

CROSSBOW
TECHNOLOGIES

...the mark of perfection™

The Carbon Revolution Begins

2011 Complete Product Guide

To Our Customers

In January 1994, key members of my new staff and I traveled to what was then the AMO Trade Show with a working prototype crossbow in hand and a goal of launching a new crossbow company.

Easton Arrow Distributor George R. Gardner, a key partner, and I walked the show floor looking for retailers I had dealt with when I was the Chief Operating Officer of Horton Crossbows. We succeeded in convincing some of them to meet with us after hours, where we showed them our new crossbow design and gave them the best sales pitch we could muster.

It was a quiet launch, but here we are 17 years later making two successful crossbow brands - TenPoint and Wicked Ridge - for a customer base that consistently tells us we are doing a good job. We now hold 15 patents and have 14 more pending in the U.S. and 3 in Canada. No other crossbow manufacturer comes close to this record of technological achievement.

As I think about how far we have come since then, I believe our success has been built on a foundation of three fundamentals. First, the HuntMaster Advantage crossbow we brought to that first trade show was a technologically advanced product that still measures up to today's standards, that hunters still use, and that we still stand behind.

Second, we started TenPoint with a clear vision of what we wanted to become. If you look at the last page of this catalog, you can read our Corporate Statement. We brought that to the AMO Show as well. Its principles guide us today just as they did back then.

Last, we have grown our companies with a group of people who have worked hard to translate our vision into reality.

Superior product and service, a clear set of guiding principles, and a quality staff. With those fundamentals in place we have managed to build two quality crossbow brands we are proud to put our name on.

We hope you will become as excited about our 2011 lineup as we are to offer it. Please turn the page to see **What's New for 2011**.

Good hunting,

What's New for 2011

CARBON XTRA CLS™

CARBON FUSION CLS™

The NEW Carbon Fusion CLS™ and Carbon Xtra CLS™ feature the industry's first ever woven carbon fiber barrel, designed to answer the demand for lighter and quieter crossbows.

Adapting technology similar to that used for the airframe of Boeing's new 787 Dreamliner, the Carbon Fusion CLS's barrel, along with other structural refinements, eliminates a remarkable 20 oz. from our original Phantom CLS™ design.

The new carbon barrel is fitted with threaded aluminum rivet nuts, which "float" the barrel inside the stock, reducing noise and vibration. In addition, the barrel's flight deck has an extremely low coefficient of friction for improved string life.

Like its predecessor, the Carbon Fusion CLS relies on our breakthrough Compact Limb System (CLS) to create a 185-pound power plant that shoots 345 fps with 111 foot-pounds of kinetic energy.

The bow also can be upgraded to a fully-camouflaged version for an extra \$100.

The Carbon Xtra CLS comes with a precision-crafted, laminated wood stock rendered in a durable weather-resistant semi-gloss finish with a non-slip rubber butt plate.

Equipped with the ACUdraw™ or ACUdraw 50™, TenPoint's patented cocking units, and NEW RangeMaster Pro™ variable speed and power scope, both models are sold only as complete packages.*

*Like all TenPoint crossbows, these new models are equipped with our patented DFIT™ (dry-fire inhibitor), highly regarded 3.5-pound PowerTouch™ trigger and an ambidextrous automatic safety. Please see pages 6 & 7 and 16 & 17 for a complete list of our TenPoint and 6 Point Series Core Performance Features.

STEALTH XLT™

Created for those looking to move up to TenPoint's top-of-the-line models, the NEW Stealth XLT™ is a lighter and faster premium-level adaptation of the Turbo XLT™.

It features a 185-pound version of our Xtreme Limb Technology (XLT) bow assembly and shoots 320 fps, with 95.5 foot-pounds of kinetic energy.

Unlike the Turbo XLT, the Stealth XLT is fitted with a machined aluminum barrel and our patented GripSafety™. With modifications to the barrel, riser and trigger box, the Stealth XLT is much lighter at 7 lbs. 6 oz.

Equipped with our NEW RangeMaster Pro™ variable speed scope and either of the patented ACUdraw™ or ACUdraw 50™ cocking mechanisms, the Stealth XLT is a perfectly balanced, precision performance crossbow with pinpoint accuracy and deadly speed.*

GripGuard™

Included with all 2011 TenPoint Series crossbows, the NEW GripGuard™ is a shield that custom fits over post-1999 synthetic stock model fore-grips in the series. The wings at the top of the shield help prevent a shooter's fore-grip fingers or thumb from dangerously migrating above the flight deck while shooting the crossbow.

MAVERICK HP™

A great value, priced in the middle of the 6 Point Series lineup, the NEW Maverick HP™ delivers a deadly combination of blistering speed and crushing knockdown power. Employing a select blend of both TenPoint and 6 Point Series technology, it shoots 325 fps with 98.5 foot-pounds of kinetic energy.

The Maverick HP's bow assembly is fitted with 175-pound field-proven HL limbs powered by TenPoint Series HP cams. This upgraded power plant mounts in a fixed position on a 6 Point Defender stock assembly.

Equipped with our NEW 3x Pro-View 2 Scope the Maverick HP is a powerful and deadly accurate addition to the 6 Point lineup.*

ACUrope™

The industry's only portable and fully retractable rope cocking mechanism, our new ACUrope™ eliminates traditional rope-cocker drawbacks, including tangles, knots and the unsafe practice of hanging the rope around one's neck. When not in use, the grips dovetail neatly together and slip inside a belt-mounted holster.

The unit's slim SPECTRA® 1000 draw cords are pound-for-pound 15 times stronger than steel, while a pair of heavy-duty constant-force springs inside the retracting grip power the spool. The compact grips are made from DuPont™ Zytel® Super Tough Nylon.

RangeMaster Pro™ Scope

Standard on our top-of-the-line bow collection, the NEW RangeMaster Pro™ Scope features a variable speed and arrow drop-compensation setting for crossbows that shoot between 275 and 365 fps. No adjustment for distance is required. The configuration consists of three duplex crosshairs and four dots calibrated for 20, 30, 40, and 50-yards. The fourth dot is free standing, situated just below the 40-yard crosshair.

This compact and lightweight, 8.25-inch aluminum scope features a 30mm tube for heightened light-gathering and durability. It is equipped with an etched glass reticle and fully multi-coated 1.5 to 5x optics that reduce the loss of light transmission caused by reflection and scattering to .25% - as good as current scope technology can produce.

No other crossbow manufacturer today offers a variable speed, arrow drop-compensating scope with a better field-of-view that is this lightweight and compact.

3x Pro-View 2™ Scope

An enhanced version of our popular 3x Pro-View™ Scope, this new scope includes a customer-requested, fourth aiming point at 50-yards.

Calibrated for crossbows that shoot in the 330 fps range, this 20, 30, 40, and now 50-yard illuminated dot and crosshair configuration is housed in a lightweight 8.5-inch aluminum tube equipped with a durable etched glass reticle and fully-coated 3x optics. The new fourth dot is free-standing and situated directly below the 40-yard crosshair.

In the field, you can select between non-illuminated black dots or red or green illuminated dots to suit your light conditions. A five-position rheostat controls both the color choice and the illumination intensity.

What's Improved for 2011

SteddyEddy™

Our improved SteddyEddy™ design includes a weather resistant, fiber reinforced, flexible rubber rapid-pivot tube that provides smooth and quiet 360-degree movement for all shot angles. The end of the tube is equipped with a friction fitting socket that snaps on to the underside of the crossbow barrel.

