

TENPOINT'S PARTNERSHIP WITH MOSSY OAK

At the bottom of this page you will see the logos of organizations we belong to or support and companies we partner with in the production of our products.

This year we chose to highlight our partnership with Mossy Oak because we have a particular affinity for their core values.

In their words, "It is truly our love of the outdoors, our commitment to sustaining that outdoor lifestyle, and the time spent with friends and family that drive us to partner with companies that share our values."

Mossy Oak also believes in "creating hunters", without regard for their choice-of-weapon. That belief is particularly important to TenPoint because we believe those within the hunting industry who work to limit hunting opportunity over choice-of-weapon issues actually promote an anti-hunting agenda.

We have printed our own Corporate Statement below as we do in every year's catalog. While our words are very different than theirs, we think our business philosophy is actually remarkably similar. We are proud to count Mossy Oak among our valued partners.

Corporate Statement

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

2010 COMPLETE PRODUCT GUIDE

TO OUR CUSTOMERS

First, let me extend my thanks to all of our customers. Our new ones and longtime loyal ones. Welcome to our TenPoint family.

2009 was a great year for our company. 2010 is shaping up to be more of the same. We have worked hard to establish TenPoint as the premiere crossbow brand in the marketplace. I am told we have achieved that goal because both our customers and others we respect within the archery industry tell us that we are the best. Equally important, though, is that we believe we are the best, and that will always drive us to remain the best.

I have been manufacturing crossbows and designing innovations and improvements related to every aspect of shooting them for 25 years (17 years with TenPoint). Sadly, my Dad passed away this past September. Throughout all of those years he and I spent many, many hours "kicking around" ideas and playing with prototypes. He loved crossbows, and we loved making them better together. I still hear him telling me everyday. . . . "Keep at it, keep improving our stuff. Keep making better stuff for our customers to use." Reflecting back on the past 25 years, I feel a tremendous sense of satisfaction over the innovations, designs and improvements we have made to our products.

Looking ahead, I'm feeling even better. With thirteen patents in hand by January 2010, and, twenty projected by 2012, you can count on more great products coming from TenPoint down the road.

Keep shooting straight; keep telling us what we can do better; and keep hunting. We need everyone to spend a few more days afield. Take your son or daughter. Take your grandson or granddaughter. Take your wife. Hell, take your Grandma. Time passes quickly.

Good hunting.

Richard J. Bednar

Rick Bednar – CEO
TenPoint Crossbow Technologies

October 2009

Taken in Pike County, IL, where you must be 62 to hunt with a crossbow. At TenPoint we support the use of both vertical bows and crossbows during archery season.

WHAT MAKES TENPOINT CROSSBOWS SUPERIOR TO OTHER BRANDS?

WILLIAM J. BEDNAR

No other crossbow manufacturer comes close to this record of technological achievement.

In each of the sixteen years TenPoint has been manufacturing crossbows, we have never failed to introduce innovations or to improve our products. And, in most cases, the advancements we have made originated from customer input. Since 1994, we have secured 13 patents with others pending or being filed.

Below are some of our more significant innovations:

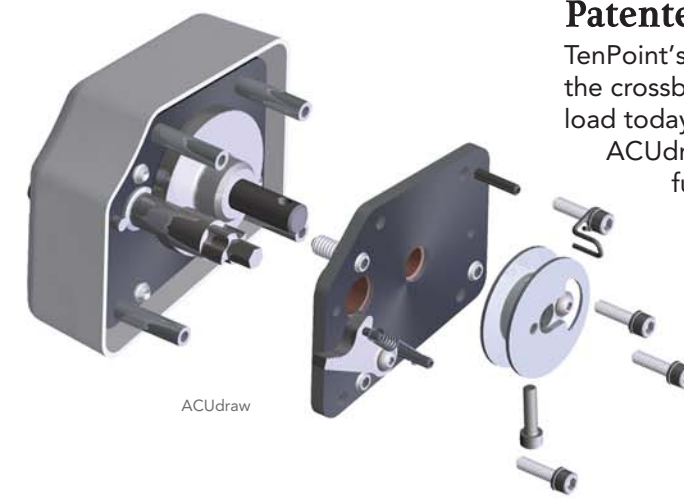

Patented Trigger Technology

All TenPoint and 6 Point Series crossbows are now equipped with one of our patented 3.5-pound machined triggers. Designed to match-up with the physical characteristics of the models that use them, the PowerTouch comes in three versions, the Deluxe, PowerTouch-10, and PowerTouch-6. All PowerTouch triggers contain MIM (Metal Injection Molded) action components and remain rated as the finest crossbow triggers made today.

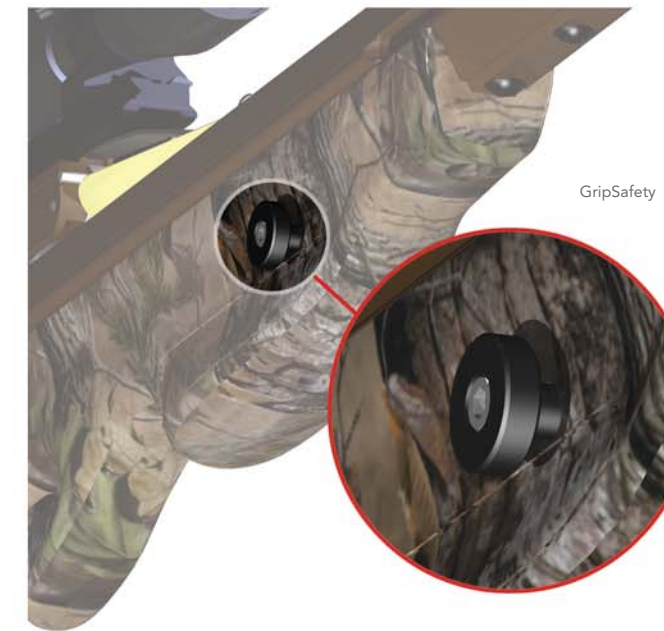

Patented DFI™ (Dry-Fire-Inhibitor)

In 1996 TenPoint introduced the DFI, which prevents dry-firing our crossbows when no arrow is loaded on the flight deck. The addition of this technology to our entire crossbow lineup has virtually eliminated the potentially severe damage and/or injury that can be caused by a dry-fire.

