PRODUCT GUIDE

2012

TO OUR CUSTOMERS

In 2010 we launched Wicked Ridge Crossbows with the idea of building a simple, reliable crossbow that was affordable for many outdoorsmen. After two successful years, we believe we have achieved the goals that we outlined in our original business plan.

For 2012 we are continuing to improve the Wicked Ridge line with our new Raider CLS model — an economical variation of TenPoint's high-performance Compact Limb System (CLS) bows. During the Raider's test phase we were blown away by its speed, accuracy, and overall performance. We feel certain you will be equally impressed once you have an opportunity to shoot it.

In addition, we have upgraded the original Invader and Warrior models at no additional cost to our customers. The new 2012 Invader HP and Warrior HL are equipped with TenPoint's field-proven HL limbs, delivering greater speed and improved durability. HP (high-performance) cams come standard on the Invader HP, improving performance and further distinguishing it from the Warrior HL. All 2012 Wicked Ridge limbs are made in the USA.

We believe Wicked Ridge manufactures the best entry-level crossbows in the market. We intend to continue to earn your trust by listening to your suggestions and by offering high-quality products backed by outstanding customer service.

I would like to thank our existing Wicked Ridge customers for their support. I also encourage our potential 2012 customers to check out our products. Shoot them and compare ours to the competition. I think you will choose to be part of the Wicked Ridge family.

Good Hunting,

RAIDER CLS™

This year's all-new flagship bow, the Raider CLS, marks a leap forward for the entire Wicked Ridge lineup. Built upon the same rock-solid platform that has made Wicked Ridge an instant classic among hunters and shooters, the Raider CLS boasts a new riser and limb assembly featuring a new version of TenPoint's exclusive Compact Limb System™ (CLS) Technology. The result: a smooth, deadly, highly maneuverable bow that registers a devastating 330 fps with 101.6 foot-pounds of kinetic energy.

Combined with a lightweight, cored semi-skeletal stock, the new Invader HP clocks in at 315 fps with 92.6 foot-pounds of kinetic energy.

WARRIOR HL™

Like the Invader HP, the new Warrior HL is now equipped with TenPoint's field-proven HL limbs. Featuring precision CNC-machined aluminum wheels, the 175-pound Warrior HL's new bow assembly delivers its payload at a punishing 300 fps with 84 foot-pounds of kinetic energy.