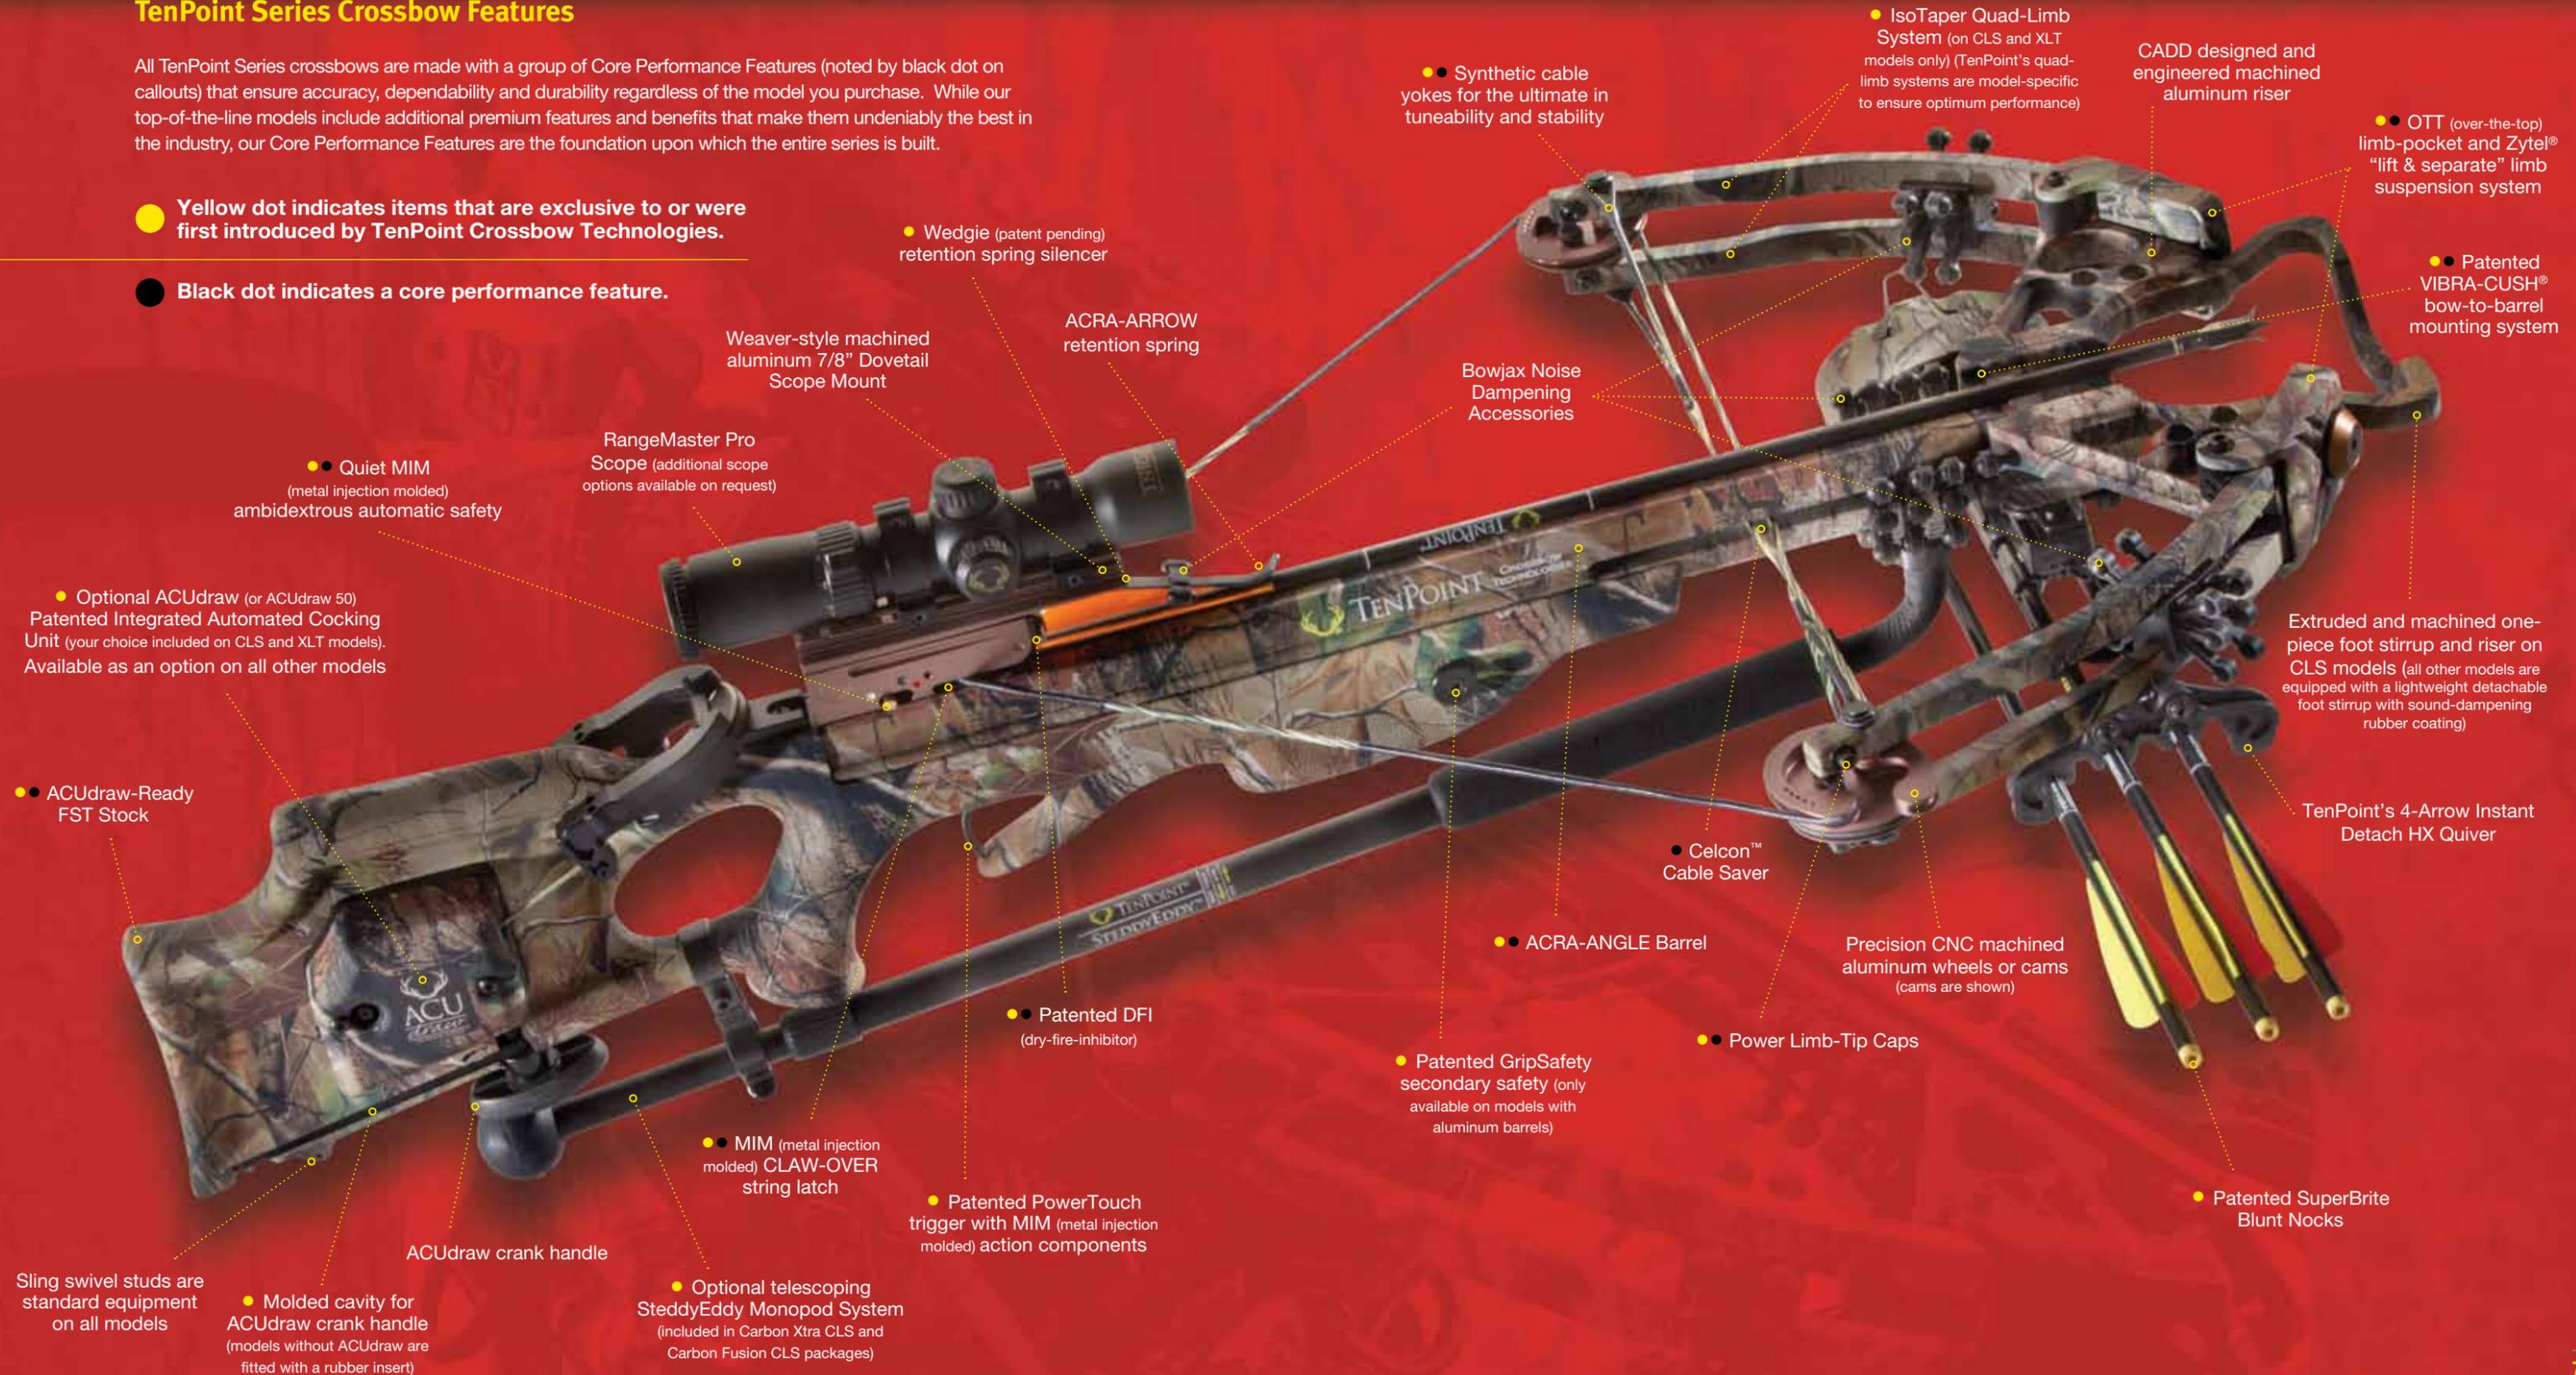

TENPOINT Core Features

TenPoint Series Crossbow Features

All TenPoint Series crossbows are made with a group of Core Performance Features (noted by black dot on callouts) that ensure accuracy, dependability and durability regardless of the model you purchase. While our top-of-the-line models include additional premium features and benefits that make them undeniably the best in the industry, our Core Performance Features are the foundation upon which the entire series is built.

● Yellow dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.

● Black dot indicates a core performance feature.

● Quiet MIM (metal injection molded) ambidextrous automatic safety

● Optional ACUdraw (or ACUdraw 50) Patented Integrated Automated Cocking Unit (your choice included on CLS and XLT models). Available as an option on all other models

● ACUdraw-Ready FST Stock

Sling swivel studs are standard equipment on all models

● Molded cavity for ACUdraw crank handle (models without ACUdraw are fitted with a rubber insert)

● Optional telescoping SteddyEddy Monopod System (included in Carbon Xtra CLS and Carbon Fusion CLS packages)

● MIM (metal injection molded) CLAW-OVER string latch

● Patented PowerTouch trigger with MIM (metal injection molded) action components

● Patented DFI (dry-fire-inhibitor)

● Patented GripSafety secondary safety (only available on models with aluminum barrels)

● ACRA-ANGLE Barrel

● Celcon™ Cable Saver

● Power Limb-Tip Caps

Precision CNC machined aluminum wheels or cams (cams are shown)

● Patented SuperBrite Blunt Nocks

TenPoint's 4-Arrow Instant Detach HX Quiver

Extruded and machined one-piece foot stirrup and riser on CLS models (all other models are equipped with a lightweight detachable foot stirrup with sound-dampening rubber coating)

● Patented VIBRA-CUSH® bow-to-barrel mounting system

● OTT (over-the-top) limb-pocket and Zytel® "lift & separate" limb suspension system

CADD designed and engineered machined aluminum riser

