## Corporate Statement

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance, and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect, and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently, and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions, and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

Complete Product Guide 2008

# To Our Customers

## This year was a good one for me and for TenPoint Crossbow Technologies.

Personally, on September 21, I got to see my father, Bill Bednar, inducted into the National Archery Hall of Fame in Springfield, MO. It was a great honor for him and for our family. Please read about his accomplishments and his career on our website, [www.tenpointcrossbows.com](http://www.tenpointcrossbows.com) (click "Press Releases" on the "About Us" drop-down menu). Nearly as momentous, this fall my dad and I took my two sons on their first hunt (see page 36 in this catalog). The hunt was a long-time coming but worth the wait. We now plan to make this multi-generation hunt an annual event.

Professionally, thanks to our valued customers, TenPoint enjoyed another year of healthy growth. Each year the feedback we receive tells us that the perception of our company as a manufacturer of high-quality, precision-performance crossbows grows stronger. Each year we re-dedicate ourselves to improving our products and to forging a position of technological superiority within the crossbow industry.

While 2007 was great for me and TenPoint, I have concerns about the future of hunting - and bowhunting in particular.

This year the U.S. Fish and Wildlife service reported that the number of hunters over age 16 declined 10-percent between 1996 and 2006 - from 14 million to 12.5 million. Experts attribute the decline to many things: increased recreational options for youngsters, loss of hunting land to urban encroachment, farmers' concerns for safety and liability and of course, television.

On the upside, however, the decline has slowed in recent years and a number of states with progressive wildlife agencies are seeing increases in the number of hunting permits issued.

TenPoint's home state, Ohio, is an example of where hunting is alive and well. Deer license sales bottomed out in 1980 at 216,100 but have more than doubled since then to 440,000.

Among other things, the state has strongly emphasized youth recruitment and it has paid off. Since 1996, youth hunting licenses have doubled to 66,600. In addition, Ohio has initiated an Apprentice License Program, which temporarily waives the hunter education course requirement so that residents and non-residents can "try out" hunting if accompanied by a licensed hunter over age 21. Interestingly, the greatest percentage of growth has come in archery season where the lack of crossbow restrictions has helped boost license sales. The deer herd has never been larger, archery season never longer and the chances of success never greater.

It is clear that there are many things we can do to turn the tide nationally. Sadly, however, there are those within our own ranks who contribute to the problem rather than the solution. Most notable are the leaders of the state bowhunting organizations and the Pope and Young Club's creation, the North American Bowhunting Coalition. They continue to organize against any intrusion of crossbows into what they call "their season." Their mantra is, "The crossbow is the single greatest threat to bowhunting as we know it." Their rationale is, "The crossbow is not a bow." They ignore state wildlife agency studies, data from states which permit crossbow hunting, and the simple logic that proves how wrong they are.

They do not want youngsters, women, or others who cannot draw and hold a compound bow to use a crossbow in "their" season. They do not want elderly archers to be able to convert to crossbows. They would rather allow bowhunters who have no business shooting a conventional bow to continue doing so rather than allowing them to hunt ethically with a crossbow.

What they fail to realize is that their exclusionary position - not the crossbow - is actually the greatest threat to bowhunting as we know it. To quote an old Pogo comic strip, "I have seen the enemy and he is us." It is time to unite, not fight. Fighting among ourselves only serves those trying to take away all of our hunting rights.

Rick & Bill Bednar at the National Archery Hall of Fame

A handwritten signature in cursive script that reads "Richard L. Bednar".

Richard L. Bednar, CEO

## TenPoint Crossbows have unparalleled accuracy.

All crossbow manufacturers make glowing claims about shooting accuracy, but claiming accuracy is not the same as delivering it.

In 2003, *Aventure Chasse Peche*, a popular French-Canadian hunting and fishing magazine, published an exhaustive crossbow accuracy comparison test in one of its issues. Top-of-the-line models from all of the major crossbow manufacturers - American and Canadian - were vigorously tested at distances out to 150 feet (50 yards). None of the other manufacturers' models could match TenPoint's 7/8-inch grouping at 100 feet or 1.5-inch grouping at 150 feet. Also, unlike the competition, the TenPoint model survived the extensive test without any breakdowns, operating problems, or signs of premature wear.

The best test, however, is your test. Before you make your crossbow purchase, shoot all of the models you are considering. - You be the judge.

## TenPoint Crossbows have great balance, fit and feel.

A number of years ago we used the following headline in our advertising campaign: "Shoulder them. Shoot them. You'll understand the difference between the best and the rest." Aside from comparing shooting accuracy, you need to compare how a crossbow feels when you shoot it and - like a comfortable hunting boot - how it fits. TenPoint crossbows are designed for balance and shooting comfort. So, take us up on this suggestion:  
- Shoot a TenPoint and see how it fits.

## TenPoint Crossbows have optimum - and honest - power and speed.

Many of the speed and energy claims advertised by other crossbow manufacturers are either misleading or untrue. Using a relatively heavy 420-grain arrow, our top models shoot a true 343 and 330 fps. With those speeds and the 420-grain arrow combination, they generate potent foot pounds of kinetic energy ranging from 101.5 fp to 109.7 fp. Equally important, however, TenPoint crossbows produce that power and speed on a frame that is quite manageable to load and that produces a minimum of shock, hammer, and noise.  
- Compare loading and shooting TenPoint crossbows to other brands.

## TenPoint gives you superior value for your hard earned dollars.

If you compare the engineering, quality, performance, and durability of TenPoint crossbows to our competitors' models, we are confident you will agree that we offer considerably more value for your dollar.

## There is no better value on the market today.

Visit us online at: [www.tenpointcrossbows.com](http://www.tenpointcrossbows.com)

# What Makes TenPoint Crossbows Superior to Other Brands?

In each of the fourteen years TenPoint has been manufacturing crossbows, we have never failed to introduce innovations or to improve our products. And, in most cases, the advancements we have made originated from customer input. Since 1994, we have secured 12 patents with others pending or being filed.

**No other crossbow manufacturer comes close to this record of technological achievement.**

Below are some of our more significant innovations:

## Patented Trigger Technology

TenPoint has two primary trigger types designed to match-up with the performance characteristics of the models that use them – the RollerTouch and the PowerTouch triggers.

The Titan TL-7 is equipped with our innovative 5-pound RollerTouch™ trigger (patent pending). The RollerTouch features a double-roller system installed at the top of the trigger finger that allows the finger to roll off the string latch's sear surface rather than to slide off. This rolling action significantly reduces the friction between the two parts.

All other TenPoint and 6 Point crossbows are now equipped with one of our patented 3.5-pound machined triggers, including the Deluxe, PowerTouch-10, or PowerTouch-6 triggers. All PowerTouch™ triggers contain MIM (Metal Injection Molded) action components and continue to be the finest crossbow triggers made today.

## Patented DFI™ (Dry-Fire-Inhibitor)

In 1996 TenPoint introduced the DFI, which prevents dry-firing our crossbows when no arrow is loaded on the flight deck. The addition of this technology to our entire crossbow lineup has virtually eliminated the potentially severe damage and/or injury that can be caused by a dry-fire.

## Patented ACUdraw™ and Patented ACUdraw 50™

TenPoint's convenient and user-friendly cocking aids have made our models the crossbows of choice for those who cannot or do not wish to manually load today's heavier draw weights. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aids available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 26 & 27 for details.

