welcome to the
NEXT GENERATION

Corporate Statement

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance, and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect, and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently, and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions, and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

COMPLETE PRODUCT GUIDE | **2007**

To Our Customers

2007 will be my 44th year in the Archery/Shooting Sports Business. I must admit, it very well could be the most exciting. Here is why:

- Recent reports in the national media suggest that the trend of declining numbers of hunters may be leveling off and actually may be headed for a reversal over the next 20 years.
- The increase in women hunters is particularly encouraging. According to the National Sporting Goods Association, the number of women bowhunters increased 176% between the years 2001 and 2005 to a total of 786,000.
- There is good news on the youth front as well. This hunting season in Ohio there are more than 20,000 new young hunters afield due in large part to the state's special youth hunting seasons and its new apprentice hunting license program. The apprentice license allows a first-timer to give hunting a try – supervised of course- without having to complete a hunter education course. This is the first year in what seems like ages that the number of youth hunters in Ohio exceeded the loss of resident adult hunters.

These developments are not accidental. There are many organizations like the National Wild Turkey Federation (NWTf), Safari Club International (SCI), the National Rifle Association (NRA) and the Archery Trade Association (ATA), to name a few, that have effective programs targeted at women and youngsters. And of course state wildlife agencies are increasingly looking at regulatory changes and innovations to grow and retain the number of licensed hunters and improve revenues.

What is often overlooked, however, is the role the crossbow plays (or can play) in the effort to recruit, retain and provide recreation to all hunters.

Because cocking aids are increasingly common with crossbows, most youngsters, women, and elderly hunters can now manage using a crossbow when they may not be able to manage using a vertical bow. Bowhunters who no longer have time to practice with vertical bows can continue to hunt the archery season confidently with crossbows. In fact, if the truth be told, there are plenty of unskilled vertical bowhunters who should be hunting with crossbows. And, those who have never hunted before can enjoy early success with crossbows. Success is a great predictor that new and old hunters will continue to hunt.

It is time to get past the bickering and fighting over what constitutes archery equipment. All of the evidence suggests that crossbows pose no threat to vertical bowhunters, bow seasons, or deer harvests. On the contrary, like the organizations listed above, crossbows play a significant role in growing the sport, attracting new hunters, and retaining the ones we already have.

The Federal Government defines the crossbow as "archery equipment" and requires the companies that make them to pay a Federal Excise Tax on every one they sell. That tax, collected from you, the crossbow purchaser, helps fund state wildlife programs across the entire country.

I am personally committed to designing and developing hunter-friendly products that help recruit, retain and provide additional recreation for all hunters. Here at TenPoint we are especially committed to innovations that improve our products and grow our sport.

Good hunting,

Richard L. Bednar - CEO

2006 Ohio Buck,
28 1/2" main beams.

TENPOINT CROSSBOWS HAVE UNPARALLELED ACCURACY.

You will read glowing claims about accuracy from all crossbow manufacturers, but claiming accuracy is not the same as delivering it.

In 2003, *Aventure Chasse Peche*, a popular French-Canadian hunting and fishing magazine, published an exhaustive crossbow accuracy comparison test in one of its issues. Top-of-the-line models from all of the major crossbow manufacturers – American and Canadian – were vigorously tested at distances out to 150 feet (50-yards). None of the other manufacturers' models could match TenPoint's 7/8-inch grouping at 100 feet or 1 1/2-inch grouping at 150 feet. Also, unlike the competition, the TenPoint model survived the extensive test without any breakdowns, operating problems, or signs of premature wear.

The best test, however, is your test. Before you make your crossbow purchase, shoot all of the models you are considering.

- You be the judge

TenPoint Crossbows have great balance, fit, and feel.

A number of years ago we used the following headline in our advertising campaign: "Shoulder them. Shoot them. You'll understand the difference between the best and the rest." Aside from comparing shooting accuracy, you need to compare how a crossbow feels when you shoot it and – like a comfortable hunting boot – how it fits. TenPoint crossbows are designed for balance and shooting comfort. So, take us up on this suggestion:

- Shoot a TenPoint and see how it fits

TenPoint Crossbows have optimum - and honest - power and speed.

Many of the speed and energy claims advertised by other crossbow manufacturers are either misleading or untrue. Using a relatively heavy 420-grain arrow, our top three models shoot a true 343, 333, and 311 fps respectively. With those speeds and the 420 grain arrow combination, they generate potent foot pounds of kinetic energy ranging from 90.2 fp to 109.7 fp. Equally important, however, TenPoint crossbows produce that power and speed on a frame that is quite manageable to load and that produces a minimum of shock, hammer, and noise.

- Compare loading and shooting TenPoint crossbows to other brands

TenPoint gives you superior value for your hard earned dollars.

If you compare the engineering, quality, performance, and durability of TenPoint crossbows to our competitors' models, we are confident you will agree that we offer considerably more value for your dollar.

In 2004 our then entry-level Titan TL-4 model won **Inside Archery Magazine's Best Buy Award** (selected by dealers across the country) over all other manufacturers' models. In 2005 our top-of-the-line Pro Elite model won the same award.

- There is no better value on the market today

What Makes TenPoint Crossbows Superior to Other Brands?

In each of the thirteen years TenPoint has been manufacturing crossbows, we have never failed to introduce innovations or to improve our products. And, in most cases, the advancements we have made originated from customer input. Since 1994, we have secured eight patents with others pending or being filed.

No other crossbow manufacturer comes close to this record of technological achievement.

Below are Some of Our More Significant Innovations:

PATENTED TRIGGER TECHNOLOGY

TenPoint has two triggers designed to match-up with the performance characteristics of the models that use them. Our premium bow models (The Phantom CLS™, Pro Elite HP™ and Blazer HP™) feature the patented 3 1/2 pound machined PowerTouch™ trigger, made with MIM (Metal Injection Molded) action components. It is the finest crossbow trigger made today.

The remaining models are equipped with our innovative 5-pound RollerTouch™ trigger (patent pending). The RollerTouch features a double-roller system installed at the top of the trigger finger that allows the finger to roll off the string latch's sear surface rather than to slide off. This rolling action significantly reduces the friction between the two parts.

