# What makes TenPoint® crossbows

## TENPOINT LEADS THE INDUSTRY IN CROSSBOW TECHNOLOGY

In each of the eleven years we have been producing crossbows, we have never failed to make improvements in our lineup. And, in most cases, our advancements originated from customer input. Since 1994, we have secured six patents with two more pending and another being filed.

*No other crossbow manufacturer comes close to this record of technological achievement.*

### *Here are some of our more significant innovations:*

#### **1. Patented PowerTouch™ Trigger.**

Compare a TenPoint PowerTouch trigger against the competition. Set at 3 1/2 pounds for optimum travel and touch, its action components are made from ultra-smooth metal injection-molded (MIM) parts, which produce a crisp, smooth, and vibration-free release that is the envy of the industry and one key to TenPoint's unsurpassed accuracy.

#### **2. Patented DFI™ (Dry-Fire-Inhibitor).**

In 1996 TenPoint introduced the unique DFI, which prevents dry-firing our crossbow when no arrow is loaded on the flight deck, virtually eliminating potentially severe damage resulting from a dry-fire.

#### **3. Patented ACUdraw™ and Patent Pending ACUdraw 50.™**

TenPoint's convenient and user-friendly cocking aids have made us the crossbow of choice for those who cannot or do not wish to manually load today's heavier draw-weight crossbows. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aids available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 18-19 of this catalog for details.

# superior to other brands?

## 4. Patent Pending GripSafety.™

Installed in the fore grip of all TenPoint models equipped with our PowerTouch trigger, the GripSafety keeps you from pulling the trigger without first depressing and holding this secondary safety button in place with your fore grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore grip below the barrel's flight deck. Installed on a standard basis for right-handed shooters, new models can be special-ordered for left-hand shooters at no charge.

## 5. OTT™ Limb Pocket Suspension System.

In 2004 we introduced the OTT (Over-the-Top) limb pocket suspension system, slashing noise and vibration levels by 50% and making TenPoint crossbows as quiet as many compounds. Used on all of our models, the OTT system lifts, separates, and isolates the limbs from the riser on Dupont Zytel® suspension pads. This innovative lift and separate system increases limb stability while dramatically reducing vibration and noise.

## 6. ACRA-ANGLE™ Barrel.

TenPoint's ACRA-ANGLE extruded and machined aluminum barrel is another key to our unparalleled shooting accuracy. Allowing shooters to load the bow string with their hands resting comfortably against the barrel, this feature promotes accurate string loading, an absolute requirement for shooting accuracy. Many other crossbow manufacturers' barrel designs do not permit hand contact for fear of injury, making it more difficult to load a string accurately. Second, the flight deck and arrow groove of every barrel is CNC machine finished, creating an arrow launch pad with unsurpassed dimensional integrity. >>>

## >>> ...more of what makes TenPoint crossbows superior.

### 7. TenPoint Crossbows have unparalleled accuracy.

**You will read glowing claims about accuracy from all crossbow manufacturers. Simply making such claims does not make them true.**

In 2003, *Aventure Chasse Peche*, a popular French-Canadian hunting and fishing magazine, published a detailed and exhaustive crossbow accuracy comparison test in one of its issues. Top-of-the-line models from all of the major crossbow manufacturers – American and Canadian – were vigorously tested at distances out to 150 feet (50 yards). None of the other manufacturers' models could match TenPoint's 7/8-inch grouping at 100 feet or its 1 1/2-inch grouping at 150 feet. Also, unlike the competition, the TenPoint crossbow survived the extensive test without any problems surfacing or any signs of premature wear.

The best test, however, is the test you conduct. Before you make your crossbow purchase, shoot all of the models you are considering.

***You be the judge.***

### 8. TenPoint Crossbows have great balance, fit, and feel.

Several years ago we used the following headline in our advertising campaign, *Shoulder them. Shoot them. You'll understand the difference between the best and the rest.* Aside from comparing shooting accuracy, you need to compare how a crossbow feels when you shoot it and - like a comfortable shoe - how it fits you. TenPoints are designed for balance and shooting comfort. So, take us up on our suggestion.