## Patented GripSafety™

Installed in the fore-grip of the top four TenPoint models with aluminum barrels, the GripSafety prevents pulling the trigger without first depressing and holding this secondary safety in place with your fore-grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore-grip and below the barrel's flight deck. Installed on a standard basis for right-handed shooters, left-handed installation is available at no charge when placing a new bow order.

## Limb Technology

TenPoint now offers five limb configurations specifically designed for optimum performance on the models that use them: the NEW GT Recurve Limb for the GT Curve and GT Flex models, TL-4 Limbs™ for the Titan TL-7, HL Limbs™ for the Pro Fusion and Pro Slider, ST Limbs™ for the NEW Lazer HP and the 12-inch IsoTaper Limbs™ (patent pending), featured on our Phantom models and the NEW Shadow CLS. With a performance-matched limb for each crossbow design, combined with a performance-matched trigger, you can count on consistently superior accuracy, durability and dependability up and down the entire lineup.

## HP™ and MR™ Cam Stability Bushings

TenPoint's new Cam Stability Bushings, while simple in concept, perform several important functions. First, they provide an ultra-stable sleeve to support and stabilize the axles. Second, they help eliminate wheel lean when loading the crossbow. And, third, they help establish precise string tension on the barrel surface, to promote accurate arrow flight and to reduce serving wear.

## Barrel Technology

The TenPoint Series' ACRA-ANGLE™ and the 6 Point Series' UL TriLoc™ barrels are key to the unparalleled shooting accuracy of TenPoint crossbows. Both are designed to allow shooters to pull the bow string while their index fingers touch the side of the barrel; thereby guaranteeing accurate loading, which is essential to shooting accuracy. And, both of their arrow flight decks are machine finished for unsurpassed dimensional integrity, which insures accurate, repeatable arrow flight.

## Riser Technology

Developed primarily through the Computer Aided Drafting and Design (CADD) process, all TenPoint and 6 Point risers are Finite Element Analysis (FEA) tested and designed for specific crossbow model applications. Made from 6061 T6 machined aluminum, each riser design is created to maximize the efficiency of each limb system's total package.

Complete Capture Limb Pocket

# What's New for 2008

## Five New Models

### Phantom Xtra™

Headlining the 2008 TenPoint lineup, the NEW 343 fps Phantom Xtra™ - a premium version of TenPoint's blockbuster 2007 Phantom CLS - is designed for the serious hunter, shooting enthusiast or collector who demands the best.

Featuring a precision-crafted, laminated wood version of TenPoint's functionally superior FST stock, the Phantom Xtra pushes crossbow aesthetics to a new level. Custom manufactured for TenPoint by Keystone Sporting Arms, LLC, this classic, heirloom-quality design – richly rendered in a durable weather-resistant semi-gloss finish with a non-slip rubber butt plate – will withstand years of rugged use in the woods.

Like the 2007 Phantom CLS, the 185-pound Phantom Xtra relies on TenPoint's technologically superior Compact Limb System (CLS) to deliver a dramatically smooth, quiet and vibration-free shot with unparalleled speed and accuracy. The CLS system consists of a synergistic combination of bow assembly components which include a robust one-piece machined riser and foot stirrup fitted with TenPoint's powerful 12-inch IsoTaper limbs and maximum rotation MR cams.

The Phantom Xtra comes with a deluxe package including both hard and soft carrying cases, SteddyEddy, 4-Arrow HX Quiver,™ Claw® Sling, two six-packs of Premium Hunter Carbon arrows – one with broadheads and Tracer™ nocks and the other with practice points, Wedgie™ Arrow Retention Spring Dampener, TenPoint's Care Kit, and a NEW and innovative Custom Service Package.

The Phantom Xtra comes standard with the purchaser's choice of either of our patented ACUdraw™ or ACUdraw 50™ cocking mechanisms and either one of our two scope options, the 3x Pro-View or Pro-40 Multi-Dot Scope.

### Shadow CLS™

The NEW Shadow CLS is a potent 175-pound companion to TenPoint's two, 185-pound Phantom models. At a blistering 330 fps, the Shadow adds a value-priced choice to the CLS-powered collection of crossbows.

Delivering pinpoint accuracy, bone-crushing power and precision performance, the Shadow is fueled by TenPoint's Compact Limb System Technology (CLS) and features bronze-anodized machined metal components, our patented PowerTouch trigger, and patented GripSafety.

Double-dip fluid-imaged in REALTREE® APG HD,™ the Shadow CLS comes with a starter package including our 4-Arrow HX Quiver,™ Claw® Sling, a six-pack of Easton aluminum arrows with three broadheads and three practice points, and TenPoint's Wedgie™ Arrow Retention Spring Dampener. It also comes standard with the purchaser's choice of either of the patented ACUdraw™ or ACUdraw 50™ cocking mechanisms and either one of our two scope options, the 3x Multi-Line or Pro-40 Multi-Dot Scope.

### Lazer HP™

Priced for customers looking to move up to TenPoint's precision-performance top-of-the-line models, the NEW Lazer HP combines a select mix of time-tested technology that has evolved over the years from our field-proven 185-pound ST limb models.

At a lightning quick 313 fps, the Lazer HP features 185-pound TenPoint ST limbs driven by TenPoint's powerful HP cams. This power plant is mounted on our bronze anodized 18 1/2-inch machined ACRA-ANGLE barrel equipped with our patented PowerTouch™ trigger. The result is a combination of blistering speed, tack-driving accuracy, and flawless performance.

Double-dip fluid imaged in REALTREE HARDWOODS GREEN HD™, the Lazer HP is packaged with the 3x Pro-View or Pro-40 Multi-Dot Scope, 4-Arrow HX Quiver; three-pack of arrows with practice points, and TenPoint's Wedgie™ Arrow Retention Spring Dampener. The Lazer HP will accept either of our user-friendly patented ACUdraw or ACUdraw 50 cocking mechanisms.

### GT Flex™

Three recurve crossbows in one, the NEW GT Flex delivers the perfect synergy between TenPoint's NEW GT Recurve Limb™ bow assembly (see page 20 & 21) and the innovative three-position 6 Point Slider stock assembly, first introduced in 2006.

At 6 lbs. 4 oz. this lightweight, quiet and compact hunting machine delivers the most efficient transfer of energy per inch of power stroke and per pound of draw weight of any recurve crossbow on the market. Equipped with TenPoint's machined aluminum UL Triloc barrel, riser and TenPoint's patented PowerTouch-6 trigger, there is no better dollar-value in the industry today.

Mounted in its 180-pound/13.25-inch power stroke position, it is a lethal 300 fps deer hunter. Locked in its medium, 125-pound/11.875-inch stroke position, it transforms into the perfect recurve for turkey hunting and bow-fishing. And, in its 90-pound/7.75-inch stroke position, it is the ideal training crossbow for youngsters and first-time shooters.

Double-dip fluid-imaged in Mossy Oak Break Up® the GT Flex is sold as a package or as a bow only with a peep and pin sighting system. The GT Flex is available with or without TenPoint's patented ACUdraw or ACUdraw 50 cocking mechanism.