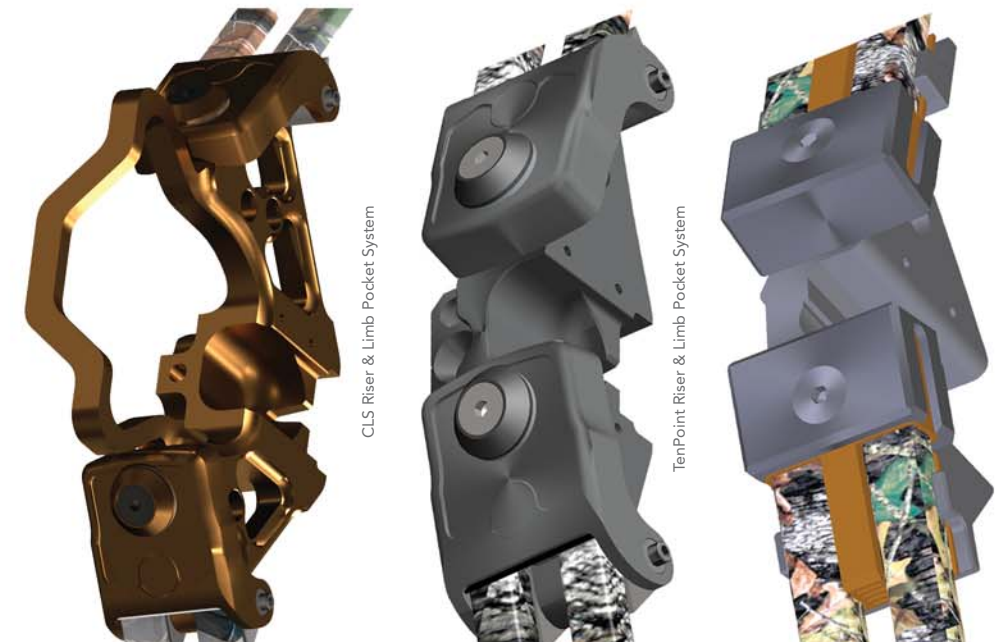

Patented ACUdraw™ and Patented ACUdraw 50™

TenPoint's convenient and user-friendly cocking aids have made our models the crossbows of choice for those who cannot or do not wish to manually load today's heavier draw weights. Compare TenPoint's ACUdraw or ACUdraw 50 to other cocking aids available today. Lightweight and fully-integrated into the butt stock, they have no dangling parts. They load the crossbow consistently every time; and they auto-retract after each use. Check pages 24-25 for details.

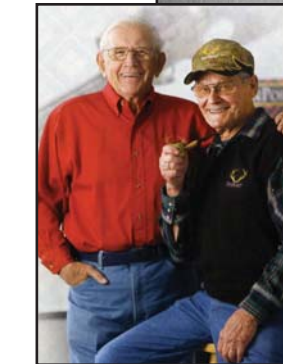

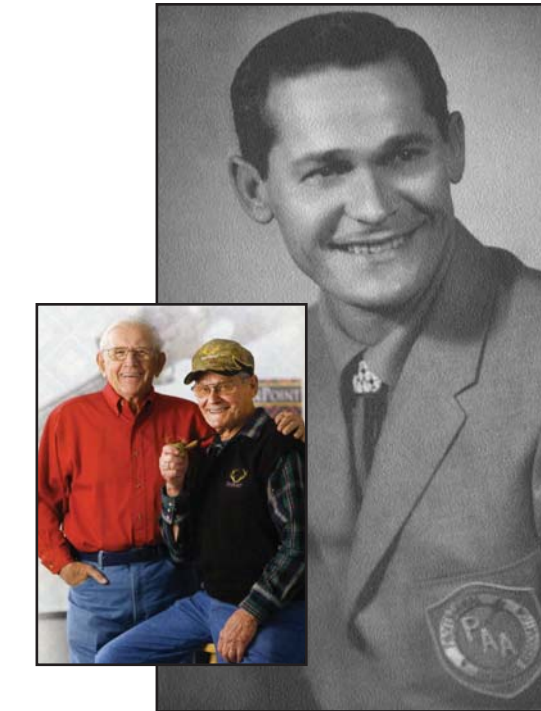

Patented GripSafety™

Installed in the fore-grip of the top three TenPoint models with aluminum barrels, the GripSafety prevents pulling the trigger without first depressing and holding this secondary safety in place with your fore-grip thumb. It helps prevent potentially severe injury by keeping thumbs and fingers in proper position on the fore-grip and below the barrel's flight deck. Installed on a standard basis for right-handed shooters, left-handed installation is available at no charge when placing a new bow order.

Riser and Limb-Pocket Technology

Developed primarily through the Computer Aided Drafting and Design (CADD) process, all TenPoint and 6 Point risers are Finite Element Analysis (FEA) tested and designed for specific crossbow model applications. Made from 6061 T6 machined aluminum, each riser design is created to maximize the efficiency of each limb system's total package.

Sadly, this year the TenPoint family must turn the page and begin a new chapter in our collective life. Bill Bednar, the patriarch of the Bednar family and a major creative force behind our company, passed away on September 2, 2009, at age 84.

Inducted into the Archery Hall of Fame in 2007, his contributions to the sport are well documented and do not need to be repeated here. At the height of his shooting career in the 1960's, he established himself as the dominant field and target archer of his time.

His obsession with the sport led him – with his life's partner, Edith - to purchase a brick building in Suffield, OH. They converted it into a three bedroom apartment, archery range and pro shop, which they called Portage Archery Center. And, in 1963, they moved in with their three children, Cindy 9, Rick 6, and Joanna 3.

Today, Portage Archery Center continues to operate as The Complete Hunter's Outlet Archery Center, a Division of TenPoint Crossbow Technologies. The TenPoint factory now stands next door, and Rick, now 52, runs TenPoint. Cindy is our Director of Office Administration, and Joanna is our Chief Financial Officer.

Bill's great fortune was being able to work side-by-side with his entire family for the last sixteen years of his life. While technically retired, he continued to feed his obsession with the ballistics and mechanics of arrow flight. A self taught builder, inventor and machinist, he spent nearly every day in his custom shop tucked in the back corner of the factory. He invented much of the technology that has made TenPoint what it is today. In his spare time he designed and built production fixtures, kept his factory building in top repair, generally tinkered with new ideas, and consulted with Rick daily on all aspects of the business.

Bill was a fierce competitor, who more often than not kept his game face on. In recent years, however, as TenPoint matured and flourished, and his children demonstrated their skill at running the business, his sometimes gruff exterior gave way to his gentler nature.

Before he left us, he assured his family that he had checked off all the items on his bucket list. That is not a bad measure for a life well lived. We miss him.

HP™ and MR™ Cam Stability Bushings

TenPoint's Cam Stability Bushings, while simple in concept, perform several important functions. First, they provide an ultra-stable sleeve to support and stabilize the axles. Second, they help eliminate wheel lean when loading the crossbow. And, third, they help establish precise string tension on the barrel surface, to promote accurate arrow flight and to reduce serving wear.

Barrel Technology

The TenPoint Series' ACRA-ANGLE™ and the 6 Point Series' UL TriLoc™ barrels are key to the unparalleled shooting accuracy of TenPoint crossbows. Both are designed to allow shooters to pull the bow string while their index fingers touch the side of the barrel; thereby guaranteeing accurate loading, which is essential to shooting accuracy. And, both of their arrow flight decks are machine finished for unsurpassed dimensional integrity, which insures accurate, repeatable arrow flight.

Limb Technology

TenPoint offers four limb configurations specifically designed for optimum performance on the models that use them: GT Recurve Limbs for the GT Mag and GT Flex models, HL Limbs™ for the Titan HLX and Pro Slider, ST Limbs™ for the Lazer HP, and 12-inch IsoTaper Limbs™ with a woven fiberglass weft laminate fused to the compression side (**patent pending**), featured on our Defender, and both Phantom models. The new Turbo HLX features an 11-inch IsoTaper woven weft limb.

With a performance-matched limb for each crossbow design, combined with a performance-matched trigger, you can count on consistently superior accuracy, durability, and dependability up and down the entire lineup.

OUR COMMITMENT TO QUALITY

TenPoint's Corporate statement, reprinted on the back cover of this catalog, begins with our commitment to making products that are recognized as the industry standard. We work to achieve this goal through careful engineering, rigorous testing, and ongoing quality assurance procedures.

Engineering

TenPoint's design team employs the premier cutting-edge SolidWorks® software to design new and improve existing products. With this in-house capability to conceptualize, design, prototype and test, we can produce third and fourth generation product designs by product launch.

