

# CORPORATE STATEMENT

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance, and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect, and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently, and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions, and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

# WARRANTY

**All TenPoint and 6 Point series crossbows carry a Limited Lifetime Operational Warranty.**  
Check your owner’s manual for details.

*The only way you’ll ever have to buy another one is if you just can’t stop yourself.*

# REDEFINING CROSSBOW TECHNOLOGY THROUGH INNOVATION

COMPLETE PRODUCT GUIDE 2006

# TO OUR CUSTOMERS

While the headline on the cover of this catalog, ***Redefining Crossbow Technology through Innovation***, is an appropriate characterization of our company direction throughout its history, I believe this year it carries even greater significance.

In 2006, our twelfth year, we are introducing a number of improvements to our lineup along with three new crossbow models. Two of these models are so unique that we have created a separate **6 Point Crossbows™** series or category for them. The models themselves are the **Pro Slider™** and the **Slider™**.

Take the time to read about them in the pages that follow, and, when you get a chance, visit one of our dealers to shoot them. You will see that while they clearly have a “personality” of their own, you will have no trouble recognizing their TenPoint “genetics.”

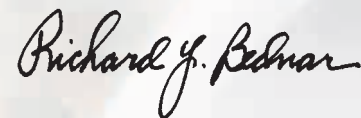

Featuring bow assemblies that slide, locate, and lock in three different positions, these models adapt to virtually any shooter, regardless of age, sex, stature, or physical ability. They are lightweight, quiet, affordable, and fun to shoot. More important, however, their “bloodline” is unmistakably TenPoint: dependable, durable, accurate, and designed to perform at a level our customers have come to expect.

Our new TenPoint series **Pro Fusion™** crossbow features a molded Verton® polymer combination thumbhole stock and barrel with an imbedded riser rod, our new HL™ 175-pound high-performance limbs, and our new RollerTouch™ trigger. The fusion of all this new technology provides the best combination of speed and accuracy available today at a mid-range crossbow price point.

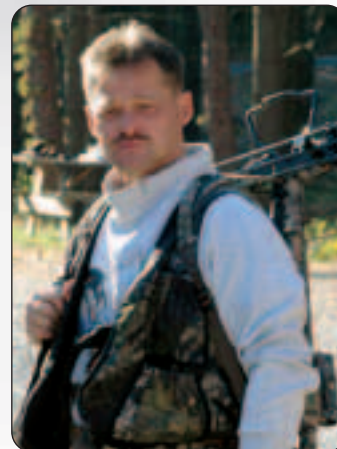

Checkout the ***What’s New for 2006*** section of the catalog. I am proud of the innovation we are bringing to the marketplace this year and believe you will approve.

In the future our goals will remain simple. We intend to continuously improve our products and to provide unparalleled service to our customers at every level.

Good hunting,

Richard L. Bednar  
Executive Vice President  
Chief Operating Officer

## TENPOINT CROSSBOWS HAVE UNPARALLELED ACCURACY.

**You will read glowing claims about accuracy from all crossbow manufacturers, but claiming accuracy is not the same as delivering it.**

In 2003, *Aventure Chasse Peche*, a popular French-Canadian hunting and fishing magazine, published an exhaustive crossbow accuracy comparison test in one of its issues. Top-of-the-line models from all of the major crossbow manufacturers – American and Canadian – were vigorously tested at distances out to 150 feet (50-yards). None of the other manufacturers’ models could match TenPoint’s 7/8-inch grouping at 100 feet or 1-inch grouping at 150 feet. Also, unlike the competition, the TenPoint model survived the extensive test without any breakdowns, operating problems, or signs of premature wear.

The best test, however, is your test. Before you make your crossbow purchase, shoot all of the models you are considering.

***You be the judge.***

**TenPoint Crossbows have great balance, fit, and feel.**

A number of years ago we used the following headline in our advertising campaign: “Shoulder them. Shoot them. You’ll understand the difference between the best and the rest.” Aside from comparing shooting accuracy, you need to compare how a crossbow feels when you shoot it and – like a comfortable hunting boot – how it fits. TenPoint’s are designed for balance and shooting comfort. So, take us up on this suggestion:

***Shoot a TenPoint and see how it fits.***

**TenPoint Crossbows have optimum – and honest – power and speed.**

Many of the speed and energy claims advertised by other crossbow manufacturers are either misleading or untrue. Using a relatively heavy 420-grain arrow our 185 pound models and our **NEW** 175 pound Pro Slider™ and Pro Fusion™ models shoot an honest 305 – 313 fps, generating an equally honest and potent 86.8 - 91.4 foot pounds of kinetic energy. Equally important, however, our models produce that power and speed on a frame that is quite manageable to load and that generates a minimum of shock, hammer, and noise.

***Compare loading and shooting TenPoint crossbows to other brands.***

**TenPoint gives you superior value for your hard earned dollars.**

If you compare the engineering, quality, performance, and durability of TenPoint crossbows to our competitors’ models, we are confident you will agree that we offer considerably more value for your dollar.

In 2004 our then entry-level Titan TL-4 model won **Inside Archery Magazine’s Best Buy Award** (selected by dealers across the country) over all other manufacturers’ models. In **2005** our top-of-the-line Pro Elite model won the same award.

***There is no better value on the market today.***

# WHAT MAKES TENPOINT® CROSSBOWS SUPERIOR TO OTHER BRANDS?

In each of the twelve years TenPoint has been manufacturing crossbows, we have never failed to introduce innovations or to improve our products. And, in nearly all cases, the advancements we have made originated from customer input. Since 1994, we have secured eight patents with others pending or being filed.

*No other crossbow manufacturer comes close to this record of technological achievement.*

## Below are Some of Our More Significant Innovations

### PATENTED TRIGGER TECHNOLOGY

TenPoint now has three triggers designed to match-up with the draw weight of our crossbow models. Our 185-pound premium bow models feature the patented 31/2 pound PowerTouch™ trigger, made with MIM (Metal Injection Molded) action components - the finest crossbow trigger made today. Our 175-pound models (and one 165-pound model) are built with the **NEW** RollerTouch™ trigger (patent pending). This trigger features a double-roller system installed at the top of the trigger finger to reduce friction between it and the string latch. This engineering advancement significantly lowers the trigger pull into the 5-pound range. Also new for 2006 is the 6-pound DropLatch™ trigger, a re-design of our 165-pound draw-weight Titan TL-4 crossbow trigger. It features a **NEW** MIM trigger finger with a radius at the top where it meets the sear surface of the string latch. The radius, combined with the ultra smooth surface finish (up to 10-times smoother than investment casting) that MIM technology offers, dramatically improves the trigger pull over the previous design.

### PATENTED DFI™ (Dry-Fire-Inhibitor)

In 1996 TenPoint introduced the DFI, which prevents dry-firing our crossbows when no arrow is loaded on the flight deck. The addition of this technology to our entire crossbow lineup has virtually eliminated the potentially severe damage and/or injury that a dry-fire can cause.

### ACUdraw™ (Patented) ACUdraw 50™ (Patented)

TenPoint's convenient and user-friendly cocking aids have made us the crossbow of choice for those who cannot or do not wish to manually load today's heavier draw weight crossbows. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aides available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 24-25 for details.

### GRIPSAFETY™ (Patent Pending)

Installed in the fore grip of all TenPoint models that use the PowerTouch trigger, the GripSafety prevents pulling the trigger without first depressing and holding this secondary safety button in place with your fore-grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore grip and below the barrel's flight deck. Installed on a standard basis for right-handed shooters, left-handed installation is available at no charge when placing a new bow order.