### GT Curve™

True to TenPoint's obsession with precision engineering and quality, the NEW value-priced GT Curve delivers a lethal combination of power, pin-point accuracy and performance in a recurve-style crossbow.

At 7-pounds, this lightweight and maneuverable crossbow features the NEW 180-pound GT Recurve bow assembly mounted on the TenPoint Series molded one-piece Verton® FST thumbhole stock and barrel assembly.

Equipped with our premium patented PowerTouch-10 trigger, it generates speeds up to 300 fps and produces a nearly identical speed and kinetic energy efficiency curve as the GT Flex.

Double-dip fluid imaged in REALTREE HARDWOODS HD™, this model comes packaged with the Pro-40 Multi-Dot Scope, 4-Arrow HX Quiver, and a three-pack of arrows with practice points. It can be ordered with or without an ACUdraw or ACUdraw 50 cocking mechanism.

# What's New for 2008

## Two Improved Models

### Pro Fusion™

TenPoint's lightweight, quiet and affordable 175-pound Pro Fusion improves its trigger performance in 2008 with the addition of the patented PowerTouch-10™ trigger, an upgrade that incorporates TenPoint's premium trigger action into a new machined housing that is fashioned to fit the Pro Fusion stock. This upgrade produces a lighter, smoother trigger pull and improves accuracy.

Double-dip fluid imaged in REALTREE HARDWOODS HD™ the Pro Fusion will come packaged with our 4-Arrow Instant Detach HX Quiver; six aluminum arrows with three broadheads and three practice points, and the popular Pro-40 Multi-Dot Scope.

### Pro Slider™

The 6 Point Series Pro Slider also steps up its trigger performance for 2008 with the addition of the patented PowerTouch-6™ trigger upgrade. This upgrade adapts TenPoint's industry leading PowerTouch trigger mechanics into a new machined housing that is compatible with the 6 Point Series UL TriLoc barrel. The result is a surgically precise multi-position crossbow adaptable to virtually any shooter; regardless of age, sex, stature or physical ability.

Double-dip fluid imaged in Mossy Oak Break-Up®, the Pro Slider comes packaged with our 4-Arrow Instant Detach HX Quiver; three aluminum arrows with practice points, and the popular 3x Multi-Line Scope.

## Accessories

### 4-Arrow Instant Detach HX Conventional Bow Quiver™

A smart addition to any conventional bow users' equipment list, TenPoint's NEW six-ounce, sturdy 4-Arrow Instant Detach HX Conventional Bow Quiver™ is a perfect adaptation of our 2007 HX Quiver crossbow design.

Included with the new quiver are two interchangeable rubber arrow grippers: TenPoint's standard (crossbow) gripper; which accepts 21/64ths through 23/64ths diameter shafts, and a second conventional bow gripper which fits 17/64ths through 20/64ths diameter shafts. Built into the quiver's X-Connector; the Lever Lock mounting system allows the user to instantly attach or detach the quiver.

### Bow-Fishing Rig

Manufactured by AMS, TenPoint's NEW Bow-Fishing Rig and mount is a welcome addition for the shooter wanting to take their crossbow experience to an entirely new level.

Attached directly to the crossbow's riser, this compact, simple rig features a zero-drag reel with exceptional line control, allowing the stacked, not spooled, line to flow freely from the bottle so the arrows fly further and deeper. With the AMS Retriever, there are no bails to release or buttons to forget to push before the shot — just shoulder, aim and shoot.

## New Technology

### Recurve Limb

Twelve years in development, TenPoint's new laminated 180-pound GT Recurve-style Limbs exceed the parameters established in its original design envelope. Pound-for-pound and inch-for-inch, its 85% energy transfer rating is the best in the crossbow industry.

Co-engineered by Gordon Glass and TenPoint, its superior design sets a new recurve limb standard for optimum power stroke, deflection, over-pull, brace height, and poundage.

At the heart of the design is a ground, tapered power-generating glass core supported by a cross-weaved glass filler that establishes the dimensional requirements for thickness and adds unparalleled stability and durability to the overall construction. This package is then captured on both sides by premium S-Glass outer skins completing a classic design destined to become the best in the industry.

### PowerTouch Trigger Upgrades

The NEW PowerTouch-10™ and PowerTouch-6™ trigger upgrades give TenPoint the ability to incorporate its patented PowerTouch trigger mechanics throughout the entire crossbow line-up.

The PowerTouch-10 design allows us to install our best trigger technology into our light-weight, one-piece Verton stocks, making this trigger available as an upgrade for Titan TL-7 and pre-2008 Pro Fusion models. The PowerTouch-6 does the same for our multi-position 6 Point Series models. The original Deluxe PowerTouch trigger remains in use on our top-of-the-line TenPoint Series aluminum barrel models.

Contact TenPoint's Customer Service via email under our "contact us" heading at [www.tenpointcrossbows.com](http://www.tenpointcrossbows.com) or telephone **330.628.9245** for additional information.

### TenPoint Soft Crossbow Case

Designed by Neet Products, Inc. for TenPoint, this NEW soft crossbow case features a wider body for both compound and recurve crossbows along with shape-holding side panels for added depth to accommodate mounted optics and additional crossbow accessories. Made with double-stitched, high-grade Cordura® and Trico-lining, this functionally improved design also includes a heavy-duty YKK zipper with double pulls and a removable shoulder strap.

Available in black with REALTREE HARDWOODS GREEN HD® or Mossy Oak Break-Up® accented panels.

## Coming in 2008

Check [www.tenpointcrossbows.com](http://www.tenpointcrossbows.com) for the introduction of TenPoint's **B.Y.O.B. (Build Your Own Bow) Custom Shop.**

→ Select from a variety of premium stocks and other components to custom build your own CLS package.

→ Select components to custom upgrade the TenPoint model you currently own.

Details available soon on the TenPoint website.

**NEW 08**

***Designed for the discriminating hunter or collector looking for the best of the best, the NEW Phantom Xtra, a premium version of TenPoint's 2007 blockbuster Phantom CLS, takes crossbow aesthetics and performance to a new level.***

The Phantom Xtra's field-tested Compact Limb System power plant and machined ACRA-ANGLE barrel comes mounted on a precision-crafted, laminated wood version of TenPoint's functionally superior FST stock. This heirloom-quality stock, manufactured for TenPoint by Keystone Sporting Arms, LLC, is fitted with a non-slip rubber butt plate, and comes beautifully protected by a durable weather-resistant semi-gloss finish that will stand up to years of use in the field.

The Phantom Xtra package also includes special amenities such as a Custom Service Package good up to five years, hard and soft carrying cases, and a custom arrow package that includes NEW illuminated Tracer™ nocks.

The Compact Limb System (CLS) components include a robust one-piece machined riser and foot stirrup, 12-inch 185-pound IsoTaper limbs fitted with maximum rotation CADD engineered MR Cams and Brownell Ultra-Cam™ string and cables.

Combined, these elements form an uncommonly compact, quiet, and powerful bow assembly with a hunter-friendly 13-inch power stroke, and a highly maneuverable 17.5-inch axle-to-axle span when cocked.

