre-'98)
- HCA-411 Replacement Power Spring (Post-'98)
- HCA-420 Replacement Draw Claw (Pre-'98)
- HCA-421 Replacement Draw Claw (Post-'98)

SIGHTING ACCESSORIES

- HCA-086 RangeMaster™ Scope Adjustment Mechanism
- HCA-050 MicroSlide™ or Standard Sight Pin
- HCA-060 Rear Peep Sight 3/8" base
- HCA-075 3/8" Dovetail Scope Mount
- HCA-077 7/8" Dovetail Scope Mount
- HCA-078 SlideMount™ 7/8" Dovetail Scope Mount
- HCA-082 30mm Scope Rings for 3/8" Dovetail
- HCA-092 30mm Scope Rings for 7/8" Dovetail

SHOOTING AIDS

- HCA-111 Flight Groove & Trigger Lube
- HCA-110 String & Cable Wax
- HCA-087 Poundage Conversion Kit
- HCA-113 Standard Cable Saver
- HCA-114 Extreme™ Cable Saver
- HEA-300 Thunderhead™ 125 Broadhead (6-pack)

CROSSBOW ARROWS

As Easton Aluminum's Complete Crossbow Arrow Resource, Hunter's Manufacturing combines the art and tradition of hand-fletched arrows with the unparalleled quality of Easton shafts and accessories to produce the highest quality crossbow arrows made in the world.

Choose from three Hunter's Arrow models:

- XX75 Hunter's Camo 20", 2219 with SuperBrite™ Neon polymer blunt ends. The proven industry standard for absolutely reliable results.
- XX75 458 Series™ 20", 2315 with aluminum blunt ends. With a bit less weight and a bit more diameter, the choice of many looking for less weight and more velocity.
- XX78 TURBO EX 20", 2219 with SuperBrite™ Neon polymer blunt ends. A super-strong, super-straight arrow in Easton's best alloy. Finished in Hunter's three-color camo.

Hunter's also makes crossbow arrows for other manufacturer's models:

- Bear/Jennings
- Moon Nocks
- PSE: old & new
- All manufacturers using 20" arrows with blunt ends

The photos shown are typical of ones we regularly receive from our customers and staff shooters. Usually, they also send along interesting letters or notes, giving us all the details about their hunts.

To be honest, it is not uncommon for them to also offer praise about the way their crossbows performed at the moment of truth. And, it is also not uncommon for them to suggest new products or ways to make our existing products better.

Our customers' suggestions are what have given us the ideas and the impetus to become the innovator and the technological leader within our industry.

So, we thank our customers and encourage them to keep sending the pictures and to keep challenging us to make a better crossbow.