### LIMB-POCKET TECHNOLOGY

In 2004 we introduced the OTT™ (Over-the-Top) limb pocket suspension system to our TenPoint Series models. Using Dupont Zytel® suspension pads to lift and separate the limbs, isolating them from the riser, and then capturing the entire assembly with an outer limb-pocket, this technology dramatically increased limb stability and slashed noise and vibration levels by 50%.

### COMPLETE-CAPTURE™ LIMB-POCKET

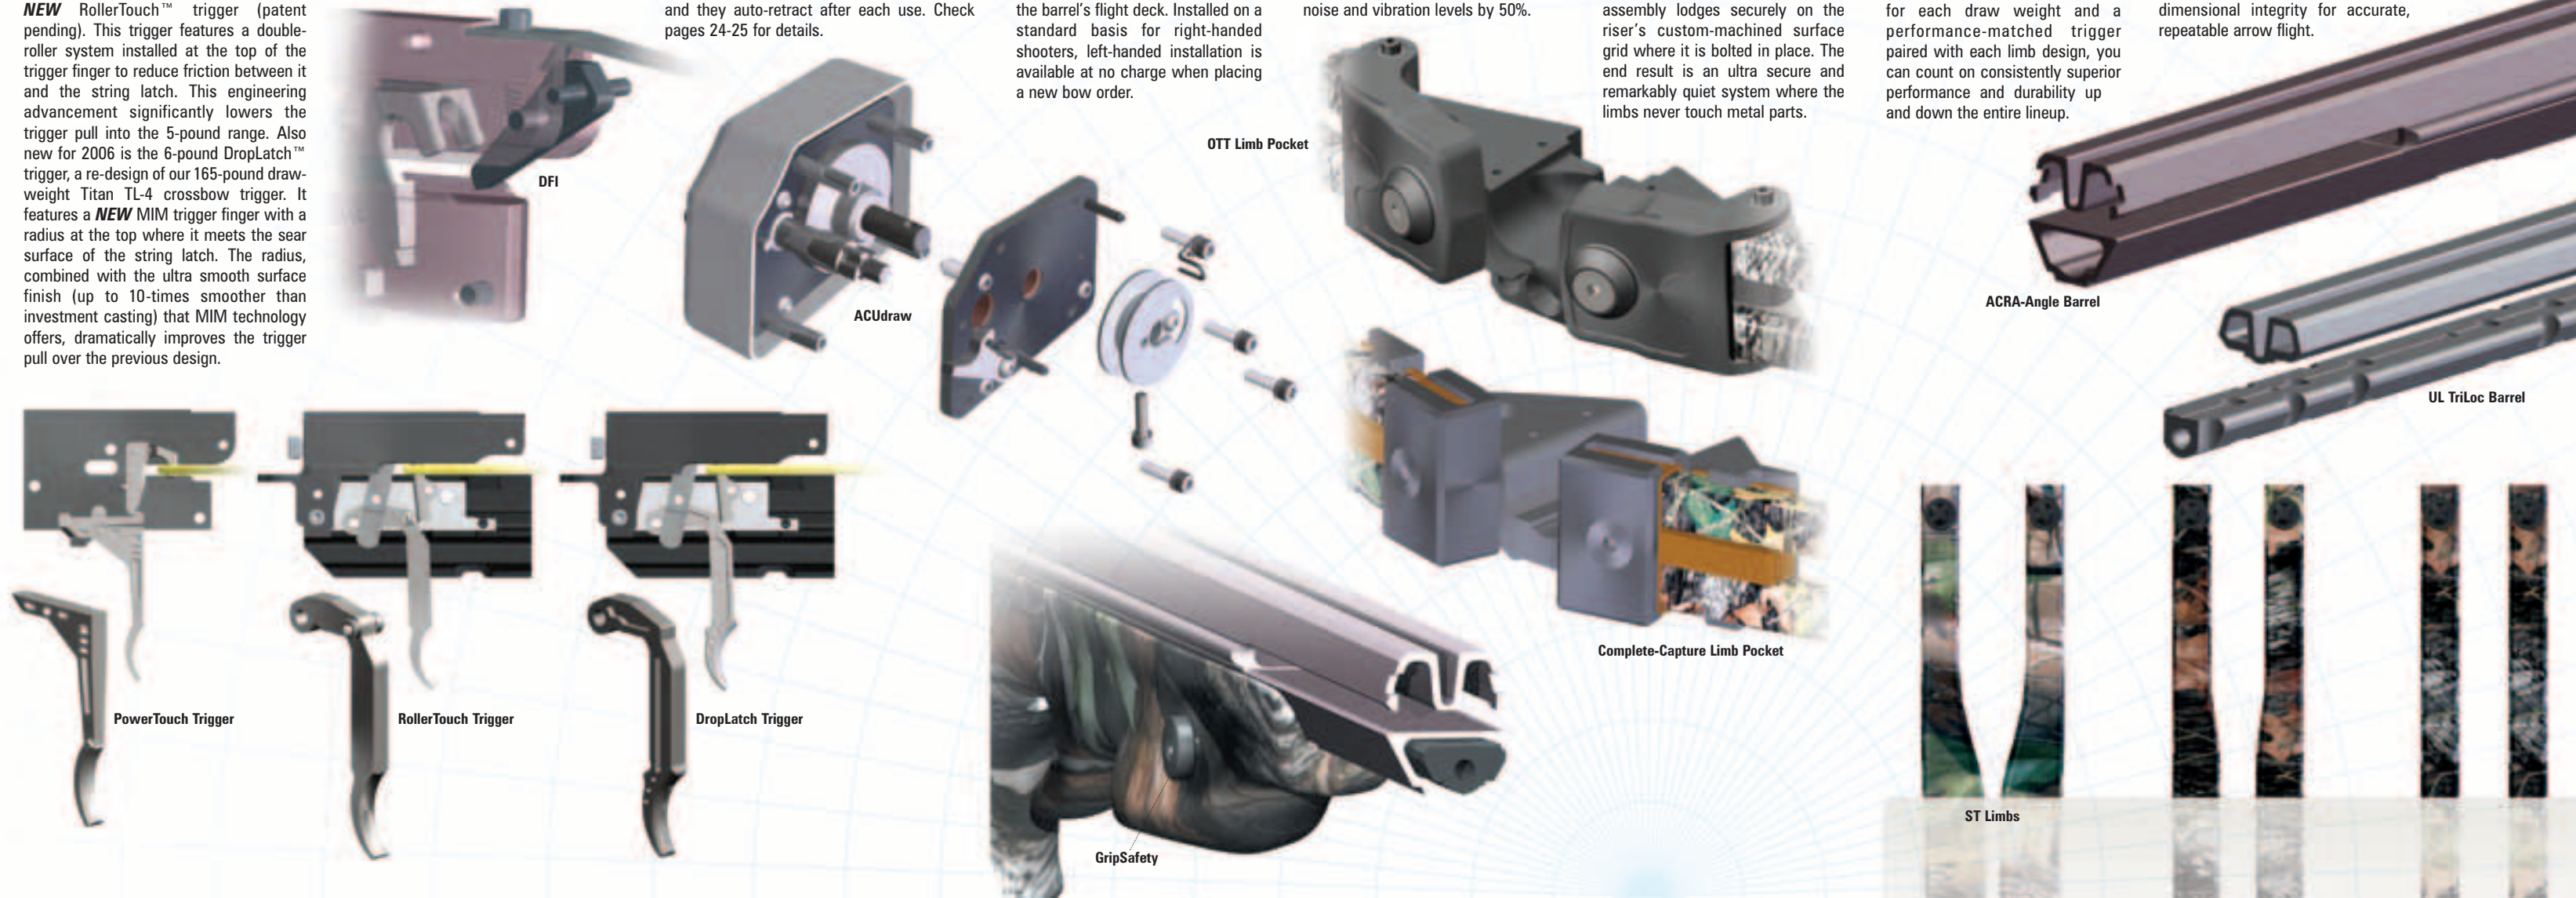

This year, the **NEW** 6 Point Slider models are equipped with an equally effective and innovative Complete-Capture limb-pocket suspension system. First, a polypropylene sleeve-cushion fits securely inside the machined aluminum limb-pocket or glove. The limbs slip inside the cushion, and the Complete-Capture assembly lodges securely on the riser's custom-machined surface grid where it is bolted in place. The end result is an ultra secure and remarkably quiet system where the limbs never touch metal parts.