## The Phantom Xtra Package Includes:

- Your choice of TenPoint's 3x Pro-View Scope (pictured on crossbow) or the Pro-40 Multi-Dot Scope.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- NEW Claw® Sling w/swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads and NEW Tracer™ nocks. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with patented PillarLock™ system for maximum equipment protection.
- NEW Deluxe Soft Crossbow Case.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- TenPoint CareKit, including Microlon® Precision Oiler; chap stick-sized String Wax & Conditioner; telescoping Combo LensPen Brush & Cleaner; and Carry Case.
- TenPoint Wedgie™ Arrow Retention Spring Dampener and VIBRA-DAMP™ Cable Suppressors.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- NEW: Two Custom Service Package certificates worth \$99 each (good for 5-years).

***Introduced in 2007, the Phantom CLS gained instant recognition as the industry leader while ushering in the next generation of crossbow technology.***

The Compact Limb System (CLS) components include a robust one-piece machined riser and foot stirrup, 12-inch 185-pound IsoTaper limbs fitted with maximum rotation CADD engineered MR Cams™ and Brownell Ultra-Cam™ string and cables. Combined, these elements form an uncommonly compact, quiet, and powerful bow assembly with a hunter-friendly 13-inch power stroke, and a highly maneuverable 17.5-inch axle-to-axle span when cocked.

The Phantom features TenPoint's Compact Limb System Technology (CLS), a collection of bow assembly components that, when combined with a hunter-friendly 13-inch power stroke, produces a shot so smooth, quiet and vibration free, it is difficult to believe it delivers its payload at a blazing 343 fps.

The revolutionary CLS components include a robust integrated machined riser and foot stirrup, 12-inch, 185-pound IsoTaper limbs equipped with maximum rotation CADD engineered MR Cams,™ and Brownell Ultra-Cam™ string and cables. Combined, these elements form an ultra-compact bow assembly with a highly maneuverable 17.5-inch axle-to-axle span when cocked.

Fully double-dip fluid imaged in REALTREE® APG HD™ and including all of TenPoint's patented trigger, DFI, GripSafety, and cocking mechanism technology, the Phantom CLS is the perfect synergy of great looks, unparalleled performance, and awesome power.

## The Phantom CLS Package Includes:

- Your choice of TenPoint's 3x Pro-View Scope (pictured on crossbow) or the Pro-40 Multi-Dot Scope.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- NEW Claw® Sling w/swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Three-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with patented PillarLock™ system for maximum equipment protection.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- TenPoint CareKit, including Microlon® Precision Oiler; chap stick-sized String Wax & Conditioner; telescoping Combo LensPen Brush & Cleaner; and Carry Case.
- TenPoint Wedgie™ Arrow Retention Spring Dampener and VIBRA-DAMP™ Cable Suppressors.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

## Shadow CLS™

NEW 08

**330 FPS\***

**175 LB. Draw Weight**

*Sporting a mix of time-tested technology that has evolved over the years from our field-proven 185-pound ST limb models, the NEW 313 fps Lazer HP is priced for customers looking to move up to TenPoint's precision performance, top-of-the-line collection.*

The Lazer HP is double-dip fluid imaged in REALTREE HARDWOODS GREEN HD® and features 185-pound ST limbs driven by powerful HP cams. This power plant is mounted on TenPoint's bronze anodized 18.5-inch machined ACRA-ANGLE barrel equipped with the patented Deluxe PowerTouch Trigger and GripSafety. The result is a combination of blistering speed, tack-driving accuracy, and flawless performance.

### The Lazer HP Package Includes:

- TenPoint's 3x Pro-View Scope (pictured on crossbow) or Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Arrow Retention Spring Dampener.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

# Pro Fusion™

IMPROVED 08

**305 FPS\***

**175 LB. Draw Weight**

**86.7 FP Kinetic Energy\***

Available only as a package

May be purchased with or without ACUdraw or ACUdraw 50 cocking mechanism

Comes with Pro-40 Multi-Dot Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

*A fusion of technology, function and form, the IMPROVED Pro Fusion delivers high octane performance at an affordable mid-range price.*

Upgraded for 2008, the Pro Fusion features the addition of the patented PowerTouch-10 trigger, which incorporates TenPoint's premium 3.5-pound trigger action into a new machined housing made to fit the Pro Fusion stock. This new trigger produces a lighter, smoother trigger pull and improves accuracy. Combined with our field-proven HL limb, machined wheels and Fast Flight bow assembly, the Pro Fusion is a lightweight precision hunting crossbow that shoots at speeds comfortably exceeding 300 fps.

## The ProFusion Package Includes:

- TenPoint's Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with NAP® Spitfire® 100-grain broadheads.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

**Pro Fusion, GT Curve, & Titan TL-7 one-piece Stock & Barrel Combo**

# Titan TL-7™

**280 FPS\***

**165 LB. Draw Weight**

**73.1 FP Kinetic Energy\***

Available as a bow with scope only or as a package

Packaged Titans may be purchased with or without ACUdraw or ACUdraw 50 cocking mechanism

Comes with Pro-40 Multi-Dot Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

*The Titan TL-7 continues to defy its classification as an entry-level model by outclassing and outperforming other brand's top-of-the-line models.*

This workhorse bow features a lightweight one-piece molded Verton® combination stock and barrel design, TenPoint's patent-pending RollerTouch trigger, field-tested TL-4 quad limbs powered by machined aluminum wheels, yoked steel cables, and B-66 synthetic string. Its ever-growing popularity and legendary reliability keep it in its valued position within the TenPoint lineup.

## The Titan TL-7 Package Includes:

- TenPoint's Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

## NEW 18

*Representing TenPoint's long-awaited  
 entrance into the recurve crossbow  
 market, the NEW GT Curve is the perfect  
 embodiment of fit, form and function.*

The affordable GT Curve combines TenPoint's NEW 180-pound GT Limb bow assembly with our patented PowerTouch-10 trigger and molded one-piece Verton® stock and barrel assembly to create a lethal combination of speed, accuracy, and dependability. Its hunter-friendly 13.375-inch power stroke and lightweight, compact frame also makes it easy to load and highly maneuverable in the woods.

Both the GT Curve and GT Flex (page 20) are powered by

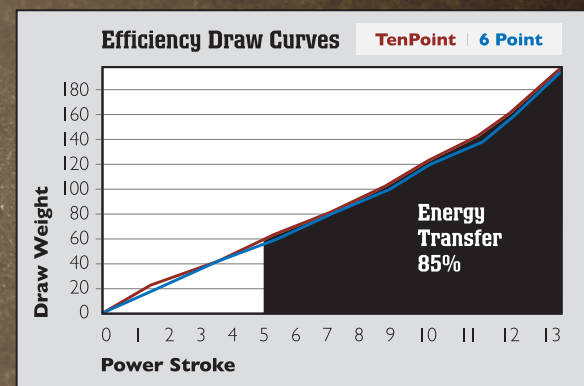

## The NEW 180-pound GT Recurve Limb

Twelve years in development, TenPoint's new laminated 180-pound GT Recurve Limb exceeds the parameters established in its original design envelope. Pound-for-pound and inch-for-inch, its 85% energy transfer rating is the best in the crossbow industry (see graph below).

Co-engineered by Gordon Glass and TenPoint, its superior design sets a new limb standard for optimum power stroke, deflection, over-pull, brace height, and poundage.

