# TO OUR CUSTOMERS

This year may be the best ever for crossbow hunting. Roughly ten states are considering easing their crossbow restrictions. Three of the ten are well along in the process, and the chances they will remove crossbow restrictions in their archery seasons are good. The remaining seven states - and perhaps others - appear interested in considering the crossbow issue early enough in the year to make regulatory changes in the 2009/2010 archery season if they so choose.

All this interest in easing crossbow regulations is no accident. Most state wildlife officials are looking to harvest more deer, recruit more hunters and find ways to retain existing hunters. In addition, they have come to understand that the state and national bowhunting organizations' exclusionary opposition to crossbows cannot be supported by facts or data of any sort.

In remarks made to a state legislative committee last December, Bill Audette, a Michigan resident and crossbow advocate summed up his argument in favor of crossbows better than anyone we have heard.

*"Members of the committee, what we are proposing is a paradigm shift, a sea change in the way of thinking about this issue. Instead of focusing on the limiting and negative concept of "Exclusion", we should be promoting and embracing the positive concept of "Inclusion". Two terms that are the direct by-product of the concept of "Inclusion" are the words "Opportunity" and "Choice". The former is necessary for the latter to be a possibility."*

I invite you to read pages 7-9 in this catalog to learn more about the regulatory environment today. I also urge you to get active in your state if need be. An easy way to stay current on crossbow issues is to visit our website ([www.tenpointcrossbows.com](http://www.tenpointcrossbows.com)) and to sign up for our E-Newsletter and our more targeted and issue-related E-Blasts.

We believe 2009 may well become a watershed year during which "inclusion" finally wins out over "exclusion" and that offering hunters the "choice" of using a crossbow during archery season will expand hunting "opportunity" for tens of thousands of new hunters.

Sincerely,

*Richard J. Bednar*

Richard L. Bednar, CEO  
TenPoint Crossbow Technologies

## Corporate Statement

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

## TenPoint & 6 Point Series 2009 COMPLETE PRODUCT GUIDE

# WHAT MAKES TENPOINT CROSSBOWS SUPERIOR TO OTHER BRANDS?

# HALL OF FAMERS

In each of the fifteen years TenPoint has been manufacturing crossbows, we have never failed to introduce innovations or to improve our products. And, in most cases, the advancements we have made originated from customer input. Since 1994, we have secured 12 patents with others pending or being filed.

**No other crossbow manufacturer comes close to this record of technological achievement.**

Below are some of our more significant innovations:

### Patented Trigger Technology

All TenPoint Series and 6 Point Series crossbows are now equipped with one of our patented 3.5-pound machined PowerTouch™ triggers. Designed to match-up with the physical characteristics of the models that use them, the PowerTouch comes in three versions, the Deluxe, PowerTouch-10, and PowerTouch-6. All PowerTouch triggers contain MIM (Metal Injection Molded) action components and continue to rate as the finest crossbow triggers made today.

### Patented DFI™ (Dry-Fire-Inhibitor)

In 1996 TenPoint introduced the DFI, which prevents dry-firing our crossbows when no arrow is loaded on the flight deck. The addition of this technology to our entire crossbow lineup has virtually eliminated the potentially severe damage and/or injury that can be caused by a dry-fire.

### Patented GripSafety™

Installed in the fore-grip of the top four TenPoint models with aluminum barrels, the GripSafety prevents pulling the trigger without first depressing and holding this secondary safety in place with your fore-grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore-grip and below the barrel's flight deck. Installed on a standard basis for right-handed shooters, left-handed installation is available at no charge when placing a new bow order.

### Patented ACUdraw™ and Patented ACUdraw 50™

TenPoint's convenient and user-friendly cocking aids have made our models the crossbows of choice for those who cannot or do not wish to manually load today's heavier draw weights. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aids available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 26 & 27 for details.

CLS Riser & Limb Pocket System

TenPoint Riser & Limb Pocket System

6 Point Riser & Limb Pocket System

George R. Gardner

**TenPoint is proud it can boast that three of its director/owners are now Hall of Fame members.**

The newest inductee is George R. Gardner, President of TenPoint. He was inducted into the 2008 class of the National Archery Hall of Fame in a ceremony held January 8, 2009, during the annual Archery Trade Association Show in Indianapolis.

George has spent most of his working life in the archery industry, but his fascination with the bow and arrow and his contributions to the sport as a competitive shooter, organizer, and big game hunter began to unfold as an 18-year-old back in 1946 when he discovered it was more fun to hunt deer with a bow than with a gun.

Over the years as a competitive archer he won numerous local, state and national archery tournaments. He is a co-founder, charter member and former vice president of the Professional Archers Association. He has served as president of the Detroit Metropolitan Archers Association and the Michigan Archers Association, vice president of the Michigan Bowhunters, and Field Governor for the N.F.A.A. He has also served on the American Archery Council, is a member of the Anderson Archery Hall of Fame and was the organizing founder of the Diana's, the first group to promote awareness of women's bowhunting opportunities and issues.

George began his career in the industry in 1960 as a sales representative working first for Pearson and then Shakespeare Archery. By 1963 he had become the National Sales Manager for Indian Industries. In the early seventies, he started his own independent manufacturers' representative business, which evolved into the G.R. Gardner and Co. and a 21-year career as, one of the top five Easton Arrow Distributorships in the country. Then, in 1994, he and Rick Bednar, with a group of additional investors, founded what is now TenPoint Crossbow Technologies.

The impressive trophy room added to his home in Southgate Michigan is a testament to the many African trips he has made in pursuit of his love of big game hunting. While he would be happy to catch the next flight for a new African adventure, he now spends most of his hunting days at his deer camp just above Claire, Michigan where he and his wife, Betty, hunt with family and friends and where each year they host a group of 20 to 25 youngsters who spend the day shooting bows, crossbows, and bb guns.

George joins two of our other director/owners as Hall of Fame members. In 2007, Bill Bednar, retired, was inducted into the National Archery Hall of Fame, and Chuck Jordan, our Director of Business Development, was inducted into the Bowhunters Hall of Fame. The combined archery and bowhunting expertise these three men have brought to our company have clearly contributed to TenPoint becoming the industry leader in crossbow technology and performance.

Bill Bednar

Chuck Jordan

## HP™ and MR™ Cam Stability Bushings

TenPoint's Cam Stability Bushings, while simple in concept, perform several important functions. First, they provide an ultra-stable sleeve to support and stabilize the axles. Second, they help eliminate wheel lean when loading the crossbow. And, third, they help establish precise string tension on the barrel surface, to promote accurate arrow flight and to reduce serving wear.