***Shoot a TenPoint and see how it fits.***

### 9. TenPoint Crossbows have optimum power and speed.

Using a relatively heavy 420-grain arrow (See arrow specification on page 26), our 185 pound crossbow models shoot an honest 313 feet per second and generate 91.4 foot pounds of kinetic energy – potent by any measure. Just as important, however, our models produce that power and speed on a frame that is quite manageable to load and that generates a minimum of shock, hammer, and noise.

***Compare loading and shooting a TenPoint to other brands.***

### 10. TenPoint Crossbows give you superior value for your hard earned dollars.

As the old saying goes, "You get what you pay for." If you compare the engineering, quality, performance, and durability of TenPoint crossbows to our competitors', we are confident you will agree that we offer more value for your dollar.

Compare our entry-level TITAN TL-4 to most crossbow manufacturers' top-of-the-line models.

***There is no better value on the market today.***

## All TenPoint Crossbows are built on the same foundation.

### CORE PERFORMANCE FEATURES

Every TenPoint crossbow is made with a group of *Core Performance Features* that insure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features listed below are the foundation of every crossbow we make.

Patented VIBRA-CUSH®

Patented DFI

OTT Limb-Pocket System

ACU-draw Ready FST-IV Stock

ACRA-ANGLE Barrel

Power Limb-Tip Caps

5-Point Stock-to-Barrel Mounting System

Advanced Quad-Limb Technology

Ambidextrous Automatic Safety

Tunable Synthetic Cable Yokes

Heavy-duty Riser Rod and  
Trigger-housing Clamp Plate

# WHAT'S NEW FOR 2005?

## Pro Elite™ Crossbow

We started with last year's top-of-the-line Elite QX-4 and extended its Realtree Hardwoods Green HD camo to include the barrel, riser, limb pockets, and ACUdraw covers to make a powerful visual statement. We added our new SteddyEddy™ Monopod System to help you improve your accuracy in difficult hunting situations. We added a custom matched six-pack (total of one dozen arrows) of our new Pro Elite **Premium Hunter™** carbon fiber arrows, matched for weight and straightness and equipped with tuned NAP® Thunderhead broadheads. Finally, we packed this new model and all of its accessories in our new airline approved BowMax® Hard Case. And, if you complete and return your warranty card, we will send you our new navy blue short sleeve TenPoint Staff Shooter shirt and an engraved nameplate for your case. (See pages 10 & 11 for complete details)

## Hybrid Lite™ Crossbow

Smartly decorated in Mossy Oak New Break-Up camo, the Hybrid Lite is a price conscious companion to last year's popular Elite Lite model. With a shortened barrel and stock, TenPoint's powerful ST front end strung at 175 lbs., and our crisp Titan trigger, this new performance workhorse will satisfy those looking for a lighter, shorter and more maneuverable performance model priced to please. Available alone, equipped with a rear peep and front pin sighting system, or with a package that includes a 7/8-inch Fixed Scope Mount, our new RangeMaster® 40 mm Multi-Dot Red Dot Scope, our 2/3 Arrow Instant Detach Quiver, and three XX75 2219 Aluminum Camo Arrows with 100 grain practice points.

(See page 16 for complete details)

## TenPoint RangeMaster 40mm Multi-Dot Red Dot Econo Scope

A compact and cost effective addition to our growing line of illuminated Red Dot scopes.

At only 4-inches long with a wide, 40mm view for maximum light gathering, this rugged all-aluminum Multi-Dot Red Dot scope features 20, 30, and 40-yard dots calibrated for today's 300 fps crossbows. Its adjustable integrated 7/8-inch scope mounting system requires no rings and mounts easily to standard Weaver style dovetails. Powered by a long-life 2032 size lithium battery, the 40mm Multi-Dot Red Dot offers eleven light-intensity settings to match whatever hunting conditions you face. This new scope offers superior quality at a cost-conscious price level and will give you years of effective crossbow hunting use. (See page 21 for complete details)

## TenPoint Sidewinder™ Hip Quiver Adapter

Made for TenPoint by Sports and Recreation Technologies, this unbreakable hip-mounted Nylon ST quiver adapter carries any quick disconnect quiver. It mounts right or left on your hunting belt, and positions your quiver at any angle you choose. Whether stalking, sitting, or kneeling, your arrows are always accessible. With no leg strap, no interference, and no arrow flagging, you can transfer your quiver from your bow to your hip and back instantly.