At the heart of the design is a ground, tapered power-generating glass core supported by a cross-weaved glass filler that sets the required thickness and adds unparalleled stability and durability to the overall construction. This package is then captured on both sides by premium S-Glass outer skins completing a classic design destined to become the best in the industry.

## The GT Curve Package Includes:

- TenPoint's Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

# Pro Slider™

IMPROVED 08

*The 305 FPS Pro Slider's innovative design allows its bow assembly to slide between its machined upper and lower TriLoc barrel and to locate and lock in any of three shooting positions, making it ideal for multiple shooters within a family or any shooter, regardless of age, sex or physical stature.*

**305 FPS\***

**175 LB. Draw Weight**

**86.7 FP Kinetic Energy\***

Available as a bow with scope only or as a package

Packaged Pro Sliders may be purchased with or without ACUdraw or ACUdraw 50 cocking mechanism

Comes with 3x Multi-Line Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

Regardless of the position selected (see chart), it is a high-performance, precision crafted hunting machine with a center of balance to suit all ages and sizes. The 2008 model has been upgraded with TenPoint's patented 3.5-pound PowerTouch-6 trigger, improving accuracy and making the trigger pull lighter and smoother. The Pro Slider is double-dip fluid imaged in Mossy Oak Break-Up®.

## The Pro Slider Package Includes:

- TenPoint's 3x Multi-Line Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

### Pro Slider Performance

Draw Weight	Power Stroke	FPS	
<b>175</b>	<b>12.0</b>	<b>305+</b>	<b>Long Position</b>
<b>150</b>	<b>10.625</b>	<b>280+</b>	<b>Medium Position</b>
<b>125</b>	<b>6.5</b>	<b>220</b>	<b>Short Position</b>

Each position creates a new center of balance with a different power stroke, draw weight, and speed.

# GT Flex™

NEW 08

*The NEW GT Flex combines TenPoints super-efficient NEW GT Recurve Limb (see page 9) with its innovative 6 Point Slider stock assembly to create three amazing recurve crossbows in one.*

**up to 300 FPS\***

**180 LB. Draw Weight**

**70 FP Kinetic Energy\***

Available as a bow only with peep and pin or as a package

Packaged GT Flex may be purchased with or without ACUdraw or ACUdraw 50 cocking mechanism

Packaged model comes with 3x Multi-Line Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with 350-grain arrow

Mounted in its 180-pound/13.25-inch power stroke position, it is a lethal 300 FPS deer hunter. Locked in its medium, 125-pound/11.875-inch stroke position, it transforms into the perfect recurve for turkey hunting and bow-fishing. And, in its 90-pound/7.75-inch stroke position, it is destined to become the industry's highest quality training crossbow for youngsters and first-time shooters.

Double-dip fluid imaged in Mossy Oak Break-Up®, weighing 6 lb. 4 oz., and equipped with TenPoint's machined UL TriLoc barrel, riser and TenPoint's patented PowerTouch trigger, there is no better performance or dollar-value in the industry today.

## The GT Flex Package Includes:

- TenPoint's 3x Multi-Line Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

Each position creates a new center of balance with a different power stroke, draw weight, and speed.

# TenPoint Core Features

## TenPoint Series Core Performance Features

All TenPoint Series crossbows are made with a group of Core Performance Features (noted by black dot on callouts) that ensure accuracy, dependability, and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

- Red dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.
- Black dot indicates a core performance feature.

Precision CNC machined aluminum wheels or cams (not on GT Curve)

The main assembly bolt's locking setscrew and the foot stirrup's two attachment setscrews are located on the underside of the crossbow's riser (foot stirrup setscrews not applicable to CLS models)

● VIBRA-CUSH® patented bow-to-barrel mounting system

● Limb-bolt locking setscrews (only on the Lazer HP)

# 6 Point Core Features

## 6 Point Series Core Performance Features

Like the TenPoint Series, our two 6 Point Series models are built on an equally impressive foundation of core features (noted by black dot on callouts) that mirror most of those in the TenPoint Series. While the Pro Slider and GT Flex are conceptually very different from our original TenPoint Series' models, it is easy to recognize the gene pool from which they come.

● Orange dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.

● Black dot indicates a core performance feature.

180-pound GT Recurve Limb system  
(only available on GT Flex)

Both models also accept the popular SteddyEddy Monopod System

## Two Great Cocking Devices – Making Bowhunting Accessible to Everyone

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means - in many cases taking technological shortcuts - to boost arrow speed in order to sell their crossbows. All of those means - using heavier limbs, longer power strokes, and reverse cams - have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

TenPoint responded to the need before all others by developing its two integrated, convenient and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50.

The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort. Both devices load the bow string accurately every time.

### Patented ACUdraw – The Premier Cocking Aid Available Today

The patented ACUdraw is the most user-friendly and practical solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike some of the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

...> Reduces draw weight to about 5-pounds when operated manually

...> Belt holster for ACUdraw crank included

...> Cranks manually or powers-up with almost any cordless screwdriver or drill (equipped with a clutch or low-torque setting)

...> Unlike most other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories

...> Draws the bow accurately every time

...> Available as an accessory or pre-installed

## Patented ACUdraw 50 – Takes the Traditional Rope-Cocker to a New Level

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

...> Draws the bow accurately every time

...> No more dangling ropes or handles

...> No more need to hang a rope around your neck or to stash it in your fanny pack

...> When not in use, powerful mini-magnets hold the handles securely and silently in place

...> Available pre-installed or as an accessory

...> Can be retrofitted to any TenPoint stock

...> Lightweight and affordable

The ACUdraw 50 Handles retract and store neatly against the stock when not in use.

Accessories

4-Arrow Instant Detach HX Quivers™

Weighing only 6-ounces empty and available in three camo patterns, TenPoint's two HX Quivers feature a four-arrow ABS cup and a rubber arrow gripper connected by two ultra-light carbon fiber rods. This sturdy double-rod backbone is stabilized with a two-sided polycarbonate X-Connector™ that snaps together while positioning and adjusting the quiver for left or right-handed use and then bolts securely into a locked position. The backside of the X-Connector is fitted with a Lever Lock mounting system which screws directly onto the bow, allowing the user to instantly attach or detach the quiver.

The cup and rubber gripper are molded with raised nubs that protect arrow fletching from getting crushed when the crossbow sits on a table, floor, or the ground.

HX Crossbow Quiver

The HX Crossbow Quiver's rubber arrow gripper fits arrow shafts between 21/64ths and 23/64ths in diameter.

- HCA-01807-4 4-Arrow Instant Detach HX Quiver in REALTREE® APG HD™
- HCA-01807-6 4-Arrow Instant Detach HX Quiver in ADVANTAGE TIMBER HD®
- HCA-01807-3 4-Arrow Instant Detach HX Quiver in Mossy Oak Break-Up®
- HCA-01806-3 4-Arrow Instant Detach HX Quiver in Mossy Oak Break-Up® (for 6 Point Series Crossbows)

ADVANTAGE TIMBER HD®

REALTREE® APG HD™

REALTREE HARDWOODS GREEN HD®

Mossy Oak Break-Up®

HX Conventional Bow Quiver

The HX Conventional Bow Quiver comes with two arrow grippers. It is mounted with the standard arrow gripper for shafts from 21/64ths thru 23/64ths diameter. The second gripper, which easily replaces the standard gripper, fits arrow shafts between 17/64ths and 20/64ths in diameter.