● IsoTaper Quad-Limb System (on CLS and XLT models only) (TenPoint's quad-limb systems are model-specific to ensure optimum performance)

● Synthetic cable yokes for the ultimate in tuneability and stability

● Wedgie (patent pending) retention spring silencer

Weaver-style machined aluminum 7/8" Dovetail Scope Mount

RangeMaster Pro Scope (additional scope options available on request)

ACRA-ARROW retention spring

Bowjax Noise Dampening Accessories

Carbon Xtra CLS™

TENPOINT
SERIES

NEW FOR
2011

A precision-crafted, laminated wood stock version of the Carbon Fusion CLS, the NEW Carbon Xtra CLS satisfies the discriminating hunter, shooting enthusiast or collector who demands the best. Together, its classic, heirloom-quality stock and woven carbon fiber barrel establish a new benchmark for crossbow aesthetics and performance.

345 FPS*
185 LB. Draw Weight
111 FP Kinetic Energy*

Available only as a complete package

Comes with choice of ACUdraw or ACUdraw 50 cocking mechanism

Comes with RangeMaster Pro Scope

Carbon Xtra CLS Package Details:

- TenPoint's RangeMaster Pro Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Claw® Sling with swivels.
- Six-pack of TenPoint Pro Elite carbon fiber arrows with practice points.
- Six-pack of TenPoint Pro Elite Premium Hunter carbon fiber arrows equipped with NAP® Spitfire® 100-grain broadheads and Tracer™ nocks. Each Premium Hunter arrow is precision-matched for trueness and weight-matched for accuracy.
- TenPoint airline-approved, Compact Travel & Storage Case for maximum equipment protection.
- Deluxe Soft Crossbow Case.
- SteddyEddy® telescoping lightweight aluminum monopod.
- TenPoint CareKit, including the premium Microlon® Precision Oiler, String Wax & Conditioner, Flight Rail & Trigger Lube and a Carry Case.
- TenPoint's exclusive Bowjax Crossbow Noise Dampening Kit.
- GripGuard safety shield.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.
- Two Custom Service PAC I routine maintenance certificates worth \$99 each. TenPoint will mail them after the owner completes and returns the warranty card. Valid for 5-years following the purchase date.