## Barrel Technology

The TenPoint Series' ACRA-ANGLE™ and the 6 Point Series' UL TriLoc™ barrels are key to the unparalleled shooting accuracy of TenPoint crossbows. Both are designed to allow shooters to pull the bow string while their index fingers touch the side of the barrel; thereby guaranteeing accurate loading, which is essential to shooting accuracy. And, both of their arrow flight decks are machine finished for unsurpassed dimensional integrity, which insures accurate, repeatable arrow flight.

## Riser and Limb-Pocket Technology

Developed primarily through the Computer Aided Drafting and Design (CADD) process, all TenPoint and 6 Point risers are Finite Element Analysis (FEA) tested and designed for specific crossbow model applications. Made from 6061 T6 machined aluminum, each riser design is created to maximize the efficiency of each limb system's total package.

## Our Commitment to Quality

TenPoint's Corporate statement, reprinted on the back cover of this catalog, begins with our commitment to making products that are recognized as the industry standard. We work to achieve this goal through careful engineering, rigorous testing, and ongoing quality assurance procedures.

### Engineering

With combined crossbow design experience of over 65 years, our three-person design team employs the premier cutting-edge SolidWorks® software to design new and improve existing products. With this in-house capability to conceptualize, design, prototype, and test, we can produce third and fourth generation product designs by product launch.

### Testing

Our rigorous testing standards have earned us a reputation for making durable and dependable products. We validate all of our designs through a prototyping process that combines extensive hands-on testing with automated cycle testing unparalleled in our industry. Our proprietary automated shooting simulator allows us to put thousands of shots on our bow assembly designs in a matter of days.

### Quality Assurance

Our Engineering, Receiving, and Production Departments work with suppliers to insure that raw materials meet our strict product design specifications. A team in our newly created Quality Assurance Department checks and re-checks incoming parts with custom built fixtures, tooling, and measurement equipment before parts move on to assembly. And, finally, finished products are then subject to continuous random inspection and evaluation.

# WHAT'S NEW FOR 2009

## Titan HLX™

Dollar for dollar, the best crossbow value in the industry, the NEW Titan HLX is a faster, enhanced version of TenPoint's longstanding workhorse Titan.

The Titan HLX's new bow assembly features powerful 175-pound HL limbs equipped with Fast Flight™ string and cables and machined aluminum wheels, upgrading the Titan's speed to a blistering 305 fps. To improve accuracy and handling, its Verton® molded combination FST IV stock and barrel design now houses TenPoint's premium 3.5-pound patented Power Touch-10 trigger, commonly accepted as the best trigger in the industry.

Double-dip fluid imaged in Mossy Oak Treestand®, the Titan HLX, now more than ever, defies its classification as an entry-level model by outclassing and outperforming other brand's top-of-the-line models.

## Defender CLS™

An innovative fusion between TenPoint Series CLS bow technology and 6 Point Series stock technology, the NEW and potent Defender CLS is fast, lightweight, maneuverable and deadly accurate – the perfect crossbow for those looking to move up to TenPoint's premium shooting technology at an affordable 6 Point price range.

Featuring TenPoint's Compact Limb System Technology (CLS), an innovative one-piece riser and foot stirrup, 12-inch 175-pound IsoTaper limbs fitted with maximum rotation (MR) cams, and Brownell Ultra-Cam™ string and cables, this bow assembly shoots in excess of 330 fps with a hunter friendly 13.0-inch power stroke and a maneuverable 17.5-inch axle-to-axle span when cocked.

Dipped in Mossy Oak Treestand® camo, the Defender CLS is a highly functional blend of great balance, precision engineering, and high-end performance.

## GT Mag™

Shooting between 307 and 335 fps, depending on arrow weight, the NEW GT Mag is the 6 Point Series new generation of recurve power and performance.

Its 200-pound draw weight bow assembly features Gordon Composite laminated recurve limbs mounted on the innovative 6 Point Series stock assembly. At the heart of GT limb design is a ground and tapered power-generating glass core supported by a uni-directional glass filler that establishes the required thickness and adds unparalleled stability and durability to the overall construction. This design package is then captured on both sides by premium S-Glass outer skins to complete a classic design, which now sets the standard for recurve crossbow limb performance.

Dipped in Mossy Oak Treestand®, the lightweight GT Mag is destined to become the recurve of choice for those looking for the ultimate in accuracy, power, and handling.

# CROSSBOW REGULATIONS TODAY

Thirty years ago in North America only Arkansas, Ohio, and Ontario allowed hunters unrestricted use of crossbows during archery season. During the next ten years, Wyoming and the Canadian Provinces of British Columbia, the Northwest Territories, and Nunavut lifted their restrictions.

Since 2002, however, there has been significant growth in unrestricted crossbow use. Joining the states and provinces above, Alabama, Florida, Georgia, Indiana\*, Kentucky, Louisiana, Maryland\*, Pennsylvania\*\*, South Carolina, Tennessee, and the Province of Quebec have added crossbows to their entire archery season, portions of it, or in select areas of their state during archery season.

\*Crossbows legal for part of the archery season  
 \*\*Crossbows legal in Special Reg Urban Units

## Why the Recent Growth in Crossbow Use?

Whitetail deer populations have exploded from the middle of our continent eastward in the past twenty years. While 19 states show an increase in the number of hunters between 1995 and 2005, 31 states have lost hunters, creating a net loss for the country. Two of the big three hunting states, Michigan and Pennsylvania have lost 16% and 12% of their hunters respectively, more than the total number of hunters in North Dakota.

Fewer youngsters are taking up hunting, and existing hunters are opting out in historically larger numbers. To cause more concern, recent data from some popular bowhunting states shows that bowhunters start quitting the sport in their mid 40's, and this trend continues in a straight line downward through age 65+.

Wildlife experts believe this decline is caused primarily by time constraints. At the most demanding time in their careers and while raising families in a complex society, bowhunters find less time to devote to a sport that requires practice to maintain proficiency. Eventually, as bowhunters reach their later years, their physical limitations become the primary reason for leaving.

The age profile of crossbow hunters, on the other hand, shows a more encouraging trend. While time constraints cause a similar drop in participation around age 45, crossbow hunters recover their peak participation levels between ages 50 and 60, after their children are raised and their careers stabilize. Furthermore, the decline in crossbow participation after age 60 is significantly slower than that of the vertical bowhunter. Crossbows require less practice time and demand less physically from the hunter.