- HCA-02007-3 4-Arrow Instant Detach HX Conventional Bow Quiver in Mossy Oak Break-Up®
- HCA-02007-4 4-Arrow Instant Detach HX Conventional Bow Quiver in REALTREE® APG HD™
- HCA-02007-6 4-Arrow Instant Detach HX Conventional Bow Quiver in ADVANTAGE TIMBER HD®

Sling

The Claw® Sling, manufactured for TenPoint by Quake Industries,™ is clearly superior in quality, design and construction. It features heavy-duty adjustable nylon straps (swivels included) and a longer, completely non-slip and noise free rubber shoulder pad molded in Quake's all purpose camo.

- HCA-00307-5 The Claw® (by Quake Industries™) in the all purpose style camo

TenPoint Hard Travel Case

TenPoint's BowMax airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment. Manufactured for TenPoint by Plano Outdoor Products, it contains all the room necessary to securely protect your crossbow and its accessories. It closes securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded rubber grip. Small accessories store neatly in a StowAway utility box included with every crossbow case.

- HCA-200 TenPoint BowMax™ Hard Case

TenPoint Deluxe Soft Carrying Case

Designed by Neet Products, Inc. for TenPoint, this NEW soft crossbow case features a wider body for both compound and recurve crossbows along with sturdy side panels for added depth to accommodate mounted optics and additional crossbow accessories. Made with double-stitched, high-grade Cordura®, thick padding and Trico-lining, this functionally improved design also includes a heavy-duty YKK zipper with double pulls and a removable shoulder strap.

Available in black with REALTREE HARDWOODS GREEN HD® or Mossy Oak Break-Up® accented panels.

- HCA-20107-1 TenPoint Soft Crossbow Case in REALTREE HARDWOODS GREEN HD® (NEW '08)
- HCA-20107-3 TenPoint Soft Crossbow Case in Mossy Oak Break-Up® (NEW '08)

SteadyEddy®

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteadyEddy telescoping two-section monopod ensures motion-free shooting while seated in a tree stand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, its patented Posi-Lock System™ allows you to quickly set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a completely maneuverable ball-joint mount or with the new Ball Stem Mounting Bracket and ball-joint (HCA-039). It clamps conveniently under your stock when not in use. All SteadyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

- HCA-030 SteadyEddy Crossbow Monopod System (for TenPoint Series models)
- HCA-03006 SteadyEddy Crossbow Monopod System (for 6 Point Series models)

Easily installed, the new Ball Stem Mounting Bracket gives you more options for mounting the SteadyEddy ball-joint and your sling swivel stud. Use this new bracket to retrofit crossbows with the new and improved larger diameter Ball Stem mounting screw or to give yourself the option of mounting your front sling swivel stud on the left or right side of the crossbow.

- HCA-039 SteadyEddy Ball Stem Mounting Bracket

SteadyEddy System Accessories

- HCA-03310 Rod Retention Clip (for TenPoint Series models)
- HCA-03306 Rod Retention Clip (for 6 Point Series models)
- HCA-037 3rd Extension (for shooting in standing position) - not pictured

Patented ACUdraw™ and ACUdraw 50™ (also shown on pages 26 & 27)

Your dealer – or you if you have the proper tools – can install either of these two incredible patented cocking devices. Units include a template for drilling the receiver holes in pre-2003 TenPoint models (drill, bits and hole cutter not included). Receiver holes are pre-molded in current models. Installation instructions are included.

- HCA-000-B-II ACUdraw Cocking Mechanism
- HCA-000-B-A50 ACUdraw 50 Cocking Mechanism

ACUdraw Replacement Accessories (shown collectively)

- HCA-400 ACUdraw Draw Cords (two-piece for pre-1998 claw)
- HCA-401 ACUdraw Draw Cord (one-piece for new style claw)
- HCA-411 ACUdraw Retraction Spring (post 1998)
- HCA-41106 ACUdraw Retraction Spring (post 2006 without roll pin on hub – call TenPoint's Warranty Department at 330-628-9245 if clarification is needed)
- HCA-421 ACUdraw Claw with self-centering draw cord
- HCA-426 ACUdraw Claw Holder (for TenPoint Series models)
- HCA-42606 ACUdraw Claw Holder (for 6 Point Series models)
- HCA-428 ACUdraw Claw III Kit (includes claw, holder, and draw cord)
- HCA-430 ACUdraw Hand Crank (replacement handle only)
- HCA-435 ACUdraw Hand Crank & Holster Combo
- HCA-450 ACUdraw 50 Replacement Draw Cords
- HCA-451 ACUdraw 50 Replacement Retraction Spring
- HCA-480 Stock Cover Kit (black, flat stock covers with hardware) - not shown
- HCA-520 Installation Tool Kit for ACUdraw & ACUdraw 50 units - not shown

T-Handle Stability Pads

Molded from durable polyurethane with metal discs embedded in them, these pads easily adhere to the butt stock to create a magnetically-improved, noise-free handle storage platform.

- HCA-452 ACUdraw 50 T-Handle Stability Pads

Cable Savers

Made from Polybutylene Terephthalate (PBT) these two cable savers provide a near friction-free and dimensionally stable carriage for your cables, shot after shot. PBT is known for its strength, lubricity, rigidity, and durability, a perfect combination of characteristics required for an effective cable saver.

Trigger Upgrades

TenPoint's RollerTouch trigger finger is available as an upgrade accessory for those interested in improving the pull-weight of pre-2007 Titan and pre-2006 Hybrid Lite model trigger mechanisms. The RollerTouch finger has a double-roller installed at its top to reduce friction between the finger and the string latch reducing the trigger pull to approximately 5-pounds. The trigger finger will be installed at the TenPoint Service Department.

- HCA-507 RollerTouch™ Trigger Finger

TenPoint's two NEW 2008 PowerTouch trigger upgrades allow owners of Titan TL-7, pre-2008 Pro Fusion and pre-2008 6 Point Series models (Pro Slider and Slider) the ability to replace their triggers with the finest crossbow trigger made today. All trigger upgrades must be arranged and installed by TenPoint's Service Department at 330.628.9245.

- HCA-50410 PowerTouch-10™ Trigger Upgrade Kit (NEW '08) for TenPoint Series Titan TL-7's and pre-2008 Pro Fusions.
- HCA-50406 PowerTouch-6™ Trigger Upgrade Kit (NEW '08) for 6 Point Series Sliders and pre-2008 Pro Sliders.

Maintenance

TenPoint's CareKit™ includes three important maintenance tools (Microlon® Precision Oiler; TenPoint String Wax and Conditioner; and TenPoint LensPen) packaged in a versatile multi-cavity translucent plastic mini-case with plenty of extra room for other bow maintenance items.

- HCA-11207 CareKit

The high-tech lubricant contained in the Microlon® Precision Oiler includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin impregnates the metal to create a dry film lubricant. Perfect for crossbow rails, triggers and wheels, this high-quality lubricant comes in a tube fitted with a precision applicator needle.

- HCA-11106 Microlon® Precision Oiler (shown with kit)

Made from all natural compounds, TenPoint String Wax and Conditioner comes in a convenient chap stick-style tube. This new string wax and conditioner both lubricates and rejuvenates bow strings and cables. Scent-free and water-resistant, it greatly reduces string friction and abrasion against cable slides, wheels or cams.