### LIMB TECHNOLOGY

With this year's introduction of the HL Limb™ (see "What's New" section, pages 6-9), TenPoint now offers three limb configurations specifically designed for optimum performance at different peak draw weights: TL-4 Limbs for 165-pound, HL Limbs for 175-pound, and ST Limbs™ for all 185-pound models. With a performance-matched limb for each draw weight and a performance-matched trigger paired with each limb design, you can count on consistently superior performance and durability up and down the entire lineup.

### BARREL TECHNOLOGY

The TenPoint Series' ACRA-ANGLE™ and the 6 Point Series' UL TriLoc™ barrels are key to the unparalleled shooting accuracy of all TenPoint crossbows. Both are designed to allow shooters to load the bow string with their hands resting against the barrel; thereby promoting accurate loading, which is essential to crossbow shooting accuracy. And, both are CNC machine finished to create arrow launching platforms with unsurpassed dimensional integrity for accurate, repeatable arrow flight.

# WHAT'S NEW FOR 2006 ?

## Three New Crossbows

### PRO FUSION™

As the name suggests, this **NEW** crossbow fuses proven TenPoint technology with a number of 2006 innovations.

First, the Pro Fusion's molded combination stock & barrel is made from Verton,® a durable, lightweight polymer product new to TenPoint. The result is a structurally sound stock and a dimensionally precise arrow flight deck that produces accurate arrow flight with minimal friction.

Powered by TenPoint Crossbow Technologies' new high-performance 175-pound HL limbs (detailed in this section), the Pro Fusion shoots a robust 305+ feet-per-second using TenPoint's recommended arrows.

The Pro Fusion also features TenPoint's **NEW** RollerTouch trigger (detailed further in this section). This design reduces sear surface friction with a roller system fitted on the top of the trigger finger, producing a smooth, crisp trigger with optimum travel and weight.

The Pro Fusion is sold as a package and outfitted with TenPoint's 2/3 arrow quiver, three arrows with practice points, a 7/8-inch aluminum mini dovetail scope mount, and the **NEW** Quad III 40mm Multi-Dot, Multi-Objective, and Multi-Color scope (detailed in this section). The bow and quiver are **double-dip** fluid-imaged in Realtree Hardwoods® HD™ camo.

### PRO SLIDER™ and SLIDER™

The 6 Point series Slider and Pro Slider are revolutionary new crossbows built for shooters of nearly any age, size, weight, sex or physical ability.

They feature the **NEW** Complete-Capture™ ultra-quiet limb pocket and bow assembly matched with a precision-machined riser designed to slide, locate, and lock in one of three shooting positions. The entire assembly locks in place between an innovative upper and lower extruded and machined aluminum UL TriLoc™ barrel assembly. The riser secures those components up front and an extruded and machined combo trigger/barrel receiver secures them at the back end.

Locked in the "short" position with a 125-pound draw weight and 6-inch power stroke, for example, a person of small stature can easily reach the string when cocking a Slider. The bow's center of balance correspondingly shifts to a more manageable position closer to the body. The "short" Slider shoots a respectable 220 fps.

In contrast, locked in the "long" position with a 12-inch power stroke, the Pro Slider converts to a high performance 175-pound power plant that drives tacks at speeds in excess of 305 feet per second. ➤

**Double-dip** fluid-imaged in Mossy Oak® NEW Break Up,® both models are affordable, lightweight and quiet; featuring a great looking **NEW** two-piece stock, molded to accept either of TenPoint's highly regarded cocking mechanisms: the ACUdraw and ACUdraw 50. Both models also accept the popular SteddyEddy Monopod System.

The fore-grip locates in either of two positions and is safety-engineered to keep the hunter's hand properly positioned while shooting the bow.

The Pro Slider's metal parts are anodized in a rich bronze finish. This version features TenPoint's **NEW** RollerTouch trigger and high-performance HL limbs and comes packaged with TenPoint's 7/8-inch Fixed Dovetail Scope Mount, 3x Multi-Line Scope, 2/3 Arrow Quiver, and 3-Pack of Pro Elite Carbon Arrows.

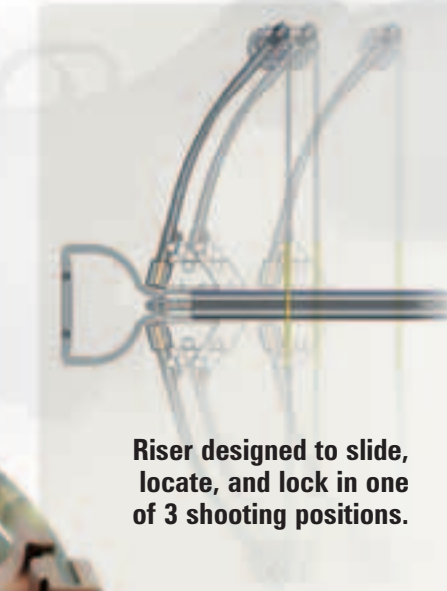

The more affordable Slider features black anodized metal parts, the **NEW** RollerTouch trigger and TenPoint's time-tested and highly reliable TL-4 limbs. The Slider comes equipped with a peep and one-pin sighting system. A 7/8-inch Dovetail Scope Mount and scope of your choice are available as optional accessories.

locate, and lock in one  
of 3 shooting positions.

Pro Slider in  
"Medium" Position

# WHAT'S NEW FOR 2006 ?

Two New Scopes • One New Limb • Two New Triggers

## 3X PRO-VIEW SCOPE™

Featured as one of two scope choices available on the top-of-the-line Pro Elite crossbow, this new scope offers the benefits of both multi-dot and multi-line scopes with a couple of new twists.

Calibrated for crossbows that shoot in the 300 fps range, this 20, 30, and 40-yard combo crosshair and illuminated dot configuration is housed in a lightweight seven-inch aluminum tube equipped with fully-coated 3x optics.

The illuminated dots are positioned at the intersection of each of the duplex crosshairs. In the field, you select non-illuminated black dots or one of two illuminated, colored dots (red or green) controlled by a five-position rheostat so you can match the illumination intensity to your hunting conditions.

## QUAD III SCOPE™

This new zero-power 40mm scope has an integrated, 7/8-inch mounting system that requires no rings. The Quad III features four objective view selections. The light intensity of each view is regulated by a five-position rheostat so you can match the illumination intensity to your hunting conditions. Each objective can be viewed in two colors, red and green.

The objective views include your choice of three dots within a ring, three dots within a diamond, three dots by themselves, and three crosshairs – all designed for 20, 30, and 40-yard shots with crossbows shooting in the 300 fps range.

Featured on the Pro Fusion in a matte black finish, the Quad III is also available fluid-imaged in Mossy Oak® NEW Break-Up®.

## ROLLERTOCH™ TRIGGER (Patent Pending)

The RollerTouch Trigger is specifically designed to lower the weight of the trigger pull primarily on TenPoint's 175-pound crossbow models.