The Georgia Data is similar to data available from a number of other popular bowhunting states.

# CROSSBOW REGULATIONS TODAY

## Wildlife Professionals Recognize the Simple Truth

Many state wildlife agencies face the same dilemma. With strained budgets from declining license sales and out-of-control deer populations, they need to find ways to harvest more deer, recruit new hunters, and retain the hunters they already have.

As data has become available from crossbow-friendly states, wildlife professionals have become better educated. Most now understand the ballistic similarities between crossbows and vertical bows and have seen how crossbows help manage the resource, improve bowhunter retention, bring retired bowhunters back into the fold, and recruit new hunters. Armed with this new data more of them are moving to incorporate the crossbow into their archery seasons as one way to solve their problems and grow the sport.

## Ohio – A Prominent Crossbow Success Story

While states like Georgia, Virginia, Maryland, and Tennessee have positive and credible data regarding the benefits of using crossbows, Ohio has the most expansive body of data.

Twenty-six years ago during its 1982-1983 season, Ohio eliminated crossbow restrictions during its entire four-month long archery season. At that time, the state had an estimated 82,000 vertical bowhunters and 11,000 crossbow hunters. By 2006, the number of vertical bowhunters grew 183% to 150,000 while the number of crossbow hunters exploded to 175,000, with 8% of all archers – roughly 25,000 – hunting with both weapons.

### Ohio Archery Season Participation 1982-2006\*

	1982	2006
<b>Crossbow Hunters</b>	<b>11,000</b>	<b>175,000</b>
<b>Vertical Bow Hunters</b>	<b>82,000</b>	<b>150,000</b>
<b>Total Archers</b>	<b>93,000</b>	<b>325,000<sup>1</sup></b>

\* Estimates by survey

1. 8% of total used both weapons

### Ohio Archery Season Harvest 1982-2006

	1982	2006
<b>Crossbow Harvest</b>	<b>193</b>	<b>33,658</b>
<b>Vertical Bow Harvest</b>	<b>3,688</b>	<b>26,432</b>
<b>Total Archery Harvest</b>	<b>3,881</b>	<b>60,090</b>

### Ohio All Weapons Permits to Harvest Ratio 1982-2006

	1982	2006
<b>Total Permits</b>	<b>257,504</b>	<b>543,614</b>
<b>Total Harvest</b>	<b>52,885</b>	<b>237,316</b>
<b>Ratio: Permits to Harvest</b>	<b>4.87 to 1</b>	<b>2.29 to 1</b>

Harvest numbers in Ohio, a mandatory deer check state, during the same years are equally impressive. In 1982, only 193 deer were harvested by crossbows while vertical bows accounted for 3,668. Twenty-four years later the total archery harvest leaped to 60,090 with crossbows accounting for 33,658 of that total. And, today in Ohio, there are more and bigger deer to hunt than ever.

One of the tired old claims levied against crossbows is that they will devastate the deer population and that they will decrease the chances of success for vertical bowhunters. The accompanying Archery Season Harvest and Permit-to-Harvest Ratio charts prove both claims wrong. While the number of archers increased 3 1/2 times during the 24 years in question, the harvest increased 15 1/2 times, so archers are proportionately harvesting far more deer now than they were when crossbows first became legal. Likewise the ratios between the total number of hunting permits issued and the total number of deer harvested profoundly illustrate that a hunter's chance of success today is far greater than it was in 1982. Back then only one deer was harvested for every 4.87 permits issued. In 2006 a deer was harvested for every 2.29 permits issued.

So, since crossbow restrictions have been lifted in Ohio's deer season, archers have come to play a meaningful role in managing the resource - much to the satisfaction of the Division of Wildlife - the number of vertical and crossbow hunters has grown dramatically, archers have more deer to hunt than ever, and the chances of success are greater than they were before crossbows joined the 1982 season.

## Who Wants Crossbows in Archery Seasons?

Within the archery industry, all of the crossbow opposition comes from a small but highly vocal minority of traditional bowhunters. They say they speak for all bowhunters but have never been able to provide any data to support that contention. In their determination to defeat crossbow initiatives they unwittingly oppose inclusion, recruitment, and retention; therefore, helping to make archery seasons irrelevant from a game management perspective. For the first time, this year, North Carolina proposed an all-weapons hunting season as a solution to its deer population problem. What would that have done for bowhunting?

The fact is, more hunters, including bowhunters, support crossbows in archery season than is commonly thought. Below are two charts excerpted from a Kentucky survey conducted by Cornell University in 2005 and a New Jersey Survey conducted by Carole Kandoth, NJ Principal Wildlife Biologist and Joseph Garris, NJ Wildlife Technician in 2007 and published in 2008. Kentucky used its survey as the basis for liberalizing its crossbow regulations in 2006 and New Jersey is currently using its survey to support proposed liberalization of crossbow regulations for the 2009/2010 season.

# TENPOINT CORE FEATURES

## TenPoint Series Core Performance Features

All TenPoint Series crossbows are made with a group of Core Performance Features (noted by black dot on callouts) that ensure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

● Red dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.

● Black dot indicates a core performance feature.

Precision CNC machined aluminum wheels or cams (not on GT Curve)

The main assembly bolt's locking setscrew and the foot stirrup's two attachment setscrews are located on the underside of the crossbow's riser (foot stirrup setscrews not applicable to CLS models)

●● VIBRA-CUSH® patented bow-to-barrel mounting system

● Limb-bolt locking setscrews (only on the Lazer HP)

Weaver-style machined aluminum 7/8" Dovetail Scope Mount

●● Synthetic cable yokes for the ultimate in tuneability and stability (not on GT Curve)

● IsoTaper Quad-Limb System (on CLS models only) (TenPoint's quad limb systems are model-specific to ensure optimum performance)

● CADD designed and engineered machined aluminum riser

● Optional Wedgie (patent pending) retention spring silencer (standard on CLS models and Lazer HP)

ACRA-ARROW retention spring

● PBT Performance Cable Saver

●● OTT (over-the-top) limb-pocket and Zytel® "lift & separate" limb suspension system (not on GT Curve)

● Patented GripSafety secondary safety (only available on models with original Deluxe PowerTouch trigger)

Extruded and machined one-piece foot stirrup and riser on CLS models (all other models are equipped with a lightweight aluminum foot stirrup with sound-dampening rubber coating)