- HCA-11007 TenPoint String Wax and Conditioner (shown with kit)

This clever lens treatment tool features a soft fiber lens brush that telescopes out of one end of its pen-sized tube and an abrasive-free lens cleaning pad housed underneath a cap at the other end. The brush gets rid of scope lens dust and the cleaning pad eliminates smudges and cleans and polishes lens surfaces without damaging or scratching the glass.

- HCA-09107 TenPoint LensPen (combo brush and cleaner) (shown with kit)

These additional lubricants are also highly effective maintenance tools that help keep crossbows in good working order: The Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance. Carry the convenient single-use oil wipes in your fanny pack for on-the-go cleaning and lubrication needs. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

- HCA-111 Flight Rail and Trigger Lube
- HCA-112.12 Flight Rail Oil Wipes (12 foil wrapped wipes per package)

Scopes

Calibrated for crossbows that shoot in the 300 FPS range, this 20, 30, and 40-yard combo illuminated dot and crosshair configuration is housed in a lightweight, seven-inch aluminum tube equipped with fully-coated 3x optics. The dots are positioned at the intersection of each duplex crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color. 7/8-inch scope mounting rings included.

- HCA-097 3x Pro-View Scope with 7/8" mounting rings

Perfectly proportioned for a crossbow at only seven-inches long, this light, compact scope features fully-coated 3x optics and three duplex crosshairs calibrated for 20, 30, and 40-yard shots with crossbows that shoot in the 300 FPS range. 7/8-inch scope mounting rings included.

- HCA-088 RangeMaster 3x32 Multi-Line Scope with 7/8" mounting rings

The Pro-40 is a zero-power 40mm multi-dot scope with an integrated, adjustable 7/8-inch mounting system that requires no rings. Its three illuminated dots, calibrated for 20, 30, and 40-yards for crossbows that shoot in the 300 FPS range, can be rendered in red or green to suit individual hunting and light conditions. The light intensity of both color views is regulated by a five-position rheostat.

Bow-Fishing Rig (NEW '08)

Manufactured by AMS, the Bow-Fishing Rig and mount attaches directly to the crossbow riser. This fast, simple rig is equipped with a zero-drag for exceptional line control. It allows the stacked - not spooled - line to release freely from the bottle so the arrows fly further and deeper. With the AMS Retriever, there are no bails to release or buttons to forget to push before the shot – just shoulder, aim, shoot, and retrieve.

Each kit comes with an AMS reel, a bottle including 35-yards of 130-pound Braided Dacron Line, a mounting bracket with post-standoffs, and a bow-fishing arrow.

- HCA-072 7/8-inch Fixed Dovetail Scope Mount / bronze
- HCA-076 7/8-inch Fixed Mini Dovetail Scope Mount / black (for 40mm scopes)
- HCA-077-H 7/8-inch Adjustable Dovetail Scope Mount / bronze (for crossbows equipped with the RangeMaster Cam or Fixed Position Accessory)
- HCA-07107 Peep and Pin Conversion Kit (for models with Adjustable Dovetail Scope Mounts) not shown
- HCA-074 Dovetail Fixed Position Accessory – not shown

Sights

Standard on the Pro Flex (when sold as a bow only), this machined aluminum sight bracket features two pin slots and is mounted on the riser. The bracket comes with one pin. Additional pins are available (HCA-050 Standard Sight Pin)

- HCA-041 Front Sight Bracket with Pin
- HCA-050 Standard Sight Pin
- HCA-062 Rear Peep Sight (Rear peep will not fit on a 7/8" mount. Contact Customer Service at 330.628.9245 for details on purchasing a Peep and Pin Conversion Kit.)

Field Crossbow Re-Stringer (NEW '08)

Designed for our new line of recurve crossbows, this Field Crossbow Re-Stringer is the perfect accessory for that "just in case" moment out in the field. The limb-tip-cap bonded to the end of our new GT Recurve Limb™ incorporates a secondary ridge designed to hold the Re-Stringer in place when being used.

- HCA-10708 Field Crossbow Re-Stringer (NEW '08)

Crossbow Arrows

The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With Moon, SuperBrite™ Blunt or Tracer™ Nocks

Two Crossbow Arrows Available:

Carbon Fiber Shafts – 20-inch 22/64ths

For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64ths diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Easton®, the Pro Elite is a masterpiece of precision engineering, strength and accuracy.

Advanced carbon fiber Pro Elite arrows are laser inspected for straightness to within .003; and hand-sorted for weight tolerances to within two-grains per dozen. They come equipped with brass or aluminum inserts and TenPoint's patented SuperBrite blunt nocks or CPC moon nocks or Tracer™ nocks. Fletched with Norway DURAVANES™, they are available in 3-packs, 6-packs, and bulk 72-packs (Tracer™ nocked arrows not available in 72-packs).

The Pro Elite Carbon Arrow is also available in a Premium Hunter version. Each Premium Hunter arrow is precision tested for trueness and weight-matched for accuracy. Premium Hunters come with individually tuned NAP® broadheads (in either a 3 or 6-pack – with 100-grain Spitfire® expandable broadheads – or in a 6-pack only with Thunderhead® 100-grain fixed-blade broadheads) installed and ready to shoot. The Premium Hunter is only available with SuperBrite blunt nocks or Tracer™ nocks.

Tracer™ nocks are only available with Spitfire broadheads.

Aluminum Shafts – 20-inch XX75 Camo 2219s

As an Easton® Aluminum Complete Crossbow Arrow Resource, TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton® shafts to produce the highest quality aluminum crossbow arrows available today.

This three-color camo shaft is the proven industry standard for reliable results. Available in black CPC moon nocks, TenPoint's patented SuperBrite blunt nocks, or Tracer™ nocks, these shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES™.

TenPoint crossbow arrows are available in bulk 72-packs (except Tracer™ nock arrows), 6-packs or 3-packs.

All Bow, No Bull with TenPoint Crossbows

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All speed tests, except on the recurve models, were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point (420-grains total). The recurve models were tested with 420-, 400- and 350-grain arrows. The chronograph was positioned 18-inches in front of the crossbow for all shots.

Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.

\* Blunt nock Tracer™ carbon and aluminum shafts are not shown

HEA-251.12 Twelve-pack of Patented SuperBrite nock tools. Available for refletching 2219 aluminum shafts or 22/64ths diameter Pro Elite shafts that use SuperBrite nocks.