Included in all Pro Elite and Elite QX-4 packages and also available as a stand alone accessory, the new Sidewinder Hip Quiver Adapter provides yet another unique and adjustable carrying option for your TenPoint quiver. (See page 20 for more details)

# WHAT'S NEW (continued)

## ELIMINATE THE BARRIERS TO CROSSBOW HUNTING SUCCESS

Your crossbow hunting success depends on eliminating or minimizing four potential barriers. First and most obvious, your crossbow must be dependable and shoot accurately. Second, you must be able to hold steady on your target. Third, your arrow must fly straight. And, finally, you must judge distance accurately. If you do not or cannot deal effectively with these barriers, you will not be successful in the field.

TenPoint has an eleven-year track record of being the best solution in the industry to the first potential barrier. There is no substitute for TenPoint's precision engineering, production quality, dependability, and accuracy.

TenPoint is pleased to introduce a group of new accessories which help eliminate two of the remaining three barriers.

### SteadyEddy™ Monopod System

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteadyEddy telescoping two-section monopod is designed for use with your crossbow while seated in a treestand or ground blind, or while standing with the shooting stick supported against the mid-section of your body.

The SteadyEddy keeps your crossbow braced solidly in position as you take your shot. It also serves as a rest while you are in your stand or blind so that you can keep your crossbow in the ready-to-shoot position.

Made of hard-tempered aluminum alloy, the SteadyEddy is lightweight and totally maneuverable. Its anodized finish resists corrosion. It comes standard with the patented Posi-Lock System™ that allows you to quickly set the length of the stick to suit your needs and easily locks it in place with a quick turn of the extension poles. It attaches conveniently to your crossbow using a maneuverable ball-joint mount, and folds up under your stock when not in use, clamping into a spring-steel pole-clip installed just behind the crossbow's pistol grip.

All SteadyEddys also come standard with an oversized cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

(See page 22 for more details)

### SteadyEddy Accessories

#### Third Extension

The standard two-section SteadyEddy extends from 21-inches to 36 1/2-inches but can be converted to a standing length three-section pole by installing this 18 1/2-inch extension. With the extension you can also use your SteadyEddy as a lightweight and ultra strong walking stick or standing-length shooting stick.

#### Shooter's "V" Attachment

When stalking game or using your SteadyEddy Shooting Stick as a walking stick, you can quickly convert it to a shooting stick by removing the Ball-Joint Mount and replacing it with the Shooter's "V". The low-profile "V" support design safely supports your TenPoint crossbow without interfering with the crossbow's cables when firing.

#### Quick Detach Connection

Designed to be installed just below the SteadyEddy's standard ball-joint mount, the Quick Detach Connection allows you to instantly remove your shooting stick from your crossbow with a short tug on its sliding release coupling. Perfect for quickly removing the

SteadyEddy so you can pack your crossbow in your new TenPoint Hard Case or so you can use your SteadyEddy as a walking stick when entering and leaving the woods.

(See page 26 for more details)

## Pro Elite™ Carbon Arrow

Privately labeled and manufactured exclusively for TenPoint by world renowned arrow manufacturer, Gold Tip®, the Pro Elite Carbon Crossbow Arrow is a masterpiece of precision engineering, strength, and accuracy. With its advanced carbon fiber construction the Pro Elite is laser-inspected for straightness to within .003" and hand-sorted for weight tolerances to within 2 grains per dozen. With its brass insert, TenPoint's patented SuperBrite bluntnock, 4-inch plastic vanes, and a recommended 100 grain field point or broadhead, the Pro Elite produces an optimum shooting weight of 431 grains, generating blazing speed, awesome kinetic energy, and bone rattling penetration. The Pro Elite is also available installed with carbon moon nocks for use with crossbows that recommend them. Pro Elite Carbon Arrows come in standard 6-packs and 72-packs.

And now, the Pro Elite Carbon arrow six-pack with SuperBrite™ caps is available in a **Premium Hunter** edition equipped with individually tuned NAP® Thunderhead 100's. Each arrow is precision matched for trueness, and weight matched for accuracy.

## TenPoint BowMax™ Hard Case

Whether transporting or storing your crossbow, TenPoint's new BowMax™ airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment.