●● ACRA-ANGLE Barrel

●● Power Limb-Tip Caps (GT Curve equipped with limb tips containing secondary field restrainer shelf)

TenPoint's 4-Arrow Instant Detach HX Quiver

# PHANTOM XTRA™

**APPLIES TO BOTH  
PHANTOM MODELS**

**343 FPS\***

**185 LB. Draw Weight**

**109.7 FP Kinetic Energy\***

Available only as a complete package

Fully-assembled, bore-sighted and ready for the woods right out of its BowMax™ hard travel case

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

Comes with 3x Pro-View Scope\*\*

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

\*\*alternate scope options are available

**Designed for the discriminating hunter or collector looking for the best of the best, the Phantom Xtra, a premium version of TenPoint's blockbuster Phantom CLS, takes crossbow aesthetics and performance to a new level.**

# PHANTOM CLS™

The Compact Limb System (CLS) components include a robust one-piece machined riser and foot stirrup, 12-inch 185-pound IsoTaper limbs fitted with maximum rotation CADD engineered MR Cams and Brownell Ultra-Cam™ string and cables. Combined, these elements form an uncommonly compact, quiet, and powerful bow assembly with a hunter-friendly 13-inch power stroke, and a highly maneuverable 17.5-inch axle-to-axle span when cocked.

**Introduced in 2007, the Phantom CLS gained instant recognition as the industry leader while ushering in the next generation of crossbow technology.**

The Phantom Xtra's field-tested Compact Limb System power plant and machined ACRA-ANGLE barrel comes mounted on a precision-crafted, laminated wood version of TenPoint's functionally superior FST stock. This heirloom-quality stock, manufactured for TenPoint by Keystone Sporting Arms, LLC, is fitted with a non-slip rubber butt plate, and comes in a semi-gloss finish that will stand up to years of use in the field.

## The Phantom Xtra Deluxe Package Includes:

- TenPoint's 3x Pro-View Scope.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Claw® Sling w/swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads and Tracer™ nocks. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with patented PillarLock™ system for maximum equipment protection.
- Deluxe Soft Crossbow Case.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- TenPoint CareKit, including Microlon® Precision Oiler, chap stick-sized String Wax & Conditioner, telescoping Combo LensPen Brush & Cleaner and Carry Case.
- TenPoint Wedgie™ Retention Spring Silencer and VIBRA-DAMP™ Cable Silencers.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- Two Custom Service PAC I certificates worth \$99 each (good for 5-years).

Featuring TenPoint's Compact Limb System Technology (CLS), the Phantom CLS produces a shot so smooth, quiet and vibration free, it is difficult to believe it delivers its payload at a blazing 343 fps. The Phantom CLS is the perfect synergy of great looks, unparalleled performance, and awesome power.

## The Phantom CLS Package Includes:

- TenPoint's 3x Pro-View Scope.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Claw® Sling w/swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Three-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved Bow-Max™ high-impact polymer hard travel case with patented PillarLock™ system for maximum equipment protection.
- SteddyEddy® telescoping lightweight aluminum monopod with patented Posi-Lock System.
- TenPoint CareKit, including Microlon® Precision Oiler, chap stick-sized String Wax & Conditioner, telescoping Combo LensPen Brush & Cleaner and Carry Case.
- TenPoint Wedgie™ Retention Spring Silencer and VIBRA-DAMP™ Cable Silencers.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

# SHADOW CLS™

**330 FPS\***

**175 LB. Draw Weight**

**101.5 FP Kinetic Energy\***

Available only as a package

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

Comes with 3x Pro-View Scope\*\*

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

\*\*alternate scope options are available

**Delivering pinpoint accuracy, bone-crushing power, and precision performance, the Shadow CLS is a potent, value-priced 175-pound companion to TenPoint's two 185-pound Phantom models.**

# LAZER HP™

**313 FPS\***

**185 LB. Draw Weight**

**91.4 FP Kinetic Energy\***

Available only as a package

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism as an option

Comes with 3x Pro-View Scope\*\*

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with recommended arrow

\*\*alternate scope options are available

**Sporting a mix of time-tested technology that has evolved over the years from our field-proven 185-pound ST limb models, the 330 fps Lazer HP is priced for customers looking to move up to TenPoint's precision performance, top-of-the-line collection.**

Powered by TenPoint's extraordinary Compact Limb System (CLS) riser, limb and cam configuration, the Shadow is a worthy 330 fps member of TenPoint's elite collection of CLS models. It features bronze anodized machined components and all of the patented safety and performance driven crossbow technology that TenPoint has to offer.

## The Shadow CLS Package Includes:

- TenPoint's 3x Pro-View Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Claw® Sling w/swivels.
- Three-pack of TenPoint aluminum arrows equipped with NAP® Spitfire® 100-grain broadheads.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Retention Spring Silencer.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

The Lazer HP features 185-pound ST limbs driven by powerful HP cams. This power plant is mounted on TenPoint's bronze anodized 18.5-inch machined ACRA-ANGLE barrel equipped with the patented Deluxe PowerTouch Trigger and GripSafety. The result is a combination of blistering speed, tack-driving accuracy and flawless performance.

## The Lazer HP Package Includes:

- TenPoint's 3x Pro-View Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Retention Spring Silencer.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

# GT CURVE™

from **274 to 300 FPS\***

**180 LB.** Draw Weight

**70 FP** Kinetic Energy\*

Available as a package only

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism as an option

Comes with Pro-40 Multi-Dot Scope\*\*

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

\* with 420- and 350-grain arrows respectively

\*\*alternate scope options are available

**A blend of field-proven TenPoint stock, barrel, and trigger technology and the industry's most efficient recurve bow assembly, the GT Curve is the perfect embodiment of fit, form, and function.**

# TITAN HLX™

**NEW 09**

**300 FPS\***

**175 LB.** Draw Weight

**The NEW Titan HLX is a faster, performance-enhanced version of TenPoint's longstanding workhorse Titan model that now more than ever outclasses and outperforms other brands' top-of-the-line models.**

The affordable GT Curve combines TenPoint's 180-pound GT Limb bow assembly with our patented PowerTouch-10 trigger and molded one-piece Verton® stock and barrel assembly to create a lethal combination of speed, accuracy, and dependability. It's hunter-friendly 13.375-inch power stroke and lightweight, compact frame also makes it easy to load and highly maneuverable in the woods.