Phantom Xtra	Phantom CLS	Shadow CLS	Lazer HP	Pro Fusion	GT Curve	Titan TL-7	Pro Slider	GT Flex	
•	•	•	•	•	•		•	•	Premium 3.5-pound PowerTouch trigger with MIM action components and safety slide.
						•			5-pound RollerTouch trigger featuring a double-roller system to reduce friction.
•	•	•	•						Patented GripSafety secondary safety to help protect the fingers and thumb on the fore-grip hand. Left-handed installation available on request.
•	•	•	•	•	•	•	•	•	Patented DFI™ (dry-fire-inhibitor). Prevents dry-firing the crossbow when no arrow is loaded on the flight deck.
•	•	•	•	•	•	•	•	•	Ambidextrous Automatic Safety.
•	•	•	•	•		•			OTT (over-the-top) limb pocket & Zytel® “lift & separate” limb suspension system, the ultimate in limb stability and sound reduction.
•	•	•							CLS (compact limb system) components which include a highly durable integrated riser and foot stirrup, 12-inch IsoTaper™ limbs, high-performance MR™ Cams, and Ultra-Cam™ string and cables.
							•	•	Complete-Capture limb pocket isolation system.
•	•	•							185-pound, 12-inch IsoTaper™ limbs with Ultra-Cam™ string and cables with tuneable yokes.
			•						Premium field-proven ST™ quad-limbs with Ultra-Cam™ string and cables with tuneable yokes.
				•			•		175-pound HL quad limbs with Fast Flight string and cables with tuneable yokes.
						•			TL-4 quad limbs with B-66 string and steel cables with tuneable synthetic yokes.
					•			•	<b>New</b> 180-pound GT Recurve Limb with 452X string.
•	•	•	•						HP (High Performance) and MR (Maximum Rotation) cams.
•	•	•	•	•	•	•	•	•	CADD designed & finite element analysis-tested, precision-machined riser.
•	•	•	•				•	•	65 Rockwell Hardcoated and Teflon® impregnated barrel surface.
•	•	•	•						Anodized, machine finished ACRA-ANGLE aluminum barrel. Provides the ultimate in dimensional integrity for perfect arrow flight.
							•	•	UL TriLoc machined aluminum barrel assembly which allows the riser to locate and lock in one of three separate shooting positions.
•									<b>New</b> richly-crafted, wood-grain laminated thumbhole stock.
•	•	•	•	•	•	•			FST style stock. TenPoint's original functionally superior thumbhole design.
				•	•	•			Molded combination stock and barrel made from Verton® - a durable, lightweight polymer.
							•	•	Verton® two-piece stock and fore-grip.
•	•	•	•	•	•	•	•	•	ACUdraw and ACUdraw 50 compatible.
•	•	•	•	•	•	•	•	•	Fixed 7/8-inch Weaver-style aluminum dovetail scope mount (*on GT Flex only when purchased as a package).
								•	Fixed sight bridge with Peep & Pin sight system on bow only purchase. Scope compatible, optional 7/8-inch Fixed Dovetail Scope Mount (HCA-078 or HCA-076) required to mount a scope.
•	•	•	•	•	•	•	•	•	Limited Lifetime Operational Warranty (See Owner's Manual for limitations).

# A Three Generation Ohio Hunt

## How the Crossbow Recruits and Retains Hunters

Thanks to the Ohio Division of Wildlife's Apprentice Hunter Program and the state's liberal crossbow regulations, TenPoint CEO, Rick Bednar and his 82-year-old father, 2007 Archery Hall of Fame inductee, Bill Bednar, were able to hunt deer for the first time this October with Rick's two sons, Phil and Steve.

Phil is a senior business major and starting shortstop on The University of Akron's Division I, Mid-American Conference baseball team. Steve is a senior at Stow High School in Northeast Ohio where he competes as one of the top golfers in the state and is regularly the top scorer on the basketball team.

While the two boys have talked many times over the years about going hunting, their school and sports schedules left them little time to take Ohio's required Hunter's Education course or to schedule a practical time to hunt with their dad. Ohio's Apprentice Program and its liberal crossbow regulations came to the rescue.

The Apprentice License is available to residents and non-residents who have never taken a hunter education course. Apprentice hunters must be accompanied by a licensed hunter over age 21 and they may purchase the Apprentice License up to three times. The theory behind the program, of course, is to overcome the objection of having to invest the time in a hunter's education course in order to find out if you like the sport.

The second factor that set the stage for the Bednar family hunt was the crossbow and Ohio's crossbow regulations. At 82, Bill Bednar is no longer able to hunt with a recurve or compound bow. Phil and Steve have never had the time to become proficient with a compound bow. And, Ohio's regulations allow unrestricted use of crossbows during archery season.

Was the hunt a success? Yes and no. Granddad Bill and Dad Rick passed on some shots, but Phil tagged-out with a "first-time" 8-point and a doe, and Steve took a doe and has been hunting weekends ever since determined to harvest a bigger buck than his older brother.

When Phil occasionally makes it home on weekends for a good home-cooked meal, the friendly sibling "trash talking" now centers on deer hunting.

We think we can count on two new enrollees in Ohio's Hunter Education classes next year.

Phil - 21  
Bill - 82

Steve - 17  
Rick - 50

# Doug Koenig to Help Grow the Sport

**TenPoint is pleased to introduce Doug Koenig as a new spokesman for our line of crossbows. Doug has been called the greatest all-around rifle, pistol, and shotgun competitive shooter in the world. In a competitive career started in 1990 – at age 20 – he has built a resume that is unequalled.**

### Here are some of his accomplishments:

- He is the only shooter to achieve a *perfect score* at the Masters International Championships. He has accomplished that feat *five* times and has won that tournament fourteen times.
- He has won *eleven* National Action Pistol Championships (Bianchi Cup), *two* European Bianchi Cups and *two* World Action Pistol Championships.
- He has won the World Speed Shooting Championship (Steel Challenge) *three* times.
- He has won the IPSC World Championship.
- He has won the World All-Around Championship (rifle, pistol, and shotgun).
- He has won the Gold Medal in 2003 and 2005 at the ESPN Great Outdoor Games in the rifle event.
- In his remarkable 2007 shooting season, Doug won the Masters International Pistol Tournament, the National Action Pistol Championship (Bianchi Cup), the European Bianchi Cup and the Sportsman's Team Challenge.

Doug's love for shooting actually developed out of a passion for hunting. "I started hunting when I was in my teens," says Doug. "After hunting season, I took up shooting just to stay in practice. I entered some tournaments just for fun; but after I won a few, I got hooked on the competition. Fortunately, my career has given me opportunities to hunt all over the world. I hunt all seasons using all weapons: compound bow, crossbow, shotgun, muzzleloader, rifle, and hand-gun."

The TenPoint staff first met Doug a few years ago when he stopped by our display at an industry trade show. He already owned one of our crossbows (he now owns three) and stopped to introduce himself and to tell us how much he liked the crossbow. He has firm opinions regarding product quality. "I cannot win tournaments without using good equipment," he contends. "I hunt with TenPoint crossbows for the same reason. You can't underestimate the importance of quality and dependability."

Since our first meeting, we have come to know and admire Doug as a person and as a competitor. That admiration and his philosophy regarding hunting – in particular, crossbow hunting – is what led us to ask him to become our spokesman.

As spokesman for the National Shooting Sports Foundation (NSSF), Doug supports hunting with all types of weapons. "We need more hunters, not fewer. The anti's love it when we fight among ourselves over choice of hunting weapons," he argues. "If we don't learn to accept each other, we'll end up killing the sport."

"State wildlife agencies want more deer killed and more hunters afield, and there is plenty of evidence to support the use of crossbows in archery season. They are a great tool for recruiting new bowhunters and retaining older ones, and they offer a good way for gun hunters to transition into bowhunting."

Besides taking on TenPoint as a sponsor, Doug is also a spokesman for an impressive number of other quality manufacturers like Smith and Wesson and Leupold.

TenPoint looks forward to working with Doug Koenig to help grow the sport and to expand the use of crossbows.