Testing

Our rigorous testing standards have earned us a reputation for making durable and dependable products. We validate all of our designs through a prototyping process that combines extensive hands-on testing with automated cycle testing unparalleled in our industry. Our proprietary automated shooting simulator allows us to put thousands of shots on our bow assembly designs in a matter of days.

Quality Assurance

Our Engineering, Receiving, and Production Departments work with suppliers to insure that raw materials meet our strict product design specifications. A team in our Quality Assurance Department checks and re-checks incoming parts with custom built fixtures, tooling, and measurement equipment before parts move on to assembly. And, finally, finished products are then subject to continuous random inspection and evaluation.

WHAT'S NEW FOR 2010

TURBO XLT™

All of TenPoint's IsoTaper limbs now bond Gordon Composite's uniweft laminate skin to the compression side of the limb for added durability and performance. The uniweft laminate is fabricated with multi-directional continuous glass fibers.

New for 2010, TenPoint's Turbo XLT employs some well conceived engineering concepts and manufacturing techniques to deliver high-end performance and functionality at an attractive price point.

Evolved from TenPoint's premium CLS or Compact Limb System models, the XLT or Xtreme Limb Technology design's most noticeable feature is a radically compact bow assembly, which spans a mere 13.5-inches from axle to axle when cocked.

The XLT design, however, differs from the CLS concept in several ways. The XLT riser is lighter, has more acutely angled limb pockets, and is fitted with 11-inch rather than 12-inch IsoTaper limbs. And, unlike the one-piece CLS riser and foot stirrup, the XLT riser comes with a detachable, lighter, coated aluminum foot stirrup.

Fitted with high-performance MR Cams, string and cables with tunable yokes, this sleek and maneuverable 180-pound draw weight power plant delivers a relatively heavy 420-grain arrow at 315 fps, generating 92.5 foot pounds of kinetic energy.

Combining the lighter riser and foot stirrup with shorter limbs and a lightweight molded Verton® stock and barrel assembly, allows the crossbow to weigh in at a very comfortable 7 lbs. 11 oz. Together the bow and stock assemblies make a beautifully balanced crossbow with perfect fit and functionality.

Like all TenPoint models, the Turbo XLT also features TenPoint's patented DFI (dry-fire inhibitor) and TenPoint's highly regarded 3.5-pound patented PowerTouch-10 trigger.

Equipped with either the ACUdraw or ACUdraw 50, TenPoint's patented automated cocking units, the Turbo XLT is handsomely double-dip fluid imaged in Mossy Oak's New Break UP Infinity®.

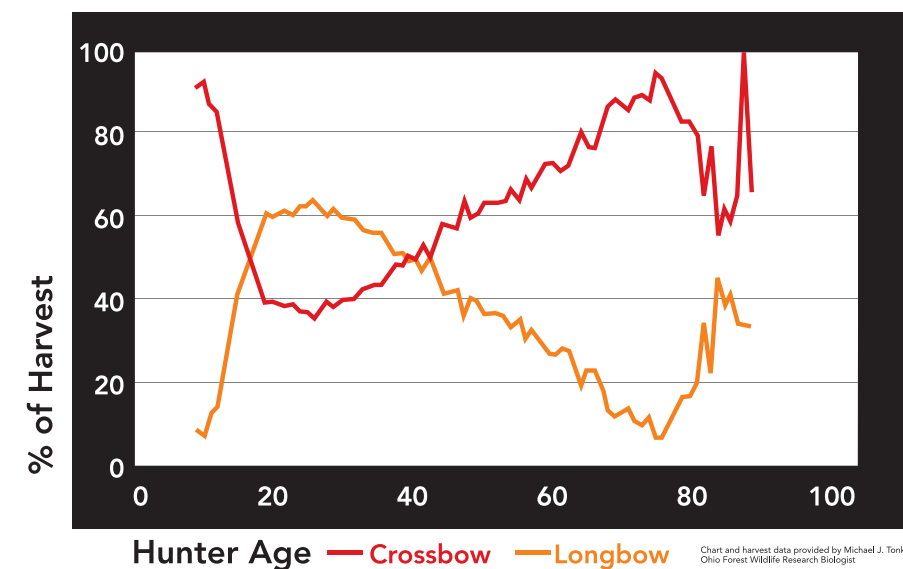

CROSSBOW DATA

Hunter Recruitment and Retention in Ohio

The dramatic chart below, developed by Ohio Wildlife Research Biologist, Michael J. Tonkovich, Ph.D., is based on **2008 Ohio Archery Whitetail Harvest Data**. Ohio is a mandatory deer check state so the data is sound. While harvest data is not hunter participation data, the success rate for crossbow and vertical bow participants is virtually identical. It is not a stretch to assume, therefore, that a hunter participation chart would look similar, and similar conclusions could be drawn from it.

The chart illustrates the percentage of the **archery harvest** taken by crossbows and vertical bows, by **hunter age**, and strongly suggests that crossbows play a significant role in hunter recruitment and retention.

OHIO: 2008-09 CROSSBOW AND VERTICAL BOW HARVEST BY HUNTER AGE

The actual data for 8-year-olds, for example, shows that 93% of that age group's harvest (118) came from crossbows. Only 7% came from vertical bows (9). The strong suggestion, therefore, is that the crossbow both encourages participation and allows for greater success at an earlier age than the vertical bow. Other studies have shown that early hunting success increases the likelihood that a hunter will get hooked, so it makes sense to allow that the crossbow is also a valuable recruitment tool.

At about age 17 the percentage of deer taken with vertical bows begins to surpass the percentage taken by crossbows. This dominance continues through ages 40 to 43, a span of 26 years. While the data does not prove

that some crossbow hunters begin to convert to vertical bows during their late teens, there is ample anecdotal evidence suggesting that they do. The number of vertical bow hunters in Ohio has grown significantly since 1982 when the state removed its crossbow restrictions during archery season.

Perhaps the most profound story behind the chart is that, at age 23, the percentage of vertical bow harvest begins its decline. The crossbow harvest percentage again overtakes the vertical bow percentage by age 43 and the vertical bow harvest declines steadily to age 75. Eighty-percent of the 63-year-olds' harvest comes from crossbows. Roughly 95% of the 75-year-olds' harvest comes from crossbows.

The reasons why vertical bow hunters revert to hunting with crossbows beginning as early as age 23 have much to do with our modern lifestyles. Family and career demands cut heavily into a young man or woman's available time, leaving little time to keep their vertical bow skills sharp. After age 50, when they begin to have more time, physical limitations begin to play a role in their conversion to crossbows. Regardless, this chart makes it abundantly clear that crossbows are a valuable hunter recruitment and retention tool.