Manufactured for TenPoint by Plano Outdoor Products, the BowMax features the patented PillarLock™ system for maximum protection of its contents. With its spacious interior dimensions (31.5" W x 39.25" L), it contains all the room necessary to secure your crossbow and all of its accessories. Arrows are conveniently stored in rubber retaining strips installed in the case's lid. High-density foam padding and poly tie-down straps with buckles, secure, cushion, and protect your crossbow. All of your small accessories store neatly in Plano's 2-3500 StowAway™ utility box included with every crossbow case.

The case shuts quickly and securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded, non-slip rubber grip. The exterior also provides a molded security connection between the top and bottom so you can attach almost any over-the-counter key or combination lock.

Three 100-grain Practice Points

7/8-inch Fixed Weaver Style Dovetail Scope Mount

3-Power x 1-inch Multi-Line MINI Crossbow Scope or 40mm Multi-Dot Red Dot Econo Crossbow Scope (shown here). Both with 20, 30, & 40 yard aiming options calibrated for 300 fps crossbows.

Mossy Oak® NEW Break-Up® Detachable 2/3 Arrow Quiver with three 20-inch SuperBrite™ Easton aluminum XX75 2219 camo arrows with vanes.

# TWO GREAT COCKING DEVICES-

MAKING BOWHUNTING ACCESSIBLE TO EVERYONE.

## ACUdraw 50™ - A Better Mousetrap. (Patent Pending)

For years, many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome. TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring to silently and effortlessly draw the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope cocker around your neck or to stash it in a fanny pack
- When not in use, powerful mini-magnets hold the handles securely and silently in place
- Available installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

## ACUdraw™ - The Original Premier Cocking Mechanism. (Patented)

The patented ACUdraw is the most advanced solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

- Reduces draw weight to about 5 lbs. when operated manually
- Belt holster for ACUdraw crank included
- Cranks manually or powers-up with almost any cordless screwdriver or drill (4.2 volts or more)
- Unlike other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or installed

Ten years ago, few crossbows had draw weights over 150-pounds. Some of today's draw weights, however, are as heavy as 200-pounds - a hefty lift for anyone. As crossbows have become more difficult to load, cocking devices have become a necessity for many.

TenPoint offers two integrated, convenient, and easy-to-use units. The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort. Both devices cock the crossbow accurately every time.

***TenPoint is the unchallenged leader in making user-friendly crossbow cocking devices.***

# ACCESSORIES

## QUIVERS

TenPoint quivers feature our instant detach design so you can quietly and quickly attach and detach them by tightening or loosening two lock-down knobs. Available in 2-3 arrow and 4-5 arrow designs. When used in conjunction with our new optional DropTine™ foot stirrup, an optional mounting bracket (included with stirrup) HCA-021, is required.

Mossy Oak® NEW Break-Up®

Realtree Hardwoods® Green HD™

## CROSSBOW CASES

TenPoint's **new** BowMax airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment. Manufactured for TenPoint by Plano Outdoor Products, it contains all the room necessary to secure your crossbow and all of its accessories. Small accessories store neatly in a StowAway utility box included with every crossbow case. Closes securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded rubber grip.

**HCA-200** - TenPoint BowMax™ Hard Case (shown)

**GOTTA HAVE IT!**

The best looking and most durable soft crossbow cases made today. With extra-thick padding, heavy-duty zippers, and two pockets for extra arrows and miscellaneous accessories, these soft cases will protect your investment for years to come. Check your state's regulations. Some require all crossbows to be transported in a case.

## SCOPES

The best value in illuminated red dot scopes on the market today. With eleven brightness settings and all-aluminum construction, these zero-power scopes come with tube extension lens shades. They deliver pinpoint accuracy in all light conditions. Available in single-dot or three-dot versions for 20, 30, & 40-yard shots.

**HCA-083** - 30mm Single-Dot Red Dot Scope with 3/8" mounting rings

**HCA-084** - 30mm Single-Dot Red Dot Scope with 7/8" mounting rings

**HCA-083M** - 30mm Multi-Dot Red Dot Scope with 3/8" mounting rings

**HCA-084M** - 30mm Multi-Dot Red Dot Scope with 7/8" mounting rings

Perfectly proportioned for a crossbow at only 7" long, this light, compact scope features fully-coated optics, three-line duplex cross hairs (20, 30, & 40-yard lines), and all-aluminum construction. An exceptional value.