This new trigger technology features a double-roller system installed at the top of the trigger finger. As you pull the trigger, it rolls off the string latch's sear surface rather than sliding off of it. The net effect is to reduce the friction between the two parts, thereby significantly lightening the trigger pull into the 5-pound range.

## DROPLATCH™ TRIGGER

The success realized by introducing MIM (Metal Injection Molding) technology to the production of several PowerTouch™ trigger parts two years ago, has led TenPoint to use MIM technology to re-engineer the Titan TL-4's crossbow trigger this year.

First, TenPoint redesigned the top of the trigger finger by adding a radius where it meets the sear surface of the string latch. That radius, combined with the ultra smooth surface finish that MIM technology offers (up to 10-times smoother than investment casting), dramatically improved the trigger pull over the previous design.

In addition, MIM technology provided the ability to both round and groove the trigger's finger-pad, thereby improving both its aesthetics and its comfort.

3x Pro-View Scope

Quad III Scope

## HL™ LIMB

Like the RollerTouch Trigger, the new HL Limb was designed specifically for the Pro Fusion and Pro Slider crossbow models. This new design borrows from the simplicity and efficiency of the 165-pound TL-4 Limb and the strength, power, and aesthetics of the 185-pound ST Limb. The result is a limb perfectly matched to the unique requirements of these two new 175-pound high performance crossbow models.

**NEW 06**

This logo designates a new item for us in 2006. Look for it throughout this catalog.

## WHAT'S IMPROVED FOR 2006 ?

At TenPoint we do not limit our innovative energy to creating new products. We direct equally assertive effort toward improving existing technology.

First, we have made several improvements to our industry leading **ACUdraw** automated cocking unit. We have lightened the string claw with new DuPont Zytel® claw tops, improved draw cord retraction with re-designed string guides, and replaced the rubber "O" ring safety-pawl spring with a more durable conventional coil-spring.

Next, we are introducing self-adhering T-Handle Stability Pads with steel disks imbedded in them to improve the **ACUdraw 50** cocking device. The new pads will adhere to the butt stock and create a magnetically improved, noise-free handle storage platform.

Third, we have beefed-up the **SteadyEddy™ Ball Stem connection** and added a universal Ball Stem Attachment Accessory for additional stability and retrofit capability.

Finally, we have replaced our **Standard and Extreme Cable Savers** with new, improved low-wear, low friction Polybutylene Terephthalate versions in black for the 6 Point Series Slider models and in white for all of the TenPoint Series models.

# PRO ELITE™

Available only as a complete package with two scope options.

## The industry's finest crossbow, delivered to you with the most complete accessory package ever assembled.

The ultimate in performance and looks, the "pro" version of TenPoint's Elite crossbow reaches a new level by expanding its great looking **double-dip** fluid-imaged Hardwoods® Green HD™ camo coverage to include the barrel, riser, limb pockets and ACUdraw covers. Plus, this premier package includes two scope options.

**313 + FPS**

**185 LB. Draw Weight**

**91.4 FP Kinetic Energy**

**Patented Premium 3 1/2 lb. PowerTouch Trigger**

**ST Limb and Bow Assembly**

See back pages of catalog for bow features, specifications, and purchase options.

## The PRO ELITE Complete Package Includes:

- In 2006 you can order your Pro Elite with TenPoint's proven 30mm Multi-Dot illuminated Red Dot Scope (see insert) or with the exciting **NEW** 3x Pro-View Scope (pictured on crossbow). Calibrated for the Pro Elite Crossbow, the 3x Pro-View™ Scope provides a 20, 30, and 40-yard combination illuminated dot and crosshair configuration with fully-coated 3-power optics. The dots are positioned at the intersection of each of the three duplex crosshairs and can be rendered in black (when illumination is off), red, or green.
- SteddyEddy telescoping lightweight aluminum monopod with patented Posi-Lock System™
- 7/8-inch Adjustable Dovetail Mount equipped with Fixed Position Accessory
- Progressive Dampening Package. Consisting of NAP® ThunderBlox™ sound and vibration limb dampeners, TenPoint Wedgie™ arrow retention spring dampener, and TenPoint VIBRA-DAMP™ cable suppressors
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with patented PillarLock™ system for maximum equipment protection
- String & Cable Wax and Flight Rail/Trigger Lube
- Deluxe Realtree Hardwoods® Green HD™ Sling w/swivels
- Six-pack of TenPoint Pro Elite carbon fiber arrows with SuperBrite blunt nocks
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with individually tuned NAP® Thunderhead® 100's. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- Six-pack of 100-grain practice points
- Deluxe Realtree Hardwoods® Green HD™ 2/3 Arrow Detachable Quiver
- Adjustable Sidewinder™ Hip Quiver Conversion System with instant detach feature
- Camouflage Strings and Cables
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts

## Winner of the 2005 Inside Archery Magazine "Best Buy Award"

In the latest annual Inside Archery Magazine poll, archery dealers across the nation selected the Pro Elite as the crossbow industry's "Best Buy," saying:

Available with or without the ACUdraw or ACUdraw 50.

"The most technologically advanced crossbow available."

"This crossbow is loaded and it shoots like a dream."

"Everyone shoots the TenPoint Pro Elite well."

NEW 3x Pro-View Scope

**FULLY-ASSEMBLED,  
SIGHTED IN, AND READY  
FOR THE WOODS RIGHT  
OUT OF ITS BOWMAX™  
HARD TRAVEL CASE.**

Optional 30mm Multi-Dot Scope available in place of 3x Pro-View scope pictured on bow.

www.tenpointcrossbows.com

## Premium TenPoint performance, delivered in a variety of configurations to satisfy your purchasing needs.

With the same top-of-the-line power plant as the Pro Elite, the Elite is now available as a stand-alone crossbow or as a complete package (fully-assembled, sighted in, and ready for the woods right out of its BowMax™ hard travel case). With its stock and limbs **double-dip**, fluid-imaged in Realtree Hardwoods® Green HD™ and its barrel, riser, trigger, and limb pocket combination anodized in a rich bronze finish, the Elite's great looks are the perfect match for its incomparable performance.

In the NAHC 2004 field test, the Elite QX-4 was given the club's highest overall rating of "10."

**313+ FPS**  
**185 L.B. Draw Weight**  
**91.4 FP Kinetic Energy**

Patented Premium 3 1/2 lb. PowerTouch Trigger  
ST Limb and Bow Assembly

See back pages of catalog for bow features, specifications, and purchase options.

Available with or without the ACUdraw or ACUdraw 50.

## The ELITE Package Includes:

- TenPoint's 30mm Multi-Dot Scope with 7/8-inch scope rings
- 7/8-inch Fixed Dovetail Scope Mount
- Progressive Dampening Package. Consists of NAP® ThunderBlox™ sound and vibration limb dampeners, TenPoint Wedgie™ arrow retention spring dampener, and TenPoint VIBRA-DAMP™ cable suppressors
- SteddyEddy telescoping lightweight aluminum monopod with patented Posi-Lock System™
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with its patented PillarLock™ system for maximum equipment protection
- String & Cable Wax and Flight Rail/Trigger Lube
- Deluxe Realtree Hardwoods® Green HD™ Sling w/swivels
- Six-pack of TenPoint Pro Elite carbon fiber arrows with SuperBrite blunt nocks
- Six 100-grain practice points
- NAP® Combo Pack of three 100-grain Thunderhead® fixed blade broadheads and three 100-grain Spitfire® expandable broadheads
- Deluxe Realtree Hardwoods® Green HD™ 2/3 Arrow Detachable Quiver
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts

## The NEW addition to the TenPoint Series of models... A fusion of technology, function, and form, delivering high octane performance at an affordable mid-range price level.