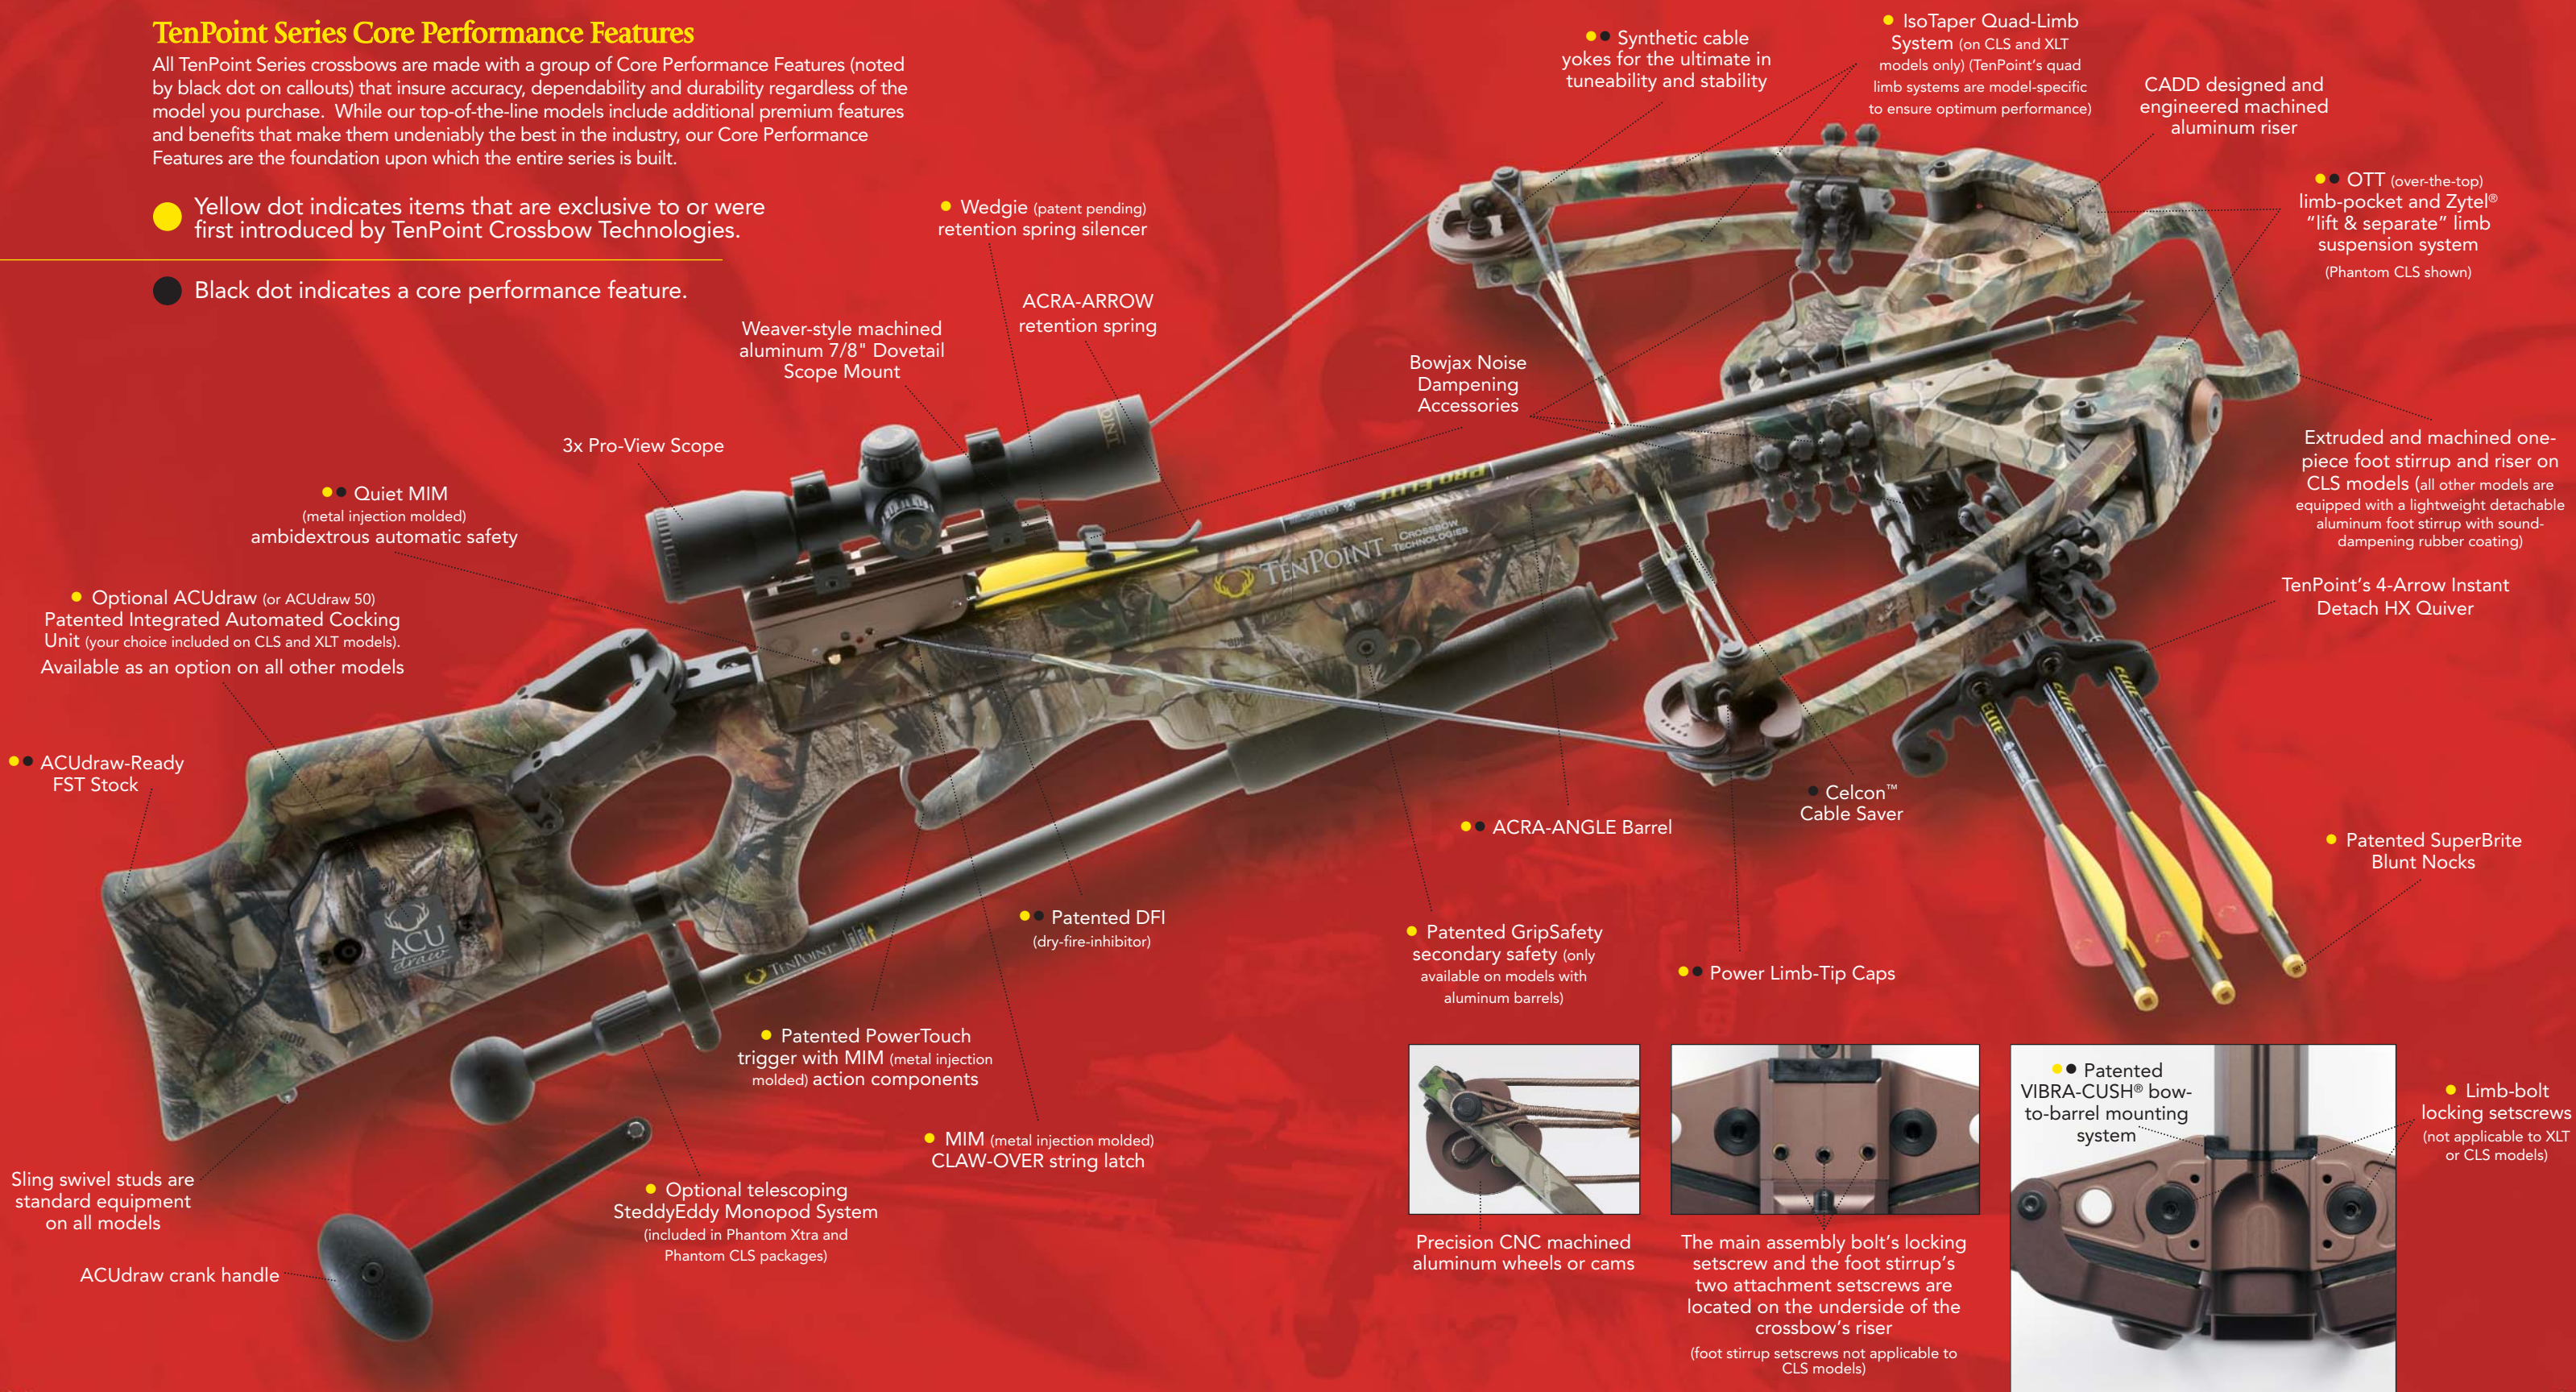

TENPOINT CORE FEATURES

TenPoint Series Core Performance Features

All TenPoint Series crossbows are made with a group of Core Performance Features (noted by black dot on callouts) that insure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

● Yellow dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.

● Black dot indicates a core performance feature.

PHANTOM XTRA™

APPLIES TO BOTH PHANTOM MODELS

343 FPS*

185 LB. Draw Weight

109.7 FP Kinetic Energy*

Available only as a complete package

Equipped with patented GripSafety secondary safety

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

Comes with 3x Pro-View Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

* with recommended arrow

This beautifully crafted, laminated wood stock version of the Phantom CLS is designed for the discriminating hunter or collector looking for the best of the best. This heirloom quality crossbow takes crossbow aesthetics and performance to a new level.

PHANTOM XTRA PACKAGE DETAILS:

- TenPoint's 3x Pro-View Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Claw® Sling with swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads and Tracer™ nocks. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved, Compact Travel & Storage Case for maximum equipment protection.
- Deluxe Soft Crossbow Case.
- SteddyEddy® telescoping lightweight aluminum monopod.
- TenPoint CareKit, including the premium Microlon® Precision Oiler, String Wax & Conditioner, telescoping Combo LensPen Brush & Cleaner and a Carry Case.
- TenPoint Wedgie™ Retention Spring Silencer and TenPoint's exclusive Bowjax Crossbow Noise Dampening Kit.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.
- Two Custom Service PAC I routine maintenance certificates worth \$99 each. TenPoint will mail them after the owner completes and returns the warranty card. Valid for 5-years following the purchase date.

PHANTOM CLS™

CLS
COMPACT LIMB SYSTEM™
TECHNOLOGY

The Compact Limb System (CLS) components include a robust one-piece machined riser and foot stirrup, 12-inch 185-pound IsoTaper limbs fitted with maximum rotation CADD engineered MR Cams and Brownell Ultra-Cam™ string and cables. Combined, these elements form an uncommonly compact, quiet, and powerful bow assembly with a hunter-friendly 13-inch power stroke, and a highly maneuverable 17.5-inch axle-to-axle span when cocked.

The finest crossbow ever made, the Phantom CLS produces a shot so smooth, quiet, and vibration free, it is difficult to believe it delivers its payload at a blazing 343 fps. The perfect synergy of premium looks, performance, and power.

PHANTOM CLS PACKAGE DETAILS:

- TenPoint's 3x Pro-View Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Claw® Sling with swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Three-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads and SuperBrite nocks. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved, Compact Travel & Storage Case for maximum equipment protection.
