WHAT'S NEW FOR 2013

TO OUR CUSTOMERS

2012 marked a record setting year for Wicked Ridge Crossbows. The original idea of building a simple, reliable crossbow that was affordable to many outdoorsmen is proving to be successful. We believe the success is, in part, due to the increase in awareness of the Wicked Ridge brand. It is a brand that we believe is known in the marketplace for offering the best crossbows for your money.

In 2012 we offered a complete makeover of the original Wicked Ridge line that launched in 2010. The popular Invader and Warrior models became the upgraded Invader HP and Warrior HL. In addition, we launched the flagship Raider CLS.

For 2013 we are excited to announce the new SDS™ (String Dampening System) for all new and existing Wicked Ridge Crossbows. We believe you will find the SDS to be an excellent add-on accessory to help take your Wicked Ridge crossbow to the next level. Also, we are offering the Raider CLS model without an ACU-52 cocking mechanism. This offering will make the Raider lighter and more affordable.