Carbon Fusion CLS™

TENPOINT
SERIES

**NEW FOR
2011**

A remarkable 20-ounces lighter than our original Phantom CLS, the NEW Carbon Fusion CLS is equipped with the industry's first woven carbon fiber barrel to produce a whisper-quiet, vibration-free shot. A powerful visual statement, this new pinnacle in crossbow performance unleashes its fury at a devastating 345 fps.

NEW FOR 2011

The NEW Stealth XLT is a premium-level adaptation of the Turbo XLT priced for customers looking to move up to TenPoint's top-of-the-line performers. With a 185-pound version of our ultra-maneuverable bow assembly, this perfectly balanced, precision-performance crossbow delivers bone-crushing power with pinpoint accuracy.

Phantom CLS-S Package Details:

- Choice of either the TenPoint RangeMaster Pro Scope or 3x Pro-View 2 Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Three-pack of TenPoint Pro Elite carbon fiber arrows equipped with practice points.
- TenPoint's exclusive Bowjax Crossbow Noise Dampening Kit.
- GripGuard safety shield.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

Stealth XLT Package Details:

- TenPoint's RangeMaster Pro Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Six-pack of TenPoint aluminum arrows equipped with practice points.
- GripGuard safety shield.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

**2010 Outdoor Life Magazine
 Editor's Choice Award Winner**

Radically compact at only 13.5-inches from axle-to-axle when cocked, the Turbo XLT is lightweight, uncommonly quiet, and highly maneuverable in the field. Designed with affordability in mind, its Xtreme Limb Technology bow assembly, shoots with the TenPoint precision, power, and comfort you have learned to count on.

Turbo XLT Package Details:

- TenPoint's 3x Pro-View 2 Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Your choice of either the patented ACUdraw or ACUdraw 50 cocking mechanism.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- GripGuard safety shield.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

Titan HLX™

300 FPS*
175 LB. Draw Weight
84 FP Kinetic Energy*

POINT SERIES Core Features

6 Point Series Core Performance Features

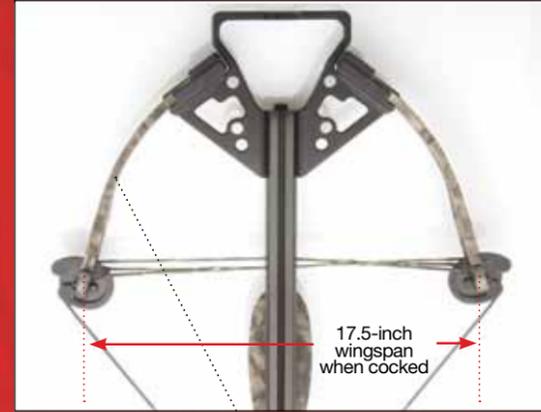

Like the TenPoint Series, our 6 Point Series models are built on an equally impressive foundation of Core Performance Features (noted by black dot on callouts) that mirror most of those in the TenPoint Series. While the 6 Point models are conceptually very different from our original TenPoint Series models, it is easy to recognize the gene pool from which they come.

● Beige dot indicates items that are exclusive to or were first introduced by TenPoint Crossbow Technologies.

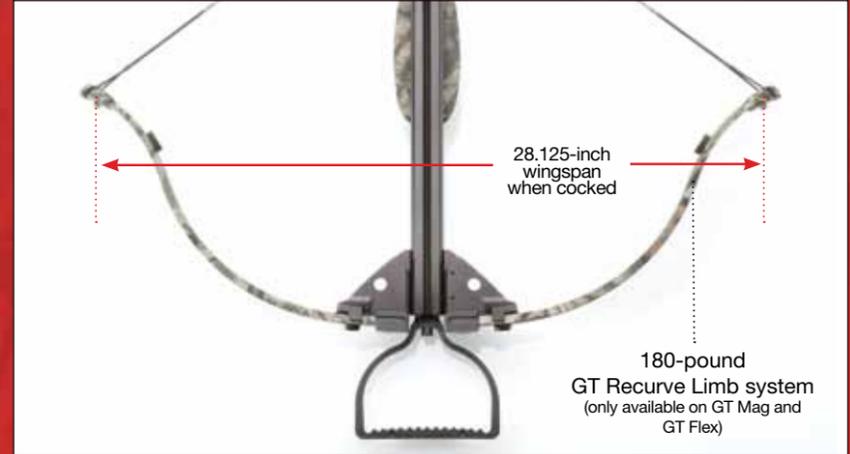

● Black dot indicates a core performance feature.

● Synthetic cable yokes for the ultimate in tuneability and stability (not applicable on recurve models)

175-pound Defender CLS Bow Assembly

180-pound GT Recurve Limb system (only available on GT Mag and GT Flex)

● Complete-Capture limb-pocket isolation system

Solid extruded and machined aluminum foot stirrup with added foot stability (Defender CLS has one-piece machined foot stirrup and riser)

CADD designed and engineered machined aluminum riser

TenPoint's 4-Arrow Instant Detach HX Quiver

● IsoTaper Limb System (Maverick HP has the HL Quad Limb System, GT Mag and GT Flex have the GT Recurve Limb System)

● Power Limb-Tip Caps (recurve models equipped with limb tips containing secondary field re-stringer shelf)

Precision CNC machined aluminum cams*
*not on recurve models

● Safety-engineered fore-grip locates in either of two positions

● Patent pending UL TriLoc machined aluminum Fixed-Position Barrel Assembly (GT Flex has multi-position barrel assembly)

ACRA-ARROW retention spring

● Wedgie (patent pending) retention spring silencer

Weaver style machined aluminum 7/8" Dovetail Scope Mount

3x Pro-View 2 Scope* (additional scope options available on request)

● Ambidextrous Automatic Safety

● Optional ACUdraw 50 (or ACUdraw) Patented Integrated Automated Cocking Unit (your choice included on the Defender CLS) Available as an option on all other models

● ACUdraw-Ready Verton® two-piece stock and fore-grip

● Patented DFI (dry-fire-inhibitor)

● Patented PowerTouch-6 3.5-pound trigger

● Optional telescoping SteddyEddy Monopod System

Sling swivel studs are standard equipment on all models

Defender CLS™

Maverick HP™

- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

GT Mag™

From **307 to 335 FPS***
200 LB. Draw Weight
87.9 to 87.2 FP Kinetic Energy*

Available only as a complete package

Choice of either an ACUdraw or ACUdraw 50 as an option

Comes with 3x Pro-View 2 Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

* with 420- and 350-grain arrows respectively

Ushering in a new generation of recurve crossbow technology and performance, the lightweight GT Mag blends blazing speed and knockdown power with unparalleled balance, maneuverability and accuracy.

GT Mag Package Details:

- TenPoint's 3x Pro-View 2 Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

GT Flex™

From **270 to 300 FPS***
180 LB. Draw Weight
68 to 70 FP Kinetic Energy*

Available only as a complete package

Choice of either an ACUdraw or ACUdraw 50 as an option

Comes with 3x Pro-View 2 Scope

SEE BACK PAGES OF CATALOG FOR DETAILED BOW FEATURES, SPECIFICATIONS AND PURCHASE OPTIONS

* with 420- and 350-grain arrows respectively

The GT Flex combines TenPoint's GT Recurve Limb, the most efficient in the industry, with an innovative 6 Point Series multi-position power stroke stock assembly to create three amazing recurve crossbows in one, which can be set at 180, 125, or 90-pounds.