- Deluxe Soft Crossbow Case.
- SteddyEddy® telescoping lightweight aluminum monopod.
- TenPoint CareKit, including the premium Microlon® Precision Oiler, String Wax & Conditioner, telescoping Combo LensPen Brush & Cleaner and a Carry Case.
- TenPoint Wedgie™ Retention Spring Silencer and TenPoint's exclusive Bowjax Crossbow Noise Dampening Kit.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

PHANTOM CLS-S™

343 FPS*
185 LB. Draw Weight
109.7 FP Kinetic Energy*

Available only as a package

Equipped with patented GripSafety secondary safety

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

6 POINT[™] SERIES CORE FEATURES

6 Point Series Core Performance Features

Like the TenPoint Series, our 6 Point Series models are built on an equally impressive foundation of core features (noted by black dot on callouts) that mirror most of those in the TenPoint Series. While the 6 Point models are conceptually very different from our original TenPoint Series models, it is easy to recognize the gene pool from which they come.

- Beige dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.
- Black dot indicates a core performance feature.

All 6 Point models also accept the popular SteddyEddy Monopod System

DEFENDER CLS™

330 FPS*
175 LB. Draw Weight
101.5 FP Kinetic Energy*

Available only as a package

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

Comes with 3x Pro-View Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

* with recommended arrow

Lethal, lightweight and maneuverable, the Defender CLS features TenPoint's 175-pound 6 Point Series version of the Compact Limb System (CLS) bow assembly. The result: a quiet, and deadly shooting experience unmatched in fit, form, and function by our competitors.

DEFENDER CLS PACKAGE DETAILS:

- TenPoint's 3x Pro-View Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Six-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Retention Spring Silencer.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

TenPoint will donate a percentage of the 2010 Defender CLS sales to the Safari Club International Hunter Defense Fund

PRO SLIDER™

305 FPS*
175 LB. Draw Weight
86.7 FP Kinetic Energy*

Available only as a package

Choice of either an ACUdraw or ACUdraw 50 as an option

Comes with 3x Pro-View Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

* with recommended arrow

The high-performance precision crafted Pro Slider's innovative design allows its bow assembly to slide between its machined upper and lower TriLoc barrel and to locate and lock in any of three shooting positions, making it ideal for multiple shooters within a family or any shooter, regardless of age, sex, or physical stature.