Built for everyday use, the Pro Fusion shoots with precision accuracy and generates speeds comfortably exceeding 300 fps. **Double-dip** fluid-imaged in Realtree Hardwoods® HD™, the innovative Pro Fusion features TenPoint's **NEW** 175-pound high-performance HL limb and bow assembly, **NEW** 5-pound RollerTouch Trigger, and **NEW** multi-view Quad III Scope: all engineered specifically to insure optimum performance at this speed and draw weight.

**305+ FPS**  
**175 L.B. Draw Weight**  
**86.78 FP Kinetic Energy**

**NEW** 5 lb. RollerTouch Trigger  
**NEW** HL Limb and Bow Assembly  
**NEW** Quad III 40mm Scope

Available with or without the ACUdraw or ACUdraw 50.

See back pages of catalog for bow features, specifications, and purchase options.

## The PRO FUSION Package Includes:

- 40mm Quad III Scope, a **NEW** zero-power 40mm scope with a 7/8-inch mounting system that requires no rings. It features four 20, 30 and 40-yard illuminated objective view selections in two colors: red and green. The light intensity is regulated by a five-position rheostat. Along with an illuminated crosshair objective, the other three include a choice of three dots within a ring, a diamond, or by themselves.
- 7/8-inch Mini Fixed Dovetail Mount
- Realtree Hardwoods® HD™ detachable 2/3 Arrow Quiver
- Three Pro Elite Carbon Arrows
- Three 100-grain practice points
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts

The Pro Fusion's riser rod is securely embedded in a one-piece molded Verton® thumbhole stock and barrel combination.

# HYBRID LITE™

Available only as a complete package.

## Precision performance from a down-sized frame.

With a two-inch shorter barrel and a one-inch shorter stock, this compact, precision-performance model, **double-dip** fluid-imaged in Mossy Oak® NEW Break-Up®, is equipped with TenPoint's **NEW** 5-pound RollerTouch trigger (patent pending) and the top-of-the-line ST limb and bow assembly. It combines elements from several TenPoint series models to create a bow that is perfectly suited for hunters looking for a lighter and more maneuverable crossbow that delivers the speed, power, and accuracy that TenPoint customers count on.

**292+ FPS**  
**175 L.B. Draw Weight**  
**79.5 FP Kinetic Energy**

**NEW 5 lb. RollerTouch Trigger**  
**ST Limb and Bow Assembly**

*Note:* Shown with Pro Elite Carbon Arrow. See page 35 for arrow purchase options.

See back pages of catalog for bow features, specifications, and purchase options.

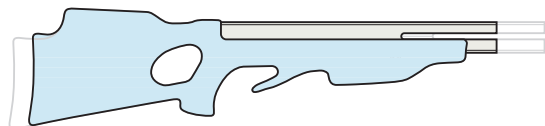

Available with or without the ACUdraw or ACUdraw 50.

## The HYBRID LITE Package Includes:

- TenPoint's 40mm Multi-Dot Scope with integrated 7/8-inch mounting system that requires no rings
- 7/8-inch Mini Fixed Dovetail Scope Mount
- Three 100-grain practice points
- MossyOak® NEW Break-Up® detachable 2/3 Arrow Quiver with three 20-inch SuperBrite Easton® aluminum XX75 camo arrows with vanes
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts

This model features a 2" shorter barrel and a 1" shorter stock compared to our Pro Elite, Elite, Pro Fusion and Titan TL-4 models.

Available as a bow only or as a package with two scope options.

# TITAN TL-4™

## Winner of the 2004 Inside Archery Magazine "Best Buy Award"

**Rated 9.5 out of a perfect 10 in the 2005 North American Hunting Club field test program.**

With all of the TenPoint Series Core Performance Features and TenPoint's **NEW** DropLatch™ trigger mechanism and plunger safety, the affordable Titan TL-4 defies its classification as an entry-level model by outclassing and outperforming other brands' top-of-the-line models.

**280+ FPS**  
**165 L.B. Draw Weight**  
**73.1 FP Kinetic Energy**

**NEW and improved 6 lb. DropLatch Trigger**  
**TL-4 Limb and Bow Assembly**

*Note:* Shown with Pro Elite Carbon Arrow. See page 35 for arrow purchase options.

See back pages of catalog for bow features, specifications, and purchase options.

## The TITAN TL-4 Packages Include:

- TenPoint's 40mm Multi-Dot Scope with integrated 7/8-inch mounting system that requires no rings or TenPoint's 3x Multi-Line Scope (pictured on bow)
- 7/8-inch Fixed Dovetail Scope Mount (Mini or Standard depending on Scope)
- MossyOak® NEW Break-Up® detachable 2/3 Arrow Quiver
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts
- The Multi-Line Scope package also includes a 6-pack of aluminum arrows with 100-grain practice points.  
*(No arrows are included with Multi-Dot package)*

Titan pictured with 3x Multi-Line Scope. When purchased alone, the Titan TL-4 is equipped with Rear Peep and Front Sight Bracket with one Pin Sight system.

40mm Multi-Dot Scope Package

The Multi-Line package also includes a 6-pack of aluminum arrows with six 100-grain practice points.

PRO SLIDER<sup>TM</sup>

Available only as a complete package.

You'll have no trouble recognizing the gene pool...

Welcome the newest members of TenPoint Crossbow Technologies' family, the 6 Point<sup>TM</sup> series of crossbows, featuring the innovative Pro Slider<sup>TM</sup> and Slider<sup>TM</sup> models.

Revolutionary in concept, these two new models are adaptable to virtually any shooter, regardless of age, sex, stature, or physical ability.

They feature the *NEW* Complete-Capture<sup>TM</sup> ultra-quiet limb pocket and bow assembly matched with a precision machined riser designed to slide, locate, and lock in one of three shooting positions located between an innovative upper and lower extruded and machined aluminum UL TriLoc<sup>TM</sup> barrel assembly. The riser secures the barrel components up front and an extruded and machined trigger/barrel receiver secures them at the back end.

- NEW 5 lb. RollerTouch Trigger
- NEW HL Limb and Bow Assembly
- Synthetic String and Cables
- Rich bronze anodized machined aluminum components

Bow Pictured in "Long" Position

See back pages of catalog for bow features, specifications, and purchase options.

Available with or without the ACUdraw or ACUdraw 50.

The PRO SLIDER Package Includes:

- 3x Multi-Line Scope
- 7/8-inch Fixed Dovetail Scope Mount
- MossyOak<sup>®</sup> NEW Break-Up<sup>®</sup> detachable 2/3 Arrow Quiver
- 3-pack of 20-inch Pro Elite Carbon arrows
- Three 100-grain practice points
- TenPoint Staff Shooter Field Cap
- Owner's instructional DVD with exciting over-the-shoulder hunts

WHILE THESE NEW 6 POINT SERIES ADDITIONS HAVE PERSONALITIES OF THEIR OWN, THEIR GENETICS ARE UNMISTAKABLY TENPOINT.

- NEW 5 lb. RollerTouch Trigger
- TL-4 Limb and Bow Assembly
- Synthetic String and Steel Cables
- Standard black anodized machined aluminum components

Bow Pictured in "Long" Position

Available with or without the ACUdraw or ACUdraw 50.

See back pages of catalog for bow features, specifications, and purchase options.

*Note:* Dovetail Scope Mount and choice of scope purchased separately.