PATENTED DFI™ (Dry-Fire-Inhibitor)

In 1996 TenPoint introduced the DFI, which prevents dry-firing our crossbows when no arrow is loaded on the flight deck. The addition of this technology to our entire crossbow lineup has virtually eliminated the potentially severe damage and/or injury that can be caused by a dry-fire.

PATENTED ACUdraw™ & PATENTED ACUdraw 50™

TenPoint's convenient and user-friendly cocking aids have made our models the crossbows of choice for those who cannot or do not wish to manually load today's heavier draw weights. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aids available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 24-25 for details.

LIMB-POCKET TECHNOLOGY

In 2004 we introduced the OTT™ (Over-the-Top) limb pocket suspension system to our TenPoint Series models. Using Dupont Zytel® suspension pads to lift and separate the limbs, this technology isolates the limbs from the riser and then securely captures the entire assembly with a machined aluminum outer limb-pocket. The OTT system dramatically increases limb stability and slashes noise and vibration levels by 50%.

Our 6 Point™ Series models (Slider™ and Pro Slider™) are equipped with an equally effective and innovative Complete Capture™ limb pocket suspension system. First, a polypropylene sleeve-cushion fits securely inside the machined aluminum limb pocket or glove. The limbs slip inside the cushion, and the Complete Capture assembly lodges securely on the riser's custom-machined surface grid where it is bolted in place. The end result is an ultra secure and remarkably quiet system, which isolates the limbs from any contact with metal parts.

PATENT PENDING GRIPSafety™

Installed in the fore-grip of all TenPoint models with PowerTouch triggers, the GripSafety prevents pulling the trigger without first depressing and holding this secondary safety in place with your fore-grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore-grip and below the barrel's flight deck. Installed on a standard basis for right-handed shooters, left-handed installation is available at no charge when placing a new bow order.

LIMB TECHNOLOGY

TenPoint now offers four limb configurations specifically designed for optimum performance on the models that use them: TL-4 Limbs™ for 165-pound models, HL Limbs™ for 175-pound models, ST Limbs™ for the Pro Elite HP, and the **New** 12-inch 185-pound IsoTaper Limbs™, featured on our **New** Phantom CLS model. With a performance-matched limb for each crossbow design, combined with a performance-matched trigger, you can count on consistently superior accuracy, durability, and dependability up and down the entire lineup.

BARREL TECHNOLOGY

The TenPoint Series' ACRA-ANGLE™ and the 6 Point Series' UL TriLoc™ barrels are the key to the unparalleled shooting accuracy of TenPoint crossbows. Both are designed to allow shooters to load the bow string with their hands resting against the barrel; thereby promoting accurate loading, which is essential to crossbow shooting accuracy. And, both are designed to create arrow launching platforms with unsurpassed dimensional integrity for accurate, repeatable arrow flight.

HP™ & MR™ CAM STABILITY BUSHINGS

TenPoint's **New** Cam Stability Bushings, while simple in concept, perform several important functions. First, they provide an ultra stable sleeve to support and stabilize the axles. Second, they help eliminate wheel lean when loading the crossbow. And, third, they help establish precise string tension on the barrel surface, to promote accurate arrow flight and to reduce serving wear.

What's New - 2007

Headlining the 2007 TenPoint lineup is the all NEW and revolutionary 343 fps Phantom CLS.

Designed for optimum performance in the woods with the hunter in mind, this sleek and maneuverable crossbow is only 17 1/2-inches wide from axle-to-axle when cocked. It's one of the most compact crossbows on the market today and introduces a new generation of crossbow technology to the TenPoint lineup.

While the Phantom CLS includes all of the traditional Core Performance Features (see page 18-20) TenPoint customers have come to expect, what separates it from the rest of the lineup is its **New** Compact Limb System Technology (CLS), a collection of bow assembly components that collectively produce a shot that is so smooth, quiet, and vibration-free that it is difficult to believe it delivers its payload with such power and speed.

The Phantom CLS comes completely accessorized, bore-sighted and ready to shoot right out of its airline-approved hard case. The package includes the purchaser's choice of either of TenPoint's patented ACUdraw™ or ACUdraw 50™ cocking mechanism and either of two scope options, TenPoint's 3X Pro-View or the **New** Pro-40 Multi-Dot.

Double-dip fluid imaged in the new REALTREE® APG HD™ camo, the Phantom CLS is the perfect blend of stunning looks and unparalleled performance.

PHANTOM CLS

The CLS Components Include:

A highly durable machined integrated (one-piece) riser and foot stirrup, which adds unparalleled strength to the entire bow assembly.

New 185-pound, 12-inch IsoTaper Limbs™, attached to the riser with our field-proven OTT™ Limb Pocket System, a virtually vibration-free design.

New maximum rotation high-performance MR Cams™, engineered to generate exceptional speed on an incredibly compact frame with a hunter-friendly 13-inch power stroke.

Brownell Ultra-Cam™ cables and string to insure stretch-free configuration for more consistent and reproducible power and speed.

BLAZER HP

Another addition to TenPoint's top-of-the-line, high performance models.

The **New** Blazer HP combines a selected blend of proven TenPoint technology with new CADD engineered high-performance HP Cams™ to create a potent combination of speed, accuracy, and performance.

Also double-dip fluid imaged in REALTREE® APG HD™, this model features TenPoint's field-proven 175-pound HL limbs, machined riser, and OTT sound-deadening limb pocket combination outfitted with high-performance Brownell Ultra-Cam™ cables and string. It also features our premium machine-finished and bronze anodized ACRA-ANGLE aluminum barrel, equipped with our patented 3 1/2-pound PowerTouch™ trigger.

The Blazer HP can be purchased as an accessorized package or by itself with one of two scope options, the 3X Multi-Line Scope or the **New** Pro-40 Multi-Dot Scope. As with all TenPoint crossbows, the Blazer HP will accept either of the user-friendly patented ACUdraw or ACUdraw 50 cocking mechanisms.