PRO SLIDER PACKAGE DETAILS:

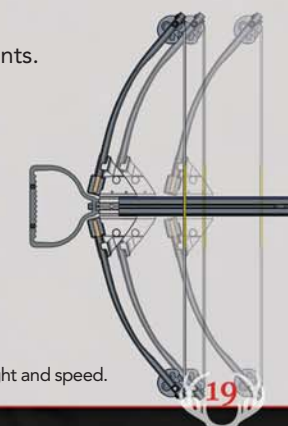

- TenPoint's 3x Pro-View Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Wedgie™ Retention Spring Silencer.

An Industry First – Two Crossbow Assembly Options in One Purchase!

The Defender-Mag Combo gives the option of sometimes hunting with a compound model and other times with a recurve. This three-piece combo comes with our precision crafted 6 Point Series stock assembly fitted with our patented 3.5-pound PowerTouch-6 trigger and your choice of the patented ACUdraw or ACU-draw 50 cocking mechanism. In a matter of minutes, you can attach the Combo's 330 fps, 175-pound Defender CLS bow assembly or its 335 fps, 200-pound GT Mag bow assembly.

Regardless of the bow assembly you choose at the time, you can be confident you will experience a profoundly satisfying hunting and shooting experience. The industry's first cost effective and efficient way to own two high-performance crossbows with one simple purchase.

CROSSBOW ARROWS

The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With Moon, SuperBrite™ Blunt, or Tracer™ Nocks

Two Crossbow Arrows Available:

Carbon Fiber Shafts – 20-inch 22/64ths

For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64ths diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Easton®, the Pro Elite is a masterpiece of precision engineering, strength, and accuracy.

Advanced carbon fiber Pro Elite arrows are laser inspected for straightness to within .003; and hand-sorted for weight tolerances to within two-grains per dozen. They come equipped with brass or aluminum inserts and TenPoint's patented SuperBrite blunt nocks, or

CPC moon nocks, or Tracer nocks. They are fletched with Norway DURAVANES™. Available in 3-packs, 6-packs, and bulk 72-packs (Tracer nocked arrows not available in 6- or 72-packs).

The Pro Elite Carbon Arrow is also available in a Premium Hunter version. Each Premium Hunter arrow is precision tested for trueness, and weight-matched for accuracy. Premium Hunters come in a 3-pack with 100-grain NAP® Spitfire® expandable broadheads installed and ready to shoot. The Premium Hunter is only available with SuperBrite™ blunt nocks or Tracer™ nocks.

Premium Hunter Tracer nocked arrows only available with NAP® Spitfire® broadheads.

Aluminum Shafts – 20-inch XX75 Hunting Quality 2219's

TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton shafts to produce the highest quality aluminum crossbow arrows available today.

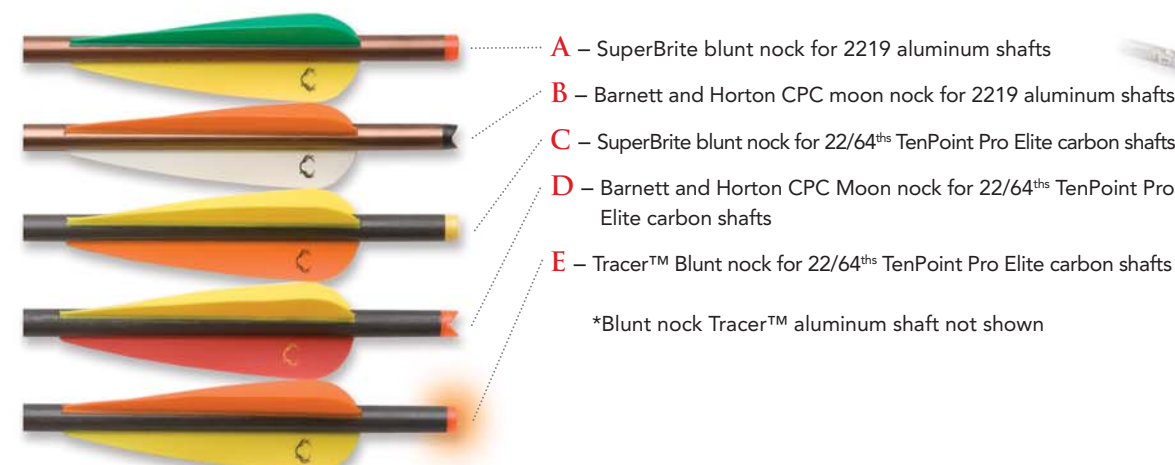

This shaft is the proven industry standard for reliable results. Available in black CPC moon nocks, TenPoint's patented SuperBrite blunt nocks, or Tracer™ nocks, these shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES™.

TenPoint crossbow arrows are available in bulk 72-packs, 6-packs, or 3-packs (Tracer™ nocked arrows only sold in 3-packs).

All Bow, No Bull with TenPoint Crossbows

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All 420-grain speed tests were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point. The recurve models were also tested with a 350-grain arrow, consisting of a 17.5-inch aluminum shaft and 75-grain tip (not recommended for hunting). The chronograph was positioned 18-inches in front of the crossbow for all shots.

Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.

HEA-251.12

Twelve-pack of Patented SuperBrite nock tools. Available for refletching 2219 aluminum shafts or 22/64ths diameter Pro Elite shafts that use SuperBrite nocks.

Two Great Cocking Devices – Making Bowhunting Accessible to Everyone

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means - in many cases taking technological shortcuts - to boost arrow speed in order to sell their crossbows. All of those means - using heavier limbs, longer power strokes, and reverse cams - have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

TenPoint responded to the need before all others by developing its two integrated, convenient, and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50.

The ACUdraw 50 reduces a crossbow's draw weight by 50%. The original ACUdraw converts even the heaviest draw weight to about five pounds of effort. Both devices load the bow string accurately every time.