GT Flex Package Details:

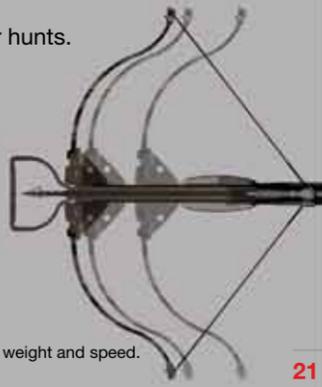

- TenPoint's 3x Pro-View 2 Scope mounted on a machined aluminum 7/8-inch Fixed Dovetail Mount.
- Deluxe 4-Arrow HX Quiver with quick disconnect lever.
- Three-pack of TenPoint aluminum arrows equipped with practice points.
- TenPoint Staff Shooter Field Cap.
- Owner's Instructional DVD with exciting over-the-shoulder hunts.
- TenPoint vehicle window sticker.

GT Flex Performance

Draw Weight	Power Stroke	FPS	
180	13.25	up to 300	Long Position
125	11.875	up to 265	Medium Position
90	7.75	up to 175	Short Position

Each position creates a new center of balance with a different power stroke, draw weight and speed.

Three Great Cocking Devices – Making Bowhunting Accessible to Everyone

A decade ago few crossbows had draw weights over 150-pounds, and cocking a crossbow was no great chore. In recent years, however, many manufacturers have employed a variety of means - in many cases taking technological shortcuts - to boost arrow speed in order to sell their crossbows. All of those means - using heavier limbs, longer power strokes, and reverse cams - have made loading the modern crossbow more difficult for nearly everyone and impossible for some.

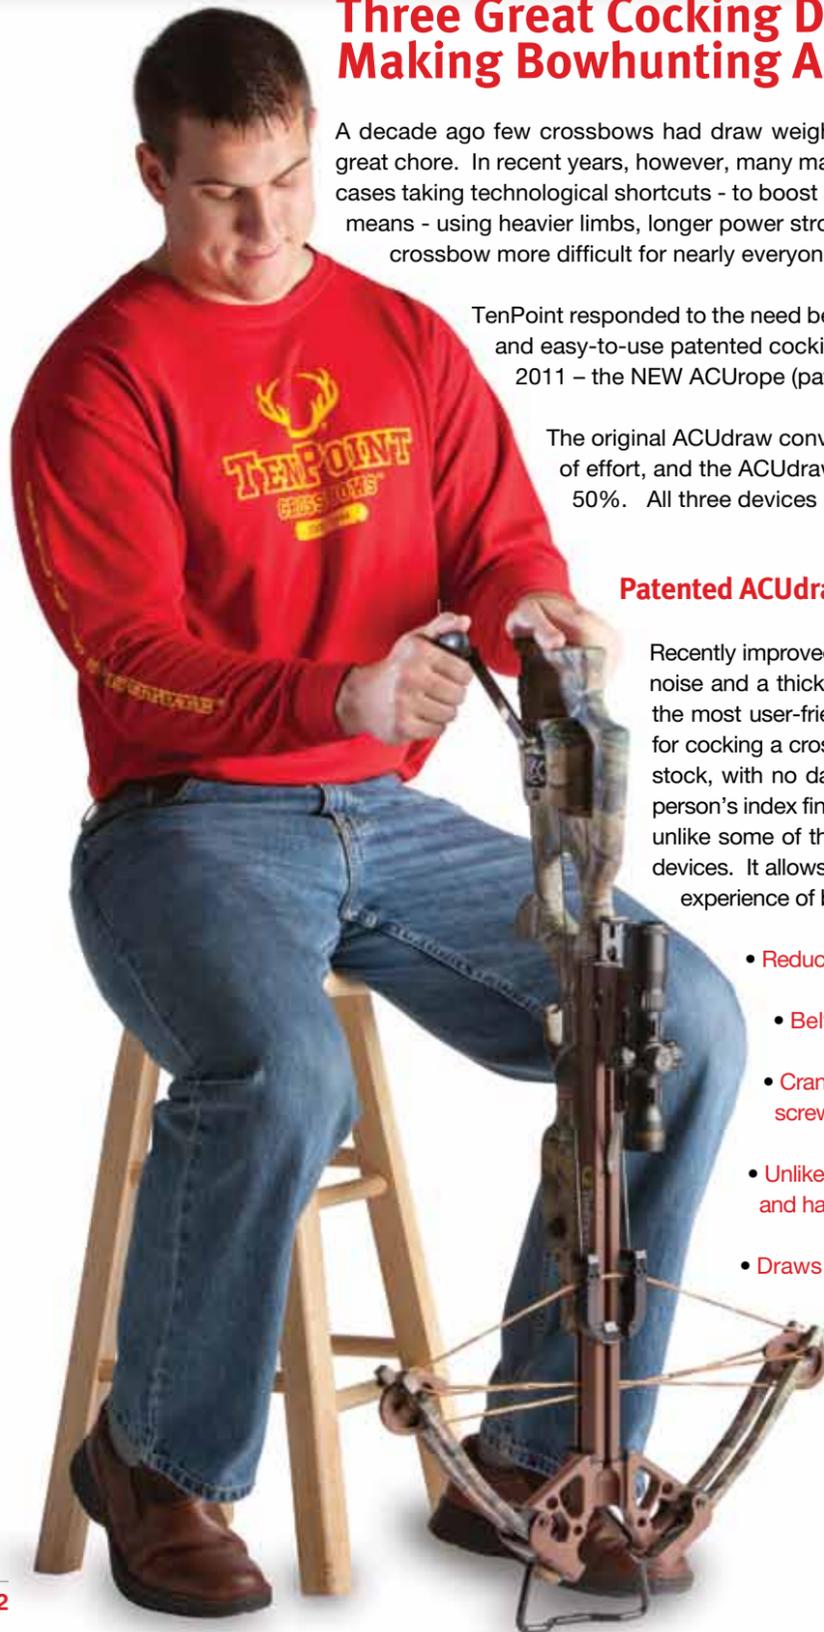

TenPoint responded to the need before all others by developing two integrated, convenient, and easy-to-use patented cocking devices, the ACUdraw and the ACUdraw 50 - and for 2011 - the NEW ACUrope (patent pending).

The original ACUdraw converts even the heaviest draw weight to about five pounds of effort, and the ACUdraw 50 and ACUrope reduce a crossbow's draw weight by 50%. All three devices load the bow string accurately every time.

Patented ACUdraw – The Premier Cocking Aid Available Today

Recently improved with three additional bearings to reduce both friction and noise and a thicker spring to improve retraction, the patented ACUdraw is the most user-friendly and practical solution available on the market today for cocking a crossbow effortlessly and accurately. Fully integrated into the stock, with no dangling parts, it requires only the strength of the average person's index finger to operate. And, it only weighs slightly over one pound, unlike some of the competition's heavy and cumbersome add-on cocking devices. It allows hunters of all ages and physical abilities to enjoy the great experience of bowhunting.

- Reduces draw weight to about 5-pounds when operated manually
- Belt holster for ACUdraw crank included
- Cranks manually or powers-up with almost any cordless screwdriver or drill (equipped with a clutch or low-torque setting)
- Unlike most other crossbow cocking mechanisms, it is lightweight and has no bulky clamp-on assemblies or hang-on accessories
- Draws the bow accurately every time
- Available as an accessory or pre-installed

Patented ACUdraw 50 – Takes the traditional rope-cocker to a new level

For years many crossbow shooters have used the conventional rope-cocker to load their crossbows, reducing the draw weight by half. While this old method does its job, it is cumbersome.