**HCA-087** - 3-Power x 1" Multi-Line MINI Crossbow Scope with 3/8" mounting rings

**HCA-088** - 3-Power x 1" Multi-Line MINI Crossbow Scope with 7/8" mounting rings

This rugged all-aluminum Multi-Dot Red Dot scope features 20, 30, and 40-yard dots calibrated for today's 300 fps crossbows. Its adjustable integrated 7/8-inch scope mounting system requires no rings and mounts easily to standard Weaver style dovetails. Its long-life lithium battery offers eleven light-intensity settings to match whatever conditions you face. At a cost-conscious price level this high quality scope will give you years of effective crossbow hunting use.

**HCA-089M** - RangeMaster 40mm Multi-Dot Red Dot Econo Scope with 7/8" integrated mounting system.

# ACCESSORIES (continued)

## SHOOTING AIDS

### SteadyEddy

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteadyEddy telescoping two-section monopod insures motion-free shooting while seated in a treestand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, its patented Posi-Lock System™ allows you to quickly set its length with a quick turn of the extension poles. It attaches to your crossbow using a completely maneuverable ball-joint mount, and clamps under your stock when not in use. All SteadyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

HCA-030 - SteadyEddy Crossbow Monopod System

**GOTTA HAVE IT!**

### SteadyEddy Accessories

Installed just below the SteadyEddy's standard ball-joint mount, the Quick Detachment Connection allows you to instantly remove your shooting stick with a short tug on its release coupling. Perfect for quickly removing the SteadyEddy for storage or to use it as a walking stick when entering and leaving the woods.

HCA-035 - Quick Detachment Connection

Replaces the ball joint connection when your SteadyEddy is detached from your crossbow. This low-profile "V" attachment quietly supports your crossbow without interfering with its cables when shooting.

HCA-036 - "V" Shooter's Attachment

Easily installed, this 18 1/2" extension converts your SteadyEddy to a standing-length three-section shooting or walking stick.

HCA-037 - Third Extension

Carry these convenient single-use oil wipes in your fanny pack to occasionally lubricate your barrel flight-deck and to clean, lubricate, and preserve other metal surfaces on your crossbow. Can also be used on gun barrels. Each package contains 12 foil-wrapped wipes.

HCA-112.12 - Flight Rail Oil Wipes

**GOTTA HAVE IT!**

## TRIGGER ACCESSORIES AND PARTS

### HCA-086 - RangeMaster® Rear Scope Adjustment Mechanism

The RangeMaster Rear Scope Adjustment Mechanism is used to convert the Fixed Position Accessory, installed in Elite PowerTouch trigger assemblies, to a thumb-operated adjustable scope mount. Once installed you use the thumb-lever to select incremental yardage settings without taking your eye off the scope. Includes a lock-down knob and a tension adjustment feature.

HCA-086

### HCA-074 - Dovetail Fixed Position Accessory for RangeMaster

Used to convert pre-2004 models equipped with RangeMaster Rear Scope Adjustment Mechanisms to a fixed position scope mounting system. This accessory, along with a few parts from the RangeMaster system, replaces the RangeMaster thumb lever and locks the sight mount solidly in a fixed position.

### HCA-504 - PowerTouch Trigger Component Upgrade Kit

Improve the performance of your pre-2004 PowerTouch trigger by replacing its old action and safety components with TenPoint's New MIM (metal injection molded) components. MIM parts are dimensionally more precise than the old technology and less subject to warp during heat treatment. Best of all, MIM parts have ultra-slick surfaces, perfect for ultra-smooth trigger operation.

### HCA-501 - PowerTouch Trigger with DFI, Dovetail, and Fixed Position Kit

The complete PowerTouch trigger assembly, ready to drop into the barrel and bolt in place. Includes MIM action components and safety slide. The finest crossbow trigger ever made.

HCA-074

## CROSSBOW PRESS

Easy to use, the Portable Crossbow Press is the perfect, cost-effective way for dealers or owners who choose to do their own crossbow string & cable maintenance, tuning and repair. Designed for crossbows that are already strung.