Slider available as bow only  
(accessories may be purchased separately)

SLIDER

Double-dip fluid-imaged in Mossy Oak<sup>®</sup> NEW Break Up<sup>®</sup>, both models are affordable, lightweight and quiet; featuring a great looking new stock, molded to accept either of TenPoint's highly regarded cocking mechanisms: the ACUdraw and ACUdraw 50. Both models also accept the popular SteddyEddy Monopod System.

Included with SLIDER:

Rear Peep and Front Sight with One Pin  
(7/8-inch Fixed Dovetail Scope Mount and choice of scope purchased separately)

TenPoint Staff Shooter Field Cap

Owner's instructional DVD with exciting over-the-shoulder hunts

PRO SLIDER

	Draw Weight	Power Stroke	FPS

# CORE FEATURES

## TenPoint Series Core Performance Features

All TenPoint Series crossbows are made with a group of Core Performance Features that insure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

Patented VIBRA-CUSH
Patented DFI
OTT Limb-Pocket System
ACUdraw-Ready FST Stock
ACRA-ANGLE Barrel
Power Limb-Tip Caps
PBT Performance Cable Saver
5-Point Stock-to-Barrel Mounting System
Advanced Quad-Limb Technology
Ambidextrous Automatic Safety
Tunable Synthetic Cable Yokes
Heavy-Duty Riser Rod and Trigger-Housing Clamp-Plate

# CORE FEATURES

## 6 Point Series Core Performance Features

Like the TenPoint Series, our two **NEW** 6 Point Series models are built on an equally impressive foundation of core features that mirror most of those in the TenPoint Series. While the new Slider crossbows are conceptually very different from our original TenPoint Series' models, it is easy to recognize the gene pool from which they come.

Patented DFI
Complete-Capture Limb-Pocket System (patent pending)
ACUdraw-Ready Two-Piece Stock (patent pending)
UL TriLoc Multi-Position Barrel Assembly (patent pending)
RollerTouch Trigger (patent pending)
Power Limb-Tip Caps
PBT Performance Cable Saver
Advanced Quad-Limb Technology
Ambidextrous Automatic Safety
Tunable Synthetic Cable Yokes

Black dot indicates a core performance feature. ●

Optional TenPoint 2/3 Arrow Detachable Quiver

Both models also accept the popular SteddyEddy Monopod System

The patented ACUdraw is the most advanced solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

Improved for 2006, we have lightened the ACUdraw's self-centering string claw with new DuPont Zytel® claw tops, improved draw cord retraction with re-designed string guides, and replaced the rubber "O" ring safety-pawl spring with a more durable conventional coil-spring.

- Reduces draw weight to about 5-pounds when operated manually
- Belt holster for ACUdraw crank included
- Unlike other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or pre-installed

**Patented**

## Two Great Cocking Devices – Making Bowhunting Accessible to Everyone.

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means - in many cases taking technological shortcuts - to boost arrow speed in order to sell their crossbows. All of those means - using heavier limbs, longer power strokes, and reverse cams - have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

TenPoint responded to the need before all others by developing its two integrated, convenient, and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50.

The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort. Both devices load the bow string accurately every time.

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

This year we have introduced self-adhering T-Handle Stability Pads with steel disks imbedded in them to improve the ACUdraw 50 cocking device. The new pads adhere to the butt stock and create a magnetically improved, noise-free handle storage platform.

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope around your neck or to stash it in your fanny pack
- When not in use, powerful mini-magnets hold the handles securely and silently in place
- Available pre-installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

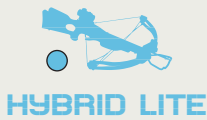

**Patented**

The ACUdraw 50 Handles retract and store neatly against the stock when not in use.

# ACCESSORIES

The colored dots let you know if an accessory is available for a specific crossbow model.

## 2/3 ARROW FRONT MOUNT QUIVERS ●●●●●●●●

TenPoint’s 2/3 arrow quivers feature our instant detach design so you can quietly and quickly attach and detach them by tightening or loosening two lock-down knobs. Mount directly to your crossbow or use with optional Sidewinder™ Hip Quiver Conversion System (HCA-022).

- HCA-015-NBU 2/3 Arrow Front Mount Quiver in Mossy Oak® NEW Break-Up®
- HCA-015-HG 2/3 Arrow Front Mount Quiver in Realtree Hardwoods® Green HD™

## SIDEWINDER™ HIP QUIVER CONVERSION SYSTEM ●●●●●●●●

Made for TenPoint by Sports and Recreation Technologies, this unbreakable hip-mounted Nylon ST quiver adapter carries any quick-disconnect quiver. It mounts right or left on your hunting belt, and positions your quiver at any angle you choose. Whether stalking, sitting, or kneeling, your arrows are always accessible. No leg strap, no interference, and no arrow flagging.

- HCA-022 Sidewinder™ Hip Quiver Conversion System

## SLINGS ●●●●●●●●

These Deluxe Slings are unparalleled in quality and construction. They feature a longer design with non-slip, double-thick reinforced shoulder pads and heavy-duty adjustable nylon straps (swivels included).

- HCA-002-HG Deluxe Realtree Hardwoods® Green HD™ Sling with swivels
- HCA-002-NBU Mossy Oak® NEW Break-Up® Sling with swivels

## CROSSBOW CASES ●●●●●●●●

TenPoint’s BowMax™ airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment. Manufactured for TenPoint by Plano Outdoor Products, it contains all the room necessary to secure your crossbow and all of its accessories. Small accessories store neatly in a StowAway utility box included with every crossbow case. Closes securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded rubber grip.

- HCA-200 TenPoint BowMax™ Hard Case
- HCA-201-HG Deluxe 2 pocket Case in Realtree Hardwoods® Green HD™
- HCA-201-NBU Deluxe 2 pocket Case in Mossy Oak® NEW Break-Up®

# ACCESSORIES

## SHOOTING AIDS ●●●●●●●●

### SteddyEddy

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteddyEddy telescoping two-section monopod insures motion-free shooting while seated in a treestand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, its patented Posi-Lock System™ allows you to quickly set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a completely maneuverable ball-joint mount or with the new Ball Stem Mounting Bracket and ball-joint (HCA-039). It clamps conveniently under your stock when not in use. All SteddyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

HCA-030 SteddyEddy Crossbow Monopod System

### NEW SteddyEddy Ball Stem Mounting Bracket

Easily installed, the new Ball Stem Mounting Bracket gives you more options for mounting the SteddyEddy ball-joint and your sling swivel stud. Use this new bracket to retrofit crossbows with the new and improved larger diameter Ball Stem mounting screw or to give yourself the option of mounting your front sling swivel stud on the left or right side of the crossbow.

HCA-039 SteddyEddy Ball Stem Mounting Bracket

## PATENTED ACUDRAW™ AND ACUDRAW 50™ ●●●●●●●● (also shown on pages 24 & 25)

Your dealer – or you if you have the proper tools – can install either of these two incredible cocking devices. Kits include a template for drilling the receiver holes (drill, bits, and hole cutter not included) in pre-2003 TenPoint models. Receiver holes are pre-molded in current models. Installation instructions are included.

HCA-000-B-II ACUdraw Cocking Mechanism  
HCA-000-B-A50 ACUdraw 50 Cocking Mechanism

### NEW T-Handle Stability Pads

Made from tough, closed-cell, resilient rubber, these new pads easily adhere to the butt stock to create a magnetically-improved, noise-free handle storage platform.