TenPoint has taken this leveraged rope-cocking concept to an easy-to-use level by integrating it into the butt stock and adding a heavy-duty retraction spring that silently and effortlessly draws the ropes securely back inside the unit's housing after each use. No storing the rope, untangling it, or putting it away after using it.

- Draws the bow accurately every time
- No more dangling ropes or handles
- No more need to hang a rope around your neck or to stash it in your fanny pack
- When not in use, powerful mini-magnets hold the handles securely and silently in place
- Available pre-installed or as an accessory
- Can be retrofitted to any TenPoint stock
- Lightweight and affordable

ACUrope (Patent Pending) – The industry's first compact and fully retractable rope-cocker

The ACUrope is our NEW revolutionary portable, retractable crossbow rope-cocker. The ACUrope reduces the effort required to cock your crossbow by 50% like traditional rope-cockers on the market, but that is where the comparison ends. When the shooter is finished cocking the bow, the ACUrope's draw cord completely retracts inside one of the two grips. Then, the grips dovetail neatly together to form a compact unit that the hunter can conveniently slip inside a belt-mounted holster or pouch.

The unit's slender draw cords, pound-for-pound 15-times stronger than steel, are made of heat and abrasion resistant SPECTRA® 1000 fiber. A pair of heavy-duty constant-force springs packed neatly inside the retracting grip power the spool, which is mounted on a durable steel axle and frame. The grips are made from DuPont™ Zytel® Super Tough Nylon.

- Clever, convenient, and user-friendly
- Draws the bow accurately every time
- Lightweight and affordable
- No more dangling ropes or handles
- Works on most crossbow brands on the market

Patented

Patent Pending

Accessories

4-Arrow Instant Detach HX Quivers™

Weighing only 6-ounces empty, TenPoint's HX Quivers feature a four-arrow ABS cup and a rubber arrow gripper connected by two ultra-light carbon fiber rods. This double-rod backbone is stabilized with a two-sided polycarbonate X-Connector™ that snaps and bolts together while positioning and adjusting the quiver for left or right-handed use.

The cup and rubber gripper are molded

with raised nubs that protect arrow fletching from getting crushed when placing the crossbow on a table, floor, or on the ground.

The backside of the X-Connector is fitted with a quick-lock mounting system which screws directly onto the bow, allowing the user to instantly attach or detach the quiver. Comes with TenPoint and 6 Point Series mounting brackets.

- HCA-01807-4 4-Arrow Instant Detach HX Quiver in REALTREE® APG HD™
- HCA-01807-3 4-Arrow Instant Detach HX Quiver in Mossy Oak® Break-UP®
- HCA-01807-7 4-Arrow Instant Detach HX Quiver in Mossy Oak® Treestand®
- HCA-01810-6 4-Arrow Instant Detach HX Quiver in Mossy Oak® Break-UP® Infinity®

Sling

The Claw Sling (by Quake Industries) is unparalleled in quality and construction. It features a longer non-slip design with heavy-duty adjustable nylon straps (swivels included).

- HCA-00307-5 The Claw (by Quake Industries) in the all purpose style camo

Crossbow Cases

TenPoint's airline approved Compact Travel & Storage Case provides protection, security, and ease of transport for your crossbow investment. Its three padded sections contain all the room necessary to secure your crossbow and all of its accessories. The exterior design features zipper closure and D-rings for included shoulder strap.

- HCA-20010 TenPoint Compact Travel & Storage Case (for compact, take-down transport or storage of your crossbow)

Designed by Neet Products, Inc. for TenPoint, the standard recurve size soft crossbow case features a wider body for recurve crossbows. A narrower width soft case provides the perfect fit for all Compact Limb System (CLS) and Xtreme Limb Technology (XLT) crossbows. Both soft cases have sturdy side panels for added depth to accommodate mounted optics and most additional crossbow accessories. Made with double-stitched, high-grade Cordura®, thick padding, and Trico-lining, these functionally improved designs also include a heavy-duty YKK zipper with double pulls and a removable shoulder strap.

- HCA-20110-6 TenPoint Soft Crossbow Case in Mossy Oak® Break-UP® Infinity® (fits all TenPointCrossbows including recurves)
- HCA-20108-6 **NEW 2011** TenPoint Soft Crossbow Case in Mossy Oak® Break-UP® Infinity® (for CLS and XLT model crossbows) (not shown)
- HCA-20108-5 TenPoint Soft Crossbow Case in Realtree® APG HD™ (for CLS and XLT model crossbows)

SteadyEddy - Improved 2011

The SteadyEddy telescoping two-section monopod insures motion-free shooting while seated in a treestand or ground blind, or while standing with the shooting stick supported against the mid-section of your body. Made of hard-tempered alloy aluminum, you can easily set its length with a quick turn of the extension pole. It attaches directly to your crossbow using a 360-degree maneuverable rapid-pivot tube equipped with a snap-on connection. It clamps conveniently under your stock when not in use. All SteadyEddys come standard with a cushioned hand grip, an all-terrain carbide tip that grips rock and ice, and a removable rubber support ball that grips solid surfaces and cushions the system when supported against your body. Rod retention clips for TenPoint and 6 Point Series crossbows included.

- HCA-030 **Improved 2011** SteadyEddy Crossbow Monopod System (for all TenPoint crossbows built after 1999)

(additional parts not shown)

For those looking to upgrade their current SteadyEddy mounting system, the SteadyEddy Rapid-Pivot Retrofit Kit provides a user-friendly snap-on option. The kit includes the SteadyEddy Mounting Bracket, mounting screws and rapid-pivot tube.

- HCA-031 **NEW 2011** SteadyEddy Rapid-Pivot Retrofit Kit

SteadyEddy System Accessories

- HCA-03306 Rod Retention Clip for 6 Point Series models
 - HCA-03310 Rod Retention Clip for TenPoint Series models
- (Both Rod Retention Clips are included with the SteadyEddy Monopod System)

ACURope (Patent Pending)

New for 2011, the ACURope is a revolutionary portable, retractable crossbow rope-cocker that reduces the effort required to cock a crossbow by 50%. The grips dovetail neatly together to form a compact unit that the hunter can conveniently slip inside a belt-mounted holster or pouch.

- HCA-000-B-R **NEW 2011** ACURope

CUB™ (Crossbow Unloading Bolt) (patent pending)

Made from PolyLactic Acid (PLA), this single-use Biodegradable Unloading Bolt provides a cost effective way to unload your crossbow in the field without having to chance ruining a perfectly good arrow. At about one-sixth the cost of a crossbow arrow, this biodegradable bolt minimizes environmental impact by naturally decomposing in the same way as fallen leaves. Available in a convenient 6-pack, this innovative snap-together, two-piece design occupies about the same space as two side-by-side ball-point pens.

- HEA-000.6 CUB (Crossbow Unloading Bolt) (6-pack)

Patented ACUdraw™ and ACUdraw 50™

(also shown on pages 22 & 23)
Your dealer – or you if you have the proper tools – can install either of these two incredible patented cocking devices. Units include a template for drilling the receiver holes in pre-2003 TenPoint models (drill, bits, and hole cutter not included). Receiver holes are pre-molded in current models. Installation instructions are included.