**HCA-106** - Portable Crossbow Press

## ACUDRAW™ & ACUDRAW 50™ (also shown on pages 18 & 19)

Your dealer - or you if you have the proper tools - can install either of these two incredible cocking devices. Kits include templates for drilling the receiver holes (drill, bits, and hole cutter not included) in pre-2003 TenPoint models. Receiver holes are pre-molded in current models. Installation instructions are included.

**HCA-000-B-II** - ACUdraw Cocking Mechanism

**HCA-000-B-A50** - ACUdraw 50 Cocking Mechanism

## ACUDRAW REPLACEMENT ACCESSORIES (shown collectively above)

**HCA-435** - ACUdraw Hand Crank & Holster Combo

**HCA-400** - ACUdraw Draw Cords (two-piece for claw style prior to 1998)

**HCA-401** - ACUdraw Draw Cords

**HCA-411** - ACUdraw Retraction Spring (post 1998)

**HCA-421** - ACUdraw Claw with self-centering draw cord

**HCA-426** - ACUdraw Claw Holder

**HCA-428** - ACUdraw Claw III Kit (includes claw, holder, and draw cord)

**HCA-450** - ACUdraw 50 Replacement Draw Cords

**HCA-451** - ACUdraw 50 Replacement Retraction Spring

## LUBRICANTS

These two lubricants are critical to maintaining all crossbows in good working order and to extending the life of your string and cables. The Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not freeze-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance.

**HCA-110** - String & Cable Wax

**HCA-111** - Flight Rail & Trigger Lube

HCA-110

HCA-111

## CABLE SAVERS

# CROSSBOW ARROWS

## A COMPLETE LINE OF NOCK SYSTEMS FOR MOST CROSSBOWS

TenPoint Crossbow Technologies has the shaft, insert, and nock combination for most crossbows on the market or in the field today. Check with your local dealer for the optimum combination for your crossbow.

As an Easton Aluminum Complete Crossbow Arrow Resource, TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton shafts to produce the highest quality aluminum crossbow arrows available today.

For those looking for the perfect carbon crossbow arrow, TenPoint now offers its own Pro Elite™ 20-inch, 22/64<sup>th</sup> carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Gold Tip®, the Pro Elite is a masterpiece of precision engineering, strength, and accuracy.

And now, the Pro Elite Carbon arrow six-pack is available in a Premium Hunter edition (HCA-610.6) equipped with individually tuned NAP® Thunderhead 100's. Each arrow is precision matched for trueness, and weight matched for accuracy.

### Two Arrow Shafts Available:

1. **XX75 Camo**, 2219 & 2117. This three-color camo shaft is the proven industry standard for absolutely reliable results. The 2219 is available in all nock systems. The 2117, for Excalibur bows, uses a black polymer blunt cap.
2. **TenPoint Pro Elite** 20-inch, 22/64<sup>th</sup> diameter, advanced carbon fiber arrow. Laser inspected for straightness to within .003" and hand-sorted for weight tolerances to within 2 grains per dozen, it comes equipped with brass inserts and blunt SuperBrite™ nocks or carbon moon nocks.

### All Bow. No Bull with TenPoint Crossbows

The **performance chart on back cover** contains data from tests we conducted using the crossbows and arrows shown. All the crossbows were production models. We did not increase draw weights or modify any of the bows.

**We urge you to shoot 2219 shafts** (or shafts of comparable weight) **when using any crossbow.** Using lighter shafts may damage your crossbow over time and will void your TenPoint warranty.

#### HEA-251.12

Twelve-Pack of Patented SuperBrite™ nock tools. Available for refletching 2219 aluminum shafts or 22/64<sup>th</sup> diameter Pro Elite shafts using SuperBrite™ nocks.

A - SuperBrite™ blunt nock for 2219 aluminum shafts

B - Barnett & Horton CPC moon nock for 2219 aluminum shafts

C - Excalibur blunt nock for 2117 aluminum shafts

D - PSE nock (old & new) for 2219 aluminum shafts

E - Bear/Jennings nock for 2219 aluminum shafts

F - SuperBrite Blunt nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shafts

G - Moon nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shafts

## CORPORATE STATEMENT

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance, and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect, and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently, and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions, and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.