## The GT Curve Package Includes:

- TenPoint's Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

The affordably-priced Titan HLX features TenPoint's reliable FST IV molded Verton® combination stock and barrel design powered by a robust 305+ fps bow assembly featuring precision-machined aluminum wheels and riser with OTT limb pockets, and tunable synthetic cable yokes. It is also upgraded for 2009 with 175-pound HL limbs, Fast Flight™ cables and string, and TenPoint's premium 3.5-pound PowerTouch-10 trigger. Dollar for dollar, the 2009 Titan HLX is destined to reign as the best compound crossbow value in the industry today.

## The Titan HLX Package Includes:

- TenPoint's 3x Pro-View Scope (pictured on crossbow) or Pro-40 Multi-Dot Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

## 6 Point Series Core Performance Features

Like the TenPoint Series, our 6 Point Series models are built on an equally impressive foundation of core features (noted by black dot on callouts) that mirror most of those in the TenPoint Series. While the 6 Point models are conceptually very different from our original TenPoint Series models, it is easy to recognize the gene pool from which they come.

- Gold dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.
- Black dot indicates a core performance feature.

**The 305 FPS Pro Slider's innovative design allows its bow assembly to slide between its machined upper and lower TriLoc barrel and to locate and lock in any of three shooting positions, making it ideal for multiple shooters within a family or any shooter, regardless of age, sex or physical stature.**

Lightweight and maneuverable, the Defender CLS combines our newly engineered Compact Limb System (CLS) 175-pound bow assembly with a one-inch longer version of our 6 Point Series stock assembly to produce a balanced, quiet, and deadly shooting experience unmatched by our competitors.

## The Defender CLS Package Includes:

- TenPoint's 3x Pro-View Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock Accessory.
- Six-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Retention Spring Silencer.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

TenPoint will donate a percentage of the 2009 Defender CLS model sales to the Safari Club International Hunter Defense Fund.

Regardless of the shooting position selected (see chart), the Pro Slider is a high-performance, precision crafted hunting machine with a center of balance to suit all ages and sizes. The Pro Slider is equipped with TenPoint's patented 3.5-pound PowerTouch-6 trigger, noted for a lightweight and smooth trigger pull that promotes increased accuracy.

## The Pro Slider Package Includes:

- Choice of TenPoint's 3x Multi-Line or 3x Pro-View Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

### Pro Slider Performance

Draw Weight	Power Stroke	FPS	
175	12.0	305+	Long Position
150	10.625	280+	Medium Position
125	6.5	220	Short Position

Each position creates a new center of balance with a different power stroke, draw weight and speed.

\*\*alternate scope options are available

**The GT Flex combines TenPoint's GT Recurve Limb, the most efficient in the industry, with its innovative 6 Point Slider stock assembly to create three amazing recurve crossbows in one.**

Shooting between 307 and 335 fps, depending on the arrow, the GT Mag is powered by 200-pound Gordon Composite Inc. laminated limbs, carrying the industry's highest energy transfer rating. Combined with the innovative and lightweight 6 Point series stock platform, fitted with TenPoint's patented PowerTouch-6 trigger, the GT Mag ushers in the next generation in recurve crossbow technology and performance.

## The GT Mag Package Includes:

- TenPoint's 3x Pro-View Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock Accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

Mounted in its 180-pound/13.25-inch power stroke position, it is a lethal 300 FPS deer hunter. Locked in its medium, 125-pound/11.875-inch stroke position, it transforms into the perfect recurve for turkey hunting and bow-fishing. And, in its 90-pound/7.75-inch stroke position, it is destined to become the industry's highest quality training crossbow for youngsters and first-time shooters.

Weighing 6 lb. 4 oz., and equipped with TenPoint's machined UL TriLoc barrel, riser and TenPoint's patented PowerTouch-6 trigger, there is no better performance or dollar-value in the industry today.

## The GT Flex Package Includes:

- TenPoint's 3x Multi-Line Scope.
- 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with instant detach Lever Lock accessory.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.

### GT Flex Performance

Draw Weight	Power Stroke	FPS	
<b>180</b>	<b>13.25</b>	up to <b>300</b>	<b>Long Position</b>
<b>125</b>	<b>11.875</b>	up to <b>265</b>	<b>Medium Position</b>
<b>90</b>	<b>7.75</b>	up to <b>175</b>	<b>Short Position</b>

Each position creates a new center of balance with a different power stroke, draw weight and speed.

# DEFENDER-MAG™ COMBO

## AN INDUSTRY FIRST – Two Crossbow Assembly Options in One Purchase!

The NEW Defender-Mag Combo gives the option of sometimes hunting with a compound model and other times with a recurve. It also provides the security of being able to pack a backup on that hunting trip hundreds of miles from civilization. Regardless, the Defender-Mag Combo is a cost effective and efficient way to own two high-performance crossbows with one simple purchase – an industry first.

The Defender-Mag three-piece combo comes with our precision crafted 6 Point Series stock assembly fitted with our patented 3.5-pound PowerTouch-6 trigger and your choice of the patented ACUdraw or ACU-draw 50 cocking mechanism. In a matter of minutes, you can attach the Combo's 330 fps, 175-pound Defender CLS bow assembly or its 335 fps, 200-pound GT Mag bow assembly.

Regardless of the bow assembly you choose at the time, you can be confident you will experience a profoundly satisfying hunting and shooting experience.

The Compact Limb System (CLS) components include a robust one-piece machined riser and foot stirrup, 12-inch 175-pound IsoTaper limbs fitted with maximum rotation CADD engineered MR Cams and Brownell Ultra-Cam™ string and cables. Combined, these elements form an uncommonly compact, quiet, and powerful bow assembly with a hunter-friendly 13-inch power stroke, and a highly maneuverable 17.5-inch axle-to-axle span when cocked.

**GT Mag Efficiency Draw Curve**

## Two Great Cocking Devices – Making Bowhunting Accessible to Everyone

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means - in many cases taking technological shortcuts - to boost arrow speed in order to sell their crossbows. All of those means - using heavier limbs, longer power strokes, and reverse cams - have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

TenPoint responded to the need before all others by developing its two integrated, convenient, and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50.

The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort. Both devices load the bow string accurately every time.