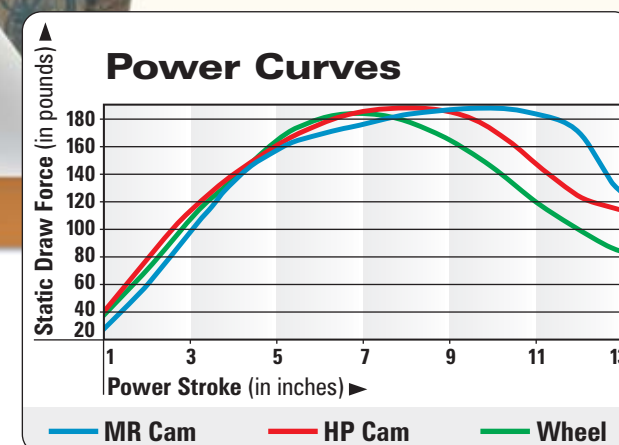

Shooting at 311 fps, the Blazer HP is priced right for those looking to move up to a high-end, precision performance crossbow.

New Technology:

HP™ and MR™ Cams

The HP Cam, used on the **New** Blazer HP and improved Pro Elite HP, and the MR Cam, another key component to the Phantom CLS' Compact Limb System Technology, were designed by TenPoint's Engineering Department to maximize power and to use the crossbow's power stroke efficiently to achieve maximum arrow velocity.

IsoTaper™ Limbs

A key component of the Compact Limb System Technology that powers the new TenPoint Phantom CLS crossbow, the 12-inch pultruded fiberglass IsoTaper limb is unique in that it is not ground to create a conventional hinge point like most limbs. Instead, it is ground to a static taper from thick to thin, starting at the butt end of the limb and extending to its hinge. The result is a limb of superior strength, without hot spots, that deflects relatively consistently across its entire surface.

What's New - 2007

Accessories:

4-Arrow Instant Detach HX Quiver™

Weighing only 6 ounces empty, TenPoint's **New** light and sturdy HX Quiver™ features an ergonomically designed four-arrow cup made of ABS and a rubber arrow gripper with a shape suggestive of our corporate antler logo. These parts are connected by two ultra-light carbon fiber rods that makeup the quiver's backbone. The double-rod backbone is stabilized with a two-sided polycarbonate X-Connector™ that snaps together while positioning and adjusting the quiver for left or right-handed use, and then bolts into a locked position.

Conveniently, the cup and rubber gripper are molded with raised nubs that protect arrow fletching from getting crushed when bench shooting or when placing the crossbow on a table, floor, or on the ground.

The backside of the X-Connector is fitted with a Bohning Lever Lock mounting system which screws into the underside of the crossbow, allowing the user to instantly attach or detach the quiver.

Pro-40 Multi-Dot™ Scope

The **New** Pro-40 is a zero-power 40 mm multi-dot scope with an integrated 7/8-inch mounting system that requires no rings. Its three illuminated dots, calibrated for 20, 30, and 40-yards for crossbows that shoot in the 300 fps range, can be rendered in red or green to suit individual hunting and light conditions. The light intensity of both color views is regulated by a five-position rheostat.

This logo designates a new item for us in 2007. Look for it throughout this catalog.

CareKit™

Included in all Phantom CLS and Pro Elite HP crossbow packages or available as a stand-alone accessory, TenPoint's **New** CareKit™ includes three important maintenance tools packaged in a versatile multi-cavity translucent plastic mini-case with plenty of extra room for other bow maintenance items.

Microlon® Precision Oiler

Microlon is not an oil treatment; it is a metal treatment. It includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin particles impregnate the pores in metal surfaces to create a dry film lubricant with one of the lowest coefficients of friction of any material known to man.

Perfect for crossbow rails, this high-quality lubricant comes in a tube fitted with a precision applicator needle that also makes it easy to get to hard-to-reach areas such as the inside of a trigger mechanism.

TenPoint String Wax and Conditioner™

Packaged in a convenient chap-stick sized tube and made from all natural compounds, this **New** string wax and conditioner both lubricates and rejuvenates bow strings and cables. It is scent-free and protects critical string fibers by resisting penetration by water. It greatly reduces string friction and abrasion against cable slides and wheels or cams.

TenPoint LensPen™

Two lens treatment tools in one, this clever accessory features a soft fiber lens brush that telescopes out of one end of its pen-sized tube and an abrasive-free lens cleaning pad housed underneath a cap at the other end. The brush gets rid of scope lens dust and the cleaning pad eliminates smudges and cleans and polishes lens surfaces without damaging or scratching the glass.

Two Improved Models:

TITAN TL7

The 2007 Titan TL-7 now features a one-piece molded Verton® FST thumbhole stock and barrel combination completely double-dip fluid imaged in ADVANTAGE TIMBER HD. In addition, we have replaced the DropLatch™ trigger with the smoother and lighter pulling 5-pound RollerTouch™ trigger.

As in the past, the Titan TL-7 is available as a package with the purchaser's choice of a 3X Multi-Line or the **New** Pro-40 Multi-Dot Scope or as a bow only, equipped with a Rear Peep and Front Sight Bracket with one Pin.

The new modifications combine to improve shooting accuracy, reduce weight, and improve handling, making this workhorse a better value than ever, even outperforming many other manufacturers' top-end models.

PRO ELITE HP

The Pro Elite HP is a new and improved version of our former top-of-the-line Pro Elite.

By extending the barrel length by one-inch and replacing the wheels with new CADD engineered high-performance HP Cams outfitted with Bownell Ultra-Cam™ cables and string, we have increased the speed to a potent 333 fps.

Also new for 2007, the Pro Elite HP will be available both as a complete package as in the past or as a bow by itself, equipped with either of two scope options, our 3X Pro-View Multi-Line or our **New** Pro-40 Multi-Dot Scope.

PHANTOM CLS™

Designed with the bowhunter in mind for optimum performance in the woods, the sleek, compact, and maneuverable Phantom CLS introduces the next generation of crossbow technology to the world-renowned TenPoint lineup.

NEW 07

343 FPS*

185 LB. Draw Weight

109.7 FP Kinetic Energy*

Available Only as a Complete Package

Fully-assembled, bore-sighted, and ready for the woods right out of its BowMax™ hard travel case

Available With either: the Patented ACUdraw or ACUdraw 50 cocking mechanism

2 Scope Options:
3X Pro-View or
New Pro-40 Multi-Dot

See back pages of catalog for detailed bow features, specifications, and purchase options.

*with recommended arrow

The all **New** CLS components include a robust one-piece machined riser and foot stirrup, 12-inch 185-pound IsoTaper limbs equipped with maximum rotation CADD engineered MR Cams and Brownell Ultra-Cam™ string and cables, and a hunter-friendly power stroke. Combined, these elements form an ultra-compact bow assembly with a narrow highly maneuverable 17 1/2-inch span when cocked.