- HCA-000-B-II ACUdraw Cocking Mechanism
- HCA-000-B-A50 ACUdraw 50 Cocking Mechanism

ACUdraw Replacement Accessories (shown collectively)

- HCA-400 ACUdraw Draw Cords (two-piece for pre-1998 claw)
- HCA-401 ACUdraw Draw Cords (one-piece for new style claw)
- HCA-411 ACUdraw Retraction Spring (post 1998)
- HCA-41106 ACUdraw Retraction Spring (post 2006 without roll pin on hub – call TenPoint's Warranty Department at 330-628-9245 if clarification is needed)
- HCA-421 ACUdraw Claw with self-centering draw cord (for use with HCA-426 Holder)
- HCA-426 ACUdraw Claw Holder
- HCA-428 ACUdraw Claw III Kit (includes claw, holder, and draw cord)

- HCA-435 ACUdraw Hand Crank & Holster Combo
- HCA-450 ACUdraw 50 Replacement Draw Cords
- HCA-451 ACUdraw 50 Replacement Retraction Spring
- HCA-452 **Improved 2011** ACUdraw 50 T-Handle Stability Pads (for TenPoint Series models)
- HCA-453 **Improved 2011** ACUdraw 50 T-Handle Stability Pads (for 6 Point Series models)

Accessories

Maintenance

TenPoint's CareKit™ includes three important maintenance tools (Microlon® Precision Oiler, TenPoint String Wax and Conditioner, and Flight Rail and Trigger Lube) packaged in a versatile multi-cavity, translucent plastic mini-case with plenty of extra room for other bow maintenance items.

HCA-11207 CareKit

The high-tech lubricant contained in the Microlon® Precision Oiler includes antioxidants, corrosion inhibitors, and microscopic fractured resin particles all suspended in a high-quality lightweight oil base. It not only cleans metal surfaces and prevents corrosion and rust, but the resin impregnates the metal to create a dry film lubricant. Perfect for crossbow rails, triggers, and cams, this high-quality lubricant comes in a tube fitted with a precision applicator needle.

HCA-11106 Microlon® Precision Oiler

Made from all natural compounds, TenPoint String Wax and Conditioner comes in a convenient chap stick style tube. This string wax and conditioner both lubricates and rejuvenates bow strings and cables. Scent-free and water-resistant, it greatly reduces string friction and abrasion against cable slides, wheels, or cams. Extend the life of your strings and cables by keeping them adequately lubricated with wax.

HCA-11007 TenPoint String Wax and Conditioner

TenPoint's Flight Rail and Trigger Lube, unlike other manufacturers' gel-based lubricants, will not gum-up in cold weather or collect dirt and grit, which could make your trigger sluggish and impede its performance.

HCA-111 Flight Rail and Trigger Lube

GripGuard™

Made from impact-resistant Trirex® polycarbonate with an anti-reflective finish, the GripGuard is a shield that custom fits over post-1999 TenPoint Series synthetic stock model fore-grips with or without a GripSafety™. The wings at the top of the shield help prevent a shooter's fore-grip fingers or thumb from dangerously migrating above the flight deck while shooting the crossbow. Two double-sided adhesive strips hold it securely in place.

HCA-100 NEW 2011 GripGuard

Broadheads

Recommended by TenPoint, the New Archery Products® Spitfire® expandable broadheads are the most trusted mechanical broadheads in the industry. They fly straight with pinpoint accuracy and will stand up to the toughest hunting conditions.

HEA-297 New Archery Products' Spitfire 100-grain, 3-Blade Mechanical Broadhead 3-Pack

Foot Stirrup

HCA-009 Standard Rubber Coated Foot Stirrup

Silencers

Private labeled exclusively for TenPoint by Bowjax, Inc., the Noise Dampening Package™ is a combination of accessories that progressively reduces decibel level and shortens noise duration when used on a crossbow. It features a set of Bowjax limb vibration dampeners, retention spring dampener, and barrel dampeners. Three versions are available – one for our IsoTaper and HL split limbs, one for our TL and ST split limb crossbows, and a set for solid limb and recurve crossbows.

HCA-13710 Noise Dampening Package – for solid and recurve limbs (not shown)

HCA-13810 Noise Dampening Package – for IsoTaper and HL limbs

HCA-13910 Noise Dampening Package – for TL and ST limbs (not shown)

Help reduce sound with TenPoint's Wedgie™ retention spring silencer.

HCA-13810

HCA-09811

HCA-097-II

Both scopes are configured with five light intensity settings for two illuminated views.

Scopes

Featuring a variable speed and arrow drop-compensation setting for crossbows that shoot between 275 and 365 fps, the RangeMaster Pro Scope requires no adjustment for distance. The configuration consists of three duplex crosshairs and four dots calibrated for 20, 30, 40, and 50-yards. The fourth dot is free standing, situated just below the 40-yard crosshair. This 8.25-inch aluminum scope features a 30mm tube for heightened light-gathering and durability. It is equipped with an etched glass reticle and fully multi-coated 1.5 to 5x optics that reduce the loss of light transmission. Choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green).

HCA-09811 NEW 2011 RangeMaster Pro Scope with 7/8" mounting rings

Calibrated for crossbows that shoot in the 330 fps range, this 20, 30, 40, and now 50-yard combo illuminated dot and crosshair configuration is housed in a lightweight 8.5-inch aluminum tube equipped with fully-coated 3x optics. The new fourth dot is free-standing and situated directly below the 40-yard crosshair. Depending on your hunting conditions, you can choose from a non-illuminated black dot or one of two illuminated, colored dots (red or green). A five-position rheostat controls the light intensity and color. 7/8-inch scope mounting rings included.

T-Handle Stability Pads

Our NEW ACUdraw 50 T-Handle Stability Pads™ are die cut from 1/8" 60 durometer Neoprene and form fit to the butt stock to create a noise-free handle storage platform.

HCA-452 Improved 2011 ACUdraw 50 T-Handle Stability Pads (for TenPoint Series models)

HCA-453 Improved 2011 ACUdraw 50 T-Handle Stability Pads (for 6 Point Series models)

Cable Savers

Made from Polybutylene Terephthalate (PBT), this cable saver provides a near friction-free and dimensionally stable carriage for your cables, shot after shot. PBT is known for its strength, lubricity, rigidity, and durability, a perfect combination of characteristics required for an effective cable saver.

HCA-113 6 Point Series Cable Saver

Made from Gelcon™, a high lubricity, low friction Teflon and acetal polymer compound, this cable saver provides a friction-free and dimensionally stable carriage for your cables. Specifically formulated for wear and friction characteristics, this cable saver provides smooth sliding against both the aluminum and the camo-dipped barrels.

7/8-Inch Dovetail Scope Mounts and Accessories

Our machined aluminum Weaver style 7/8" Dovetail Scope Mounts come standard on all models.

- HCA-078 7/8" Fixed Dovetail Scope Mount / black
- HCA-072 7/8" Fixed Dovetail Scope Mount / bronze (not shown)
- HCA-077-H 7/8" Adjustable Dovetail Scope Mount / bronze (for crossbows equipped with the RangeMaster Cam or Fixed Position Accessory) (not shown)
- HCA-07107 Peep and Pin Conversion Kit (for models with Adjustable Dovetail Scope Mounts) (not shown)

Sights

For those hunters requiring peep and pin sights, our machined aluminum sight bracket features two pin slots and mounts on the riser. The bracket comes with one pin. Additional pins are available (HCA-050 Standard Sight Pin).

- HCA-041 Front Sight Bracket with Pin
- HCA-050 Standard Sight Pin
- HCA-062 Rear Peep Sight – bolts directly on top of fixed-style trigger box. (Rear peep will not fit on a 7/8" dovetail mount.)
- HCA-07110 Peep and Pin Conversion Kit (for models with non-Adjustable Dovetail Scope Mounts) (not shown)

TenPoint T-Shirts

Arrows

The Highest Quality Aluminum and Carbon Fiber Arrows Available Today, Equipped With SuperBrite™ Blunt, Moon, or Tracer™ Nocks

TWO CROSSBOW ARROWS AVAILABLE:

Carbon Fiber Shafts – 20-inch 22/64^{ths}

For those looking for the perfect carbon crossbow arrow, TenPoint offers the Pro Elite 20-inch 22/64^{ths} diameter carbon fiber arrow. Private labeled exclusively for TenPoint by world renowned arrow manufacturer, Easton®, the Pro Elite is a masterpiece of precision engineering, strength, and accuracy.