**IMPROVED** 9

### Patented ACUdraw – The Premier Cocking Aid Available Today

Improved for 2009 with three additional bearings to reduce both friction and noise and a thicker spring to improve retraction, the patented ACUdraw is the most user-friendly and practical solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike some of the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

- Reduces draw weight to about 5-pounds when operated manually
- Belt holster for ACUdraw crank included
- Cranks manually or powers-up with almost any cordless screwdriver or drill (equipped with a clutch or low-torque setting)
- Unlike most other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or pre-installed

Patented

# ACUdraw 50™

## Patented ACUdraw 50 – Takes the Traditional Rope-Cocker to a New Level

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding an improved heavy-duty retraction spring for 2009 that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope around your neck or to stash it in your fanny pack
- When not in use, powerful mini-magnets hold the handles securely and silently in place
- Available pre-installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

The ACUdraw 50 Handles retract and store neatly against the stock when not in use.

# ACCESSORIES

## 4-Arrow Instant Detach HX Quivers™

Weighing only 6 ounces empty, TenPoint's HX Quivers feature a four-arrow ABS cup and a rubber arrow gripper (the Conventional bow quiver package includes two sizes of the rubber arrow gripper) connected by two ultra-light carbon fiber rods. This double-rod backbone is stabilized with a two-sided polycarbonate X-Connector™ that snaps together while positioning and adjusting the quiver for left or right-handed use, and then bolts into a locked position.

The cup and rubber gripper are molded with raised nubs that protect arrow fletching from getting crushed when placing the crossbow on a table, floor, or on the ground.

The backside of the X-Connector is fitted with a Bohning Lever Lock mounting system which screws directly onto the bow, allowing the user to instantly attach or detach the quiver.

## Sling

The Claw Sling (by Quake Industries) is unparalleled in quality and construction. It features a longer non-slip design in their all purpose camo and heavy-duty adjustable nylon straps (swivels included).

- HCA-00307-5** The Claw (by Quake Industries) in the all purpose style camo

## TenPoint Hard Travel Case

TenPoint's BowMax airline approved, high-impact polymer hard travel case provides protection, security, and ease of transport for your crossbow investment. Manufactured for TenPoint by Plano Outdoor Products, it contains all the room necessary to secure your crossbow and all of its accessories. Closes securely with three snap-down latches, and the exterior design features a heavy-duty swivel-mounted carrying handle with an over-molded rubber grip. Small accessories store neatly in a StowAway utility box included with every crossbow case.

- HCA-200** TenPoint BowMax™ Hard Case

## TenPoint Deluxe Soft Carrying Case

Designed by Neet Products, Inc. for TenPoint, the standard recurve size soft crossbow case features a wider body for recurve crossbows and the narrower width soft case is the perfect fit for all Compact Limb System (CLS) crossbows. Both soft cases have sturdy side panels for added depth to accommodate mounted optics and most additional crossbow accessories. Made with double-stitched, high-grade Cordura®, thick padding, and Trico-lining, these functionally improved designs also include a heavy-duty YKK zipper with double pulls and a removable shoulder strap.

- HCA-20107-1** TenPoint Soft Crossbow Case in Realtree Hardwoods® Green HD™ (fits all TenPoint Crossbows including recurves)
- HCA-20108-5** **NEW 09** TenPoint Soft Crossbow Case in Realtree® APG HD™ (for CLS model crossbows)

## SteadyEddy®

Manufactured for TenPoint by Stoney Point® Products, Inc., the SteadyEddy telescoping two-section monopod insures motion-free shooting while seated in a tree stand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, its patented Posi-Lock System™ allows you to quickly set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a completely maneuverable ball-joint mount or with the new Ball Stem Mounting Bracket and ball-joint (HCA-039). It clamps conveniently under your stock when not in use. All SteadyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body.

**HCA-030**  
**HCA-03006**

SteadyEddy Crossbow Monopod System **(for TenPoint Series models)**  
SteadyEddy Crossbow Monopod System **(for 6 Point Series models)**

Easily installed, the new Ball Stem Mounting Bracket gives you more options for mounting the SteadyEddy ball-joint and your sling swivel stud. Use this new bracket to retrofit crossbows with the new and improved larger diameter Ball Stem mounting screw or to give yourself the option of mounting your front sling swivel stud on the left or right side of the crossbow.

**HCA-039** SteadyEddy Ball Stem Mounting Bracket

## Maintenance

TenPoint's CareKit™ includes three important maintenance tools (Microlon Precision Oiler, TenPoint String Wax and Conditioner, and TenPoint Lens Pen) packaged in a versatile multi-cavity translucent plastic mini-case with plenty of extra room for other bow maintenance items.

**HCA-11207** CareKit

The high-tech lubricant contained in the Microlon Precision Oiler includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin impregnates the metal to create a dry film lubricant. Perfect for crossbow rails, triggers, and wheels, this high-quality lubricant comes in a tube fitted with a precision applicator needle.

**HCA-11106** Microlon® Precision Oiler

Made from all natural compounds, TenPoint String Wax and Conditioner comes in a convenient chap stick style tube. This string wax and conditioner both lubricates and rejuvenates bow strings and cables. Scent-free and water-resistant, it greatly reduces string friction and abrasion against cable slides, wheels, or cams. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

**HCA-11007** TenPoint String Wax and Conditioner

This clever lens treatment tool features a soft fiber lens brush that telescopes out of one end of its pen-sized tube and an abrasive-free lens cleaning pad housed underneath a cap at the other end. The brush gets rid of scope lens dust and the cleaning pad eliminates smudges and cleans and polishes lens surfaces without damaging or scratching the glass.

**HCA-09107** TenPoint Lens Pen (combo brush and cleaner)

TenPoint's Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance.

**HCA-111** Flight Rail and Trigger Lube

HCA-111

HCA-112.12

## Broadheads

Not sure whether you want to shoot fixed blade broadheads or expandable broadheads? Try them both. New Archery Products® offers packages for both Thunderhead® fixed blade heads and Spitfire® expandable heads.

**HEA-297** New Archery Products' Spitfire 100-grain, 3-Blade Mechanical Broadhead 3-Pack  
**HEA-298** New Archery Products' Thunderhead 100-grain Fixed Broadhead 3-Pack

## Foot Stirrup

**HCA-009** Standard Rubber Coated Foot Stirrup

## Silencers

TenPoint's Progressive Dampening Package™, is a trio of accessories that progressively reduces decibel level and shortens noise duration when used in combination. It features a set of LimbSaver® limb vibration dampeners, TenPoint's Wedgie™ retention spring silencer, and TenPoint's VIBRA-DAMP™ cable silencers. Two versions are available – one for our IsoTaper (CLS crossbows), HL, and TL split limb (medium to large gap in limbs) and one for our ST split limb (narrow gap in limbs) crossbows.