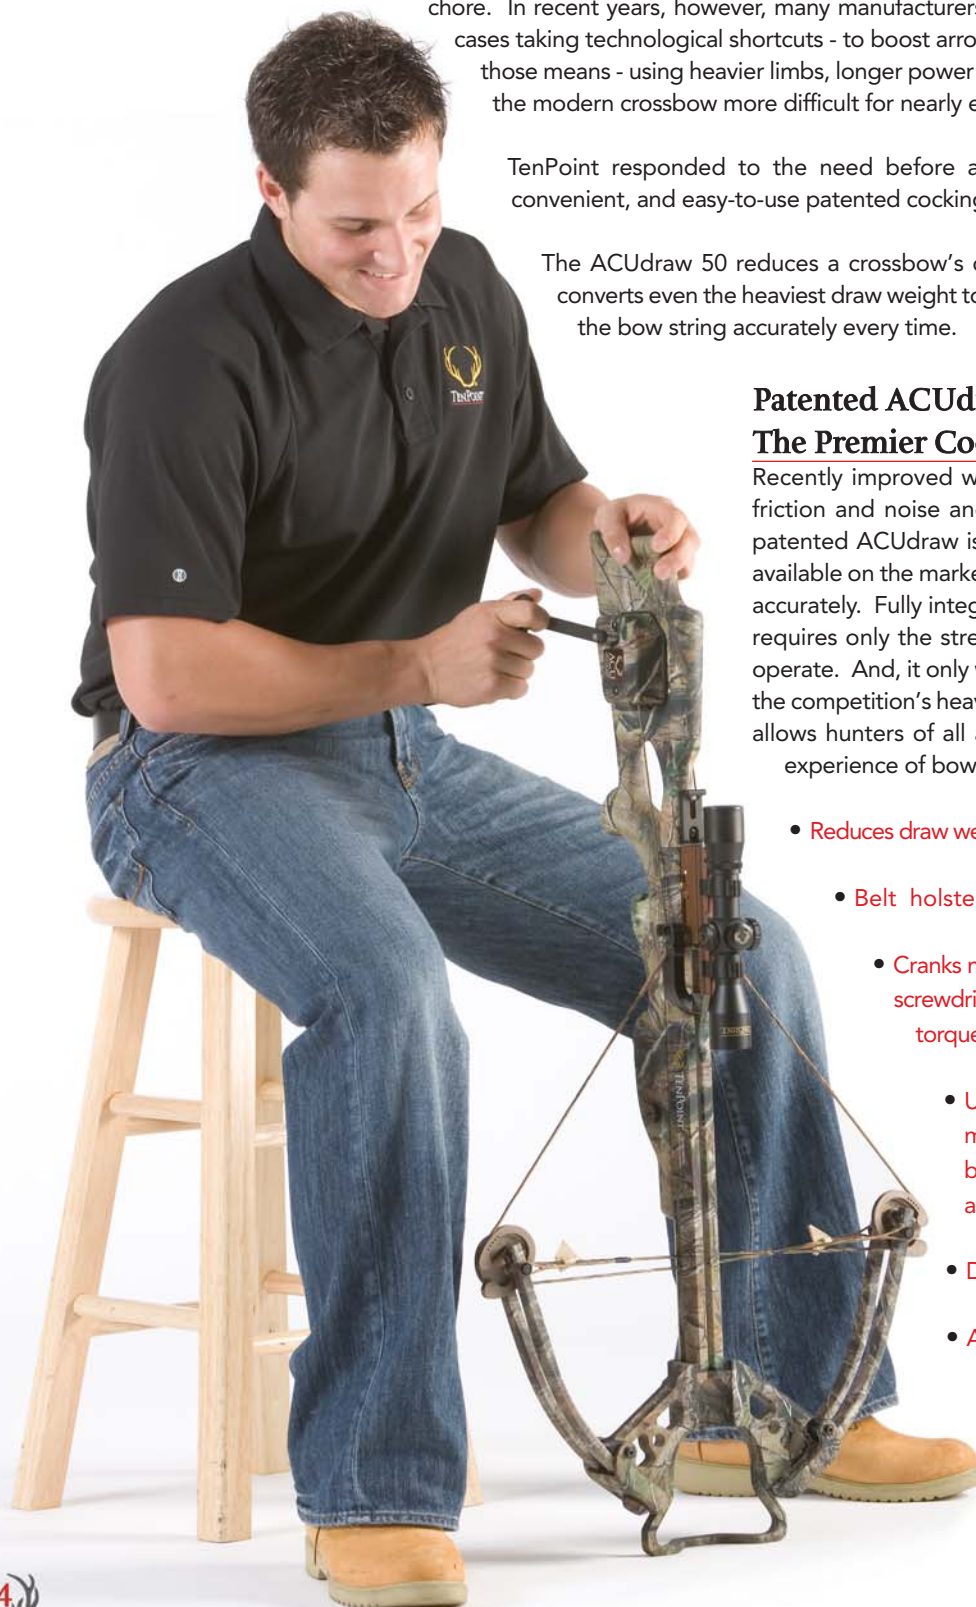

Patented ACUdraw – The Premier Cocking Aid Available Today

Recently improved with three additional bearings to reduce both friction and noise and a thicker spring to improve retraction, the patented ACUdraw is the most user-friendly and practical solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike some of the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

- Reduces draw weight to about 5-pounds when operated manually
- Belt holster for ACUdraw crank included
- Cranks manually or powers-up with almost any cordless screwdriver or drill (equipped with a clutch or low-torque setting)
- Unlike most other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or pre-installed

Patented

Patented ACUdraw 50 – Takes the traditional rope-cocker to a new level

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to a new, easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