Nearly three years in development, the **New** Phantom CLS features TenPoint's new Compact Limb System Technology (CLS), a collection of bow assembly components that produce a shot so smooth, quiet, and vibration-free, it's difficult to believe it delivers its payload with such speed and power.

Decorated in the exciting new REALTREE® APG HD™ camo pattern and featuring TenPoint's field-proven PowerTouch trigger, the Phantom CLS is the perfect synergy of great looks, unparalleled performance, and awesome power.

The Phantom CLS Package Includes:

- Your choice of TenPoint's proven 3x Pro-View Scope (pictured on crossbow) or the **New** Pro-40 Multi-Dot Scope (see page 32).
- 7/8-inch Fixed Dovetail Mount.
- **New** Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with SuperBrite blunt nocks and six practice points.
- TenPoint Bow-Max™ high-impact hard travel case for maximum equipment protection.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- **New** TenPoint CareKit with Carry Case, including a Precision Oiler, chap-stick sized String Conditioner and Wax and TenPoint's telescoping LensPen (lens brush & cleaner).
- TenPoint Wedgie™ arrow retention spring dampener and VIBRA-DAMP™ cable suppressors.
- Deluxe Sling w/swivels.
- TenPoint Staff Shooter Field Cap.
- Owner's instructional DVD with exciting over-the-shoulder hunts.

PRO ELITE HP™

With significantly increased speed and kinetic energy, the Pro Elite - widely regarded since its introduction as the premier crossbow on the market - is now better than ever.

NEW 07

This new and improved successor to the Pro Elite features a one-inch longer power stroke (12 1/2-inches) and TenPoint's new high-performance HP Cam. This new power stroke and cam combination, paired with our PowerTouch trigger and ST limbs with Brownell Ultra-Cam™ string and cables, takes the Pro Elite HP to an unparalleled level of power, and performance in its class.

333 FPS*

185 LB. Draw Weight

103.4 FP Kinetic Energy*

Available as a Complete Package or as a Bow, Dovetail & Scope Only

Fully-assembled, bore-sighted, and ready for the woods right out of its BowMax™ hard travel case

Available With or Without: the Patented ACUdraw or ACUdraw 50 cocking mechanism

2 Scope Options:
3X Pro-View or
New Pro-40 Multi-Dot

The Pro Elite HP Package Includes:

- Your choice of TenPoint's proven 3x Pro-View Scope (pictured on crossbow) or the **New** Pro-40 Multi-Dot Scope (see page 32).
- 7/8-inch Fixed Dovetail Mount.
- **New** Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with SuperBrite blunt nocks and six practice points.
- TenPoint Bow-Max™ high-impact hard travel case for maximum equipment protection.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- **New** TenPoint CareKit with Carry Case, including a Precision Oiler, chap-stick sized String Conditioner and Wax and TenPoint's telescoping LensPen (lens brush & cleaner).
- TenPoint Wedgie™ arrow retention spring dampener and VIBRA-DAMP™ cable suppressors.
- Deluxe Sling w/swivels.
- TenPoint Staff Shooter Field Cap.
- Owner's instructional DVD with exciting over-the-shoulder hunts.

BLAZER HP™

Combining a select blend of field-proven TenPoint technology with our New HP Cam, the all New Blazer HP is a perfect balance of lightning speed, pinpoint accuracy and flawless performance.

NEW 07

The Blazer HP features TenPoint's field-proven HL limbs, machined riser, and OTT sound-deadening limb pocket combination outfitted with high-performance Brownell Ultra-Cam™ cables and string. Also featuring TenPoint's machine-finished ACRA-ANGLE aluminum barrel, equipped with the PowerTouch trigger – the best in the industry – the Blazer HP is priced perfectly for those looking to move up to a high-end, precision performance crossbow.

The Blazer HP Package Includes:

- Your choice of TenPoint's proven 3x Multi-Line Scope (pictured on crossbow) or the **New** Pro-40 Multi-Dot Scope (see page 32).
- 7/8-inch Fixed Dovetail Mount.
- **New** Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Deluxe Sling w/swivels.
- Three-pack of TenPoint Pro Elite carbon fiber arrows with SuperBrite blunt nocks and three practice points.
- Three-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint Staff Shooter Field Cap.
- Owner's instructional DVD with exciting over-the-shoulder hunts.

311 FPS*

175 LB. Draw Weight

90.2 FP Kinetic Energy*

Available as a Package or as a Bow, Dovetail & Scope Only

Available With or Without: the Patented ACUdraw or ACUdraw 50 cocking mechanism

2 Scope Options:
3X Multi-Line or
New Pro-40 Multi-Dot

See back pages of catalog for detailed bow features, specifications, and purchase options.

*with recommended arrow

A fusion of technology, function, and form, the Pro Fusion delivers high octane performance at an affordable mid-range price level.

The Pro Fusion shoots with pinpoint accuracy and generates speeds comfortably exceeding 300 fps. It features TenPoint's field-proven HL limb with Fast Flight cables and string, classic RollerTouch trigger (patent pending), and our lightweight and maneuverable Verton® molded all-camo combination FST thumbhole stock and barrel design.

ProFusion & Titan TL-7 one-piece Stock & Barrel Combo

The Pro Fusion Package Includes:

- Your choice of TenPoint's 3x Multi-Line Scope (see page 32) or the **New** Pro-40 Multi-Dot Scope (pictured on crossbow).
- 7/8-inch Fixed Dovetail Mount.
- **New** Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of Easton XX75 aluminum arrows with SuperBrite blunt nocks, equipped with NAP® Spitfire® 100-grain broadheads.
- Three-pack of Easton XX75 aluminum arrows with SuperBrite blunt nocks, and three practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's instructional DVD with exciting over-the-shoulder hunts.

This New and improved Titan design continues to defy its classification as an entry-level model by outclassing and outperforming many other brands' top-of-the-line models.

NEW 07

This workhorse now features a one-piece molded Verton® all-camo combination FST thumbhole stock and barrel design. It's also newly equipped with TenPoint's classic RollerTouch trigger (patent pending). The new Titan TL-7 features combine to improve shooting accuracy, reduce weight, and improve handling.