**HCA-138** **NEW 09** Progressive Dampening Package – for IsoTaper, HL and TL limbs

## CUB™ (Crossbow Unloading Bolt) - NEW 09

Made from PolyLactic Acid (PLA), this single-use Biodegradable Unloading Bolt (patent pending) provides a cost effective way to unload your crossbow in the field without having to chance ruining a perfectly good arrow. At about one-sixth the cost of a crossbow arrow, the biodegradable bolt minimizes environmental impact by naturally decomposing in the same way as fallen leaves. Available in a convenient 6-pack, this innovative snap-together, two-piece design occupies about the same space as two side-by-side ball-point pens.

## Scopes

Calibrated for crossbows that shoot in the 330 fps range, this 20, 30, and 40-yard combo illuminated dot and crosshair configuration is housed in a lightweight seven-inch aluminum tube equipped with fully-coated 3x optics. The dots are positioned at the intersection of each duplex crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color. 7/8-inch scope mounting rings included.

**HCA-097** 3x Pro-View Scope with 7/8" mounting rings

Perfectly proportioned for a crossbow at only 7" long, this light, compact scope features fully-coated 3x optics and three duplex crosshairs calibrated for 20, 30, and 40-yard shots with crossbows that shoot in the 330 fps range. 7/8-inch scope mounting rings included.

**HCA-088** RangeMaster 3 x 32 Multi-Line Scope with 7/8" mounting rings

The Pro-40 is a zero-power 40 mm multi-dot scope with an integrated, adjustable 7/8-inch mounting system that requires no rings. Its three illuminated dots, calibrated for 20, 30, and 40-yards for crossbows that shoot in the 330 fps range, can be rendered in red or green to suit individual hunting and light conditions. The light intensity of both color views is regulated by a five-position rheostat.

Front Sight Bracket with Pin  
Standard Sight Pin  
Rear Peep Sight (Rear peep will not fit on a 7/8" mount. Contact Customer Service at (330) 628-9245 for details on purchasing a Peep and Pin Conversion Kit.)

## Bow-Fishing Rig

Manufactured by AMS, the Bow Fishing Rig and mount attaches directly to the crossbow riser. This fast, simple rig is equipped with a zero-drag for exceptional line control. It allows the stacked – not spooled – line to flow freely from the bottle so the arrows fly further and deeper. With the AMS Retriever, there are no baits to release or buttons to forget to push before the shot – just shoulder, aim, shoot, and retrieve.

Each kit comes with an AMS reel, a bottle including 35-yards of 130-pound Braided Dacron Line, a mounting bracket, and a bow-fishing arrow.

**HEA-52808** Bow-Fishing Rig  
**HEA-508.1** Bow-Fishing Rig Replacement Arrow  
**HEA-52709** Bow Fishing Bracket (bracket only)

## Field Crossbow Re-Stringer

Designed for our popular line of recurve crossbows, this Field Crossbow Re-Stringer is the perfect accessory for that "just in case" moment out in the field. The limb-tip-cap bonded to the end of our GT Recurve Limb™ incorporates a secondary ridge designed to hold the Re-Stringer in place when being used.

**HCA-10708** Field Crossbow Re-Stringer

# CROSSBOW ARROWS

## The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With Moon, SuperBrite™ Blunt or Tracer™ Nocks

### Two Crossbow Arrows Available:

#### Carbon Fiber Shafts – 20-inch 22/64ths

For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64ths diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Easton®, the Pro Elite is a masterpiece of precision engineering, strength and accuracy.

Advanced carbon fiber Pro Elite arrows are laser inspected for straightness to within .003; and hand-sorted for weight tolerances to within two-grains per dozen. They come equipped with brass inserts and TenPoint's patented SuperBrite blunt nocks, CPC moon nocks or Tracer™ nocks. Fletched with Norway DURAVANES™, they are available in 3-packs, 6-packs, and bulk 72-packs (Tracer™ nocked arrows not available in 6- or 72-packs).

The Pro Elite Carbon Arrow is also available in a Premium Hunter version. Each Premium Hunter arrow is precision tested for trueness and weight-matched for accuracy. Premium Hunters come with individually tuned NAP® broadheads (in either a 3- or 6-pack – with 100-grain Spitfire® expandable broadheads – or in a 6-pack only with Thunderhead® 100-grain fixed-blade broadheads) installed and ready to shoot. The Premium Hunter is only available with SuperBrite blunt nocks or Tracer™ nocks.

Premium Hunter Tracer nocked arrows only available with Spitfire broadheads.

#### Aluminum Shafts – 20-inch XX75 Camo 2219s

As an Easton® Aluminum Complete Crossbow Arrow Resource, TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton® shafts to produce the highest quality aluminum crossbow arrows available today.

This three-color camo shaft is the proven industry standard for reliable results. Available in black CPC moon nocks, TenPoint's patented SuperBrite blunt nocks, or Tracer™ nocks, these shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES™.

TenPoint crossbow arrows are available in bulk 72-packs, 6-packs, or 3-packs (Tracer™ nocked arrows only sold in 3-packs).

### All Bow, No Bull with TenPoint Crossbows

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All 420-grain speed tests were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point. The recurve models were also tested with a 350-grain arrow, consisting of a 17.5-inch aluminum shaft and 75-grain tip (not recommended for hunting). The chronograph was positioned 18-inches in front of the crossbow for all shots.

Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.

- A** - SuperBrite blunt nock for 2219 aluminum shafts
- B** - Barnett and Horton CPC moon nock for 2219 aluminum shafts
- C** - SuperBrite blunt nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shafts
- D** - Moon nock for 22/64<sup>th</sup> TenPoint Pro Elite carbon shaft

\* Blunt nock Tracer™ carbon and aluminum shafts are not shown

#### HEA-251.12

Twelve-pack of patented SuperBrite nock tools. Available for refletching 2219 aluminum shafts or 22/64<sup>th</sup> diameter Pro Elite shafts that use SuperBrite nocks.

Note: When installing cables, twist the bottom yoke (located at the end of each cable) four times.

\*Twist the Phantom, Shadow and Defender bottom yokes five times. Doing so will eliminate limb twist when cocking your crossbow.