HCA-452 T-Handle Stability Pads

### ACUdraw Replacement Accessories (shown collectively at right)

HCA-400 ACUdraw Draw Cords (two-piece for pre-1998 claw)  
HCA-401 ACUdraw Draw Cords  
HCA-411 ACUdraw Retraction Spring (post 1998)  
HCA-421 ACUdraw Claw with self-centering draw cord  
HCA-426 ACUdraw Claw Holder  
HCA-428 ACUdraw Claw III Kit (includes claw, holder, and draw cord)  
HCA-430 ACUdraw Hand Crank (replacement handle only)  
HCA-435 ACUdraw Hand Crank and Holster Combo  
HCA-450 ACUdraw 50 Replacement Draw Cords  
HCA-451 ACUdraw 50 Replacement Retraction Spring

## CABLE SAVERS

Made from Polybutylene Terephthalate (PBT) these two **NEW** cable savers provide an improved (slick and dimensionally stable) carriage for your cables shot after shot. PBT is known for its strength, lubricity, rigidity, and durability, a perfect combination of characteristics required for an effective cable saver.

# ACCESSORIES

## LUBRICANTS ●●●●●●●●

These three lubricants are critical to maintaining all crossbows in good working order and to extending the life of your string and cables. The Flight Rail and Trigger Lube, unlike other manufacturers’ gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance. Carry the convenient single-use oil wipes in your fanny pack for on-the-go cleaning and lubrication needs. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

- HCA-110 String & Cable Wax
- HCA-111 Flight Rail and Trigger Lube
- HCA-112.12 Flight Rail Oil Wipes (12 foil wrapped wipes per package)

## BROADHEADS ●●●●●●●●

Not sure whether you want to shoot fixed blade broadheads or expandable broadheads? Try them both. New Archery Products® offers packages for both Thunderhead® fixed blade heads and Spitfire® expandable heads.

- HEA-297 New Archery Products’ Spitfire® 100-grain, 3-Blade Mechanical Broadhead 3-pack
- HEA-298 New Archery Products’ Thunderhead® 100-grain, Fixed Broadhead 3-pack

## FOOT STIRRUP ●●●●●●●●

- HCA-009 Standard Rubber Coated Foot Stirrup

## SILENCERS

TenPoint’s Progressive Dampening Package,™ assembled exclusively for crossbows, is a trio of accessories that progressively reduces decibel level and shortens noise duration when used in combination. It features a set of New Archery Products’ ThunderBlox™ limb vibration dampeners, TenPoint’s Wedgie™ arrow retention spring dampener, and TenPoint’s VIBRA-DAMP™ cable suppressors. Two versions are available – one for split-limb crossbows and one for solid-limb crossbows.

- HCA-136 Progressive Sound Dampening Package – for split-limbs ●●●●●●●●
- HCA-137 Progressive Sound Dampening Package – for solid-limbs

## TRIGGER ACCESSORIES AND PARTS

The Fixed Position Accessory is used to convert pre-2004 models equipped with RangeMaster® Rear Scope Adjustment Mechanisms to a fixed position scope mounting system. This accessory, along with a few parts from the RangeMaster® system, replaces the RangeMaster® thumb lever and locks the sight mount solidly in a fixed position.

## SCOPES ●●●●●●●●

### 3x Pro-View Scope™

Calibrated for crossbows that shoot in the 300 fps range, this 20, 30, and 40-yard combo illuminated dot and crosshair configuration is housed in a lightweight seven-inch aluminum tube equipped with fully-coated 3x optics. The dots are positioned at the intersection of each duplex crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color.

**HCA-097** 3x Pro-View Scope w/ 7/8" rings

### Quad III Scope™

Available in matte black or Mossy Oak® NEW Break-Up®, this new zero-power 40mm scope has an integrated, adjustable 7/8-inch mounting system that requires no rings. The Quad III features four objective views including your choice of three dots within a ring, three dots within a diamond, three dots by themselves, and three crosshairs – all designed for 20, 30, and 40-yard shots with crossbows shooting in the 300 fps range. Each objective can be viewed in two colors, red and green. The light intensity of each view is regulated by a five-position rheostat.

**HCA-095M** QUAD III (Mossy Oak® NEW Break-Up® camo finish)

**HCA-096M** QUAD III (black matte finish)

### 30mm Multi-Dot Scope™

This zero-power scope with eleven brightness settings and all-aluminum construction delivers pinpoint accuracy in all light conditions. It features 20, 30, and 40-yard dots calibrated for crossbows that shoot approximately 300 feet-per-second.

**HCA-083M** 30mm Multi-Dot Scope with 3/8" mounting rings (black matte finish)

**HCA-084M** 30mm Multi-Dot Scope with 7/8" mounting rings (black matte finish)

### 3x Multi-Line Scope™

Perfectly proportioned for a crossbow at only 7" long, this light, compact scope features fully-coated three-power optics, three-line duplex crosshairs (20, 30, & 40-yard lines), and all-aluminum construction. An exceptional value.

**HCA-087** 3x Multi-Line Scope with 3/8" mounting rings (black matte finish)

**HCA-088** 3x Multi-Line Scope with 7/8" mounting rings (black matte finish)

### 40mm Multi-Dot Scope™

This zero-power 40mm scope has an integrated, adjustable 7/8-inch mounting system that requires no rings. Calibrated for 20, 30, and 40-yard shots with eleven light-intensity settings. At a cost-conscious price level this high quality scope will give you years of effective crossbow hunting use.

## 7/8-INCH FIXED DOVETAIL SCOPE MOUNT ●●●●●●

Our machined aluminum Weaver style 7/8" Fixed Dovetail Scope Mounts come standard on the Elite, Hybrid Lite, Pro Fusion and Pro Slider models and are available as an option for the Titan TL-4 and Slider.

- HCA-078 7/8" Fixed Dovetail Scope Mount / black
- HCA-072 7/8" Fixed Dovetail Scope Mount / bronze
- HCA-076 7/8" Mini Dovetail Mount – Fixed / black (for 40mm scopes)

## SCOPE RINGS ●●●●●●●●

Regardless of the TenPoint scope you wish to mount or your crossbow's dovetail size, we have the rings to handle the job.

- HCA-080 1" Scope Rings with 3/8" Base
- HCA-081 1" Scope Rings with 7/8" Base
- HCA-082 30mm Scope Rings with 3/8" Base
- HCA-092 30mm Scope Rings with 7/8" Base

## SIGHTS ●●●●●●●●

Standard on the Titan TL-4 and Slider models without scopes, this sturdy machined aluminum sight bracket features two pin slots and can be mounted on the riser. Comes with one pin. Additional pins available (HCA-050 Standard Sight Pin).

- HCA-041 Front Sight Bracket w/Pin  
Standard on the Titan TL-4 and Slider models without scopes, the Rear Peep Sight mounts in a fixed position.
- HCA-060 Rear Peep Sight  
Rear peep will not fit on a 7/8" mount.  
Call Customer Service at 330.628.9245 for details on purchasing a Peep and Pin Conversion Kit.

# CROSSBOW ARROWS

## The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With Moon or SuperBrite™ Blunt Nocks

### TWO CROSSBOW ARROWS AVAILABLE:

**Carbon Fiber Shafts – 20-inch 22/64<sup>th</sup>**  
For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64<sup>th</sup> diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Gold Tip,® the Pro Elite is a masterpiece of precision engineering, strength, and accuracy.

Advanced carbon fiber Pro Elite arrows are laser inspected for straightness to within .003" and hand-sorted for weight tolerances to within two grains per dozen. They come equipped with brass inserts and TenPoint's patented SuperBrite blunt nocks or CPC moon nocks, and they are fletched with Norway DURAVANES.™

The Pro Elite Carbon Arrow is also available in **Premium Hunter** versions with individually tuned NAP® Thunderhead® 100-grain broadheads (6-pack) or with 100-grain Spitfires® (3-pack-not show) – all installed and ready to shoot. Each Premium Hunter arrow is precision tested for trueness, and weight-matched for accuracy. The Premium Hunter is only available with SuperBrite blunt nocks in 3 or 6-packs.