When purchased alone, the Titan TL-7 comes equipped with Rear Peep and Front Sight Bracket with one Pin Sight.

The Titan TL-7 Package Includes:

- Your choice of TenPoint's 3x Multi-Line Scope (see page 32) or the **New** Pro-40 Multi-Dot Scope (pictured on crossbow).
- 7/8-inch Fixed Dovetail Mount.
- **New** Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.

SLIDER™

A uniquely creative crossbow series engineered with TenPoint's unmistakable attention to quality, durability, and precision performance.

Revolutionary in concept, the Slider and Pro Slider are adaptable to virtually any shooter, regardless of age, sex, stature, or physical ability.

They feature TenPoint's Complete-Capture™ ultra-quiet limb pocket and bow assembly matched with a precision machined riser designed to slide, locate, and lock in one of three shooting positions located between an innovative upper and lower extruded and machined aluminum UL TriLoc™ barrel assembly. The riser secures the barrel components up front and an extruded and machined trigger/barrel receiver secures them at the back end.

Both models are affordable, lightweight and quiet; featuring TenPoint's RollerTouch trigger and a great looking stock, molded to accept either of TenPoint's highly regarded cocking mechanisms: the ACUdraw and ACUdraw 50. The stock's safety-engineered independent fore-grip also locates in one of two shooting positions to suit each hunter's preference. Both models also accept the SteddyEddy Monopod System.

Shown with optional scope.

The Slider Comes With:

- Rear Peep and Front Sight with One Pin (7/8 - inch Fixed Dovetail Scope Mount and choice of scope may be purchased separately).
- TenPoint Staff Shooter Field Cap.
- Owner's instructional DVD with exciting over-the-shoulder hunts.

SLIDER™

Draw Weight	Power Stroke	FPS	
165	12.0	290+	Long Position
150	10.625	265+	Medium Position
125	6.5	189	Short Position

Each position creates a new center of balance with a different power stroke, draw weight, and speed.

Available as a Bow Only

**Available With or Without:
the Patented ACUdraw or
ACUdraw 50 cocking mechanism**

**165-pound TL Limb and
bow assembly**

**Synthetic string and steel cables
with tunable synthetic yokes**

purchase options.**

CORE Features

TenPoint Series Core Performance Features

All TenPoint Series crossbows are made with a group of Core Performance features that insure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

Patented VIBRA-CUSH

Patented DFI

OTT Limb-Pocket System

ACUdraw-Ready FST Stock

ACRA-ANGLE Barrel

Power Limb-Tip Caps

PBT Performance Cable Saver

Advanced Quad-Limb Technology

Ambidextrous Automatic Safety

Tunable Synthetic Cable Yokes

Heavy-Duty Riser Rod and Trigger-Housing Clamp-Plate

Warranty

All TenPoint Series crossbows carry a Limited Lifetime Operational Warranty. Check your owner’s manual for details.

The only way you’ll ever have to buy another one is if you just can’t stop yourself.

CORE Features

Like the TenPoint Series, our two 6 Point Series models are built on an equally impressive foundation of Core Performance Features that mirror most of those in the TenPoint Series. While the Slider crossbows are conceptually very different from our original TenPoint Series’ models, it is easy to recognize the gene pool from which they come.

Patented DFI

ACUdraw™

The Premier Cocking Aid Available Today.

The patented ACUdraw is the most user-friendly and practical solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike some of the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

- Reduces draw weight to about 5-pounds when operated manually
- Belt holster for ACUdraw crank included
- Cranks manually or powers-up with almost any cordless screwdriver or drill (4.2 volts or more)
- Unlike most other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or pre-installed

Patented

Seated or standing, the ACUdraw makes cocking a crossbow easily accessible to everyone.

Two Great Cocking Devices — Making Bowhunting Accessible to Everyone.

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means to boost arrow speed by using heavier limbs, longer power strokes, and reverse cams. They have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

TenPoint responded to the need before all others by developing its two integrated, convenient, and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50. The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort.

Both devices load the bow string accurately every time.

ACUdraw 50™

Takes the traditional rope-cocker to a new level.

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope around your neck or to stash it in your fanny pack
- When not in use, powerful mini-magnets hold the T-handles securely and silently in place against molded polyurethane stability pads
- Available pre-installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

Patented

The ACUdraw 50 Handles retract and store neatly against the stock when not in use.

Accessories

4-Arrow Instant Detach HX Quivers™ ●●●●●●●●

Weighing only 6 ounces empty, TenPoint's **New** HX Quiver™ features a four-arrow ABS cup and a rubber arrow gripper connected by two ultra-light carbon fiber rods. This double-rod backbone is stabilized with a polycarbonate X-Connector™ that snaps together while positioning the quiver for left or right-handed use and then bolts into a locked position.

The cup and rubber gripper are molded with raised nubs that protect arrow fletching from getting crushed when bench shooting or placing the crossbow on a table, floor, or on the ground.

The backside of the X-Connector is fitted with a Bohning Lever Lock mounting system which screws into the underside of the crossbow, allowing the user to instantly attach or detach the quiver.

Crossbow Cases ●●●●●●●●

TenPoint's BowMax airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment. Manufactured for TenPoint by Plano Outdoor Products, it contains all the room necessary to secure your crossbow and all of its accessories. Closes securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded rubber grip. Small accessories store neatly in a StowAway utility box included with every crossbow case.

HCA-200 TenPoint BowMax™ Hard Case

The best looking and most durable soft crossbow cases made today. With extra-thick padding, heavy-duty zippers, and two pockets for extra arrows and miscellaneous accessories, these soft cases will protect your investment for years to come. Check your state's regulations – some require all crossbows to be transported in a case.

Shooting Aids

SteddyEddy

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteddyEddy telescoping two-section monopod insures motion-free shooting while seated in a treestand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, its patented Posi-Lock System™ allows you to quickly set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a completely maneuverable ball-joint mount or with the new Ball Stem Mounting Bracket and ball-joint (HCA-039). It clamps conveniently under your stock when not in use. All SteddyEddys come standard with a cushioned hand-grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

- HCA-030** SteddyEddy Crossbow Monopod System - **for TenPoint Series models**
HCA-03006 SteddyEddy Crossbow Monopod System - **for 6 Point Series models**

SteddyEddy Ball Stem Mounting Bracket

Easily installed, the new Ball Stem Mounting Bracket gives you more options for mounting the SteddyEddy ball-joint and your sling swivel stud. Use this new bracket to give yourself the option of mounting your front sling swivel stud on the left or right side of the crossbow.