# CROSSBOW FEATURES

TENPOINT SERIES						6 POINT SERIES				
Phantom Xtra	Phantom CLS	Shadow CLS	Lazer HP	GT Curve	Titan HIX	Defender CLS	Pro Slider	GT Mag	GT Flex	
•	•	•	•	•	•	•	•	•	•	Premium 3.5 lb. PowerTouch trigger, with MIM action components and safety slide.
•	•	•	•	•	•	•	•	•	•	Patented GripSafety secondary safety to help protect the fingers and thumb on the fore-grip hand. Left-handed installation available on request.
•	•	•	•	•	•	•	•	•	•	Patented DFI™ (dry-fire-inhibitor). Prevents dry-firing the crossbow when no arrow is loaded on the flight deck.
•	•	•	•	•	•	•	•	•	•	Ambidextrous Automatic Safety.
•	•	•	•	•	•	•	•	•	•	OTT (over-the-top) limb pocket & Zytel® “lift & separate” limb suspension system, the ultimate in limb stability and sound reduction.
•	•	•	•	•	•	•	•	•	•	CLS (compact limb system) components which include a highly durable integrated riser and foot stirrup, 12-inch IsoTaper™ limbs, high-performance MR™ Cams and Ultra-Cam™ string and cables.
•	•	•	•	•	•	•	•	•	•	Complete-Capture limb pocket isolation system.
•	•	•	•	•	•	•	•	•	•	185-pound, 12-inch IsoTaper™ limbs with Ultra-Cam™ string and cables with tuneable yokes.
•	•	•	•	•	•	•	•	•	•	Premium field-proven ST™ quad-limbs with Ultra-Cam™ string and cables with tunable yokes.
•	•	•	•	•	•	•	•	•	•	175-pound HL quad limbs with Fast Flight string and cables with tuneable yokes.
•	•	•	•	•	•	•	•	•	•	GT Recurve Limb with 452X string.
•	•	•	•	•	•	•	•	•	•	HP (High Performance) and MR (Maximum Rotation) cams.
•	•	•	•	•	•	•	•	•	•	CADD designed & finite element analysis-tested, precision-machined riser.
•	•	•	•	•	•	•	•	•	•	CADD designed & finite element analysis-tested, integrated one-piece aluminum riser and stirrup.
•	•	•	•	•	•	•	•	•	•	Anodized, machine finished ACRA-ANGLE aluminum barrel. Provides the ultimate in dimensional integrity for perfect arrow flight.
•	•	•	•	•	•	•	•	•	•	UL TriLoc machined aluminum barrel assembly which allows the riser to locate and lock in one of three separate shooting positions.
•	•	•	•	•	•	•	•	•	•	UL TriLoc fixed position machined aluminum barrel assembly.
•	•	•	•	•	•	•	•	•	•	Richly-crafted, wood-grain laminated thumbhole stock.
•	•	•	•	•	•	•	•	•	•	FST style stock. TenPoint's original functionally superior thumbhole design.
•	•	•	•	•	•	•	•	•	•	Molded combination stock and barrel made from Verton® - a durable, lightweight polymer.
•	•	•	•	•	•	•	•	•	•	Verton two-piece stock and fore-grip.
•	•	•	•	•	•	•	•	•	•	Ergo-friendly power stroke – 12.5" or less.
•	•	•	•	•	•	•	•	•	•	Maximum performance power stroke – 13" or longer.
•	•	•	•	•	•	•	•	•	•	ACUdraw and ACUdraw 50 compatible.
•	•	•	•	•	•	•	•	•	•	Fixed 7/8" Weaver-style aluminum dovetail scope mount (on GT Mag and GT Flex models only when purchased as packages).
•	•	•	•	•	•	•	•	•	•	Fixed sight bridge with peep & pin sight system. Scope compatible. Optional 7/8" Fixed Dovetail Scope Mount (HCA-078 or HCA-072) required to mount a scope.
•	•	•	•	•	•	•	•	•	•	Limited Lifetime Operational Warranty (See Owner's Manual for limitations).

## TenPoint Spokesman Doug Koenig Posts Another Winning Year

Doug Koenig and sons Zach (11), Trevor (9) and Bradley (4) with their TenPoint Pro Slider.

In a competitive shooting career that began at age 20 in 1990, TenPoint spokesman Doug Koenig, widely regarded as the greatest all-around rifle, pistol, and shotgun competitive shooter in the world, added impressively to his resume in 2008, posting four major championship victories.

In May he won his twelfth National Action Pistol Championship (Bianchi Cup). In June, Doug (for the twelfth time), and teammates Jerry Miculek and Mike Plaxco, fired the top score and captured the Industry Open class for Team Smith & Wesson at the 2008 Sportsman's Team Challenge Nationals in San Antonio, Texas. In August, he won his fifteenth Masters Championship in a challenging test of every facet of a shooter's handgun skills. And, finally, in November, he won his third World Action Pistol Championship in Hamilton, New Zealand (held every 2-3 years).

Doug's love for shooting developed out of his passion for hunting. "I started hunting when I was in my teens," says Doug. "After hunting season, I took up shooting just to stay in practice. I entered some tournaments just for fun; but after I won a few, I got hooked on the competition. Fortunately, my career has given me opportunities to hunt all over the world. I hunt all seasons using all weapons: compound bow, crossbow, shotgun, muzzleloader, rifle, and hand gun."

The TenPoint staff met Doug a number of years ago at an industry trade show. He already owned one of our crossbows, and stopped to introduce himself and to tell us how much he liked his bow. He has firm opinions regarding product quality. "I cannot win tournaments without using good equipment," he contends. "I hunt with TenPoint crossbows for the same reason. You can't underestimate the importance of quality and dependability".

As spokesman for the National Shooting Sports Foundation (NSSF), Doug supports hunting with all types of weapons. "We need more hunters, not fewer. The anti's love it when we fight among ourselves over choice of weapons," he argues. "When the resource can sustain it, if you are against hunting with a particular weapon, you are against hunting in my mind."

"State wildlife agencies want more deer killed and more hunters in the woods. Crossbows are a great tool for recruiting new bowhunters and retaining older ones, and they offer a good way for gun hunters to transition into bowhunting."

Doug loves hunting these days more than ever because he now shares his time in the woods with his sons 11-year-old Zach, 9-year-old Trevor, and 4-year-old Bradley. "Every hunter I know who loves the sport can't think of anything more satisfying than sharing that passion with their children. I am certain these are days my sons and I will cherish for the rest of our lives."