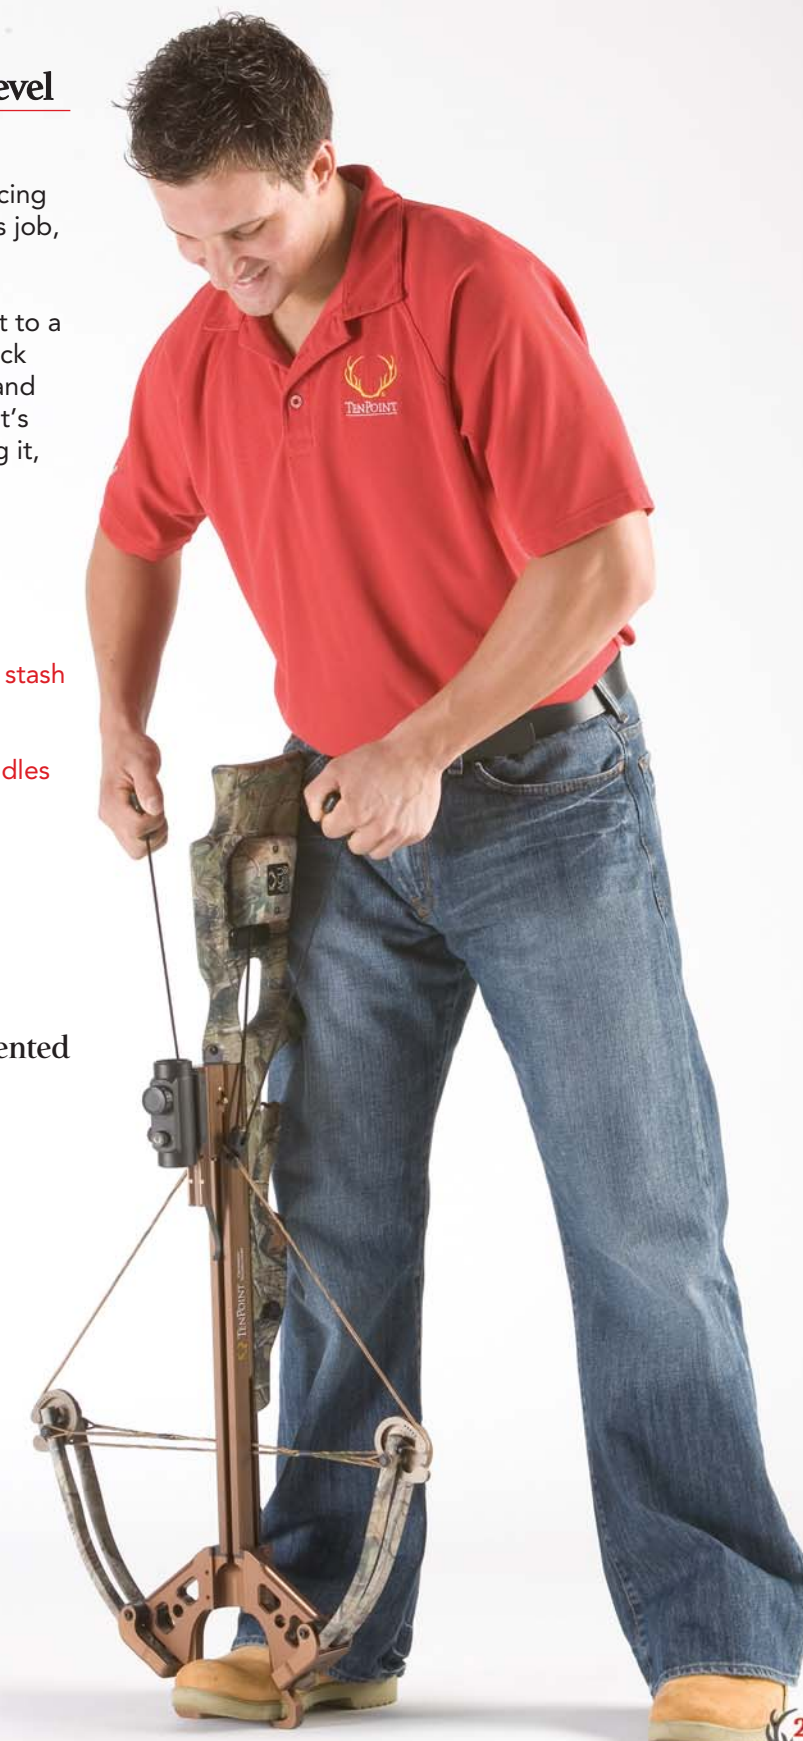

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope around your neck or to stash it in your fanny pack
- When not in use, powerful mini-magnets hold the handles securely and silently in place
- Available pre-installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

Patented

The ACUdraw 50 Handles retract and store neatly against the stock when not in use.

ACCESSORIES

4-Arrow Instant Detach HX Quivers™

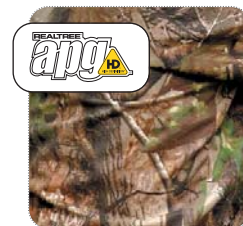

Weighing only 6 ounces empty, TenPoint's HX Quivers feature a four-arrow ABS cup and a rubber arrow gripper connected by two ultra-light carbon fiber rods. This double-rod backbone is stabilized with a two-sided polycarbonate X-Connector™ that snaps and bolts together while positioning and adjusting the quiver for left or right-handed use.

The cup and rubber gripper are molded with raised nubs that protect

arrow fletching from getting crushed when placing the crossbow on a table, floor, or on the ground.

The backside of the X-Connector is fitted with a quick-lock mounting system which screws directly onto the bow, allowing the user to instantly attach or detach the quiver. Comes with TenPoint and 6 Point Series mounting brackets.

Crossbow Cases

TenPoint's airline approved, hard travel cases provide protection, security, and ease of transport for your crossbow investment. Either hard case contains all the room necessary to secure your crossbow and all of its accessories.

- | | |
|-----------|---|
| HCA-200 | TenPoint Hard Case (for travel with a fully-assembled crossbow) |
| HCA-20010 | TenPoint Compact Travel & Storage Case (for compact, take-down transport or storage of your crossbow) |

Designed by Neet Products, Inc. for TenPoint, the standard recurve size soft crossbow case features a wider body for recurve crossbows. A narrower width soft case provides the perfect fit for all Compact Limb System (CLS) and Xtreme Limb Technology (XLT) crossbows. Both soft cases have sturdy side panels for added depth to accommodate mounted optics and most additional crossbow accessories. Made with double-stitched, high-grade Cordura®, thick padding, and Trico-lining, these functionally improved designs also include a heavy-duty YKK zipper with double pulls and a removable shoulder strap.

SteadyEddy

The SteadyEddy telescoping two-section monopod insures motion-free shooting while seated in a tree stand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, you can easily set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a completely maneuverable ball-joint mount or with the Ball Stem Mounting Bracket and ball-joint (HCA-039). It clamps conveniently under your stock when not in use. All SteadyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body. Rod retention clips for TenPoint and 6 Point Series crossbows included.

- | | |
|---------|--|
| HCA-030 | SteadyEddy Crossbow Monopod System (for all TenPoint crossbows built after 1999) |
|---------|--|

Easily installed, the Ball Stem Mounting Bracket gives you more options for mounting the SteadyEddy ball-joint and your sling swivel stud. Use this bracket to retrofit crossbows with the larger diameter Ball Stem mounting screw or to give yourself the option of mounting your front sling swivel stud on the left or right side of the crossbow.

ACCESSORIES

Maintenance
TenPoint's CareKit™ includes three important maintenance tools (Microlon Precision Oiler, TenPoint String Wax and Conditioner, and TenPoint Lens Pen) packaged in a versatile multi-cavity translucent plastic mini-case with plenty of extra room for other bow maintenance items.

HCA-11207

HCA-111

HCA-11207 CareKit

The high-tech lubricant contained in the Microlon Precision Oiler includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin impregnates the metal to create a dry film lubricant. Perfect for crossbow rails, triggers, and wheels, this high-quality lubricant comes in a tube fitted with a precision applicator needle.

HCA-11106 Microlon® Precision Oiler

Made from all natural compounds, TenPoint String Wax and Conditioner comes in a convenient chap stick style tube. This string wax and conditioner both lubricates and rejuvenates bow strings and cables. Scent-free and water-resistant, it greatly reduces string friction and abrasion against cable slides, wheels, or cams. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

HCA-11007 TenPoint String Wax and Conditioner

This clever lens treatment tool features a soft fiber lens brush that telescopes out of one end of its pen-sized tube and an abrasive-free lens cleaning pad housed underneath a cap at the other end. The brush gets rid of scope lens dust and the cleaning pad eliminates smudges and cleans and polishes lens surfaces without damaging or scratching the glass.

HCA-09107 TenPoint Lens Pen (combo brush and cleaner)

TenPoint's Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance.

HCA-111 Flight Rail and Trigger Lube

Broadheads

Recommended by TenPoint, the New Archery Products® Spitfire® expandable broadheads are the most trusted mechanical broadheads in the industry. They fly straight with pinpoint accuracy and will stand up to the toughest hunting conditions.

Foot Stirrup HCA-009 Standard Rubber Coated Foot Stirrup

Silencers - NEW 10

Private labeled exclusively for TenPoint by Bowjax, Inc. the new Noise Dampening Package™, is a combination of accessories that progressively reduces decibel level and shortens noise duration when used on a crossbow. It features a set of Bowjax limb vibration dampeners, retention spring dampener, and barrel dampeners. Three versions are available – one for our IsoTaper and HL split limbs, one for our TL and ST split limb crossbows, and a set for solid limb and our recurve crossbows.

Scopes

Calibrated for crossbows that shoot in the 330 fps range, this 20, 30, and 40-yard combo illuminated dot and crosshair configuration is housed in a lightweight seven-inch aluminum tube equipped with fully-coated 3X optics. The dots are positioned at the intersection of each duplex crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color. 7/8-inch scope mounting rings included.

HCA-097 3x Pro-View Scope with 7/8" mounting rings

Perfectly proportioned for a crossbow at only 7" long, this light, compact scope features fully-coated 3X optics and three duplex crosshairs calibrated for 20, 30, and 40-yard shots with crossbows that shoot in the 330 fps range. 7/8-inch scope mounting rings included.

HCA-088 RangeMaster 3 x 32 Multi-Line Scope with 7/8" mounting rings

The Pro-40 is a zero-power 40 mm multi-dot scope with an integrated, adjustable 7/8-inch mounting system that requires no rings. Its three illuminated dots, calibrated for 20, 30, and 40-yards for crossbows that shoot in the 330 fps range, can be rendered in red or green to suit individual hunting and light conditions. The light intensity of both color views is regulated by a five-position rheostat.