Advanced carbon fiber Pro Elite arrows are equipped with 68-grain brass inserts that provide 13% front-of-center weighting (F.O.C.), a concept introduced and perfected by TenPoint's engineering department to create better down-range accuracy. They are laser inspected for straightness to within .003; and hand-sorted for weight tolerance to within two-grains per dozen to ensure accurate arrow grouping. They come fitted with TenPoint's patented SuperBrite blunt nocks, CPC moon nocks, or Tracer™ nocks and are fletched with Norway DURAVANES™. Available in 3-packs,

6-packs, and bulk 72-packs (Tracer™ nocked arrows not available in 6- or 72-packs).

The Pro Elite Carbon Arrow is also available in a Premium Hunter version. Each Premium Hunter arrow is precision tested for trueness, and weight-matched for accuracy. Premium Hunters come in a 3-pack with 100-grain NAP® Spitfire® expandable broadheads installed and ready to shoot. The Premium Hunter is only available with SuperBrite blunt nocks or Tracer™ nocks.

Premium Hunter Tracer™ nocked arrows only available with NAP® Spitfire® broadheads.

Aluminum Shafts – 20-inch XX75 Hunting Quality 2219's

TenPoint Crossbow Technologies combines the art and tradition of fletching arrows with the unparalleled quality of Easton® shafts to produce the highest quality aluminum crossbow arrows available today.

This shaft is the proven industry standard for reliable results. Available in TenPoint's patented SuperBrite blunt nocks, black CPC moon nocks, or Tracer™ nocks, these shafts include CPC inserts and are fletched with a slight offset using Norway DURAVANES™.

TenPoint crossbow arrows are available in bulk 72-packs, 6-packs, or 3-packs (Tracer™ nocked arrows only sold in 3-packs).

All Bow, No Bull with TenPoint Crossbows

The arrow performance standards listed throughout this catalog (speed and kinetic energy) contain data from tests we conducted using off-the-shelf production models of our crossbows, checked only for draw-weight accuracy. All 420-grain speed tests were conducted with our Pro Elite Arrow, as described above, using a 100-grain practice point. The recurve models were also tested with a 350-grain arrow, consisting of a 17.5-inch aluminum shaft and 75-grain tip (not recommended for hunting). The chronograph was positioned 18-inches in front of the crossbow for all shots.

Note that our aluminum finished arrows are comparable in weight to our carbon finished arrows.

- A** – SuperBrite blunt nock for 2219 aluminum shafts
- B** – Barnett and Horton CPC moon nock for 2219 aluminum shafts
- C** – SuperBrite blunt nock for 22/64^{ths} TenPoint Pro Elite carbon shafts
- D** – Barnett and Horton CPC Moon nock for 22/64^{ths} TenPoint Pro Elite carbon shafts
- E** – Tracer™ Blunt nock for 22/64^{ths} TenPoint Pro Elite carbon shafts

*Blunt nock Tracer™ aluminum shaft not shown

HEA-251.12

Twelve-pack of Patented SuperBrite nock tools. Available for refletching 2219 aluminum shafts or 22/64^{ths} diameter Pro Elite shafts that use SuperBrite nocks.

The Right to Hunt

The right to hunt is the issue, not the choice-of-weapon.

There are few left who do not recognize the critical need to recruit new hunters and to retain the ones we have.

The facts supporting the inclusion of crossbows in archery season are plentiful, and the arguments in favor of defining crossbows as archery equipment far outweigh the thin arguments in opposition.

To date, no state has presented any data showing that crossbows have an adverse effect on the resource. On the contrary, available data supports the view that crossbows both help manage a rapidly expanding resource, and absolutely help retain hunters. In addition, evidence is beginning to accumulate that shows crossbows help recruit hunters.

Those who take elitist positions regarding choice-of-weapon are anti-hunting and are, therefore, no different than those who work to take away all of our hunting privileges.

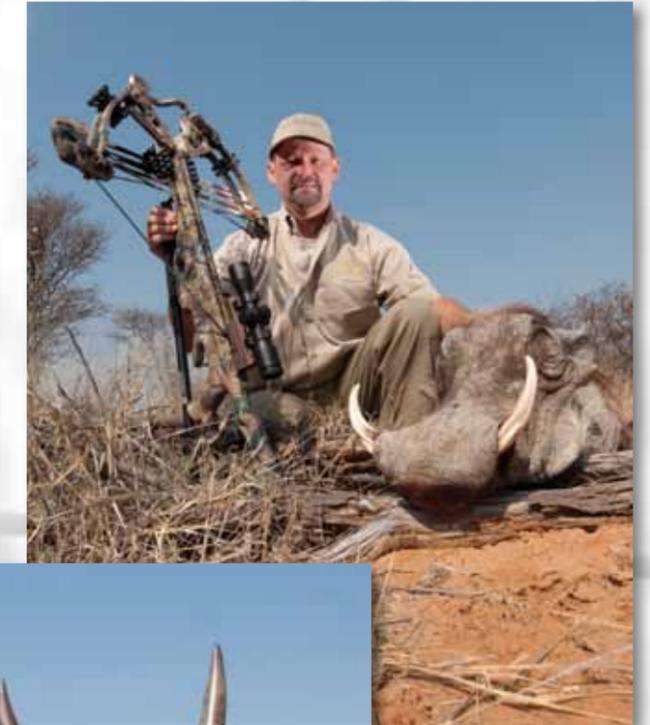

TenPoint supports the use of any and all legal hunting weapons and those who lawfully use them.

2009
Whitetail taken with compound bow
Pike County, IL, USA

2006
Whitetail taken with crossbow
Lancaster, Ohio, USA

2010
Warthog taken with crossbow
Africa

2010
Kudu taken with crossbow
Africa

2010
Eland taken with rifle
Africa

Stay Connected with TenPoint

Our company's corporate statement, printed below, includes a commitment to building long-term relationships with customers. One way we work to achieve this goal is by interacting with customers in a variety of ways.

In 2010, we began developing our social media platform through Facebook, Twitter, and Camospace. We are excited about the interaction taking place with our TenPoint enthusiasts through company and product updates, discussions, photos and videos.

We will continue to enhance these social media tools to allow you to stay connected with our company and we hope to become a part of your hunting family. The links for each application can be found on our webpage, www.tenpointcrossbows.com.

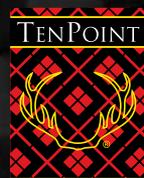

Corporate Statement

Our goal at TenPoint Crossbow Technologies® is to be a world class manufacturer of products that are recognized as an industry standard for safety, precision engineering, durability, performance and power.

Two principles guide the operation of our company. First, quality cannot be compromised. Second, successful enterprise comes from sound business relationships built on mutual trust, respect and ethical behavior.

Our marketing objective is to build solid long-term relationships with our business partners and customers. We intend to achieve that goal by keeping our promises, responding quickly, operating consistently and remaining loyal. We promise to stand by our products, correct our errors, listen to suggestions and continuously look for ways to improve our methods of operation.

Finally, we are committed to the care and conservation of our land, water and air; to the humane and responsible management of our wildlife and to the preservation and expansion of recreational shooting and hunting.

...the mark of perfection™