- HCA-039** SteddyEddy Ball Stem Mounting Bracket - **for models built beginning in 2000**

SteddyEddy System Accessories

HCA-037 3rd Extension (for shooting in standing position) - **for all models** - (not pictured)

Cable Savers

Made from Polybutylene Terephthalate (PBT) these two cable savers provide a near friction-free and dimensionally stable carriage for your cables, shot after shot. PBT is known for its strength, lubricity, rigidity, and durability, a perfect combination of characteristics required for an effective cable saver.

- HCA-113** 6 Point Series Cable Saver
HCA-114 TenPoint Series Cable Saver

Patented ACUdraw™ and ACUdraw 50™

(also shown on pages 24 & 25)

Your dealer – or you if you have the proper tools – can install either of these two incredible patented cocking devices. Units include a template for drilling the receiver holes in pre-2003 TenPoint models (drill, bits, and hole cutter not included). Receiver holes are pre-molded in current models. Installation instructions are included.

Accessories

Maintenance

TenPoint's **New** CareKit™ includes three important maintenance tools (Microlon Precision Oiler, TenPoint String Wax and Conditioner, and TenPoint LensPen) packaged in a versatile multi-cavity translucent plastic mini-case with plenty of extra room for other bow maintenance items.

NEW 07

HCA-11207 CareKit

The high-tech lubricant contained in the Microlon Precision Oiler includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin impregnates the metal to create a dry film lubricant. Perfect for crossbow rails, triggers, and wheels, this high-quality lubricant comes in a tube fitted with a precision applicator needle.

HCA-11106 Microlon® Precision Oiler

Made from all natural compounds, TenPoint String Wax and Conditioner comes in a convenient chap-stick style tube. This **New** string wax and conditioner both lubricates and rejuvenates bow strings and cables. Scent-free and water-resistant, it greatly reduces string friction and abrasion against cable slides, wheels, or cams.

HCA-11007 TenPoint String Wax and Conditioner

This clever lens treatment tool features a soft fiber lens brush that telescopes out of one end of its pen-sized tube and an abrasive-free lens cleaning pad housed underneath a cap at the other end. The brush gets rid of scope lens dust and the cleaning pad eliminates smudges and cleans and polishes lens surfaces without damaging or scratching the glass.

HCA-09107 TenPoint LensPen (combo brush and cleaner)

These additional lubricants are also highly effective maintenance tools that help keep crossbows in good working order. The Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance. Carry the convenient single-use oil wipes in your fanny pack for on-the-go cleaning and lubrication needs. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

HCA-110 String & Cable Wax

HCA-111 Flight Rail and Trigger Lube

HCA-112.12 Flight Rail Oil Wipes (12 foil wrapped wipes per package)

GOTTA HAVE IT!

Broadheads

Not sure whether you want to shoot fixed blade broadheads or expandable broadheads? Try them both. New Archery Products® offers packages for both Thunderhead® fixed blade heads and Spitfire® expandable heads.

HCA-145 Wedgie™ Arrow Retention Spring Dampener

HCA-151 VIBRA-DAMP™ Cable Suppressors (4-pack)

Trigger Accessories and Parts

Improve the performance of your pre-2004 PowerTouch trigger by replacing its action and safety components with MIM (metal injection molded) components. MIM parts are dimensionally more precise than the old technology and less subject to warping during heat treatment. Best of all, MIM parts have ultra-slick surfaces, perfect for ultra-smooth trigger operation (factory installed) .

HCA-504 PowerTouch Trigger Component Upgrade Kit

TenPoint's RollerTouch trigger finger is available as a factory installed upgrade accessory for those interested in improving the pull-weight of pre- 2007 Titan model trigger mechanisms. The RollerTouch finger has a double roller installed at its top to reduce friction between the finger and the string latch.

HCA-507 RollerTouch™ Trigger Finger

HCA-507

Accessories

Scopes

3x Pro-View Scope™

Calibrated for crossbows that shoot in the 300 fps range, this 20, 30, and 40-yard combo illuminated dot and crosshair configuration is housed in a lightweight seven-inch aluminum tube equipped with fully-coated 3X optics. The dots are positioned at the intersection of each duplex crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color. 7/8-inch scope mounting rings included.

HCA-097 3x Pro-View Scope with 7/8" mounting rings

3x Multi-Line Scope™

Perfectly proportioned for a crossbow at only 7" long, this light, compact scope features fully-coated 3X optics and three duplex crosshairs calibrated for 20, 30, and 40-yard shots with crossbows that shoot in the 300 fps range. 7/8-inch scope mounting rings included.

HCA-088 3x Multi-Line Scope with 7/8" mounting rings

Pro-40 Multi-Dot Scope™

The **New** Pro-40 is a zero-power 40 mm multi-dot scope with an integrated, adjustable 7/8-inch mounting system that requires no rings. Its three illuminated dots, calibrated for 20, 30, and 40-yards for crossbows that shoot in the 300 fps range, can be rendered in red or green to suit individual hunting and light conditions. The light intensity of both color views is regulated by a five-position rheostat.

HCA-08907 Pro-40 Multi-Dot Scope

7/8-inch Fixed Dovetail Scope Mounts

Our machined aluminum Weaver style 7/8" Fixed Dovetail Scope Mounts come standard on all models except the Titan TL-7 (when sold unaccessorized as a bow only) and the Slider.

- HCA-078** 7/8" Fixed Dovetail Scope Mount / black
- HCA-072** 7/8" Fixed Dovetail Scope Mount / bronze (not shown)
- HCA-076** 7/8" Fixed Mini Dovetail Mount / black (for 40mm scopes)

Scope Rings

HCA-081 1" Scope Rings with 7/8" Mounting Base

Sights

Standard on the Titan TL-7 (when sold as a bow only) and on the Slider models, this machined aluminum sight bracket features two pin slots and is mounted on the riser. The bracket comes with one pin. Additional pins are available (HCA-050 Standard Sight Pin)

HCA-041 Front Sight Bracket with Pin

HCA-062 Rear Peep Sight

Rear peep will not fit on a 7/8" mount.
Call Customer Service at 330.628.9245 for details on purchasing a Peep and Pin Conversion Kit.