**Aluminum Shafts – 20-inch XX75 Camo 2219's**  
As an Easton Aluminum Complete Crossbow Arrow Resource, TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton shafts to produce the highest quality aluminum crossbow arrows available today.

This three-color camo shaft is the proven industry standard for reliable results. Available in black CPC moon nocks or TenPoint's patented SuperBrite blunt nocks, both shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES.™

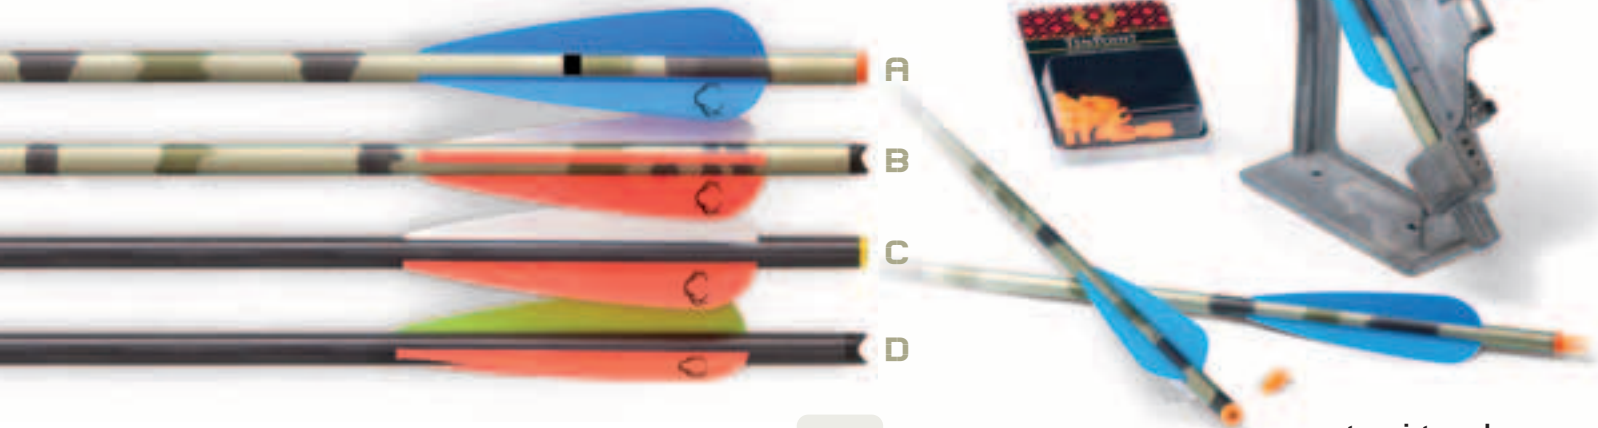

TenPoint crossbow arrows are available in 72-packs, 6-packs, or 3-packs (3-packs not pictured).

### ALL BOW, NO BULL WITH TENPOINT CROSSBOWS

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All speed tests were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point (420-grains total). The chronograph was positioned 18-inches in front of the crossbow for all shots.

*Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.*

- A – SuperBrite blunt nock for 2219 aluminum shafts
- B – Barnett and Horton CPC moon nock for 2219 aluminum shafts
- C – SuperBrite blunt nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shafts
- D – Moon nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shafts

Pro Fusion & Pro Slider	HCA-115 or HCA-115C	13	HCA-124 or HCA-124C	13
Pro Elite, Elite, Elite QX-4 & QX-4	HCA-115 or HCA-115C	13	HCA-124 or HCA-124C	13

**Note:** When installing cables, twist the bottom yoke (located at the end of each cable) four times. Doing so will eliminate limb twist when cocking your crossbow.

# CROSSBOW FEATURES

							FEATURES
●	●						3 1/2 lb. PowerTouch trigger, with premium MIM action components and safety slide. Set at optimum travel and touch for a crisp, smooth release. The best crossbow trigger made today.
		●	●		●	●	<b>NEW</b> 5lb. RollerTouch trigger features a double-roller system which reduces friction and significantly lightens trigger pull.
				●			<b>NEW</b> 6lb. DropLatch trigger features a redesigned trigger finger using MIM technology to dramatically improve the trigger pull.
●	●						GripSafety secondary safety (Patent Pending), which helps protect the fingers and thumb on the fore-grip hand. Left-handed installation available on request.
		●		●	●	●	Dupont Zytel® trigger box top. Made from a versatile polymer engineered for flexibility, dimensional stability under heavy loads, extreme temperatures and humidity.
●	●	●	●	●	●	●	Patented DFI™ (dry-fire-inhibitor). Prevents dry-firing the crossbow when no arrow is loaded on the flight deck.
●	●	●	●	●			Ambidextrous Automatic Safety.
●	●	●	●	●			OTT (over-the-top) limb pocket and Zytel® “lift & separate” limb suspension system, the ultimate in limb stability and sound reduction.
					●	●	<b>NEW</b> Complete-Capture limb pocket isolation system. Each limb is fitted inside a glove-like polymer cushion captured inside a machined aluminum pocket, which is then bolted to the riser, producing superior stability and noise dampening.
●	●		●				Premium field-proven ST quad-limbs with synthetic cables and tunable yokes. Custom engineered for our 185-pound models, the ST is the finest limb design on the market today.
		●			●		<b>NEW</b> 175-pound HL quad limbs with Fast Flight string & cables. Designed specifically for the Pro Fusion and Pro Slider crossbow models, this new design borrows from the simplicity of TL-4 Limb and the strength of ST Limb to produce a design perfectly suited to this 175-pound draw weight.
				●		●	TL-4 quad limbs with steel cables and tuneable synthetic yokes. A simple yet highly effective, durable design, perfect for our 165-pound draw weight models.
●	●	●	●	●	●	●	CADD designed and finite element analysis-tested, precision-machined riser. Precision engineering for precision shooting.
●	●				●		65 Rockwell Hardcoated and Teflon® impregnated barrel surface.
●	●		●	●			Anodized, machine-finished ACRA-ANGLE aluminum barrel. Provides the ultimate in dimensional integrity for perfect arrow flight.
					●	●	<b>NEW</b> UL TriLoc machined aluminum barrel assembly. An innovative upper and lower extruded and machined aluminum barrel design between which the Slider or Pro Slider’s riser locates and locks in one of three separate shooting positions.
●	●	●	●	●			FST-IV style stock. TenPoint’s original functionally superior thumbhole design.
		●					Molded combination stock and barrel made from Verton®, a durable, lightweight polymer with superior structural characteristics and precise dimensional integrity. Promotes accurate arrow flight with minimal friction.
					●	●	Verton® two-piece stock. While the butt-stock supports the trigger and barrel receiver, the fore-grip locates in either of two shooting positions and is safety-engineered to keep the hunter’s hand properly positioned while shooting the bow.
●	●	●	●	●	●	●	ACUdraw and ACUdraw 50 compatible.
●							Adjustable aluminum 7/8" Weaver-style dovetail scope mount locked in position with TenPoint’s Dovetail Fixed Position Accessory (HCA-074).
	●	●	●		●		Fixed 7/8" Weaver-style aluminum dovetail scope mount.
				●		●	Fixed sight bridge with peep and pin sight system. Scope compatible. Optional 7/8" Fixed Dovetail Scope Mount (HCA-078) required to mount a scope.
●	●	●	●	●	●	●	Limited Lifetime Operational Warranty (See Owner’s Manual for limitations)