Crossbow Arrows

The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With Moon or SuperBrite™ Blunt Nocks.

Two Crossbow Arrows Available:

Carbon Fiber Shafts – 20-inch 22/64^{ths}

For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64^{ths} diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Gold Tip®, the Pro Elite is a masterpiece of precision engineering, strength, and accuracy.

Advanced carbon fiber Pro Elite arrows are laser inspected for straightness to within .003" and hand-sorted for weight tolerances to within two grains per dozen. They come equipped with brass inserts and TenPoint's patented SuperBrite blunt nocks or CPC moon nocks, and they are fletched with Norway DURAVANES™.

The Pro Elite Carbon Arrow is also available in a Premium Hunter version. Each Premium Hunter arrow is precision tested for trueness, and weight-matched for accuracy. Premium Hunters come with individually tuned NAP broadheads - either a 3-pack with 100-grain Spitfire (new for '07) expandable broadheads (HEA-615.3) or a 6-pack with Thunderhead 100-grain fixed-blade broadheads (HEA-610.6) installed and ready to shoot. The Premium Hunter is only available with SuperBrite blunt nocks.

Aluminum Shafts – 20-inch XX75 Camo 2219's

As an Easton Aluminum Complete Crossbow Arrow Resource, TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton shafts to produce the highest quality aluminum crossbow arrows available today.

This three-color camo shaft is the proven industry standard for reliable results. Available in black CPC moon nocks or TenPoint's patented SuperBrite blunt nocks, both shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES™.

All TenPoint crossbow arrows are available in 72-packs, 6-packs, or 3-packs.

All Bow, No Bull with TenPoint Crossbows

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All speed tests were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point (420-grains total). The chronograph was positioned 18-inches in front of the crossbow for all shots.

Also **New** for '07 is a Premium Aluminum version (weight-matched & spin balanced) available in a 3-pack and equipped with 100-grain Spitfire broadheads.

Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.

A – SuperBrite blunt neck for 2219 aluminum shafts

B – Barnett and Horton CPC moon neck for 2219 aluminum shafts

C – SuperBrite blunt neck for 22/64^{ths} TenPoint Pro Elite carbon shafts

D – Moon neck for 22/64^{ths} TenPoint Pro Elite carbon shafts

HEA-251.12

Twelve-pack of Patented SuperBrite neck tools. Available for refletching 2219 aluminum shafts or 22/64^{ths} diameter Pro Elite shafts that use SuperBrite nocks.

NEW 07

Outdoor Writer Makes Bowhunting History!

Armed with his TenPoint Titan TL-4 crossbow, outdoor writer Bob Humphrey made bowhunting history this spring by becoming the first hunter ever to officially record a wild turkey Grand Slam with a crossbow.

When asked what motivated Humphrey to take up this challenge, he mentioned several reasons. "It started as a bit of a lark when I was doing research for a story last year," said Humphrey, a regular contributor to numerous national hunting magazines. "In contacting the records department of the National Wild Turkey Federation, I learned they had no official record of a crossbow grand slam. That's when a light went on. There are very few opportunities to do something no-one else has done before. World records can be broken, but there's only one first. I saw it as a challenge, and a way to have some fun," Humphrey added.

"On a more serious note," he said, "I also saw it as an opportunity to raise awareness about crossbows. I've hunted with a compound bow for over 25 years, and will continue to do so as long as I can pull a string back. For me, crossbows represent a change of pace, another opportunity to spend more time afield. But for some folks, they represent the only means to be able to bowhunt. Crossbows are not the evil tools some make them out to be; yet some folks still discriminate against them. When I started this quest, 12 states allowed crossbows for deer hunting but not for turkeys. That's silly; you can hunt them with a shotgun, but not a crossbow!"

GRAND SLAM!

Humphrey's quest began in Florida in mid-March, and ended in Ohio in early May. Over that eight-week span, he took five longbeards including an **Osceola**, an **Eastern**, two **Rio Grandes** and his very first **Merriam**. All of the hunts were filmed for the Extreme Hunting Adventures television program, as well as a DVD from Extreme Dimension Wildlife Calls expected out in January 2007.

"I want to emphasize that this was a team effort," said Humphrey. "A lot of folks helped make this happen. I especially want to mention my cameraman, Scott Underhill. Trying to hunt turkeys with a crossbow is tough enough," he said, "but filming every hunt was even more challenging. Somehow Scott made it work, and captured some great footage in the process. We also made some great friends along the way, to whom I'm extremely grateful."

Bob with his Merriam's Tom and Titan TL-4.

- **SKU No.** **Phantom CLS**
C07002-4141 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw 50
C07002-4142 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw
C07002-4121 – Crossbow w/Package, 3x Pro-View Scope, ACUdraw 50
C07002-4122 – Crossbow w/Package, 3x Pro-View Scope, ACUdraw

- **SKU No.** **Pro Elite HP**
C07004-1040 – Crossbow w/Pro-40 Multi-Dot Scope
C07004-1041 – Crossbow w/Pro-40 Multi-Dot Scope, ACUdraw 50
C07004-1042 – Crossbow w/Pro-40 Multi-Dot Scope, ACUdraw
C07004-1020 – Crossbow w/3x Pro-View Scope
C07004-1021 – Crossbow w/3x Pro-View Scope, ACUdraw 50
C07004-1022 – Crossbow w/3x Pro-View Scope, ACUdraw
C07004-1140 – Crossbow w/Package, Pro-40 Multi-Dot Scope
C07004-1141 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw 50
C07004-1142 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw
C07004-1120 – Crossbow w/Package, 3x Pro-View Scope
C07004-1121 – Crossbow w/Package, 3x Pro-View Scope, ACUdraw 50
C07004-1122 – Crossbow w/Package, 3x Pro-View Scope, ACUdraw

- **SKU No.** **Blazer HP**
C07023-4040 – Crossbow w/Pro-40 Multi-Dot Scope
C07023-4041 – Crossbow w/Pro-40 Multi-Dot Scope, ACUdraw 50
C07023-4042 – Crossbow w/Pro-40 Multi-Dot Scope, ACUdraw
C07023-4030 – Crossbow w/3x Multi-Line Scope
C07023-4031 – Crossbow w/3x Multi-Line Scope, ACUdraw 50
C07023-4032 – Crossbow w/3x Multi-Line Scope, ACUdraw
C07023-4140 – Crossbow w/Package, Pro-40 Multi-Dot Scope
C07023-4141 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw 50
C07023-4142 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw
C07023-4130 – Crossbow w/Package, 3x Multi-Line Scope
C07023-4131 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw 50
C07023-4132 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw

- **SKU No.** **Pro Fusion**
C07027-2140 – Crossbow w/Package, Pro-40 Multi-Dot Scope
C07027-2141 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw 50
C07027-2142 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw
C07027-2130 – Crossbow w/Package, 3x Multi-Line Scope
C07027-2131 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw 50
C07027-2132 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw

- **SKU No.** **Titan TL-7**
C07041-6000 – Crossbow Only
C07041-6001 – Crossbow, ACUdraw 50
C07041-6002 – Crossbow, ACUdraw
C07041-6140 – Crossbow w/Package, Pro-40 Multi-Dot Scope
C07041-6141 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw 50
C07041-6142 – Crossbow w/Package, Pro-40 Multi-Dot Scope, ACUdraw
C07041-6130 – Crossbow w/Package, 3x Multi-Line Scope
C07041-6131 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw 50
C07041-6132 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw

- **SKU No.** **Pro Slider**
C06050-3130 – Crossbow w/Package, 3x Multi-Line Scope
C06050-3131 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw 50
C06050-3132 – Crossbow w/Package, 3x Multi-Line Scope, ACUdraw

- **SKU No.** **Slider**
C06070-3000 – Crossbow Only
C06070-3001 – Crossbow, ACUdraw 50
C06070-3002 – Crossbow, ACUdraw

<div>        </div> <div>Crossbow Features</div>							
Phantom CLS	Pro Elite HP	Blazer HP	Pro Fusion	Titan TL-7	Pro Slider	Slider	
●	●	●					3 1/2 lb. PowerTouch trigger, with premium MIM action components and safety slide. Set at optimum travel and touch for a crisp, smooth release. The best crossbow trigger made today.
			●	●	●	●	5lb. RollerTouch trigger features a double-roller system which reduces friction and significantly lightens trigger pull.
●	●	●					GripSafety secondary safety (Patent Pending), which helps protect the fingers and thumb on the fore-grip hand. Left-handed installation available on request.
			●	●	●	●	Dupont Zytel® trigger box top. Made from a versatile polymer engineered for flexibility, dimensional stability under heavy loads, extreme temperatures and humidity.
●	●	●	●	●	●	●	Patented DFI™ (dry-fire-inhibitor). Prevents dry-firing the crossbow when no arrow is loaded on the flight deck.
●	●	●	●	●	●	●	Ambidextrous Automatic Safety.
	●	●	●	●			OTT (over-the-top) limb pocket and Zytel® “lift & separate” limb suspension system, the ultimate in limb stability and sound reduction.
●							New CLS (compact limb system) components which include a highly durable integrated riser and foot stirrup, 12-inch IsoTaper™ limbs, high-performance MR™ Cams and Ultra-Cam™ string and cables. Together the components produce unparalleled strength and speed in addition to being smooth, quiet and vibration-free.
					●	●	Complete-Capture limb pocket isolation system. Each limb is fitted inside a glove-like polymer cushion captured inside a machined aluminum pocket, which is then bolted to the riser, producing superior stability and noise dampening.
●							New 185-pound IsoTaper™ limbs created exclusively for our New CLS technology are designed for use with our New Ultra-Cam string and cables with tunable yokes. The 12-inch pultruded fiberglass limb is uniquely ground to a static taper from thick to thin giving it maximum performance, strength and durability the entire length of the limb without hot spots.
	●						Premium field-proven ST™ quad-limbs with New Ultra-Cam string and cables with tunable yokes. Still one of the finest limb designs on the market today.
		●	●		●		175-pound HL quad limbs designed specifically for the Blazer HP, Pro Fusion and Pro Slider crossbow models to produce a design perfectly suited to the 175-pound draw weight models. The Blazer HP comes standard with the New Ultra-Cam string and cables with tunable yokes and the Pro Fusion and Pro Slider crossbow models come equipped with Fast Flight string and cables with tunable yokes.
				●		●	TL-4 quad limbs with steel cables and tuneable synthetic yokes. A simple yet highly effective, durable design, perfect for our 165-pound draw weight models.
●	●	●					New HP (High Performance) and MR (Maximum Rotation) cams. HP cams are used on the Pro Elite HP and Blazer HP crossbow models and the MR Cam is used on the Phantom CLS to maximize power and to use the crossbow’s power stroke efficiently to achieve maximum arrow velocity.
●	●	●	●	●	●	●	CADD designed and finite element analysis-tested, precision-machined riser. Precision engineering for precision shooting.
●	●	●			●		65 Rockwell Hardcoated and Teflon® impregnated barrel surface.
●	●	●					Anodized, machine-finished ACRA-ANGLE aluminum barrel. Provides the ultimate in dimensional integrity for perfect arrow flight.
					●	●	UL TriLoc machined aluminum barrel assembly. An innovative upper and lower extruded and machined aluminum barrel design between which the Slider or Pro Slider’s riser locates and locks in one of three separate shooting positions.
●	●	●	●	●			FST style stock. TenPoint’s original functionally superior thumbhole design.
			●	●			Molded combination stock and barrel made from Verton®, a durable, lightweight polymer with superior structural characteristics and precise dimensional integrity. Promotes accurate arrow flight with minimal friction.
					●	●	Verton® two-piece stock. While the butt-stock supports the trigger and barrel receiver, the fore-grip locates in either of two shooting positions and is safety-engineered to keep the hunter’s hand properly positioned while shooting the bow.
●	●	●	●	●	●	●	ACUdraw and ACUdraw 50 compatible.
●	●	●	●	●*			Fixed 7/8" Weaver-style aluminum dovetail scope mount (*Titan TL-7’s purchased as a package only).
				●		●	Fixed sight bridge with peep and pin sight system. Scope compatible. Optional 7/8" Fixed Dovetail Scope Mount (HCA-078 or HCA-076) required to mount a scope.
●	●	●	●	●	●	●	Limited Lifetime Operational Warranty (See Owner’s Manual for limitations)
